The allowance for credit losses for our wholesale customers is developed using a credit monitoring process, like that used for retail customers. When a wholesale customer & # 8217; s risk characteristics are no longer aligned with the pooled population, we use specific identification to develop an allowance for credit losses. Adjustments to the allowance for credit losses are recorded in Operating and maintenance expense in the Consolidated Statements of Operations and Comprehensive Income. < / span > < / div > < div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" > < span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" > We have certain non- customer receivables in Current Assets and Other deferred debits and other assets which primarily are with governmental agencies. Purchased RECs are recorded at cost on the date they are purchased and internally generated RECs are recognized at a zero- cost basis when generated. The cost of RECs purchased on a stand- alone basis is based on the transaction price, while the cost of RECs acquired through PPAs represents the difference between the total contract price and the market price of energy at contract inception. Generally, revenue for RECs that are sold to a counterparty under a contract that specifically identifies a power plant are recognized at a point in time when the power is produced. This includes both bundled and unbundled REC sales. The excess of the purchase price over fair value of our proportionate share of the assets acquired and liabilities assumed was recorded to goodwill. The goodwill recognized is primarily driven by the opportunity for continued operations through 80 years and the value of STP & # 8217; s carbon- free energy that is not fully reflected by the markets. The goodwill amount has been assigned entirely to the ERCOT operating segment. See Note 13 & # 8212; Intangible Assets for additional information. A significant portion of PJM' s fossil generation fleet failed to perform as reserves were called. In accordance with PJM' s tariff, funds collected from non- performance charges are redistributed as bonuses to generating resources that overperformed during the event, including our nuclear fleet. Complaints were filed at FERC by underperforming generators alleging, among other things, that PJM & # 8217; s tariff is unjust and unreasonable, and that PJM violated its tariff or otherwise acted negligently in operating the system during that period, seeking to reduce or eliminate any penalty. In 2023, a proposed settlement was filed with FERC, and FERC subsequently approved the settlement as uncontested. We recognized $ 120 & # 160; million and $ 109 & # 160; million for bonuses (pre- tax), net of non- performance charges, in 2023 and 2022, respectively, associated with this event, primarily driven by the overperformance of our nuclear fleet. The first annual process resulted in a filing at FERC on September 15, 2021 and included our projection of capital expenditures to be recovered under the Mystic COS between June 1, 2022 and December 31, 2022. On April 28, 2022, FERC issued an order setting for settlement and / or hearing the issue of whether our projected 2022 capital expenditures can be recovered. A settlement was filed at FERC in March 2023 and was approved by FERC on August 1, 2023. The settlement reduces the recovery we receive for capital projects over the term of the Mystic COS. The settlement also eliminates the potential that we would need to return EMT capital expenditures that were recovered via COS if EMT continues operating after the Mystic COS terminates. The approval of this offer of settlement does not have a material financial statement impact. On September 15, 2022, we made our second annual filing at FERC. On December 5, 2023, FERC issued an order setting for settlement / hearing certain components of the second annual filing, including the issue of Mystic & # 8217; s recovery of historical rate base costs. The nuclear PTC recognizes the contributions of carbon- free nuclear power by providing a federal tax credit of up to $ 15 / MWh, subject to phase- out, beginning in 2024 and continuing through 2032. The nuclear PTC includes adjustments for inflation. With the nuclear PTC policy support, we expect that many of our nuclear assets will operate through the end of the nuclear PTC period. Further, the IRA includes a 15 % book- minimum tax on applicable corporations that we do not expect to have a material impact to our consolidated financial statements. The U. S. In connection with our efforts to obtain a water quality certification pursuant to Section 401 of the Clean Water Act (401 Certification) from MDE for Conowingo, we had been working with MDE and other stakeholders to resolve water quality licensing issues, including: (1) water quality, (2) fish habitat, and (3) sediment. < / span > < / div > < div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" > < span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" > In 2019, we and MDE filed with FERC a Joint Offer of Settlement (Offer of Settlement) that would resolve all