Risk Factors Comparison 2025-02-18 to 2024-02-27 Form: 10-K

Legend: **New Text** ~~Removed Text~~ Unchanged Text Moved Text Section

We operate in a complex market and regulatory environment that involves significant risks, many of which are beyond our direct control. Such risks, which could negatively affect our consolidated financial statements, fall primarily under the categories below: Risks related to market and financial factors primarily include: • the price **and availability** of fuels ~~, in particular the price of natural gas, which affects power prices~~ , • the generation resources in the markets in which we operate, • the design of power markets, • our ability to operate our generating assets, • our ability to access capital markets, • the impacts of ~~on- going~~ **ongoing** competition, and • emerging technologies and business models, including those related to climate change mitigation and transition to a low- carbon economy. Risks related to legislative, regulatory, and legal factors primarily include changes to, and compliance with, the laws and regulations that govern: • the renewal of operating licenses, • environmental and climate policy, and • tax policy. Risks related to operational factors primarily include: • changes in the global climate could produce extreme weather events, which could put our facilities at risk, and such changes could also affect the levels and patterns of demand for energy and related services, • the safe, secure and effective operation of our nuclear facilities and the ability to effectively manage the associated decommissioning obligations, ~~and~~ • physical ~~and~~ , cybersecurity **, and third- party reliability** risks for us as an owner- operator of generation facilities and as a participant in commodities trading **, • ability to attract and retain an appropriately qualified workforce, and • acquisitions or investments in new business initiatives and new markets** . Risks related to ~~our separation from Exelon~~ **the proposed acquisition of Calpine** primarily include: • **challenges in satisfying conditions** ~~replicate certain services provided by Exelon (e. g., information technology)~~ **obtaining regulatory approvals, and potential delays or abandonment of the merger agreement, • no assurance of the dividends at the current rate post- acquisition, reduced ownership and voting power for current shareholders, and potential dilution to earnings per share and significant transaction costs, • integration challenges including the complex, costly and time- consuming integration process with potential unknown liabilities, and the possible loss of key employees and customers, and • legal and regulatory risks such as potential lawsuits and substantial costs, as well as valuation risk** , which **could negatively impact future operating results** ~~will require additional resources and expense, and • performance by Exelon and us under the transaction agreements, including indemnification responsibilities tied to the allocation of businesses and liabilities~~ . Risks Related to Market and Financial Factors We are exposed to price volatility associated with both the wholesale and retail power markets and the procurement of nuclear fuel, natural gas **,** and oil. We are exposed to commodity price risk for natural gas and the unhedged portion of our generation portfolio. Our earnings and cash flows are therefore exposed to variability of spot and forward market prices in the markets in which we operate. Price of Fuels. The spot market price of electricity for each hour is generally determined by the marginal cost of supplying the next unit of electricity to the market during that hour. Thus, the market price of power is affected by the market price of the marginal fuel **, in particular the price of natural gas,** used to generate the electricity unit. Cost and Availability of Fuel. We depend on nuclear fuel, natural gas **,** and oil to operate most of our generating facilities. The supply markets for nuclear fuel, natural gas **,** and oil are subject to price fluctuations, availability restrictions, **tariffs,** counterparty default, and geopolitical risk, including the ~~current~~ **ongoing** Russia and Ukraine conflict **which has yielded sanctions** and **legislation by** the ~~potential for additional~~ United States **, United Kingdom, European Union, and Canada impacting the exports and imports of Russian nuclear fuel. An example of such** sanctions ~~against~~ **includes the" Prohibiting Russian Uranium Imports Act" which bans the import of low- enriched uranium into the U. S. that is produced in** Russia **or by Russian entities, absent a waiver from the DOE** . The cycle of production and utilization of nuclear fuel is complex, and we engage a diverse set of suppliers to ~~ensure we can~~ secure the nuclear fuel needed to continue to operate our nuclear fleet long- term. Non- performance by these suppliers could have a material adverse impact on our consolidated financial statements. See ITEM 1. BUSINESS – Price and Supply Risk Management and ~~See~~ ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK for additional information on the nuclear fuel cycle and procurement. Demand and Supply. The market price for electricity is also affected by changes in the demand for electricity and the available supply of electricity. Unfavorable economic conditions, milder than normal weather, and the growth of energy efficiency and demand response programs can depress demand. In addition, in some markets, the supply of electricity can exceed demand during some hours of the day, resulting in loss of revenue for **baseload** ~~base- load~~ generating plants such as our nuclear plants ~~. Conversely, new demand sources such as electrification of transportation could increase demand and change demand patterns~~ . Retail Competition. Our retail operations compete for customers in a competitive environment, which affects the margins we can earn and the volumes we are able to serve. In periods of sustained low natural gas and power prices and low market volatility, retail competitors can aggressively pursue market share because the barriers to entry can be low and wholesale generators (including us) use their retail operations to hedge generation output. Market Designs. The wholesale markets vary from region to region with distinct rules, practices and procedures. Changes in these market rules, problems with rule implementation, or failure of any of these markets could adversely affect our business. In addition, a significant decrease in market participation could affect market liquidity and have a detrimental effect on market stability. We may be adversely affected by the effects of sustained inflation. The existence of inflation in the economy has resulted in, or may result in, higher interest rates and capital costs, increased costs of labor, and other similar effects. If inflation rates ~~continue to~~ rise or ~~remain~~ **become** elevated for a sustained period, they could have a material adverse effect on our business, financial condition, results of operations and liquidity. Although we may take measures to mitigate the impact of inflation, those measures may not be effective. We are potentially affected by emerging technologies that could **,** over time **,** affect or transform the energy industry. Advancements in **both distributed and utility- scale** power generation technology **could impact market prices and demand size and behaviors. For instance** , ~~including~~ commercial and residential solar generation installations ~~and commercial micro turbine installations~~ , **energy storage improvements that include batteries and fuel cells, and other emerging technologies** are improving the cost- effectiveness of customer self- supply of electricity ~~. Improvements in energy storage technology, including batteries and fuel cells, could also better position customers to meet their around- the- clock electricity requirements~~ . Improvements in energy efficiency of lighting, appliances, equipment and building materials will also affect energy consumption by customers. ~~Changes~~ **Advancements** in **nuclear technology, carbon capture sequestration, storage and advanced geothermal may contribute to a substantial increase in the supply of clean, reliable baseload** power **, impacting market prices. Carbon sequestration technology may also allow for gas** generation ~~, storage, to continue to be a viable source of clean electricity~~ and **provide for future growth of clean gas- powered generation** ~~use technologies could have significant effects on customer behaviors and their energy consumption~~ . These developments could affect the price of energy, levels of customer- owned generation, customer expectations and current business models and make portions of our generation facilities uneconomic prior to the end of their useful lives. These technologies could also result in further declines in commodity prices or demand for delivered energy. Each of these factors could affect our consolidated financial statements through, among other things, reduced operating revenues, increased operating and maintenance expenses, increased capital expenditures, and potential asset impairment charges or accelerated depreciation and decommissioning expenses over shortened remaining asset useful lives. Market performance and other factors could decrease the value of our NDT funds and employee benefit plan assets, which then could require significant additional funding. Disruptions in the capital markets and their actual or perceived effects on particular businesses and the broader economy could adversely affect the value of the investments held within our NDTs and employee benefit plan trusts. We have significant obligations in these areas and hold substantial assets in these trusts to meet those obligations. The asset values are subject to market fluctuations and will yield uncertain returns, which could fall below our projected return rates. A decline in the market value of the NDT fund investments could increase our funding requirements to decommission our nuclear plants. A decline in the market value of the pension and OPEB plan assets would increase the funding requirements associated with our pension and OPEB plan obligations. Additionally, our pension and OPEB plan liabilities are sensitive to changes in interest rates. As interest rates decrease, the liabilities increase, potentially increasing benefit costs and funding requirements. ~~Changes in demographics, including increased numbers of retirements or changes in life expectancy assumptions or changes to Social Security or Medicare eligibility requirements could also increase the costs and funding requirements of the obligations related to the pension and OPEB plans.~~ See Note 10 — Asset Retirement Obligations and Note ~~15~~ **14** — Retirement Benefits of the Combined Notes to Consolidated Financial Statements for additional information. We could be negatively affected by unstable capital and credit markets and increased volatility in commodity markets. We rely on the capital markets, particularly for publicly offered debt, as well as the banking and commercial paper markets, to meet our financial commitments and short- term liquidity needs. Disruptions in the capital and credit markets in the United States or abroad could negatively affect our ability to access the capital markets or draw on our bank revolving credit facilities. The banks may not be able to meet their funding commitments to us if they experience shortages of capital and liquidity or if they experience excessive volumes of borrowing requests within a short period of time. The inability to access capital markets or credit facilities, and longer- term disruptions in the capital and credit markets as a result of uncertainty, changing or increased regulation, reduced alternatives or failures of significant financial institutions could result in the deferral of discretionary capital expenditures, affect our ability to effectively hedge our generation portfolio, require changes to our hedging strategy in order to reduce collateral posting requirements, or require a reduction in discretionary uses of cash. In addition, we have exposure to worldwide financial markets, including Europe, Canada **,** and Asia. Disruptions in these markets could reduce or restrict our ability to secure sufficient liquidity or secure liquidity at reasonable terms. As of December 31, ~~2023~~ **2024** , approximately ~~37~~ **35** %, ~~12~~ **11** %, and ~~17~~ **20** % of our available credit facilities were with European, Canadian **,** and Asian banks, respectively. The strength and depth of competition in energy markets depend heavily on active participation by multiple trading parties, which could be negatively affected by disruptions in the capital and credit markets and legislative and regulatory initiatives that could affect participants in commodities transactions. Reduced capital and liquidity and failures of significant institutions that participate in the energy markets could diminish the liquidity and competitiveness of energy markets that are important to our business. Perceived weaknesses in the competitive strength of the energy markets could lead to pressures for greater regulation of those markets or attempts to replace market structures with other mechanisms for the sale of power, including the requirement of long- term contracts. If we were to experience a downgrade in our credit ratings to below investment grade or otherwise fail to satisfy the credit standards in our agreements with our counterparties or regulatory financial requirements, we would be required to provide significant amounts of collateral that could affect our liquidity and we could experience higher borrowing costs. Our business is subject to credit quality standards that could require market participants to post collateral for their obligations upon a decline in ratings. We are also subject to certain financial requirements under NRC regulations as a result of our operation of nuclear power plants that could require us to provide cash collateral or surety bonds if those requirements are not met. One or both events could adversely affect available liquidity and, in the case of a rating downgrade, borrowing and credit support costs. See ITEM 7. MANAGEMENT' S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS – Liquidity and Capital Resources – Credit Matters and Cash Requirements – Security Ratings and Note ~~16~~ **15** — Derivative Financial Instruments of the Combined Notes to Consolidated Financial Statements for additional information regarding the potential impacts of credit downgrades on our cash flows. If we fail to meet project- specific financing agreement requirements, we could experience an impairment or loss of the financed project. We have project- specific financing arrangements and must meet the requirements of various agreements relating to those financings. Failure to meet those arrangements could give rise to a project- specific financing default which, if not cured or waived, could result in the specific project being required to repay the associated debt or other borrowings earlier than otherwise anticipated, and if such repayment were not made, the lenders or security holders would generally have broad remedies, including rights to foreclose against the project assets and related collateral or to force our subsidiaries in the project- specific financings to enter ~~into~~ bankruptcy proceedings. The impact of bankruptcy could result in the impairment of certain project assets. See Note ~~17~~ **16** — Debt and Credit Agreements of the Combined Notes