The NDT funds hold debt and equity securities directly and indirectly through commingled funds and mutual funds, which are included in equities and fixed income. Our NDT fund investments policies outline investment guidelines for the trusts and limit the trust funds & # x2019; exposures to investments in highly illiquid markets and other alternative investments, including private credit, private equity, and real estate. Investments with maturities of three months or less when purchased, including certain short- term fixed income securities are considered cash equivalents and included in the recurring fair value measurements hierarchy as Level 1 or Level 2. & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- style: italic; font- weight: 400; line- height: 120 %" & gt; Equities. & lt; / span & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; These investments consist of individually held equity securities, equity mutual funds, and equity commingled funds in domestic and foreign markets. With respect to individually held equity securities, the trustees obtain prices from pricing services, whose prices are generally obtained from direct feeds from market exchanges, which we are able to independently corroborate. Equity securities held individually, including real estate investment trusts, rights, and warrants, are primarily traded on exchanges that contain only actively traded securities due to the volume trading requirements imposed by these exchanges. The equity securities that are held directly by the trust funds are valued based on quoted prices in active markets and categorized as Level 1. Certain equity securities have been categorized as Level 2 because they are based on evaluated prices that reflect observable market information, such as actual trade information or similar securities. Certain private placement equity securities are categorized as Level 3 because they are not publicly traded and are priced using significant unobservable inputs. & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; Equity commingled funds and mutual funds are maintained by investment companies, and fund investments are held in accordance with a stated set of fund objectives. The values of some of these funds are publicly quoted. For mutual funds which are publicly quoted, the funds are valued based on quoted prices in active markets and have been categorized as Level 1. For equity commingled funds and mutual funds which are not publicly quoted, the fund administrators value the funds using the NAV per fund share, derived from the quoted prices in active markets on the underlying securities and are not classified within the fair value hierarchy. These investments can typically be redeemed monthly or more frequently, with 30 or less days of notice and without further restrictions. & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- style: italic; font- weight: 400; line- height: 120 %" & gt; Fixed income. & lt; / span & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; For fixed income securities, which consist primarily of corporate debt securities, U. S. government securities, foreign government securities, municipal bonds, asset and mortgage- backed securities, commingled funds, mutual funds, and derivative instruments, the trustees obtain multiple prices from pricing vendors whenever possible, which enables cross- provider validations in addition to checks for unusual daily movements. A primary price source is identified based on asset type, class, or issue for each security. With respect to individually held fixed income securities, the trustees monitor prices supplied by pricing services and may use a supplemental price source or change the primary price source of a given security if the portfolio managers challenge an assigned price and the trustees determine that another price source is preferable. We have obtained an understanding of how these prices are derived, including the nature and observability of the inputs used in deriving such prices. Additionally, we selectively corroborate the fair values of securities by comparison to other market- based price sources. Investments in U. S. Treasury securities have been categorized as Level 1 because they trade in highly- liquid and transparent markets. Certain private placement fixed income securities have been categorized as Level 3 because they are priced using certain significant unobservable inputs and are typically illiquid. The remaining fixed income securities, including certain other fixed income investments, are based on evaluated prices that reflect observable market information, such as actual trade information of similar securities, adjusted for observable differences and are categorized as Level 2. This includes equity investments sold short during the period, which represent liabilities. & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; Other fixed income investments primarily consist of fixed income commingled funds and mutual funds, which are maintained by investment companies and hold fund investments in accordance with a stated set of fund objectives. The values of some of these funds are publicly quoted. For mutual funds which are publicly quoted, the funds are valued based on quoted prices in active markets and have been categorized as Level 1. For fixed income commingled funds and mutual funds which are not publicly quoted, the fund administrators value the funds using the NAV per fund share, derived from the quoted prices in active markets of the underlying securities and are not classified within the fair value hierarchy. Over- the- counter derivatives are valued daily, based on quoted prices in active markets and trade in open markets, and have been categorized