outstanding issues relating to the 401 Certification. FERC subsequently issued a new 50- year license for Conowingo, effective March 1, 2021. Several environmental groups appealed FERC & # 8217; s ruling to the U. S. Court of Appeals for the D. C. Circuit. The court of appeals issued a decision vacating FERC & # 8217; s decision to grant Conowingo its license renewal and sending the matter back to FERC for further proceedings. Upon issuance of the mandate from the U. S. Court of Appeals for the D. C. Circuit, we began operating under an annual license, which renews automatically, containing the same terms as the license that was in effect prior to the 2021 FERC order. < / span > < / div > < div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" > < span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" > MDE informed us that as a result of the U. In response to the procedure outlined by the MDE, supplemental briefs on the 401 Certification were filed by the Lower Susquehanna Riverkeeper Association and Waterkeepers Chesapeake (jointly) and us. In addition, we filed a supplemental reply brief. We are unable to further predict the outcome of this proceeding at this time. In its February 2022 decision, the NRC reversed itself and concluded that the previous environmental review required by the National Environmental Policy Act (NEPA) for the Peach Bottom subsequently renewed licenses was incomplete because it did not adequately address environmental impacts resulting from renewing the units & # 8217; licenses for an additional 20 years. As a result, the NRC has undertaken a rulemaking to modify its regulations and guidance to specifically address environmental impacts during the period of subsequent license renewal. In addition, the NRC modified the expiration dates for the Peach Bottom licenses from 2053 and 2054 to 2033 and 2034, respectively, pending the completion of the updated NEPA analysis. We expect that the license expiration dates will be restored to 2053 and 2054, respectively, once the NRC' s reevaluation of environmental impacts resulting from subsequent license renewal is complete. In September 2023, the NRC announced that its schedule to complete the rulemaking has delayed by several months and now intends to be complete by August 2024. This delay does not alter our expectation that the license expiration dates for Peach Bottom will be restored. Depreciation provisions and ARO assumed retirement dates continue to assume Peach Bottom Units 2 and 3 will operate through 2053 and 2054, respectively, given our expectation that the previously approved expiration dates will be restored. < / span > < / div > < span > < / span > < / td > < / tr > < / table > < div style =" display: none;" > < table border =" 0" cellpadding =" 0" cellspacing =" 0" class =" authRefData" style =" display: none;" id =" defref_us- gaap_PublicUtilitiesDisclosureTextBlock" > < tr > < td class =" hide" > < a style =" color: white;" href =" javascript: void (0);" onclick =" Show. hideAR ();" > X < / a > < / td > < / tr > < tr > < td > < div class =" body" style =" padding: 2px;" > < a href =" javascript: void (0);" onclick =" Show. toggleNext (this);" > - Definition < / a > < div > < p > The entire disclosure for public utilities. < / p > < / div > < a href =" javascript: void (0);" onclick =" Show. toggleNext (this);" > References < / a > < div style =" display: none;" > < p > Reference 1: http: / / fasb. org / us- gaap / role / ref / legacyRef < br > - Topic 980 < br > - Name Accounting Standards Codification < br > - Publisher FASB < br > - URI https: / / asc. fasb. org / / 980 / tableOfContent < br > < / p > < / div > < a href =" javascript: void (0);" onclick =" Show. toggleNext (this);" > Details < / a > < div style =" display: none;" > < table border =" 0" cellpadding =" 0" cellspacing =" 0" > < tr > < td > < strong > Name: < / strong > < / td > < td style =" white- space: nowrap;" > us- gaap_PublicUtilitiesDisclosureTextBlock < / td > < / tr > < tr > < td style =" padding- right: 4px; We believe this is a useful measurement of operational performance, although it is not a presentation defined under GAAP and may not be comparable to other companies & # 8217; presentations or deemed more useful than the GAAP information provided elsewhere in this report. Our operating revenues include all sales to third parties and affiliate sales to Exelon' s utility subsidiaries, prior to the separation on February 1, 2022. Purchased power costs include all costs associated with the procurement and supply of electricity including capacity, energy, and ancillary services. Fuel expense includes the fuel costs for our owned generation and fuel costs associated with tolling agreements. The results of our other business activities are not regularly reviewed by the CODM and are therefore not classified as operating segments or included in the regional reportable segment amounts. These activities include wholesale and retail sales of natural gas, energy- related sales in the United Kingdom, as well as sales of other energy- related products and sustainable