to Consolidated Financial Statements for additional information. Our risk management policies cannot fully eliminate the risk associated with our commodity trading activities. Our asset- based power position as well as our power marketing, fuel procurement and other commodity trading activities expose us to risks of commodity price movements. We buy and sell energy and other products and enter financial contracts to manage risk and hedge various positions in our portfolio. We are exposed to volatility in financial results for unhedged positions as well as the risk of ineffective hedges. We attempt to manage this exposure through enforcement of established risk limits and risk management procedures. These risk limits and risk management procedures may not work as planned and cannot eliminate all risks associated with these activities. Even when our policies and procedures are followed, and decisions are made based on projections and estimates of future performance, results of operations could be diminished if the judgments and assumptions underlying those decisions prove to be incorrect. Factors, such as future prices and demand for power, natural gas and other energy- related commodities, become more difficult to predict and the calculations become less reliable the further into the future estimates are made. As a result, we cannot predict the impact that our commodity trading activities and risk management decisions could have on our consolidated financial statements. Financial performance and load requirements could be negatively affected if we are unable to effectively manage our power portfolio. A significant portion of our power portfolio is used to provide power under procurement contracts with load serving entities and other customers. To the extent portions of the power portfolio are not needed for that purpose, our output is sold in the wholesale power markets. To the extent our power portfolio is not sufficient to meet the requirements of our customers under the related agreements, we must purchase power in the wholesale power markets. Our financial results could be negatively affected if we are unable to cost- effectively meet the load requirements of our customers, manage our power portfolio or effectively address the changes in the wholesale power markets. The impacts of significant economic downturns (i. e., recession) could lead to

decreased volumes delivered and increased expense for uncollectible customer balances. The impacts of significant economic downturns on our retail customers, such as less demand for **the** products and services provided by **our** C & I customers, could result in an increase in the number of uncollectible customer balances and related expense. See ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK and Note ~~16~~ **15** — Derivative Financial Instruments of the Combined Notes to Consolidated Financial Statements for additional information on our credit risk. We could be negatively affected by the impacts of weather. Our operations are affected by weather, which impacts demand for electricity and natural gas, the price of energy commodities, as well as operating conditions. To the extent that weather is warmer in the summer or colder in the winter than assumed, we could require greater resources to meet our contractual commitments. Extreme weather conditions or storms ~~have could affected~~ -- **affect** the availability of generation and ~~its~~ **the** transmission **of electricity** , limiting our ability to source **electricity** or **transmit** ~~send power to where~~ it ~~is sold, and have to our customers. It could~~ also ~~impaired~~ -- **impair** ~~the~~ **our ability to** ~~transportation~~ ----- **transport** ~~of~~ natural gas to our generating assets and our ability to supply natural gas to our customers. In addition, drought- like conditions limiting water usage could impact our ability to run certain generating assets at full capacity. These conditions, which cannot be accurately predicted, could cause us to seek additional replacement supply at a time when supply is constrained. **Weather** ~~Climate change~~ projections suggest increases to summer temperature and humidity trends, as well as more erratic precipitation and storm patterns over the long term in the areas where we have generation assets. The frequency in which weather conditions emerge outside the current expected climate norms could contribute to the weather- related impacts discussed above ~~. Beginning on February 15, 2021, our Texas- based generating assets within the ERCOT market, specifically Colorado Bend II, Wolf Hollow II, and Handley, experienced periodic outages as a result of historically severe cold weather conditions. As a result of this weather event, we incurred a loss of approximately $ 800 million for the year ended December 31, 2021. See Note 19 — Commitments and Contingencies of the Combined Notes to Consolidated Financial Statements for additional information~~ . Long- lived assets, goodwill, and other assets could become impaired. Long- lived assets – principally, generation assets – represent the single largest asset class on our Consolidated Balance Sheets. In addition, we have a material goodwill balance as of December 31, ~~2023~~ **2024** . We evaluate the recoverability of the carrying value of long- lived assets to be held and used whenever events or circumstances indicating a potential impairment may exist. Factors such as, but not limited to, the business climate, including current and future energy and market conditions, environmental regulation, and the condition of assets are considered. We assess goodwill for impairment at least annually or more frequently if an event occurs or circumstances change that would more likely than not reduce the fair value of the reporting units below their carrying amount. Changes in significant assumptions, including discount rates, energy prices, projected operating costs, and cash flows could potentially result in future impairments of goodwill. An impairment would require us to reduce the carrying value of the long- lived asset and goodwill to fair value through a non- cash charge to expense by the amount of the impairment. See ITEM 7. MANAGEMENT' S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS – Critical Accounting Policies and Estimates, Note 1 — Basis of Presentation, Note 8 — Property, Plant, and Equipment, **and** Note 12 ~~— Asset Impairments, and Note 13~~ — Intangible Assets of the Combined Notes to Consolidated Financial Statements for additional information on long- lived asset impairments. We could incur substantial costs in the event of non- performance by third parties under indemnification agreements. We are exposed to other credit risks in the power markets that are beyond our control. We have entered into various agreements with counterparties that require those counterparties to reimburse us and hold us harmless against specified obligations and claims. To the extent that any of these counterparties are affected by deterioration in their creditworthiness or the agreements are otherwise determined to be unenforceable, we could be held responsible for the obligations. We have issued indemnities to third parties regarding environmental or other matters in connection with purchases and sales of assets, including several of the Exelon utilities in connection with our absorption of their former generating assets. We could incur substantial costs to fulfill our obligations under these indemnities. In the bilateral markets, we are exposed to the risk that counterparties that owe us money or are obligated to purchase energy or fuel from us ~~,~~ will not perform under their obligations for operational or financial reasons. In the event the counterparties to these arrangements fail to perform, we could be forced to purchase or sell energy or fuel in the wholesale markets at less favorable prices and incur additional losses, to the extent amounts, if any, were already paid to the counterparties. In the spot markets, we are exposed to risk as a result of default sharing mechanisms that exist within certain markets, primarily RTOs and ISOs. We are also a party to agreements with entities in the energy sector that have experienced rating downgrades or other financial difficulties. In addition, our retail sales subject us to credit risk through competitive electricity and natural gas supply activities to serve C & I companies, governmental entities **,** and residential customers. Retail credit risk results when customers default on their contractual obligations. This risk represents the loss that could be incurred due to the nonpayment of a customer' s account balance, as well as the loss from the resale of energy previously committed to serve the customer. ~~See Note 19 — Commitments and Contingencies of the Combined Notes to Consolidated Financial Statements for additional information on the February 2021 extreme cold weather event and Texas- based generating asset outages.~~ Risks Related to Legislative, Regulatory, and Legal Factors Federal or state legislative or regulatory actions could negatively affect the scope and functioning of the wholesale markets. Approximately 70 % of our generating resources, which include directly owned assets and capacity obtained through long- term contracts, are in the area encompassed by PJM. Our future results of operations are impacted by (1) FERC' s and PJM' s level of support for policies that favor the preservation of competitive wholesale power markets ~~and~~ **,** recognize the value of ~~carbon~~ **emissions** - free electricity and resiliency ~~and for~~ **, complement** states' energy objectives and policies and (2) the absence of material changes to market structures that would limit or otherwise negatively affect us. Market rules in other regions could affect us in a similar fashion. We could also be affected by state laws, regulations or initiatives to subsidize existing or new generation. FERC' s requirements for market- based rate authority could pose a risk that we may no longer satisfy FERC' s tests for market- based rates. A loss of market- based rate authority would mean that we would sell power at cost- based rates. Our business is highly regulated and could be negatively affected by legislative and / or regulatory actions. Substantial aspects of our business are subject to comprehensive federal or state legislation and / or regulation. Our consolidated financial statements are significantly affected by our sales and purchases of commodities at market- based rates, as opposed to cost- based or other similarly regulated rates, and federal and state regulatory and legislative developments related to emissions, climate change, capacity market mitigation, energy price information, resilience, fuel diversity **,** and RPS. Federal or state legislative and regulatory efforts to preserve the environmental attributes and reliability benefits of zero- emission nuclear- powered generating facilities could be subject to legal and regulatory challenges and, if overturned, could result in the early retirement of certain of our nuclear plants. The PTC benefiting existing nuclear plants included in the IRA (starting January 1, 2024) continues to be the subject of additional guidance issued from the U. S. Treasury and IRS, which may negatively impact the amount of benefits we ultimately receive ~~with respect to some~~ **. In addition, the duration** of **the PTC program, the value of the PTC, and /** ~~our~~ **or the existence of the PTC could be affected by legislative action and may have significant adverse effects on our financial performance depending on the future gross receipts received by our nuclear** units. Fundamental changes in regulations or other adverse legislative actions affecting our business would require changes in our business planning models and operations. We cannot predict when or whether legislative and regulatory proposals could become law or what their effect would be. See Note 3 — Regulatory Matters ~~and Note 7 — Early Plant Retirements~~ of the Combined Notes to Consolidated Financial Statements for additional information **on the nuclear PTC** . NRC actions could negatively affect the operations and profitability of our nuclear generating fleet. Regulatory Risk. A change in the Atomic Energy Act or the applicable regulations or licenses could require a substantial increase in capital expenditures or could result in increased operating or decommissioning costs. Events at nuclear plants owned by others, as well as those owned by us, could cause the NRC to initiate such actions. Spent Nuclear Fuel Storage. Our nuclear operations produce various types of nuclear waste materials, including SNF. The approval of a national repository for the storage of SNF and the timing of that facility opening ~~,~~ will significantly affect the costs associated with storage of SNF and the ultimate amounts received from the DOE to reimburse us for these costs. Any regulatory action relating to the timing and availability of a repository for SNF could adversely affect our ability to decommission fully our nuclear units. We cannot predict whether a fee may be established or to what extent, in the future for SNF disposal. See Note ~~19~~ **18** — Commitments and Contingencies of the Combined Notes to Consolidated Financial Statements for additional information. We could be subject to higher costs and / or penalties related to mandatory reliability standards. We, as a user of the bulk power transmission system, are subject to mandatory reliability standards promulgated by NERC and enforced by FERC. The standards are based on the functions that need to be performed to ensure the bulk power system operates reliably and are guided by reliability and market interface principles. Compliance with or changes in the reliability standards could subject us to higher operating costs and / or increased capital expenditures. If we were found in non- compliance with the federal and state mandatory reliability standards, we could be subject to remediation costs as well as sanctions, which could include substantial monetary penalties. We could incur substantial costs to fulfill our obligations related to environmental and other matters. We are subject to extensive environmental regulation and legislation by local, state and federal authorities. These laws and regulations affect the way we conduct our operations and make capital expenditures, including how we handle air and water emissions, hazardous and solid waste, and activities affecting surface waters, groundwater, and aquatic and other species. Violations of these requirements could subject us to enforcement actions, capital expenditures to bring existing facilities into compliance, additional operating costs for remediation and clean- up costs, civil penalties and exposure to third parties' claims for alleged health or property damages or operating restrictions to achieve compliance. In addition, we are subject to liability under these laws for the remediation costs for environmental contamination of property now or formerly owned by us and of property contaminated by hazardous substances we generated or released. Also, we are currently involved in several proceedings relating to sites where hazardous substances have been deposited and could be subject to additional proceedings in the future. See ITEM 1. BUSINESS – Environmental Matters and Regulation and Note ~~19~~ **18** — Commitments and Contingencies of the Combined Notes to Consolidated Financial Statements for additional information. We could be negatively affected by federal and state RPS and / or energy conservation legislation, along with energy