as Level 1. Derivative instruments other than over- the- counter derivatives are valued based on external price data of comparable securities and have been categorized as Level 2. & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- style: italic; font- weight: 400; line- height: 120 %" & gt; Private credit. & lt; / span & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; Private credit investments primarily consist of investments in private debt strategies. These investments are generally less liquid assets with an underlying term of 3 to 5 years and are intended to be held to maturity. & # 160; The fair value of these investments is determined by the fund manager or administrator using a combination of valuation models including cost models, market models, and income models and typically cannot be redeemed until maturity of the term loan. & # 160; Private credit investments held directly by us are categorized as Level 3 because they are based largely on inputs that are unobservable and utilize complex valuation models. & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; For certain private credit funds, the fair value is determined using a combination of valuation models including cost models, market models, and income models and typically cannot be redeemed until maturity of the term loan. These investments typically cannot be redeemed and are generally liquidated over a period of 8 to 10 years from the initial investment date, which is based on our understanding of the investment funds. Private equity valuations are reported by the fund manager and are based on the valuation of the underlying investments, which include unobservable inputs such as cost, operating results, discounted future cash flows, and market- based comparable data. These valuation inputs are unobservable. The fair value of private equity investments is determined using NAV or its equivalent as a practical expedient, and therefore, these investments are not classified within the fair value hierarchy. & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- style: italic; font- weight: 400; line- height: 120 %" & gt; Real estate. & lt; / span & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; These investments are funds with a direct investment in pools of real estate properties. These funds are reported by the fund manager and are generally based on independent appraisals of the underlying investments from sources with professional qualifications, typically using a combination of market- based comparable data and discounted cash flows. These valuation inputs are unobservable. Certain real estate investments cannot be redeemed and are generally liquidated over a period of 8 to 10 years from the initial investment date, which is based on our understanding of the investments funds. The remaining liquid real estate investments are generally redeemable from the investment vehicle quarterly, with 30 to 90 days of notice. The fair value of real estate investments is determined using NAV or its equivalent as a practical expedient, and therefore, these investments are not classified within the fair value hierarchy. & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; We evaluated our NDT portfolios for the existence of significant concentrations of credit risk as of December & # 160; 31, 2023. Types of concentrations that were evaluated include, but are not limited to, investment concentrations in a single entity, type of industry, foreign country, and individual fund. As of December & # 160; 31, 2023, there were no significant concentrations (generally defined as greater than 10 percent) of risk in the NDT assets. & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; See Note 10 & # x2014; Asset Retirement Obligations for additional information on the NDT fund investments. & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- style: italic; font- weight: 700; line- height: 120 %" & gt; Rabbi Trust Investments. & lt; / span & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; The Rabbi trusts were established to hold assets related to deferred compensation plans existing for certain active and retired members of executive management and directors. The Rabbi trusts' assets are included in investments in the Consolidated Balance Sheets and consist primarily of money market funds, mutual funds, and life insurance policies. Money market funds and mutual funds are publicly quoted and have been categorized as Level 1 given the clear observability of the prices. The life insurance policies are valued using the cash surrender value of the policies, net of loans against those policies, which is provided by a third- party. Certain life insurance policies, which consist primarily of mutual funds that are priced based on observable market data, have been categorized as Level 2 because the life insurance policies can be liquidated at the reporting date for the value of the underlying assets. & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- style: italic; font- weight: 700; line- height: 120 %" & gt; Deferred Compensation Obligations. & lt; / span & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; & # 160; Our deferred compensation plans allow participants to defer certain cash compensation into a notional investment account. We include such plans in other current and noncurrent liabilities in the Consolidated Balance Sheets. The value of our deferred compensation obligations is based on the market value of the participants & # x2019; notional investment accounts. The underlying notional investments are comprised primarily of equities, mutual funds, commingled funds, and fixed income securities which are based on directly and indirectly observable market