solutions that are not significant to our overall results of operations. Further, our unrealized mark- to- market gains and losses on economic hedging activities and our amortization of certain intangible assets and liabilities relating to commodity contracts recorded at fair value from mergers and acquisitions are also excluded from the regional reportable segment amounts. The CODM does not use a measure of total assets in making decisions regarding allocating resources to or assessing the performance of these reportable segments. < / span > < / div > < div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" > < span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" > The following tables disaggregate the revenue recognized from contracts with customers into categories that depict how the nature, amount, timing, and uncertainty of revenue and cash flows are affected by economic factors. On August 16, 2022, we entered into an amendment on the Facility, which increased the maximum funding limit of the Facility from $ 900 million to $ 1. 1 billion and extended the term of the Facility through August 15, 2025, unless renewed by the mutual consent of the parties in accordance with its terms. Under the Facility, NER may sell eligible short- term customer accounts receivable to the Purchasers in exchange for cash and subordinated interest. The transfers are reported as sales of receivables in the consolidated financial statements. The subordinated interest in collections upon the receivables sold to the Purchasers is referred to as the DPP, which is reflected in Other current assets in the Consolidated Balance Sheets. < / span > < / div > < div style =" margin- bottom: 0pt; margin- top: 0pt; text- align: justify" > < span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" > The Facility requires the balance of eligible receivables to be maintained at or above the balance of cash proceeds received from the Purchasers. To the extent the eligible receivables decrease below such balance, we are required to repay cash to the Purchasers. When eligible receivables exceed cash proceeds, we have the ability to increase the cash received up to the maximum funding limit. We remain committed to continued operations for our nuclear plants receiving state- supported payments under the Illinois CMC (Byron, Dresden, and Braidwood), Illinois ZES (Clinton and Quad Cities), New Jersey ZEC program (Salem), and the New York CES (FitzPatrick, Ginna, and Nine Mile Point), assuming the continued effectiveness of each program. With the passage of the IRA, we expect that many of our nuclear assets will operate at least through the end of the nuclear PTC period, concluding at the end of 2032. To enable long term operations, we plan to file applications to extend the licenses of our nuclear fleet to 80 years for the units that receive continued support under federal or state policies or a combination of both. Decommissioning- related impacts were not offset for the Byron units starting in the second quarter of 2021 due to the inability to recognize a regulatory asset at ComEd. With our September 15, 2021 reversal of the previous decision to retire Byron, we resumed contractual offset for Byron as of that date. Based on the regulatory agreement with the ICC, decommissioning- related activities are offset in the Consolidated Statements of Operations and Comprehensive Income as long as the net cumulative decommissioning- related activity result in a regulatory liability at ComEd. The offset resulted in an equal adjustment to the noncurrent payables to ComEd. See Note 10- Asset Retirement Obligations for additional information. </ span> </ div>   Other Generation </ span> </ div> In March 2018, we notified ISO- NE of our plans to early retire the Mystic Generating Station' s units 8 and 9 (" Mystic 8 and 9") absent regulatory reforms to properly value reliability and regional fuel security. Thereafter, ISO- NE identified Mystic 8 and 9 as being needed to ensure fuel security for the region and entered into a cost of service agreement with these two units for the period between June 1, 2022 to May 31, 2024. The agreement was approved by FERC in December 2018. In August 2020, we announced we will permanently cease generation operations at Mystic 8 and 9 at the expiration of the cost of service commitment in May 2024. See Note 3 & # 8212; Regulatory Matters for additional discussion of Mystic & # 8217; s cost of service agreement. The annual financial impacts stemming from shortening the expected economic useful life of Mystic 8 and 9 were not material to the periods presented. < span > </ span > </ td > </ tr > </ table > <table border =" 0" cellpadding =" 0" cellspacing =" 0" class =" authRefData" style =" display: none;" id =" defref_ceg_ImplicationsOfPotentialEarlyRetirementDisclosureTextBlock" > <tr > <td class =" hide" > <a style =" color: white;" href =" javascript: void (0);" onclick =" Show. hideAR ();" > X </ a > </ td > </ tr > <tr > <td > <a href =" javascript: void (0);" onclick =" Show. toggleNext (this);" > - Definition </ a > <p > implications of