conservation by customers. Changes to current state legislation or the development of federal legislation that requires the use of clean, renewable and alternate fuel sources could significantly impact us. The impact could include reduced use of some of our generating facilities with effects on our operating revenues and costs. Federal and state legislation mandating the implementation of energy conservation programs and new energy consumption technologies could cause declines in customer energy consumption and lead to a decline in our operating revenues. See ITEM 1. BUSINESS – Environmental Matters and Regulation – Renewable and Clean Energy Standards and " We are potentially affected by emerging technologies that could over time affect or transform the energy industry " above for additional information. Our financial performance could be negatively affected by risks arising from our ownership and operation of hydroelectric facilities. FERC has the exclusive authority to license most non- federal hydropower projects located on navigable waterways, federal lands **,** or connected to the interstate electric grid. If FERC does not issue new operating licenses for our hydroelectric facilities in the future or a station cannot be operated through the end of its current operating license, our results of operations could be adversely affected by increased depreciation rates and accelerated future decommissioning costs, since depreciation rates and decommissioning cost estimates are currently based on the available license term for each facility. We could also lose operating revenues and incur increased purchased power and fuel expense to meet our supply commitments. In addition, conditions could be imposed as part of the license renewal process that could adversely affect operations, require a substantial increase in capital expenditures, result in increased operating costs or render the project uneconomic. Similar effects could result from a change in the Federal Power Act or the applicable regulations due to events at hydroelectric facilities owned by others, as well as those owned by us. See Note 3 — Regulatory Matters of the Combined Notes to Consolidated Financial Statements for additional information regarding the license renewal for the Conowingo hydroelectric project. We could be negatively affected by challenges to tax positions taken, tax law changes and the inherent difficulty in quantifying potential tax effects of business decisions. We are required to make judgments in order to estimate our obligations to taxing authorities. These tax obligations include income, real estate, sales and use **,** and employment- related taxes and ongoing appeal issues related to these tax matters. These judgments include reserves established for potential adverse outcomes regarding tax positions that have been taken that could be subject to challenge by the tax authorities. See Note 1 — Basis of Presentation and Note ~~14~~ **13** — Income Taxes of the Combined Notes to Consolidated Financial Statements for additional information. Legal proceedings could result in a negative outcome, which we cannot predict. We are involved in legal proceedings, claims **,** and litigation arising from our business operations. Our material legal proceedings, claims **,** and litigation are summarized in Note 3 — Regulatory Matters and Note ~~19~~ **18** — Commitments and Contingencies of the Combined Notes to Consolidated Financial Statements. Adverse outcomes in these proceedings could require significant expenditures, result in ~~lost~~ **loss of** revenue, or restrict existing business activities. We could be subject to adverse publicity and reputational risks, which make us vulnerable to negative customer perception and could lead to increased regulatory oversight or other consequences. We could be the subject of public criticism. Adverse publicity of this nature could render public service commissions and other regulatory and legislative authorities less likely to view energy companies in a favorable light, and could cause those companies, including us, to be susceptible to less favorable legislative and regulatory outcomes, as well as increased regulatory oversight and more stringent legislative or regulatory requirements. Risks Related to Operational Factors We are subject to risks associated with climate change. Climate adaptation risk refers to risks to our facilities or operations that may result from changes in the physical climate, such as changes to temperatures, weather patterns and sea level rise. We periodically perform analyses to better understand how climate change could affect our facilities and operations. We primarily operate in the Midwest, **Mid-Atlantic, Northeast** ~~East Coast of the United States~~ , and Texas areas that have historically been prone to various types of severe weather events **. As** ~~, and as~~ such **,** we have well- developed response and recovery programs based on ~~these~~ historical **weather** events **and patterns** . However, our physical facilities could be placed at greater risk of damage should changes in the global climate impact temperature and weather patterns, and result in more intense, frequent and extreme weather events, unprecedented levels of precipitation, sea level rise, increased surface water temperatures, and / or other effects. Over time, we may need to make additional investments to protect our facilities from physical climate- related risks. In addition, changes to the climate may impact levels and patterns of demand for energy and related services, which could affect our operations. Over time, we may need to make additional investments to adapt to changes in operational requirements as a result of

climate change. Climate mitigation and transition risks include changes to the energy systems as a result of new technologies, changing customer expectations and / or voluntary GHG goals, as well as local, state or federal regulatory requirements intended to reduce GHG emissions. We also periodically perform analyses of potential pathways to reduce power sector and economy- wide GHG emissions to mitigate climate change. To the extent additional GHG reduction regulation or legislation becomes effective at the federal and / or state levels, we could incur costs to further limit the GHG emissions from our operations or otherwise comply with applicable requirements. To the extent such additional regulation or legislation does not become effective, the potential competitive advantage offered by our low- carbon emission profile may be reduced. See ITEM 1. BUSINESS – Environmental Matters and Regulation – Climate ~~Change~~ for additional information. Our financial performance could be negatively affected by matters arising from our ownership and operation of nuclear facilities. Nuclear capacity factors. Capacity factors for nuclear generating units significantly affect our results of operations. Lower capacity factors could decrease our revenues and increase operating costs by requiring us to produce additional energy from our natural gas and oil **-** fueled facilities or purchase additional energy in the spot or forward markets in order to satisfy our supply obligations to committed third- party sales. These sources generally have higher costs than we incur to produce energy from our nuclear stations. Nuclear refueling outages. In general, refueling outages are planned to occur once every 18 to 24 months. The total number of refueling outages, along with their duration, could have a significant impact on our results of operations. When refueling outages last longer than anticipated or we experience unplanned outages, capacity factors decrease, and we face lower margins due to higher energy replacement costs and / or lower energy sales and higher operating and maintenance costs. Nuclear fuel quality. The quality of nuclear fuel utilized by us could affect the efficiency and costs of our operations. Remediation actions could result in increased costs due to accelerated fuel amortization, increased outage costs and / or increased costs due to decreased generation capabilities. Operational risk. Operations at any of our nuclear generation plants could degrade to the point where we must shut down the plant or operate at less than full capacity. If this were to happen, identifying and correcting the causes could require significant time and expense. We could choose to close a plant rather than incur the expense of restarting it or returning the plant to full capacity. In either event, we could lose revenue and incur increased purchased power costs and fuel expense to meet supply commitments. If we are required to arrange for the safe and permanent disposal of SNF beyond current expectations, this could lead to substantial expense or capital expenditures. See" NRC actions could negatively affect the operations and profitability of our nuclear generating fleet" above for additional information on the storage of SNF. For plants operated but not wholly owned by us, we could also incur liability to our co- owners. For nuclear plants not operated and not wholly owned by us, from which we receive a portion of the plants' output, our results of operations are dependent on the operational performance of the operators and could be adversely affected by a significant event at those plants. We do not procure the fuel for the sites we do not operate. The operator' s nuclear fuel procurement plan could impact our results of operations. Additionally, poor operating performance at nuclear plants not owned by us could result in increased regulation and reduced public support for nuclear- fueled energy. Closure of generating plants owned by others, or extended interruptions of generating plants or failure of transmission lines, could adversely affect transmission systems and the sale and delivery of electricity in markets served by us. Nuclear major incident risk and insurance. The consequences of a major incident could be severe and include loss of life and property damage. Any resulting liability from a nuclear plant major incident within the United States, owned or operated by us or owned by others, could exceed our resources, including insurance coverage. We are a member of an industry mutual insurance company, NEIL, which provides property and accidental outage insurance for our nuclear operations. Uninsured losses and other expenses, to the extent not recovered from insurers or the nuclear industry, could be borne by us. Additionally, an accident or other significant event at a nuclear plant within the United States or abroad, whether owned by us or others, could result in increased regulation and reduced public support for nuclear- fueled energy. As required by the Price- Anderson Act, we carry the maximum available amount of nuclear liability insurance, $ 500 million for each operating site. Claims exceeding that amount are covered through mandatory participation in a financial protection pool. In addition, the U. S. Congress could impose revenue-raising measures on the nuclear industry to pay claims exceeding the $ 16. ~~2~~ **3** billion limit for a single incident. See Note ~~19~~ **18** — Commitments and Contingencies of the Combined Notes to Consolidated Financial Statements for additional information of nuclear insurance. Decommissioning obligation and funding. NRC regulations require that licensees of nuclear generating facilities demonstrate reasonable assurance that funds will be available in certain minimum amounts at the end of the life of the facility to decommission the facility. Actual costs to decommission our nuclear facilities may substantially exceed our estimates as a result of changes in the approach and timing of decommissioning activities, changes in decommissioning costs, changes in federal or state regulatory requirements, other changes in our estimates or **our** ability to effectively execute on ~~our~~ planned decommissioning activities. We have recourse to collect additional amounts from utility customers through PECO (subject to certain limitations and thresholds) for former PECO units and through CenterPoint ~~Energy Houston Electric~~ and AEP Texas for STP units. If circumstances changed such that there was an inability to continue to make contributions to the trust funds of the former PECO or STP units based on amounts collected from utility customers, or if we no longer had recourse to collect additional amounts from the respective utility customers if there was a shortfall of funds for decommissioning, the adequacy of the trust funds related to these units could be negatively affected. Any changes to the utilities' regulatory agreements could impact our ability to offset decommissioning- related activities for these units within the Consolidated Statements of Operations and Comprehensive Income, and the impact to our consolidated financial statements could be material. Should the expected value of the NDT fund for any former ComEd unit fall below the amount of the expected decommissioning obligation for that unit, the accounting to offset decommissioning- related activities for that unit may be temporarily suspended or discontinued, and the decommissioning- related activities would be recognized in the Consolidated Statements of Operations and Comprehensive Income, the impact of which could be material. ~~For the year ended December 31, 2021, a pre- tax charge of $ 193 million was recorded in the Consolidated Statement of Operations and Comprehensive Income for decommissioning- related activities that were not offset for the Byron units due to contractual offset being temporarily suspended. See Note 7 — Early Plant Retirements and Note 10 — Asset Retirement Obligations of the Combined Notes to Consolidated Financial Statements for additional information.