prices. Since the deferred compensation obligations themselves are not exchanged in an active market, they are categorized as Level 2 in the fair value hierarchy. & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; The value of certain employment agreement obligations (which are included with the Deferred compensation obligation in the table above) are based on a known and certain stream of payments to be made over time and are categorized as Level 2 within the fair value hierarchy. & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- style: italic; font- weight: 700; line- height: 120 %" & gt; Investments in Equities. & lt; / span & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 12pt; font- style: italic; font- weight: 700; line- height: 120 %" & gt; & lt; / span & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; We hold certain investments in equity securities with readily determinable fair values in addition to those held within the NDT funds. This amount is valued based on the sales price of the receivables net of allowance for credit losses based on accounts receivable aging historical experience coupled with specific identification through a credit monitoring process, which considers current conditions and forward- looking information such as industry trends, macroeconomic factors, changes in the regulatory

environment, external credit ratings, publicly available news, payment status, payment history, and the exercise of collateral calls. Exchange- based derivatives that are valued using unadjusted quoted prices in active markets are categorized in Level 1 in the fair value hierarchy. Certain derivatives & # x2019; pricing is verified using indicative price quotations available through brokers or over- the- counter, on- line exchanges and are categorized in Level 2. These price quotations reflect the average of the bid- ask, mid- point prices and are obtained from sources that we believe provide the most liquid market for the commodity. The price quotations are reviewed and corroborated to ensure the prices are observable and representative of an orderly transaction between market participants. This includes consideration of actual transaction volumes, market delivery points, bid- ask spreads, and contract duration. The remainder of derivative contracts are valued using the Black model, an industry standard option valuation model. The Black model considers inputs such as contract terms, including maturity, and market parameters, including assumptions of the future prices of energy, interest rates, volatility, credit worthiness, and credit spread. For derivatives that trade in liquid markets, such as generic forwards, swaps, and options, model inputs are generally observable. Such instruments are categorized in Level 2. Our derivatives are predominantly at liquid trading points. For derivatives that trade in less liquid markets with limited pricing information, model inputs generally would include both observable and unobservable inputs. These valuations may include an estimated basis adjustment from an illiquid trading point to a liquid trading point for which active price quotations are available. Such instruments are categorized in Level 3. & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; For valuations that include both observable and unobservable inputs, if the unobservable input is determined to be significant to the overall inputs, the entire valuation is categorized in Level 3. This includes derivatives valued using indicative price quotations whose contract tenure extends into unobservable periods. In instances where observable data is unavailable, consideration is given to the assumptions that market participants would use in valuing the asset or liability. This includes assumptions about market risks such as liquidity, volatility, and contract duration. Such instruments are categorized in Level 3 as the model inputs generally are not observable. Forward price curves for the power market utilized by the front office to manage the portfolio, are reviewed and verified by the middle office, and used for financial reporting by the back office. We consider credit and non- performance risk in the valuation of derivative contracts categorized in Level 2 and 3, including both historical and current market data, in our assessment of credit and non- performance risk by counterparty. Due to master netting agreements and collateral posting requirements, the impacts of credit and non- performance risk were not material to the consolidated financial statements. & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; Disclosed below is detail surrounding our significant Level 3 valuations. The calculated fair value includes marketability discounts for margining provisions and other attributes. The Level 3 balance generally consists of forward sales and purchases of power and natural gas and certain transmission congestion contracts. We utilize various inputs and factors including market data and assumptions that market participants would use in pricing assets or liabilities as well as assumptions about the risks inherent in the inputs to the valuation technique. The inputs and factors include forward commodity prices, commodity price volatility, contractual volumes, delivery location, interest rates, credit quality of counterparties, and credit enhancements. & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; For commodity derivatives, the primary input to the valuation models is the forward commodity price curve for each instrument. Forward commodity price curves are derived by risk management for liquid locations and by the traders and portfolio managers for illiquid locations. All locations are reviewed and verified by