potential early retirement disclosure [Text Block] </ p > </ div > <a href =" javascript: void (0);" onclick =" Show. toggleNext (this);" > References </ a > <p > No definition available. </ p > </ div > <a href =" javascript: void (0);" onclick =" Show. toggleNext (this);" > Details </ a > <table border =" 0" cellpadding =" 0" cellspacing =" 0" > <tr > <td > Name: </ strong > </ td > <td style =" white- space: nowrap;" > ceg_ImplicationsOfPotentialEarlyRetirementDisclosureTextBlock </ td > </ tr > <tr > <td style =" padding- right: 4px; The amounts collected from PECO customers are remitted to us and deposited into the NDT funds for the unit for which funds are collected. Every five years, PECO files a rate adjustment with the PAPUC that reflects PECO & # 8217; s calculations of the estimated amount needed to decommission each of the former PECO units based on updated fund balances and estimated decommissioning costs. The rate adjustment is used to determine the amount collectible from PECO customers. With respect to our other nuclear units, we retain any funds remaining after decommissioning. However, in connection with CENG' s acquisition of the Nine Mile Point and Ginna plants and settlements with certain regulatory agencies, certain conditions pertaining to NDT funds apply that, if met, could possibly result in obligations to make payments to certain third parties (clawbacks). For Nine Mile Point and Ginna, the clawback provisions are triggered only in the event that the required decommissioning activities are discontinued or not started or completed in a timely manner. In the event that the clawback provisions are triggered for Nine Mile Point, then, depending upon the triggering event, an amount equal to 50 % of the total amount withdrawn from the funds for non- decommissioning activities as defined in the agreement or 50 % of any excess funds in the trust funds above the amounts required for decommissioning (including SNF management and site restoration) is to be paid to the Nine Mile Point sellers. In the event that the clawback provisions are triggered for Ginna, then an amount equal to any estimated cost savings realized by not completing any of the required decommissioning activities is to be paid to the Ginna sellers. The offset of decommissioning- related activities in the Consolidated Statements of Operations and Comprehensive Income results in an equal adjustment to noncurrent payables or noncurrent receivables. However, given the asymmetric settlement provision that does not allow for continued recovery from ComEd customers in the event of a shortfall, recognition of a receivable related to former ComEd Units is not permissible and accounting for decommissioning- related activities for that unit would not be offset, and the impact to the Consolidated Statements of Operations and Comprehensive Income could be material during such periods. We determine if long- lived assets or asset groups are potentially impaired by comparing the undiscounted expected future cash flows to the carrying value when indicators of impairment exist. When the undiscounted cash flow analysis indicates a long- lived asset or asset group may not be recoverable, the amount of the impairment loss is determined by measuring the excess of the carrying amount of the long- lived asset or asset group over its fair value. The fair value analysis is primarily based on the income approach using significant unobservable inputs (Level 3) including revenue and generation forecasts, projected capital and maintenance expenditures and discount rates. A variation in the assumptions used could lead to a different conclusion regarding the recoverability of an asset or asset group and, thus, could potentially result in material future impairments of our long- lived assets. Generally, pre- tax impairment losses on long- lived assets or asset groups are recorded in Operating and maintenance expense in the Consolidated Statements of Operations and Comprehensive Income. < / span > < / div > < div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" > < span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 700; line- height: 120 %" > New England Asset Group < / span > < / div > < div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" > < span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" > In the second quarter of 2021, an overall decline in the asset group' s portfolio value suggested that the carrying value of the New England asset group may be impaired. We completed a comprehensive review of the estimated undiscounted future cash flows of the New England asset group and concluded that the carrying value was not recoverable and that its fair value was less than its carrying value. As a former subsidiary of Exelon, we have joint and several liability with Exelon to the IRS and certain state jurisdictions relating to the taxable periods that we were included in federal and state filings. However, the TMA specifies the portion of this tax liability for which we will bear contractual responsibility, and we and Exelon agreed to indemnify each other