~~ Forecasting trust fund investment earnings and costs to decommission nuclear generating stations requires significant judgment, and actual results could differ significantly from current estimates. If the investments held by our NDT funds are not sufficient to fund the decommissioning of our nuclear units, we could be required to take steps, such as providing financial guarantees through letters of credit or parent company guarantees or making additional contributions to the trusts, which could be significant, to ensure that the trusts are adequately funded and that current and future NRC minimum funding requirements are met. See Note 10 — Asset Retirement Obligations of the Combined Notes to Consolidated Financial Statements for additional information. We are subject to evolving physical security ~~and~~ **,** cybersecurity **, and third- party reliability** risks. Threat actors continue to seek to exploit potential vulnerabilities in the energy sector associated with protection of sensitive and confidential information, grid infrastructure **,** and other energy infrastructures. These attacks and disruptions, both physical and cyber, are becoming increasingly sophisticated and dynamic. Security incidents such as ransomware attacks are becoming increasingly prevalent and severe, as well as increasingly difficult to detect. In addition, geopolitical issues, to include conflicts in the Ukraine and the Middle East, as well as tensions between the U. S. and China, may motivate cyber **-** attacks which could impact the U. S. energy sector and our Company via supply chain disruptions or direct targeting. A security breach, including, but not limited to, physical or electronic intrusions, computer viruses, malware, attacks by cyber criminals or nation state threat actors, ransomware attacks, phishing attacks, supply chain attacks, third- party breaches, and other similar breaches of our physical assets or information systems, or those of our competitors, vendors, business partners and interconnected entities in RTOs, ISOs, and other energy markets, or regulators have the potential to disrupt our business and result in harm to the Company. Security breaches can also occur as a result of non- technical issues, including intentional or inadvertent actions by our employees, third- party service providers or their personnel or other parties. Our customers depend on the continuous availability of our commercial and generation operations. A failure, interruption, or breach of our operational or information security systems, or those of our third- party service providers, as a result of cyber- attacks or information security breaches could disrupt our business, result in the disclosure or misuse of confidential or proprietary information, damage our reputation, cause loss of customers or revenue, increase our costs, result in litigation and / or regulatory action, and / or cause other losses, any of which might have a materially adverse impact on our business operations and our financial position or results of operations. Operational harm could be in the form of impact to the ~~operation of the~~ generation fleet **, our commercial operations,** and / or reliability of the bulk electric system. Impacts to confidential or proprietary information could include inappropriate release of certain types of information, including critical infrastructure, sensitive customer, vendor and employee, trading, export control or other confidential information. **If** ~~Furthermore, if~~ a significant security breach were to occur, our reputation could be negatively affected, customer confidence in us or others in the industry could be diminished, or we could be subject to legal claims, loss of revenues, increased costs, regulatory penalties, or operational shutdown. We currently utilize a mix of third- party managed service providers to host and support our information technology, customer support, and generation operations. As an example, our data centers are hosted in vendor- managed co- location facilities. Consequently, we may be subject to short- and long- term interruptions, delays and outages in service and availability due to third- party cybersecurity **or reliability** incidents that are outside of our direct control. We expect that in the future we may experience interruptions, delays and outages in service and availability from time to time due to a variety of factors, including infrastructure changes, human or software errors, website hosting disruptions and capacity constraints. Coordinated physical and or cyber **-** attacks that disrupt multiple key electric assets of unaffiliated parties responsible for real- time planning and management of the bulk electric system ~~which~~ could impact our ability to provide generation **,** potentially resulting in localized and regional blackouts affecting third parties and the public, many of which will have no direct commercial relationship with the Company. We ~~also~~ cannot anticipate, detect, repel, or implement fully effective preventative measures against all cyber threats, particularly because the techniques used are constantly evolving. **Similarly, we cannot guarantee uninterrupted availability of third- party managed systems that may be affected by factors unrelated to cybersecurity incidents.** Continued implementation of advanced digital technologies increases the potentially unfavorable impacts of such attacks and **reliability, and** may introduce new vulnerabilities and threat tactics. For example, ~~as~~ **threat actors could use** Artificial Intelligence (AI) ~~continues to evolve, threat actors could use AI~~ to develop malicious code and sophisticated phishing attempts. As threats continue to evolve, we may be required to expend additional resources to continue to enhance our information security measures and / or to investigate and remediate information security vulnerabilities. While we have not experienced a material breach or disruption to our network or information systems or our operations to date, future attacks **or reliability** may negatively impact our business, reputation, or financial results. Although we maintain insurance coverage for cyber events, the amount and scope of insurance maintained against losses resulting from a significant event or security breach may not be sufficient to cover losses or otherwise adequately compensate for any business disruptions that could result. There can be no assurance that such insurance will be available on commercially reasonable terms ~~,~~ in the future. In addition, new or updated security regulations or new vulnerabilities identified by security researchers, third- party suppliers, or threat actors could require changes in current measures taken by security or our business operations and could adversely affect our consolidated financial statements. We are continuously evolving our cybersecurity strategy and technical controls to prepare for, identify, protect, detect, respond, and recover our technology systems, information and operations from such attacks. See ITEM 1C. CYBERSECURITY for more information. Our employees, contractors, customers and the general public could be exposed to a risk of injury due to the nature of the energy industry. Employees and contractors throughout the organization work in, and the general public could be exposed to, potentially dangerous environments near our operations. As a result, employees, contractors and the general public are at some risk for serious injury, including loss of life. These risks include, but are not limited to, nuclear accidents, dam failure, gas explosions, and electric contact cases. Natural disasters, war, acts and threats of terrorism, pandemic and other significant events could negatively impact our results of operations, ability to raise capital, and future growth. Our fleet of power plants and the transmission infrastructure to which they are connected could be affected by natural disasters and extreme weather events, which could result in increased costs, including supply chain costs. Natural disasters and other significant events increase our risk that the NRC or other regulatory or legislative bodies could change the laws or regulations governing, among other things, operations, maintenance, operating licenses, decommissioning, SNF storage, insurance, emergency planning, security and environmental and radiological matters. In addition, natural disasters could affect the availability of a secure and economical supply of water in some locations, which is essential for our continued operation, particularly the cooling of generating units. Also, the ability of energy transmission and distribution companies to maintain the reliability, resiliency and safety of their energy delivery systems could affect our ability to deliver energy to our customers and affect our operating costs. The impact that potential terrorist attacks could have on the industry and on us is uncertain. We face a risk that our operations would be direct targets or indirect casualties of an act of terror. Any retaliatory military strikes or sustained military campaign could affect our operations in unpredictable ways, such as changes in insurance markets and disruptions of fuel supplies and markets, particularly uranium and oil. Furthermore, these catastrophic events could compromise the physical or cybersecurity of our facilities, which could adversely affect our ability to manage our business effectively. Instability in the financial markets as a result of terrorism, war, natural disasters, pandemic, credit crises, recession or other factors also could result in a decline in energy consumption or interruption of fuel or the supply chain. In addition, the implementation of security guidelines and measures has resulted in and is expected to continue to result in increased costs. We could be significantly affected by the outbreak of a pandemic. We have plans in place to respond to a pandemic. However, depending on the severity of a pandemic and the resulting impacts to workforce and other resource availability, the ability to operate our generating assets could be adversely affected. In addition, we maintain a level of insurance coverage consistent with industry practices against property, casualty **,** and cybersecurity losses subject to unforeseen occurrences or catastrophic events that could damage or destroy assets or interrupt operations. However, there can be no assurance that the amount of insurance will be adequate to address such property and casualty losses. Our business is capital intensive, and our assets could require significant expenditures to maintain and are subject to operational failure, which could result in potential liability. Our business is capital intensive and requires significant investments in electric generating facilities. Equipment, even if maintained in accordance with good industry practices, is subject to operational failure, including events that are beyond our control, and could require significant expenditures to remedy. Our consolidated financial

statements could be negatively affected if we were unable to effectively manage our capital projects or raise the necessary capital. See ITEM 7. MANAGEMENT' S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS – Liquidity and Capital Resources for additional information regarding our potential future capital expenditures. Our performance could be negatively affected if we fail to attract and retain an appropriately qualified workforce. Certain events, such as an employee strike, loss of employees, loss of contract resources due to a major event, and an aging workforce without appropriate replacements, could lead to operating challenges and increased costs for us. The challenges include lack of resources, loss of knowledge **,** and a lengthy time period associated with skill development. In this case, costs, including costs for contractors to replace employees, productivity costs and safety costs, could arise. We are particularly affected due to the specialized knowledge required of the technical and support employees for generation operations. **In 2024 we announced the planned restart of our Crane nuclear generation facility which will require hiring skilled employees to restart and operate the plant. Our ability to source qualified employees will impact the timing and cost of the restart. If we are unable to source the necessary workforce it could result in unfavorable financial results and / or a delay to Crane' s restart.** We could make acquisitions or investments in new business initiatives and new markets, which may not be successful or achieve the intended financial results. We could continue to pursue growth in our existing businesses and markets and further diversification across the competitive energy value chain. This could include opportunistic carbon- free energy acquisitions, creating new value from our existing fleet through nuclear uprates, renewable repowerings, co- location of customer load, growing sustainability solutions for our customers, and investment opportunities in other emerging technologies and innovation. Such initiatives could involve significant risks and uncertainties, including distraction of management from current operations, inadequate return on capital, and unidentified issues not discovered during diligence performed prior to launching an initiative or entering a market. Additionally, it is possible that FERC, state public utility commissions **,** or others could impose certain other restrictions on such transactions. All these factors could result in higher costs or lower revenues than expected, resulting in lower than planned returns on investment. **We are actively pursuing the restart of our Crane nuclear generation facility. The restart is estimated to cost $ 1. 6 billion and is subject to certain regulatory approvals, including the NRC comprehensive safety and environmental review, as well as permits from relevant state and local agencies. Additionally, through separate requests, we will pursue obtaining a renewed license to operate the plant and a FERC interconnection agreement. Failure to obtain the necessary approvals could result in the impairment of amounts capitalized. The restart is a complex undertaking including procuring or restoring specialized components on a critical timeline. Failure to meet contractual timelines could result in significant penalties. Overages in costs or unforeseen issues could result in lower than planned returns on the investment.** Risks Related to ~~Our~~ **the Proposed Acquisition of Calpine We may encounter difficulties in satisfying the conditions for the completion of the Merger Agreement, including obtaining the necessary regulatory approvals, within the expected time frame or at all. Such challenges could delay the completion of the merger or impose conditions that could cause abandonment of the Merger Agreement. Consummation of the merger is subject to the satisfaction or waiver of specified closing conditions, including: (1) the receipt of regulatory approvals required to consummate the Merger Agreement; (2) the** ~~Separation~~ **expiration or termination of the applicable waiting period under the HSR Act; and (3) other customary closing conditions. Completion of the merger is conditioned upon the receipt of consents, orders, approvals or clearances, to the extent required,** from ~~Exelon The~~ **various regulatory authorities, including DOJ, FERC, and public utility commissions or similar entities in certain states in which the companies operate. We cannot provide assurance that all required regulatory approvals will be obtained or that these approvals will not contain** terms ~~in~~**, conditions** ~~our~~ **or restrictions that** ~~agreements with Exelon could~~ **would** be ~~less beneficial than~~ **unacceptable and, accordingly,** the **merger** ~~terms we~~ may **be delayed** ~~have otherwise received from unaffiliated third parties. The agreements entered with Exelon in connection with the separation, including the separation agreement, a tax matters agreement, an employee matters agreement, and a transition services agreement, were prepared in the context of the separation while we were still a wholly owned subsidiary of Exelon. Accordingly, during the period in which the terms of those agreements were prepared, we did not have an independent Board of Directors or a management team that was independent of Exelon. As a result, the terms of those agreements~~ may not **be consummated** ~~reflect terms that would have resulted from negotiations between unaffiliated third parties. Exelon may fail to perform under various transaction agreements that were executed as part of the separation, which could cause us to incur expenses or losses we would not otherwise incur~~. In connection with the ~~separation~~ **required regulatory approvals** and ~~prior~~ to ~~the distribution~~ **prevent market power concerns**, we **are expecting to sell certain of** ~~and Exelon entered into the separation agreement and entered into various other~~ **the** agreements, including a tax matters agreement, an employee matters agreement, and a transition services agreement **combined company' s PJM natural- gas- fired generating assets following the closing of the merger**. The ~~separation~~ **Merger** ~~agreement~~ **Agreement** ~~,~~ **generally permits us to terminate** the **Merger** ~~tax matters agreement~~ **Agreement** ~~and~~ **if** the **final terms** ~~employee matters agreement determined the allocation~~ of **any of** ~~assets and liabilities between~~ the **required regulatory