risk management considering published exchange transaction prices, executed bilateral transactions, broker quotes, and other observable or public data sources. The relevant forward commodity curve used to value each of the derivatives depends on a number of factors, including commodity type, delivery location, and delivery period. Price volatility varies by commodity and location. When appropriate, we discount future cash flows using risk- free interest rates with adjustments to reflect the credit quality of each counterparty for assets and our own credit quality for liabilities. The level of observability of a forward commodity price varies generally due to the delivery location and delivery period. Certain delivery locations including PJM West Hub (for power) and Henry Hub (for natural gas) are more liquid and prices are observable for up to three years in the future. The observability period of volatility & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; is generally shorter than the underlying power curve used in option valuations. The forward curve for a less liquid location is estimated by using the forward curve from the liquid location and applying a spread to represent the cost to transport the commodity to the delivery location. This spread does not typically represent a majority of the instrument & # x2019; s market price. As a result, the change in fair value is closely tied to liquid market movements and not a change in the applied spread. The change in fair value associated with a change in the spread is generally immaterial. An average spread calculated across all Level 3 power and gas delivery locations is approximately $ 47. 76 and $ 3. 09 for power and natural gas, respectively as of & lt; / span & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 8pt; font- weight: 400; line- height: 120 %" & gt; December & # 160; 31, 2023 & lt; / span & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt;. Many of the commodity derivatives are short term in nature and thus a majority of the fair value may be based on observable inputs even though the contract as a whole must be classified as Level 3. & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; The significant unobservable inputs used in the fair value measurement of our commodity derivatives are forward commodity prices and for options is price volatility. Increases (decreases) in the forward commodity price in isolation would result in significantly higher (lower) fair values for long positions (contracts that give us the obligation or option to purchase a commodity), with offsetting impacts to short positions (contracts that give us the obligation or right to sell a commodity). Increases (decreases) in volatility would increase (decrease) the value for the holder of the option (writer of the option). Generally, a change in the estimate of forward commodity prices is unrelated to a change in the estimate of volatility of prices. An increase to the heat rate or renewable factors would increase the fair value accordingly. Generally, interrelationships exist between market prices of natural gas and power. As such, an increase in natural gas pricing would potentially have a similar impact on forward power markets. & lt; / span & gt; & lt; / div & gt; < / us- gaap: FairValueDisclosuresTextBlock >< us- gaap: FairValueByBalanceSheetGroupingTextBlock contextRef =" c- 1" id =" f- 2468" > & lt; div & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; The following tables present the carrying amounts and fair values of our long- term debt and the SNF obligation as of December & # 160; 31, 2023 and 2022. style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; The Price- Anderson Act was enacted to ensure the availability of funds for public liability claims arising from an incident at any of the U. S. licensed nuclear facilities and to limit the liability of nuclear reactor owners for such claims from any single incident. As of December & # 160; 31, 2023, the current liability limit per incident is $ 16. 2 billion and is subject to change to account for the effects of inflation and changes in the number of licensed reactors at least once every five years with the last adjustment effective November 1, 2018. In accordance with the Price- Anderson Act, we maintain financial protection at levels equal to the amount of liability insurance available from private sources through the purchase of private nuclear energy liability insurance for public liability claims that could arise in the event of an incident. Effective January 1, 2024, the required amount of nuclear energy liability insurance purchased is $ 500 million for each operating site. Claims exceeding that amount are covered through mandatory participation in a financial protection pool, as required by the Price Anderson- Act, which could provide up to approximately an additional $ 15. 8 billion per incident at any U. S. nuclear power reactor in funds available for public liability claims. Participation in this secondary financial protection pool requires the operator of each reactor to fund its proportionate share of costs for any single incident at any U. S. nuclear power reactor that exceeds the primary layer of financial protection. Our share of this secondary layer would be approximately $ 3. 5 billion, based on our ownership interest in the insured nuclear reactors, however, any amounts payable under this secondary layer would be capped at $ 520 & # 160; million per incident within one calendar year. & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; In addition, the U. S. Congress could impose revenue- raising measures on the nuclear industry to pay public liability claims exceeding the $ 16. 