against any amounts for which such indemnified party is not responsible. Specifically, we will be liable for taxes due and payable in connection with tax returns that we are required to file. We will also be liable for our share of certain taxes required to be paid by Exelon with respect to taxable years or periods (or portions thereof) ending on or prior to the separation to the extent that we would have been responsible for such taxes under the Exelon tax sharing agreement then existing. As such, our Consolidated Balance Sheets at separation reflected a payable of $ 103 million for tax liabilities where we maintain contractual responsibility to Exelon, with $ 53 million recognized in Accounts payable and accrued expenses and $ 50 million in Noncurrent other liabilities. As of December & # 160; 31, 2023 and 2022, respectively, we had $ 11 million and $ 18 million in Other accounts receivable, no payables in Accounts payable and accrued expenses and $ 37 million and $ 50 million in Noncurrent other liabilities. < / span > < / div > < div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" > < span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- style: italic; font- weight: 400; line- height: 120 %" > Tax Refunds and Attributes < / span > < span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" >. The TMA provides for the allocation of certain pre- closing tax attributes between us and Exelon. Tax attributes will be allocated in accordance with the principles set forth in the existing Exelon tax sharing agreement, unless otherwise required by law. Under the TMA, we will be entitled to refunds for taxes for which we are responsible. In addition, it is expected that Exelon will have tax attributes that may be used to offset Exelon & # 8217; s future tax liabilities. A significant portion of such attributes were generated by our business. Upon separation, we reclassified $ 508 million from Deferred income taxes to reflect receivables of $ 11 million and $ 497 million in Other accounts receivable and Other deferred debits and other assets, respectively, in the Consolidated Balance Sheets for the tax attributes expected to be utilized by Exelon after separation in accordance with the terms of the TMA. As of December & # 160; 31, 2023 and 2022, respectively, we had $ 336 million and $ 168 million in Other accounts receivable and $ 178 million and $ 362 million in Other deferred debits and other assets for the reclassified tax attributes. < / span > < / div > Subsequent to the balance sheet date but prior to issuance we executed an amendment to the TMA that modified the timing of Exelon' s payment of amounts due to us. The Pension Protection Act requires the attainment of certain funding levels to avoid benefit restrictions (such as an inability to pay lump sums or to accrue benefits prospectively), and at- risk status (which triggers higher minimum contribution requirements and participant notification). The projected contributions below reflect a funding strategy to make levelized annual contributions with the objective of achieving 100 % funded status over time. This level funding strategy helps minimize the volatility of future period required pension contributions. Based on this funding strategy and current market conditions, which are both subject to change, we made our annual qualified pension contribution in July 2023. < / span > < / div > < div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" > < span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" > Our non- qualified pension plans are not funded given that they are not subject to statutory minimum contribution requirements. Other accounting treatments are available through special election and designation, provided they meet specific, restrictive criteria both at the time of designation and on an ongoing basis. These alternative permissible accounting treatments include NPNS, cash flow hedges, and fair value hedges. All derivative instruments, excluding NPNS and cash flow hedges, are recorded at fair value through earnings. For all NPNS derivative instruments, accounts receivable or accounts payable are recorded when derivatives settle, and revenue or expense is recognized in earnings as the underlying physical commodity is sold or delivered. < / span > < / div > < div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" > < span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" > Authoritative guidance about offsetting assets and liabilities requires the fair value of derivative instruments to be shown in the Combined Notes to Consolidated Financial Statements on a gross basis, even when the derivative instruments are subject to legally enforceable master netting agreements and qualify for net presentation in the Consolidated Balance Sheets. A master netting agreement is an agreement between two counterparties that may have derivative and non- derivative contracts with each other providing for the net settlement of all referenced contracts via one payment stream, which takes place as the contracts deliver, when collateral is requested or in the event