consents** ~~companies following the separation for~~ **or approvals** ~~those respective areas and~~ include any ~~necessary indemnifications related~~ **Burdensome Condition (as defined in the Merger Agreement). In addition, the Merger Agreement provides that either we or Calpine could terminate the Merger Agreement if the merger is not completed by December 31, 2025 (which date may be automatically extended** to ~~liabilities and~~ **June 1, 2026, as further provided in the Merger Agreement). If the Merger Agreement is terminated under certain circumstances due to the failure to obtain regulatory approvals, the failure to obtain regulatory approvals without Burdensome Conditions, or the breach by us of our** obligations **in respect of obtaining regulatory approvals** ~~. We will rely on Exelon to satisfy its performance and payment obligations under these agreements. If Exelon is unable or unwilling to satisfy its obligations under these agreements, including its indemnification obligations~~, we ~~could~~ **would be** ~~incur operational difficulties and / or losses. In connection with the separation into two public companies, we and Exelon indemnified each other for certain liabilities. If we are~~ required to pay ~~under~~ **Calpine a termination fee of $ 500 million as liquidated damages. Further,** ~~these~~ **the share price of** ~~indemnities to Exelon,~~ our **common stock** ~~financial results could be negatively impacted. The Exelon indemnities~~ may **decline** ~~not be sufficient~~ to ~~hold us harmless from~~ the ~~full amount of liabilities for which Exelon~~ **extent that the current market price reflects an assumption by the market that the merger** will be ~~allocated responsibility, and Exelon may not be able to satisfy its indemnification obligations in the future. Pursuant to the separation agreement and certain other agreements between Exelon and us, each party will agree to indemnify the other for certain liabilities, in each case for uncapped amounts. Indemnities that we may be required to provide Exelon are not subject to any cap, may be significant and could negatively impact our business. Third parties could also seek to hold us responsible for any of the liabilities that Exelon has agreed to retain. Any amounts we are required to pay pursuant to these indemnification obligations and other liabilities could require us to divert cash that would otherwise have been used in furtherance of our operating business. Further, the indemnities from Exelon for our benefit may not be sufficient to protect us against the full amount of such liabilities, and Exelon may not be able to fully satisfy its indemnification obligations. Moreover, even if we ultimately succeed in recovering from Exelon any amounts for which we are held liable, we may be temporarily required to bear these losses ourselves. Each of these risks could negatively affect our business, results of operations and financial condition. We may fail to have necessary systems and services in place when certain of the transaction agreements expire. If we do not have in place our own systems and services, or if we do not have agreements with other providers of these services once certain separation transaction agreements expire, we may not be able to operate our business effectively, and our profitability may decline. We are in the process of creating our own, or engaging third parties to provide, systems and services to replace many of the systems and services that Exelon currently provides to us. We may incur temporary interruptions in business operations if we cannot transition effectively from Exelon' s existing operating systems, databases and programming languages that support these functions to our own systems. Our failure to implement the new systems and transition our data successfully and cost- effectively could disrupt our business operations and have a material adverse effect on our profitability. In addition, our costs for the operation of these systems may be higher than the amounts reflected in our historical financial statements. ITEM 4. MINE SAFETY DISCLOSURESNot Applicable. PART II ITEM 5. MARKET FOR REGISTRANT' S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES CEG Parent Our common stock is listed on the Nasdaq (trading symbol: CEG). As of January 31, 2024 there were 316, 666, 538 shares of common stock outstanding and approximately 70, 439 record holders of common stock. Stock Performance Graph The performance graph below illustrates a two- year comparison of cumulative total returns based on an initial investment of $ 100 in CEG Parent common stock, as compared with the S & P 500 Stock Index and the Philadelphia Utility Sector Index, or UTY, for the period 2022 through 2023. This performance chart assumes: • $ 100 invested on February 1, 2022, in CEG Parent common stock, the S & P 500 Stock Index, and the UTY, and • All dividends are reinvested. Value of Investment2 / 1 / 2212 / 31 / 2212 / 31 / 23CEG $ 100 $ 175 $ 240S & P 500 $ 100 $ 86 $ 108UTY $ 100 $ 107 $ 96 Constellation As of January 31, 2024, CEG Parent directly held the entire membership interest in Constellation. Dividends As a Pennsylvania corporation, Constellation is subject to certain restrictions on dividends under Pennsylvania corporate law. Generally, a corporation may only pay dividends under the Pennsylvania Business Corporation Law if the total assets of the corporation would be more than the sum of its total liabilities plus the amount that would be needed, if the corporation were to be dissolved at the time as of which the distribution is measured, to satisfy the preferential rights upon dissolution of shareholders whose preferential rights are superior to those receiving the distribution. Constellation' s revolving credit facility contains a covenant requiring it to maintain a consolidated leverage ratio calculated as the ratio of its consolidated indebtedness to its consolidated earnings before interest, taxes, depreciation and amortization. Maintaining that ratio may affect Constellation' s ability to make distributions to the CEG Parent. Our Board of Directors approved an updated dividend policy for 2024. The 2024 quarterly dividend will be $ 0. 3525 per share. The following table sets forth Constellation' s quarterly cash dividends per share paid during 2023 and 2022. 20232022Fourth QuarterThird QuarterSecond QuarterFirst QuarterFourth QuarterThird QuarterSecond QuarterFirst Quarter $ 0. 2820 $ 0. 2820 $ 0. 2820 $ 0. 2820 $ 0. 1410 $ 0. 1410 $ 0. 1410 $ 0. 1410 First Quarter 2024 Dividend On February 26, 2024, our Board of Directors declared a regular quarterly dividend of $ 0. 3525 per share on our common stock for the first quarter of 2024. The dividend is payable on Tuesday, March 19, 2024, to shareholders of record as of 5 p. m. Eastern time on Friday, March 8, 2024. Unregistered Sales of Equity Securities None. Issuer Purchases of Equity Securities Our Board of Directors considers share buybacks to be one of several ways we can provide value to our shareholders through our deployment of capital. The first is to maintain strong investment grade metrics in addition to the pursuit of organic and inorganic growth consistent with our role as a leader in the clean energy transition. Our deployment of capital can also include the repurchase of shares if they can be acquired at attractive prices and increases to our dividend, which currently targets a 10 % annual growth rate. We take into account the excise taxes imposed and other administrative costs when assessing our repurchase program. We believe that our share buyback policy is in the best interests of our company and its shareholders and is also consistent with the interests of our other stakeholders. On February 16, 2023, as part of our capital allocation plan, our Board of Directors announced a share repurchase program with a $ 1 billion authority without expiration. Repurchases under this program commenced in March 2023. Shares repurchased were made through open market transactions and purchases pursuant to a Rule 10b5- 1 trading plan. All repurchased shares were constructively retired and cancelled. On December 12, 2023, our Board of Directors approved an increase to our previously announced $ 1 billion share repurchase program, authorizing the repurchase of up to an additional $ 1 billion of the Company' s outstanding common stock. On November 9, 2023, we entered into a stock purchase plan for the purchase of shares of our common stock (November 2023 Stock Purchase Plan), designed to comply with Rule 10b5- 1 under the Exchange Act. Under its terms, the November 2023 Stock Purchase Plan would expire at the later of the completion of the maximum purchase amount of $ 250 million of shares of our common stock, or December 31, 2023. During 2023, we repurchased from the open market approximately 10. 6 million shares of our common stock for a total cost, inclusive of taxes and transaction costs, of $ 1 billion. As of December 31, 2023, there was $ 1 billion of remaining authority to repurchase shares. The following table provides information regarding our share repurchases under the program during the three months ended December 31, 2023. All repurchases disclosed were made pursuant to the November 2023 Stock Purchase Plan: PeriodTotal Number of Shares Purchased (a) Average Price Paid per Share (b) Approximate Dollar Value of Shares that May Yet Be Purchased Under the Programs (c) October 1, 2023 to October 31, 2023 — $ — $ 244, 000, 000 November 1, 2023 to November 30, 2023993, 800 $ 122. 84 $ 121, 000, 000 December 1, 2023 to December 31, 2023 (d) 1, 031, 569 $ 115. 75 $ 1, 000, 000, 000 Total2, 025, 369 $ 119. 22 $ 1, 000, 000, 000 _____ (a) We have not made any purchases of shares other than in connection with the publicly announced share repurchase program described above. (b) Average price paid per share for open market transactions excludes taxes and commissions. (c) Approximate dollar value of shares that may yet be purchased under the program includes taxes and commissions. (d) Includes increase of additional $ 1 billion of share repurchase authority. ITEM 6. RESERVEDNot Applicable. Item 7. MANAGEMENT' S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Dollars in millions, unless otherwise noted) Executive Overview We are a supplier of carbon- free energy. Our generating capacity primarily consists of nuclear, wind, solar, natural gas and hydroelectric assets. Through our integrated business operations, we sell electricity, natural gas, and other energy- related products and sustainable solutions to various types of customers, including distribution utilities, municipalities, cooperatives, and commercial, industrial, governmental, and residential customers in competitive markets across multiple geographic regions. We have five reportable segments: Mid- Atlantic, Midwest, New York, ERCOT and Other Power Regions. The following Management' s Discussion and Analysis of Financial Condition and Results of Operations summarizes results for the year ended December 31, 2023 compared to the year ended December 31, 2022. For discussion of the year ended December 31, 2022 compared to the year ended December 31, 2021, refer to ITEM 7. MANAGEMENT' S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS in the 2022 Form 10- K, which was filed with the SEC on February 16, 2023. Capital Allocation and Growth Announcements We are announcing our capital allocation strategy for 2024 and 2025 supporting our core principles outlined in our Strategy and Outlook discussion. See ITEM 1. BUSINESS – Constellation' s Strategy and Outlook for additional information about our strategy. We will increase the quarterly dividend by 25 % to $ 0. 3525 per share starting in 2024, while targeting growth of 10 % annually. We are allocating capital towards our best- in- class generation fleet by committing $ 875 million of growth capital expenditures over the next two years, including nuclear uprates and license renewals, wind repowering, and hydrogen with policy support. These organic growth~~

opportunities are projected to exceed our double- digit return threshold. In our commitment to return value to shareholders, we have also approved an increase to our previously announced $ 1 billion share buyback program, authorizing the repurchase of up to an additional $ 1 billion of company stock. See Note 20 — Shareholders' Equity of the Combined Notes to the Consolidated Financial Statements for additional information on completed and authorized share buybacks. Significant Transactions and Developments On February 21, 2021, Exelon' s Board of Directors approved a plan to separate its competitive generation and customer- facing energy businesses into a stand- alone publicly traded company (the" separation"). Exelon completed the separation on February 1, 2022. In order to govern the ongoing relationships between us and Exelon after the separation, and to facilitate an orderly transition, we and Exelon have entered into several agreements, including a Separation Agreement, Tax Matters Agreement, a Transition Services Agreement, and an Employee Matters Agreement and other ancillary agreements. See Note 1 — Basis of Presentation of the Combined Notes to Consolidated Financial Statements for additional information. We incurred separation costs of $ 101 million and $ 140 million for the years ended December 31, 2023 and 2022, respectively, which are primarily recorded in Operating and maintenance expense. The separation costs are primarily comprised of system- related costs, third- party costs paid to advisors, consultants, lawyers, and other experts assisting in the separation. Share Repurchase Program On February 16, 2023, our Board of Directors announced a share repurchase program with a $ 1 billion authority without expiration. Repurchases under this program commenced in March 2023. On December 12, 2023, the Board of Directors approved an increase to our previously announced $ 1 billion share repurchase program, authorizing the repurchase of up to an additional $ 1 billion of our outstanding common stock. During 2023, we repurchased from the open market 10. 6 million shares of our common stock for a total cost, inclusive of taxes and transaction costs, of $ 1 billion. See Note 20 — Shareholders' Equity of the Combined Notes to Consolidated Financial Statements for additional information. Acquisition of Joint Ownership in South Texas Project On November 1, 2023, we completed the acquisition of NRG South Texas LP (renamed and converted as Constellation South Texas, LLC), which owns a 44 % undivided ownership interest in the jointly owned STP, a 2, 645 MW, dual- unit nuclear plant located in Bay City, Texas. The net cash paid was $ 1. 