2 billion limit for a single incident. & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; We are required by the NRC to maintain minimal levels of property insurance that demonstrates to the satisfaction of the NRC that we possess an equivalent amount of protection covering the licensee' s obligation, in the event of an accident at the licensee' s reactor, to stabilize and decontaminate the reactor and the reactor station site at which the reactor experiencing the accident is located. The insurance maintained for each facility is currently provided through insurance policies purchased from NEIL, an industry mutual insurance company of which we are a member. Currently, NRC requires that we maintain a minimum coverage limit for each reactor site of $ 1. 06 & # 160; billion, which is what our NEIL policies provide. & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; NEIL may declare distributions to its members as a result of favorable operating experience. In recent years, NEIL has made distributions to its members. Our portion of the annual distribution declared by NEIL is estimated to be $ 59 & # 160; million for 2023, and was $ 30 & # 160; million and $ 114 & # 160; million for 2022 and 2021, respectively. The distributions were recorded as a reduction to Operating and maintenance expense in the Consolidated Statements of Operations and Comprehensive Income. & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; Premiums paid to NEIL by its members are also subject to a potential assessment for adverse loss experience in the form of a retrospective premium obligation. NEIL has never assessed this retrospective premium since its formation in 1973, and we cannot predict the level of future assessments, if any. The current maximum aggregate annual retrospective premium obligation for us is approximately $ 254 million. NEIL requires its members to maintain an investment grade credit rating or to ensure collectability of their annual retrospective premium obligation by providing a financial guarantee, letter of credit, deposit premium, or some other means of assurance. & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; NEIL provides & # x201c; all risk & # x201d; property damage, decontamination and premature decommissioning insurance for each station for losses resulting from damage to its nuclear plants, either due to accidents or acts of terrorism. If the decision is made to decommission the facility, a portion of the insurance proceeds will be allocated to a fund, which we are required by the NRC to maintain, to provide for decommissioning the facility. In the event of an insured loss, we are unable to predict the timing of the availability of insurance proceeds to us and the amount of such proceeds that would be available. In the event that one or more acts of terrorism cause accidental property damage within a twelve- month period from the first accidental property damage under one or more policies for all insured plants, the maximum recovery by us will be an aggregate of $ 3. 2 billion plus such additional amounts as the insurer may recover for all such losses from reinsurance, indemnity and any other source, applicable to such losses. & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; For our insured losses, we are self- insured to the extent that losses are within the policy deductible or exceed the amount of insurance maintained. Uninsured losses and other expenses, to the extent not recoverable from insurers or the nuclear industry, could also be borne by us. Any such losses could have a material adverse effect on our consolidated financial statements. & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- style: italic; font- weight: 700; line- height: 120 %" & gt; Spent Nuclear Fuel Obligation & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; Under the NWPA, the DOE is responsible for the development of a geologic repository for and the disposal of SNF and high- level radioactive waste. As required by the NWPA, we are a party to contracts with the DOE (Standard Contracts) to provide for disposal of SNF from our nuclear generating stations. In accordance with the NWPA and the Standard Contracts, we had previously paid the DOE one mill ($ 0. 001) per kWh of net nuclear generation for the cost of SNF disposal. The DOE reduced the SNF disposal fee to zero in May 2014. Until a new fee structure is in effect, we will not accrue any further costs related to SNF disposal fees. This fee may be adjusted prospectively to ensure full cost recovery. & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; We currently assume the DOE will begin accepting SNF in 2035 and use that date for purposes of estimating the nuclear decommissioning AROs. The SNF acceptance date assumption is based on management & # x2019; s estimate of the amount of time required for DOE to select a site location and develop the necessary infrastructure for long- term SNF storage. & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; The NWPA and the Standard Contracts required the DOE to begin taking possession of SNF generated by nuclear generating units no later than January 31, 1998. The DOE, however, failed to meet that deadline and its performance has been, and is expected to remain, delayed. In August 2004, we and the DOJ, in close consultation with the DOE, reached a settlement under which the government agreed to reimburse us, subject to certain damage limitations based on the extent of the government & # x2019; s breach, for costs associated with storage of SNF at our nuclear stations pending the DOE & # x2019; s fulfillment of its obligations. That settlement agreement does not expire until all SNF has been collected from the sites that it covers. Calvert