of default. In the tables below, which present fair value balances, our energy- related economic hedges and proprietary trading derivatives are shown gross. The impact of the netting of fair value balances with the same counterparty that are subject to legally enforceable master netting agreements, as well as netting of cash collateral, including margin on exchange positions, is aggregated in the collateral and netting columns. < / span > < / div > < div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" > < span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" > Our use of cash collateral is generally unrestricted unless we were downgraded below investment grade. electricity, natural gas, and other commodities. We use a variety of derivative and non- derivative instruments to manage the commodity price risk of our electric generation facilities, including power and gas sales, fuel and power purchases, natural gas transportation and pipeline capacity agreements, and other energy- related products marketed and purchased. To manage these risks, we may enter fixed- price derivative or non- derivative contracts to hedge the variability in future cash flows from expected sales of power and gas and purchases of power and fuel. The objectives for executing such hedges include fixing the price for a portion of anticipated future electricity sales at a level that provides an acceptable return. We are also exposed to differences between the locational settlement prices of certain economic hedges and the hedged generating units. This price difference is actively managed through other instruments which include derivative congestion products, whose changes in fair value are recognized in earnings each period, and auction revenue rights, which are accounted for on an accrual basis. < / span > < / div > < div style =" margin- bottom: 0pt; margin- top: 9pt; text- align: justify" > < span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" > Additionally, we are exposed to certain market risks through our proprietary trading activities. The proprietary trading activities are a complement to our energy marketing portfolio but represent a small portion of our overall energy marketing activities and are subject to limits established by the Executive Committee. Proprietary trading includes all contracts executed with the intent of benefiting from shifts or changes in market prices as opposed to those executed with the intent of hedging or managing risk. In addition to payment netting language in the enabling agreement, our credit department establishes credit limits, margining thresholds and collateral requirements for each counterparty, which are defined in the derivative contracts. Counterparty credit limits are based on an internal credit review process that considers a variety of factors, including the results of a scoring model, leverage, liquidity, profitability, credit ratings by credit rating agencies, and other risk management criteria. To the extent that a counterparty & # 8217; s margining thresholds are exceeded, the counterparty is required to post collateral with us, as specified in each enabling agreement. Our credit department monitors current and forward credit exposure to counterparties and their affiliates, both on an individual and an aggregate basis. < / span > < / div > < div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" > < span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" > The following tables provide information on the credit exposure for all derivative instruments, NPNS and payables and receivables, net of collateral and instruments that are subject to master netting agreements, as of December & # 160; 31, 2023. Borrowings under these agreements are secured by the assets and equity of each respective project. The lenders do not have recourse against us in the event of a default. If a specific project financing entity does not maintain compliance with its specific nonrecourse debt covenants, there could be a requirement to accelerate repayment of the associated debt or other borrowings earlier than the stated maturity dates. In these instances, if such repayment was not satisfied, the lenders or security holders would generally have rights to foreclose against the project- specific assets and related collateral. The potential requirement to satisfy the associated debt or other borrowings earlier than otherwise anticipated could lead to impairments due to a higher likelihood of disposing of the respective project- specific assets significantly before the end of their useful lives. < / span >< / div >< div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" >< span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- style: italic; font- weight: 700; line- height: 120 %" > Antelope Valley Solar Ranch One. < / span >< span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" > In December 2011, the DOE Loan Programs Office issued a guarantee for up to $ 646 million for a nonrecourse loan from the Federal Financing Bank to support the financing of the construction of the Antelope Valley facility.