65 billion, after certain purchase price adjustments. This acquisition is complementary to and aligned strategically with our existing clean energy business operations . See Note 2 — Mergers, Acquisitions, and Dispositions of the Combined Notes to the Consolidated Financial Statements for additional information on this acquisition. The STP operating results are included in the ERCOT operating segment. See Note 5 — Segment Information additional information on our reportable segments. Revenue Recognized for Illinois ZECs Delivered in Prior Planning Years Our Clinton and Quad Cities units contract with certain utilities in Illinois which requires delivery of all ZECs produced during each planning year (June 1 to May 31), with total compensation limited by an annual cap for each planning year designed to limit the cost of ZECs to each utility' s customers. ZECs delivered that, if paid, would result in the annual cap being exceeded may be paid in subsequent years at the vintage year price as long as the payments would not exceed the annual cap in the year paid. In each planning year since the program commenced on June 1, 2017, we delivered ZECs to the utilities in excess of the annual compensation cap. The ZEC price and annual compensation cap effective for each planning year are administratively determined by the IPA. In 2023, we recognized $ 218 million of revenue as a receivable for ZECs delivered in prior planning years, with payment expected in the third quarter of 2024. As of December 31, 2023, this receivable is included within Customer accounts receivable, net in the Consolidated Balance Sheets. See Note 4 — Revenue from Contracts with Customers of the Combined Notes to the Consolidated Financial Statements for additional information on this acquisition. Other Key Business Drivers Russia and Ukraine Conflict We are closely monitoring developments of the Russia and Ukraine conflict including United States, United Kingdom, European Union, and Canadian sanctions, and pending legislation that may impact exports and imports of Russian nuclear fuel supply and enrichment activities, as well as the potential for Russia to limit energy deliveries. To- date, our nuclear fuel deliveries have not been affected by the Russia and Ukraine conflict. Our nuclear fuel is obtained predominantly through long- term uranium supply and service contracts. We work with a diverse set of domestic and international suppliers years in advance to procure our nuclear fuel and generally have enough nuclear fuel to support all our refueling needs for multiple years regardless of sanctions. Recognizing the potential for the continuing conflict to impact our longer- term security and cost of supply, we have entered into contracts to increase the size of our nuclear fuel inventory. We are taking this affirmative action by working with our diverse set of suppliers to ensure we can secure the nuclear fuel needed to continue to operate our nuclear fleet long- term and provide the necessary fuel to bridge potential Russian supply disruption through 2028, which is the date multiple suppliers are expected to have incremental additional capacity online. We are also continuing to work with federal policymakers and other stakeholders to facilitate the expansion of the domestic nuclear fuel cycle within the United States to improve carbon- free energy security. The preparation of financial statements in conformity with GAAP requires that management apply accounting policies and make estimates and assumptions that affect results of operations and the amounts of assets and liabilities reported in the consolidated financial statements. Management believes that the accounting policies described below require significant judgment in their application or incorporate estimates and assumptions that are inherently uncertain and that may change in subsequent periods. Additional information on the application of these accounting policies can be found in the Combined Notes to Consolidated Financial Statements. Nuclear Decommissioning Asset Retirement Obligations The AROs associated with decommissioning our nuclear units were $ 13. 9 billion at December 31, 2023. The authoritative guidance requires that we estimate our obligation for the future decommissioning of our nuclear generating plants. To estimate that liability, we use an internally- developed, probability- weighted, discounted cash flow model which, on a unit- by- unit basis, considers multiple decommissioning outcome scenarios. As a result of nuclear plant retirements in the industry, in recent years, nuclear operators and third- party service providers are obtaining more information about costs associated with decommissioning activities. At the same time, regulators are gaining more information about decommissioning activities which could result in changes to existing decommissioning requirements. In addition, as more nuclear plants are retired, it is possible that technological advances will be identified that could create efficiencies and lead to a reduction in decommissioning costs. The amount of NDT funds could also impact the timing of the decommissioning activities. Additionally, certain factors such as changes in regulatory requirements during plant operations or the profitability of a nuclear plant could impact the timing of plant retirements. These factors could result in material changes to our current estimates as more information becomes available and could change the timing of plant retirements and the probability assigned to the decommissioning outcome scenarios. The nuclear decommissioning obligation is adjusted on a regular basis due to the passage of time and revisions to the key assumptions for the expected timing and / or estimated amounts of the future undiscounted cash flows required to decommission the nuclear plants, based upon the following methodologies and significant estimates and assumptions: Decommissioning Cost Studies. We use unit- by- unit decommissioning cost studies to provide a marketplace assessment of the expected costs (in current year dollars) and timing of decommissioning activities, which are validated by comparison to current decommissioning projects within the industry and other estimates. Decommissioning cost studies are updated, on a rotational basis, for each of our nuclear units at least every five years, unless circumstances warrant more frequent updates. As part of the annual cost study update process, we evaluate newly assumed costs or substantive changes in previously assumed costs to determine if the cost estimate impacts are sufficiently material to warrant application of the updated estimates to the AROs across the nuclear fleet outside of the normal five- year rotating cost study update cycle. Cost Escalation Factors. We use cost escalation factors to escalate the decommissioning costs from the decommissioning cost studies discussed above through the assumed decommissioning period for each of the units. Cost escalation studies, updated on an annual basis, are used to determine escalation factors, and are based on inflation indices for labor, equipment and materials, energy, LLRW disposal, and other costs. All the nuclear AROs are adjusted each year for updated cost escalation factors. Probabilistic Cash Flow Models. Our probabilistic cash flow models include the assignment of probabilities to various scenarios for decommissioning cost levels, decommissioning approaches, and timing of plant shutdown on a unit- by- unit basis. Probabilities assigned to cost levels include an assessment of the likelihood of costs 20 % higher (high- cost scenario) or 15 % lower (low- cost scenario) than the base- cost scenario. The assumed decommissioning scenarios generally include the following three alternatives: (1) DECON, which assumes major decommissioning activities begin shortly after the cessation of operation, (2) Shortened SAFSTOR, which generally assumes a 30- year delay prior to onset of major decommissioning activities, and (3) SAFSTOR, which assumes the nuclear facility is placed and maintained in such condition during decommissioning so that the nuclear facility can be safely stored and subsequently decontaminated within 60 years after cessation of operations. In each decommissioning scenario, spent fuel is transferred to dry cask storage as soon as possible until DOE acceptance for disposal. The actual decommissioning approach selected will be determined at the time of shutdown and may be influenced by multiple factors including the funding status of the NDT funds at the time of shutdown and regulatory or other commitments. The plant shutdown timing scenarios consider four alternatives: (1) the probability of early plant retirement, (2) the probability of operating through the original 40- year nuclear license term, (3) the probability of operating through an initial 20- year license renewal term, and (4) the probability of a second, 20- year license renewal term. As power market and regulatory environment developments occur, we evaluate and incorporate, as necessary, the impacts of such developments into our nuclear ARO assumptions and estimates. Our probabilistic cash flow models also include an assessment of the timing of DOE acceptance of SNF for disposal. We currently assume DOE will begin accepting SNF from the industry in 2035. The SNF acceptance date assumption is based on management' s estimates of the amount of time required for DOE to select a site location and develop the necessary infrastructure for long- term SNF storage. For additional information regarding SNF, see Note 19 — Commitments and Contingencies of the Combined Notes to Consolidated Financial Statements. Discount Rates. The probability- weighted estimated future cash flows for the various assumed scenarios are discounted using our specific credit- adjusted, risk- free rates (CARFR) or a AAA- rated U. S. company proxy CARFR for the units that maintain the ability to collect decommissioning costs from utility customers (former PECO and STP units). We initially recognize an ARO at fair value and subsequently adjust it for changes to estimated costs, timing of future cash flows and modifications to decommissioning assumptions. The ARO is not required or permitted to be re- measured for changes in the CARFR that occur in isolation. Increases in the ARO due to upward revisions in estimated undiscounted cash flows are considered new obligations and are measured using a current CARFR as the increase creates a new cost layer within the ARO. Any decrease in the estimated undiscounted future cash flows relating to the ARO are treated as a modification of an existing ARO cost layer and, therefore, are measured using the average historical CARFR rates used in creating the initial ARO cost layers. If all our future nominal cash flows associated with the ARO were to be discounted at the current prevailing CARFR, the obligation would decrease from approximately $ 13. 9 billion to approximately $ 11. 3 billion. The following table illustrates the significant impact that changes in the CARFR, when combined with changes in projected amounts and expected timing of cash flows, can have on the valuation of the ARO: Change in the CARFR applied to the annual ARO updateIncrease (Decrease) to ARO as of December 31, 20232022 CARFR rather than the 2023 CARFR $ 520 2023 CARFR increased by 50 basis points (290) 2023 CARFR decreased by 50 basis points350 ARO Sensitivities. Changes in the assumptions underlying the ARO could materially affect the decommissioning obligation. The impact of a change in any one of these assumptions to the ARO is highly dependent on how the other assumptions may correspondingly change. The following table illustrates the effects of changing certain ARO assumptions while holding all other assumptions constant: Change in ARO AssumptionIncrease (Decrease) to ARO as of December 31, 2023Cost escalation studiesUniform increase in escalation rates of 50 basis points $ 1, 860 Probabilistic cash flow modelsIncrease the estimated costs to decommission the nuclear plants by 10 percent770 Increase the likelihood of the DECON scenario by 10 percent and decrease the likelihood of the SAFSTOR scenario by 10 percent (a) 140 Shorten each unit' s probability- weighted operating life assumption by 10 percent (b) 220 Extend the estimated date for DOE acceptance of SNF to 2040 (80) (a) Excludes any sites in which management has committed to a specific decommissioning approach. (b) Excludes any retired sites. See Note 1 — Basis of Presentation and Note 10 — Asset Retirement Obligations of the Combined Notes to Consolidated Financial Statements for additional information regarding accounting **the status of the transaction. We cannot assure that we will continue paying dividends at the current rate. We currently expect to pay dividends in an amount consistent with the dividend policy in effect prior to the completion of the merger. However, there is no assurance that our shareholders will receive the same dividends following the merger** for nuclear AROs **reasons that may include capital spending plans, financing agreements, cash flow or financial position** . Purchase Accounting In accordance **Decisions on whether, when, and in which amounts to make any future distributions will remain at all times entirely at the discretion of our Board of Directors, which reserves the right to change our dividend practices at any time and for any reason. Our current shareholders will have a reduced ownership and voting power after the merger. We will issue or reserve for issuance 50 million newly issued shares of common stock to Calpine stockholders as noted in the Merger Agreement (including shares of our common stock issuable pursuant to Calpine restricted stock units and other equity- based awards). Based on the number of shares of our common stock as of the transaction announcement date, our current shareholders and former Calpine stockholders would own approximately 85 % and 15 % of the outstanding shares of Constellation common stock, respectively, immediately following the consummation of the merger. Each current shareholder will remain a shareholder of Constellation** with **a percentage ownership of** authoritative guidance, the assets acquired and liabilities assumed in an acquired business are recorded at their **the** estimated fair values on **combined company that will be smaller than** the **shareholder** date of acquisition. Determining the fair value of assets acquired and liabilities assumed requires management ' s judgment **percentage of Constellation prior to the merger. As a result of this reduced ownership percentage** , often utilizes independent valuation experts and involves **our current shareholders will have less influence on the policies of the combined company than** the **they did prior to the transaction. The merger may not be accretive to earnings and may** use **cause dilution to our earnings per share, which may negatively affect the market price** of **our common stock. We currently anticipate that the merger will be accretive to earnings per share in 2026, which is expected to be the first full year following completion of the merger. This expectation is based on preliminary estimates that are subject to change. We may also encounter additional transaction and integration- related costs, may fail to realize all the benefits anticipated in the merger, or be subject to other factors that affect preliminary estimates. Any of these factors could negatively impact our operating results or decrease or delay the expected accretive effect of the merger and contribute to a decrease in the price of our common stock. We have incurred and will incur** significant **transaction** and assumptions **merger- related costs, and these costs may be more than anticipated, negatively impacting our operating results. We have incurred and expect to incur non-**