Cliffs, Ginna, Nine Mile Point, Fitzpatrick, and STP each have separate settlement agreements in place with the DOE which were extended & # 160; during 2023 to provide for the reimbursement of SNF storage costs through December 31, 2025. We and the DOE have the option to extend those settlements every three years upon mutual consent. & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; Under the settlement agreements, we received total cumulative cash reimbursements of $ 1, 855 & # 160; million through December & # 160; 31, 2023 for costs incurred. After considering the amounts due to co- owners of certain nuclear stations, we received net cumulative cash reimbursements of $ 1, 615 & # 160; million. As of December & # 160; 31, 2023 and 2022, the amount of SNF storage costs for which reimbursement has been or will be requested from the DOE under the DOE settlement agreements is as follows: & lt; / span & gt; S. L.) (Cotter), a former ComEd subsidiary, that it is potentially liable in connection with radiological contamination at two sites in Missouri. In 2000, ComEd sold Cotter to an unaffiliated third- party. As part of the sale, ComEd agreed to indemnify Cotter for any liability arising from these two Missouri superfund sites, West Lake Landfill and Latty Avenue. In connection with Exelon & # x2019; s 2001 corporate restructuring, this responsibility to indemnify Cotter was transferred to us, and ultimately retained by us per the terms of our separation from Exelon. Refer to Note 1 & # x2014; Basis of Presentation for additional information on the separation. & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" &

The EPA and the PRPs have entered into a Consent Agreement to perform the Remedial Design, which is expected to be completed in 2024. In March 2019, the PRPs received Special Notice Letters from the EPA to perform the Remedial Action work. The total estimated cost of the remedy, considering the current EPA technical requirements, is approximately $ 305 million, including cost escalation on an undiscounted basis. Our investigation has identified several other parties who also may be PRPs and could be liable to contribute to the final remedy. & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; In September 2018, the three identified PRPs, including Cotter, signed an Administrative Settlement Agreement and Order on Consent for the performance by the PRPs of the groundwater Remedial Investigation Feasibility Study (RI / FS). The purpose of this RI / FS is to define the nature and extent of any groundwater contamination from the West Lake Landfill site and evaluate remedial alternatives. We estimate the undiscounted cost for the groundwater RI / FS to be approximately $ 50 million. At this time we cannot predict the likelihood, or the extent to which remediation activities, if any, may be required and therefore cannot estimate a reasonably possible range of loss for response costs beyond those associated with the RI / FS component. & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; We determined a loss associated with the EPA' s partial excavation and landfill cover remedy and the groundwater RI / FS is probable and have recorded a liability for each, both of which are included in the total amount as discussed above, that reflects management & # x2019; s best estimate of Cotter & # x2019; s allocable share of the cost among the PRPs. Given the joint and several nature of these two liabilities, the amount of our ultimate liability will depend on the actual costs incurred to implement each required remedy as well as on the nature and terms of any cost- sharing arrangements with the final group of PRPs. It is reasonably possible that the ultimate cost and Cotter' s associated allocable share could differ significantly once these uncertainties are resolved, which could have a material impact on our consolidated financial statements. & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; Latty Avenue and Vicinity Properties & lt; / span & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt;. In August 2011, Cotter was notified by the DOJ that Cotter is considered a PRP with respect to the government & # x2019; s clean- up costs for contamination attributable to low level radioactive residues at a former storage and reprocessing facility named Latty Avenue near St. Louis, Missouri. & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; Latty Avenue was investigated and remediated by the United States Army Corps of Engineers pursuant to funding under the Formerly Utilized Sites Remedial Action Program. On August 3, 2020, the DOJ advised Cotter that it is seeking approximately $ 90 million from all the PRPs. In April 2023, Cotter was informed by the DOJ about potential additional liability for all PRPs of approximately $ 90 & # 160; million associated with the Latty Avenue site as well as certain allegedly contaminated properties in the vicinity of Latty Avenue, for which the government alleges that Cotter is a PRP. Pursuant to a series of agreements since 2011, the DOJ and Cotter have extended the Statute of Limitations through August 31, 2024. & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; We have determined that a loss associated with these claims is probable and have recorded an estimated liability, included in the total amount as discussed above, that reflects management' s best estimate of Cotter' s allocable share of the cost. It is reasonably possible that Cotter' s allocable share could differ significantly, which could have a material impact on our consolidated financial statements. & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 700; line- height: 120 %" & gt; Litigation & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- style: italic; font- weight: 700; line- height: 120 %" & gt; General. & lt; / span & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; We are involved in various other litigation matters that are being defended and handled in the ordinary course of business. The assessment of whether a loss is probable or reasonably possible, and whether the loss or a range of loss is estimable, often involves a series of complex judgments about future events. We maintain accruals for such losses that are probable of being incurred and subject to reasonable estimation. Management is sometimes unable to estimate an amount or range of reasonably possible loss, particularly where (1) the damages sought are indeterminate, (2) the proceedings are in the early stages, or (3) the matters involve novel or unsettled legal theories. In such cases, there is considerable uncertainty regarding the timing or ultimate resolution of such matters, including a possible eventual loss. & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- style: italic; font- weight: 700; line- height: 120 %" & gt; Impacts of the February 2021 Extreme Cold Weather Event and Texas- based Generating Assets Outages. & lt; / span & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; Beginning on February 15, 2021, our Texas- based generating assets within the ERCOT market, specifically Colorado Bend II, Wolf Hollow II, and Handley, experienced outages as a result of extreme cold weather conditions. In addition, those weather conditions drove increased demand for service, dramatically increased wholesale power prices, and also increased gas prices in certain regions. & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; As a result of the event and outages, we incurred a loss of approximately $ 800 & # 160; million for the year ended December & # 160; 31, 2021. The estimated impact reduced our overall Net loss by approximately $ 50 & # 160; million for the year ended December & # 160; 31, 2022, attributable to a payment to ERCOT from a defaulting market participant, the bankruptcy settlement of a defaulting ERCOT market participant, and the settlement of a dispute related to gas penalties. There was no change to the financial impact in 2023. & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; Various lawsuits have been filed against us since the February 2021 event and outages. On March 5, 2021, we, along with more than 150 power generators and transmission and distribution companies, were sued by approximately 160 individually named plaintiffs, purportedly on behalf of all Texans who allegedly suffered loss of & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; life or sustained personal injury, property damage or other losses as a result of the weather events. The plaintiffs alleged that the defendants failed to properly prepare for the cold weather and failed to properly conduct their operations, seeking compensatory as well as punitive damages. Thereafter, numerous other plaintiffs filed multiple lawsuits against more than 300 defendants, including us, involving similar allegations of liability and claims of personal injury and property damage all arising out of the February weather events. These additional lawsuits allege wrongful death, property damage, or other losses. Co- defendants in these lawsuits include ERCOT, transmission and distribution utilities and other generators. & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; On December 28, 2021, approximately 130 insurance companies which insured Texas homeowners and businesses filed a subrogation lawsuit against multiple defendants alleging that defendants were at fault for the energy failure that resulted from the winter storm, causing significant property damage to the insureds. Subsequently, several hundred other insurance companies filed similar claims. All of these cases were combined in a Multi- District- Litigation (MDL) pending in Texas state court, which established a bellwether process to consider initial motions to dismiss by the different industry groups of defendants. Defendants filed motions to dismiss the amended complaints in five bellwether cases in July 2022. On February 3, 2023, the court granted the motions to dismiss pertaining to us in part and denied them in part, leaving the plaintiffs' negligence and nuisance claims to proceed. Since the motions to dismiss were partially denied, thousands of new claimants, many in multiple mass tort actions, filed lawsuits in various Texas state courts naming us, among hundreds of other defendants. The majority of these cases were transferred to the MDL. The MDL involves over 200 cases brought by approximately 30, 000 plaintiffs, including more than 1, 300 insurance companies, and we are defendants in the majority of them. We are also named in an alleged class action that seeks to assert claims on behalf of over 4. 