recurring costs associated with **consummation** ~~respect to the timing and amounts~~ of ~~future cash inflows and outflows, discount rates, market prices and asset lives, among other~~ ~~-~~ **the** ~~items~~ **transaction** ~~. Changes to~~ **Most of** these ~~estimates~~ **costs will be transaction costs, including fees paid to financial** and ~~assumptions could result in material~~ **legal advisors related to the merger and related financing arrangements, and employment- related costs, including** ~~changes~~ ~~-~~ **change- in- control related payments** ~~to the fair value of assets and liabilities as of acquisition date. The judgments~~ made **to certain Calpine executives. We will also incur transition costs related to formulating integration plans. We may incur additional unanticipated costs** in the **integration of the businesses, which could negatively impact our operating results. We expect that the** ~~determination~~ ~~-~~ **elimination** of **costs** ~~the estimated fair value assigned to the assets acquired and liabilities assumed~~ , as well as the **realization** ~~estimated useful life~~ of ~~each~~ **other efficiencies related to the integration of the businesses, will exceed incremental transaction and merger- related costs over time. We may not realize all the expected benefits of the merger because of integration challenges. The success of the merger will depend, in part, on our ability to realize all or some of the anticipated benefits from integrating Calpine' s business with our existing businesses. The integration process will be complex, costly and time- consuming. The challenges associated with integrating the operations of Calpine' s business include, among others: • customer retention risk as well as the inability to finalize certain transactions currently in progress between Calpine and its customers; • delay in implementation of our business plan for the combined business; • unanticipated issues or costs in integrating financial, information technology, communications and other systems; • complexities associated with managing the larger, more complex, combined business; • potential unknown liabilities and unforeseen expenses, delays or regulatory conditions associated with the merger; • integrating relationships with industry contacts and business partners; • possible inconsistencies in standards, controls, procedures and policies, and compensation structures between Calpine and us; and • performance of Calpine' s generating** ~~asset~~ **assets** and **the costs to operate and maintain** ~~the~~ **them** ~~duration of each liability~~ . **relative to expectations. In addition, the companies have operated and, until the completion of the merger, will continue to operate, independently. It is possible that the integration process** could ~~significantly~~ **result in the disruption of, or the loss of momentum in, our ongoing businesses or inconsistencies in standards, controls, procedures and policies, which could negatively** impact the **combined company** ~~financial statements in periods after acquisition, such as through depreciation and amortization expense~~ . **Uncertainties associated with** ~~Authoritative guidance provides that~~ the **merger** ~~allocation of the purchase price~~ may **cause** be modified up to one year after the acquisition date as more information is obtained about the fair value of assets acquired and liabilities assumed. See Note 2 — Mergers, Acquisitions, and Dispositions of the Combined Notes to Consolidated Financial Statements for additional information. The difference between the purchase price amount and the net fair value of assets acquired and liabilities assumed is recognized as goodwill on the balance sheet if the purchase price exceeds the estimated net fair value or as ~~a bargain purchase gain on the income statement if the purchase price is less~~ **loss of management personnel** ~~than the estimated net fair value. Goodwill is assigned to reporting units that are expected to benefit from the acquisition. Goodwill is not amortized, instead it is subject to an~~ **and** ~~impairment assessment at least annually to consider whether the~~ **other key employees** ~~reporting unit fair value is more likely than not less than the carrying amount. See Note 1 — Basis of Presentation~~ , **which could adversely affect** ~~Note 2 — Mergers, Acquisitions, and Dispositions, and Note 13 — Intangible Assets of~~ the **future business and operations of the** ~~Combined~~ **combined company** ~~Notes to Consolidated Financial Statements for additional information~~ . We are **dependent** ~~required to perform an assessment for impairment of goodwill at least annually or more frequently if an event occurs or circumstances change that would more likely than not reduce the fair value of the reporting units below their carrying amount. A reporting unit is an operating segment or one~~ ~~-~~ **on** ~~level below~~ **the experience** ~~an~~ **and industry knowledge of our officers** ~~operating segment (known as a component)~~ and ~~is the~~ **other key employees to execute our business plans** ~~level at which goodwill is tested for impairment~~ . Our **success until** ~~operating segments and reporting units are Mid- Atlantic, Midwest, New York, ERCOT, and Other~~ ~~-~~ **the merger and** Power Regions. See Note 5 — Segment Information of the ~~Combined~~ **combined company** ~~Notes to Consolidated Financial Statements for additional information on our segments. Goodwill is primarily reported within our ERCOT segment. See Note 13 — Intangible Assets of the Combined Notes to Consolidated Financial Statements for additional information. Entities assessing goodwill for impairment have the option of first performing a qualitative assessment to determine whether a quantitative assessment is necessary. As part of the qualitative assessment, we evaluate, among other things, management~~ ' s ~~best estimate~~ **success after the merger will depend in part upon our ability to retain key management personnel and other key employees** of ~~projected operating~~ **both companies. Current and prospective employees may experience uncertainty about their future roles within the combined company following completion of the merger, which may have** ~~and~~ ~~-~~ **an** ~~capital cash flows~~ **adverse effect on our ability to attract** ~~for~~ ~~-~~ **or** ~~the reporting units and changes in certain~~ ~~-~~ **retain key management and** ~~market conditions, including the~~ **other** ~~discount rate~~ **key personnel** . **Accordingly** ~~Significant assumptions used in these fair value analyses include discount and growth rates~~ , ~~energy prices, and projected operating and capital cash flows. While the 2023 annual assessments indicated~~ no **assurance can** ~~impairments, certain assumptions used in the assessment are highly sensitive to changes. Adverse regulatory actions or changes in significant assumptions could potentially result in future impairments of our goodwill, which could~~ be ~~material. Unamortized Energy Contract Assets~~ **given that the combined company will be able to attract or retain key management personnel** and ~~Liabilities Unamortized energy contract assets and liabilities represent the~~ **other key employees to the same extent** ~~remaining unamortized balances of non- derivative energy contracts and fuel contracts~~ that we have ~~acquired~~ **previously been able to attract or retain our employees** . The **merger may divert significant attention** ~~initial amount recorded represents the difference between the fair value~~ of ~~the contracts at the time~~ **our management team, which could detract from efforts to meet business goals. The pursuit** of ~~acquisition and~~ the ~~contract value based~~ **merger and the preparation for the integration could place a burden** on **management** ~~the terms of each contract. The unamortized energy contract assets~~ and **internal resources** ~~liabilities are amortized over the life of the contract in relation to the expected realization of the underlying cash flows~~ . **Any** ~~Amortization of the unamortized energy and fuel contract assets and liabilities are recorded through Operating revenues or Purchased power and fuel expense, depending on the nature of the underlying contract. See Note 13 — Intangible Assets of the Combined Notes to Consolidated Financial Statements for additional information. Impairment of Long- Lived Assets We regularly monitor and evaluate the carrying value of long- lived assets or asset groups for recoverability whenever events or changes in circumstances indicate that the carrying value of those assets may not be recoverable. Indicators of potential impairment may include a deteriorating business climate, including, but not limited to, declines in energy prices, condition of the asset, or plans to dispose of a long- lived asset significantly before the end of its useful life. The review of long- lived assets or asset groups for impairment utilizes~~ significant **diversion** ~~assumptions about operating strategies and estimates~~ of **management attention away** ~~future cash flows, which require assessments of current and projected market conditions. Forecasting future cash flows requires assumptions regarding forecasted commodity prices for the sale of power and purchases of fuel and the expected operations of assets. A variation in the assumptions used could lead to a different conclusion regarding the recoverability of an asset or asset group and, thus, could potentially result in material future impairments. An impairment evaluation is based on an undiscounted cash flow analysis at the lowest level at which cash flows of the long- lived assets or asset groups are largely independent of the cash flows of other assets and liabilities. The lowest level of independent cash flows is determined by the evaluation of several factors, including the geographic dispatch of the generation units and the hedging strategies related to those units. The cash flows~~ from ~~our generating units are generally evaluated at a regional portfolio level (asset group) given the interdependency of cash flows generated from the customer supply and risk management activities within each region. In certain cases, our generating assets may be evaluated on an individual basis where those assets are contracted on a long- term basis with a third- party and operations are independent of other generating assets (typically contracted renewable generation). On a quarterly basis, we assess our long- lived assets or asset groups for indicators of potential impairment. If indicators are present for a long- lived asset or asset group, a comparison of the undiscounted expected future cash flows to the carrying value is performed. When the undiscounted cash flow analysis indicates the carrying value of a long- lived asset or asset group may not be recoverable, the amount of the impairment loss is determined by measuring the excess of the carrying amount of the long- lived asset or asset group over its fair value. The fair value of the long- lived asset or asset group is dependent upon a market participant' s view of the exit price of the asset or asset groups. This includes significant assumptions of the estimated future cash flows generated by the asset or asset groups and market discount rates. Events and circumstances often do not occur as expected, resulting in differences between prospective financial information and actual results, which may be material. The determination of fair value is driven by both internal assumptions that include significant unobservable inputs, such as revenue and generation forecasts, projected capital, maintenance expenditures, and discount rates, as well as information from various public, financial and industry sources. See Note 12 — Asset Impairments of the Combined Notes to Consolidated Financial Statements for a discussion of asset impairment assessments. Depreciable Lives of Property, Plant, and Equipment We have significant investments in electric generation assets. These assets are generally depreciated on a straight- line basis, using the group, composite or unitary methods of depreciation. The group approach is typically for groups of similar assets that have approximately the same useful lives and the composite approach is used for heterogeneous assets that have different lives. Under both methods, a reporting entity depreciates the assets over the average life of the assets in the group. The estimation of asset useful lives requires management judgment, supported by formal depreciation studies of historical asset retirement experience. Depreciation studies are generally conducted periodically if an event, regulatory action, or change in retirement patterns indicate an update is necessary. Along with depreciation study results, management considers expected future energy market conditions and generation plant operating costs and capital investment requirements in determining the estimated service lives of our generating facilities and reassesses the reasonableness of estimated useful lives whenever events or changes in circumstances warrant. When a determination has been made that an asset will be retired before the end of its current estimated useful life, depreciation provisions will be accelerated to reflect the shortened estimated useful life, which could have a material unfavorable impact on future results of operations. See Note 7 — Early Plant Retirements of the Combined Notes to Consolidated Financial Statements for additional information. Changes in estimated useful lives of electric generation assets could have a significant impact on future results of operations. See Note 1 — Basis of Presentation and Note 8 — Property, Plant, and Equipment of the Combined Notes to Consolidated Financial Statements for information regarding depreciation and estimated service lives of the property, plant and equipment. Accounting for Derivative Instruments We use derivative instruments to manage commodity price risk, foreign currency exchange risk and interest rate risk related to~~ ongoing business **concerns** ~~operations. Our derivative activities are in accordance with our Risk Management Policy (RMP). See Note 16 — Derivative Financial Instruments of the Combined Notes to Consolidated Financial Statements for additional information. We account for derivative financial instruments under the applicable authoritative guidance. Determining whether a contract qualifies as a derivative requires that management exercise significant judgment, including assessing market liquidity as well as determining whether a contract has one or more underlying and one or more notional quantities. Changes in management' s assessment of contracts and the liquidity of their markets, and changes in authoritative guidance, could result in previously excluded contracts becoming in scope of new authoritative guidance. All derivatives are recognized on the balance sheet at their fair value, except for certain derivatives that qualify for, and are elected under, NPNS. Derivatives entered for economic hedging and for proprietary trading purposes are recorded at fair value through earnings. NPNS transactions are not required to be recorded at fair value, but rather on an~~ **and** ~~accrual basis of accounting. Determining whether a contract qualifies for NPNS requires judgment on whether the contract will physically deliver and requires that management ensure compliance with all associated qualification and documentation requirements. Commodity Contracts. Identification of a commodity contract as an economic hedge requires us to determine that the contract is in accordance with the RMP. We reassess our economic hedges on a regular basis to determine if they continue to be within the guidelines of the RMP. As a part of the authoritative guidance, we make estimates and assumptions concerning future commodity prices, load requirements, interest rates, the timing of future transactions and their probable cash flows, the fair value of contracts and the expected changes in the fair value in deciding whether to enter derivative transactions, and in determining the initial accounting treatment for derivative transactions. Under the authoritative guidance for fair value measurements, we categorize these derivatives under a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. Derivative contracts are traded in both exchange- based and non- exchange- based markets. Exchange- based