1 million Texans within ERCOT who lost power during Winter Storm Uri. & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; On December 14, 2023, the Court of Appeals for the First District of Texas granted the power generator defendants' Petition for a Writ of Mandamus in the five bellwether cases and ordered the MDL court to dismiss the remaining claims against the power generator defendants, including our entities. The motions to dismiss in the five bellwether cases are expected to be applied to all of the claims against the power generator defendants in the MDL. Plaintiffs have sought rehearing of the decision with all judges of the court. & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; We dispute liability and deny that we are responsible for any of plaintiffs & # x2019; alleged claims and are vigorously contesting them. As of December & # 160; 31, 2023, approximately $ 20 million of this amount related to 235 open claims presented to us, while the remaining $ 111 million is for estimated future asbestos- related bodily injury claims anticipated to arise through 2055, based on actuarial assumptions and analyses, which are updated on an annual basis. billion authority without expiration. Share repurchases may be made through a variety of methods, which may include open market transactions, privately negotiated transactions, or purchases pursuant to a Rule 10b5- 1 trading plan, provided that the amounts spent do not exceed what is authorized. Any repurchased shares are constructively retired and cancelled. The program does not obligate us to acquire a minimum number of shares during any period and our repurchase of CEG' s common stock may be limited, suspended, or discontinued at any time at our discretion and without prior notice. Repurchases under this program commenced in March 2023. & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; During 2023, we repurchased from the open market approximately 10. 6 million shares of our common stock for a total cost, inclusive of taxes and transaction costs, of $ 1 billion. & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; On December & # 160; 12, 2023, our Board of Directors approved an increase to our previously announced $ 1 & # 160; billion share repurchase program, authorizing the repurchase of up to an additional $ 1 billion of the Company & # x2019; s outstanding common stock. As of December 31,

2023, there was $ 1 billion of remaining authority to repurchase shares. No other repurchase plans or programs have been authorized by our Board of Directors. The tax deduction related to performance share awards and restricted stock units was not material for the years ended December 31, 2023 and 2022. For each award, throughout the requisite service period, we recognize the tax benefit related to compensation costs. For performance share awards and restricted stock units, our realized tax benefit when distributed was not material for the years ended December 31, 2023 and 2022. & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 700; line- height: 120 %" & gt; Performance Share Awards & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; Performance share awards are granted under the LTIP. The performance share awards are typically settled 50 % in common stock and 50 % in cash at the end of the three- year performance period, subject to certain ownership thresholds that, if met, may result in cash settlement of the entire award. & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; The common stock portion of the performance share awards is considered an equity award and is valued based on our stock price on the grant date. The cash portion of the performance share awards is considered a liability award which is remeasured each reporting period based on the current stock price. As the value of the common stock and cash portions of the awards are based on the stock price during the performance period, coupled with changes in the total expected payout of the award, the compensation costs are subject to volatility until payout is established. & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; For nonretirement- eligible employees, performance share awards are recognized over the vesting period of three years using the straight- line method. For performance share awards granted to retirement- eligible employees, the value of the performance shares is recognized ratably over the vesting period, which is the year of grant. We process forfeitures as they occur for employees who do not complete the requisite service period. & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; The corresponding cost is measured based on the grant date fair value of the restricted stock unit issued. & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; The value of the restricted stock units is expensed over the requisite service period using the straight- line method. The requisite service period for restricted stock units is generally & lt; span style =" -sec- ix- hidden: f- 3026" & gt; three & lt; / span & gt; to five years. However, certain restricted stock unit awards become fully vested upon the employee reaching retirement eligibility. The value of the restricted stock units granted to retirement- eligible employees is either recognized ratably over the first six months in the year of grant if the employee reaches retirement eligibility prior to July 1st of the grant year or through the date of which the employee reaches retirement eligibility. We process forfeitures as they occur for employees who do not complete the requisite service period. & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; While we or CRP own 100 % of the solar entities and 100 % of the majority of the wind entities, it has been determined that the wholly owned solar and wind entities are VIEs because the entities' customers absorb price variability from the entities through fixed price power and / or REC purchase agreements. Additionally, for the wind entities that have minority interests, it has been determined that these entities are VIEs because the governance rights of some investors are not proportional to their financial rights. We are the primary beneficiary of these solar and wind entities that qualify as VIEs because we control operations and direct all activities of the facilities. There is limited recourse to us related to certain solar and wind entities. & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; In 2017, our interests in CRP were contributed to and are pledged for the CR non- recourse debt project financing structure.