derivatives that are valued using unadjusted quoted prices in active markets are generally categorized in Level 1 in the fair value hierarchy. Certain derivative pricing is verified using indicative price quotations available through brokers or over- the- counter, online exchanges. The price quotations reflect the average of the mid- point of the bid- ask spread from observable markets that we believe provide the most liquid market for the commodity. The price quotations are reviewed and corroborated to ensure the prices are observable and representative of an orderly transaction between market participants. Our derivatives are traded predominantly at liquid trading points. The remaining derivative contracts are valued using models that consider inputs such as contract terms, including maturity, and market parameters, and assumptions of the future prices of commodities, interest rates, volatility, credit worthiness and credit spread. For derivatives that trade in liquid markets, such as generic forwards, swaps, and options, the model inputs are generally observable. Such instruments are categorized in Level 2. For derivatives that trade in less liquid markets with limited pricing information, the model inputs generally would include both observable and unobservable inputs and are categorized in Level 3. We consider non- performance risk, including credit risk in the valuation of derivative contracts, and both historical and current market data in our assessment of non- performance risk. The impacts of non- performance and credit risk to date have generally not been material to the consolidated financial statements. See ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK and Note 16 — Derivative Financial Instruments and Note 18 — Fair Value of Financial Assets and Liabilities of the Combined Notes to Consolidated Financial Statements for additional information regarding derivative instruments. Defined Benefit Pension and Other Postretirement Employee Benefits The majority of our current employees participate in defined benefit pension and OPEB plans we sponsor. The measurement of the plan obligations and costs of providing benefits involves various factors, including the development of valuation assumptions and inputs and accounting policy elections. When developing the required assumptions, we consider historical information as well as future expectations. The measurement of projected benefit obligations and costs is affected by several assumptions including the discount rate, the long- term expected rate of return on plan assets, the anticipated rate of increase of health care**

costs, our contributions, the rate of compensation increases, and the long- term expected investment rate credited to employees of certain plans, among others. The assumptions are updated annually and upon any interim remeasurement of **difficulties encountered in** the **transition** plan obligations. Pension and OPEB plan assets include equity securities, including U. S. and international -- **integration** securities, and fixed income securities, as well as certain alternative investment classes such as real estate, private equity, private credit, and hedge funds. Expected Rate of Return on Plan Assets. In determining the EROA, we consider expectations regarding future long- term capital market performance, weighted by our target asset class allocations. We calculate the amount of expected return on pension and OPEB plan assets by multiplying the EROA by the MRV of plan assets at the beginning of the year, taking into consideration anticipated contributions and benefit payments to be made during the year. In determining MRV, the authoritative guidance for pensions and postretirement benefits allows the use of either fair value or a calculated value that recognizes changes in fair value in a systematic and rational manner over not more than five years. For the majority of pension plan assets, we use a calculated value that adjusts for 20 % of the difference between fair value and expected MRV of plan assets. Use of this calculated value approach enables less volatile expected asset returns to be recognized as a component of pension cost from year to year. For OPEB plan assets and certain pension plan assets, we use fair value to calculate the MRV. Discount Rate. The discount rates are determined by developing a spot rate curve based on the yield to maturity of a universe of high- quality non- callable (or callable with make- whole provisions) bonds with similar maturities to the related pension and OPEB obligations. The spot rates are used to discount the estimated future benefit distribution amounts under the pension and OPEB plans. The discount rate is the single level rate that produces -- **process may negatively** the same result as the spot rate curve. We utilize an analytical tool developed by our actuaries to determine the discount rates. Mortality. The mortality assumption is composed of a base table that represents the current expectation of life expectancy of the population adjusted by an improvement scale that attempts to anticipate future improvements in life expectancy. At separation and upon remeasurement as of December 31, 2023, we utilized the mortality tables and projection scales released by the SOA. Sensitivity to Changes in Key Assumptions. The following table illustrates the effects of changing certain of the actuarial assumptions reflected above and as discussed in Note 15 — Retirement Benefits of the Combined Notes to Consolidated Financial Statements, while holding all other assumptions constant: Actual AssumptionPensionOPEBAssumptionIncrease / (Decrease) Actuarial AssumptionPensionOPEBTotalChange in 2024 cost: Discount rate (a) 5. 52 % 5. 50 % 0. 5 % $ (14) $ — $ (14) 5. 52 % 5. 50 % (0. 5) % 14 1 15 EROA6. 50 % 6. 51 % 0. 5 % (39) (4) (43) 6. 50 % 6. 51 % (0. 5) % 39 4 43 Change in benefit obligation: Discount rate (a) 5. 17 % 5. 15 % 0. 5 % (349) (64) (413) 5. 17 % 5. 15 % (0. 5) % 380 69 449 _____ (a) In general, the discount rate will have a larger impact on the pension and OPEB cost and obligation as the rate moves closer to 0 %. Therefore, the discount rate sensitivities above cannot necessarily be extrapolated for larger increases or **our** decreases in the discount rate. Additionally, we utilize a liability- driven hedging investment strategy for our pension asset portfolio. The sensitivities shown above do not reflect the offsetting impact that changes in discount rates may have on pension asset returns. See Note 1 — Basis of Presentation and Note 15 — Retirement Benefits of the Combined Notes to Consolidated Financial Statements for additional information regarding the accounting for the defined benefit pension and OPEB plans. Taxation Significant management judgment is required in determining our provision for income taxes, primarily due to the uncertainty related to tax positions taken, as well as deferred tax assets and liabilities and valuation allowances. We account for uncertain income tax positions using a benefit recognition model with a two- step approach including a more- likely- than- not recognition threshold and a measurement approach based on the largest amount of tax benefit that is greater than 50 % likely of being realized upon ultimate settlement. Management evaluates each position based solely on the technical merits and facts and circumstances of the position, assuming the position will be examined by a taxing authority having full knowledge of all relevant information. Significant judgment is required to determine whether the recognition threshold has been met and, if so, the appropriate amount of tax benefits to be recorded in the consolidated financial statements. We evaluate quarterly the probability of realizing deferred tax assets by reviewing a forecast of future taxable income and our intent and ability to implement tax planning strategies, if necessary, to realize deferred tax assets. We also assess negative evidence, such as the expiration of historical operating loss or tax credit carryforwards, that could indicate our inability to realize our deferred tax assets. Based on the combined assessment, we record valuation allowances for deferred tax assets when it is more- likely- than- not such benefit will not be realized in future periods. Actual income taxes could vary from estimated amounts due to the future impacts of various items, including future changes in income tax laws, our forecasted financial condition and results of operations, failure to successfully implement tax planning strategies, as well as results of audits and examinations of filed tax returns by taxing authorities. See Note 14 — Income Taxes of the Combined Notes to Consolidated Financial Statements for additional information. Accounting for Loss Contingencies In the preparation of our financial statements, we make judgments regarding the future outcome of contingent events and record liabilities for loss contingencies that are probable and can be reasonably estimated based upon available information. The amount recorded may differ from the actual expense incurred when the uncertainty is resolved. Such difference could have a significant impact in the consolidated financial statements. Environmental Costs. Environmental investigation and remediation liabilities are based upon estimates with respect to the number of sites for which we will be responsible, the scope and cost of work to be performed at each site, the portion of costs that will be shared with other parties, the timing of the remediation work, regulations, and the requirements of local governmental authorities. In addition, periodic reviews are performed to assess the adequacy of other environmental reserves. These matters, if resolved in a manner different from the estimate, could have a significant impact in the consolidated financial statements. See Note 19 — Commitments and Contingencies of the Combined Notes to Consolidated Financial Statements for additional information. Other, Including Personal Injury Claims. Prior to our separation from Exelon, we were self- insured for general liability, automotive liability, and workers' compensation claims. For accidents occurring post- separation, we maintain insurance coverage for general liability, automotive liability, workers' compensation, and personal injury claims and are self- insured to the extent that losses are within policy deductibles or exceed the amount of insurance maintained. We have reserves for both open claims asserted, and an estimate of claims incurred but not reported (IBNR). The IBNR reserve is estimated based on actuarial assumptions and analysis and is updated annually. Future events, such as the number of new claims to be filed each year, the average cost of disposing of claims, as well as the numerous uncertainties surrounding litigation and possible state and national legislative measures could cause the actual costs to be higher or lower than estimated. Accordingly, these claims, if resolved in a manner different from the estimate, could have a material impact to the consolidated financial statements. Revenue Recognition Sources of Revenue and Determination of Accounting Treatment. We earn revenue from various business activities including competitive sales of power, natural gas, and other energy- related products and sustainable solutions. The accounting treatment for revenue recognition is based on the nature of the underlying transaction and applicable authoritative guidance. We primarily apply the Revenue from Contracts with Customers and Derivatives Revenues guidance to recognize revenue, as discussed in more detail below. Revenue from Contracts with Customers. We recognize revenues in the period in which the performance obligations within contracts with customers are satisfied, which generally occurs when power, natural gas and other energy- related commodities and services are provided to the customer. Transactions within the scope of Revenue from Contracts with Customers generally include non- derivative agreements, contracts that are designated as NPNS and spot- market energy commodity sales, including settlements with RTOs and ISOs. The determination of our retail power and natural gas sales to individual customers is based on systematic readings of customer meters, generally monthly. Energy delivered to customers that has not yet been billed as of the reporting period is estimated and corresponding unbilled revenue is recorded. The measurement of unbilled revenue is based upon individual customer meter readings, forecasted volumes, and applicable rates. See Note 1 — Basis of Presentation and Note 4 — Revenue from Contracts with Customers of the Combined Notes to Consolidated Financial Statements for additional information. Derivative Revenues. We record revenues and expenses using the mark- to- market method of accounting for transactions that are accounted for as derivatives. These derivative transactions primarily relate to commodity price risk management activities. Mark- to- market revenues and expenses include inception gains or losses on new transactions where the fair value is observable, unrealized gains and losses from changes in the fair value of open contracts, and realized gains and losses. Financial Results of Operations GAAP Results of Operations. The following table sets forth our GAAP consolidated Net Income (Loss) Attributable to Common Shareholders for the year ended December 31, 2023 compared to the same period in 2022. For additional information regarding the financial results **. We are obligated to complete the transaction whether or not we have obtained the required funding** for **closing** the years ended December 31, 2023 and 2022 see the discussions of Results of Operations below. **We are funding** For the Years Ended December 31, Favorable Variance20232022GAAP Net Income (Loss) Attributable to Common Shareholders $ 1, 623 $ (160) $ 1, 783 Adjusted EBITDA (non- GAAP). In analyzing and planning for our business, we supplement our use of GAAP Net Income (Loss) Attributable to Common Shareholders with Adjusted EBITDA (non- GAAP) as a performance measure. Adjusted EBITDA (non- GAAP) reflects an additional way of viewing our business that, when viewed with our GAAP results and the accompanying reconciliation to GAAP Net Income (Loss) Attributable to Common Shareholders included in the table below, may provide a more complete understanding of factors and trends affecting our business. Adjusted EBITDA (non- GAAP) should not be relied upon to the exclusion of GAAP financial measures and is, by definition, an incomplete understanding of our business, and must be considered in conjunction with GAAP measures. In addition, Adjusted EBITDA (non- GAAP) is neither a standardized financial measure, nor a presentation defined under GAAP and may not be comparable to other -- **the transaction using** companies' presentations or deemed more useful than the GAAP information provided elsewhere in this report. The following table provides a reconciliation between Net income (loss) attributable to common shareholders as determined in accordance with GAAP and Adjusted EBITDA (non- GAAP) for the year ended December 31, 2023 compared to the same period in 2022. For the Years Ended December 31, 20232022Net Income (Loss) Attributable to Common Shareholders $ 1, 623 $ (160) Income Tax (Benefit) Expense (a) 840 (339) Depreciation and Amortization1, 096 1, 091 Interest Expense, Net 431 251 Unrealized (Gain) Loss on Fair Value Adjustments (b) 658 1, 058 Asset Impairments71 — Plant Retirements and Divestitures (28) (11) Decommissioning- Related Activities (c) (716) 820 Pension & OPEB Non- Service Credits (54) (116) Separation Costs (d) 101 140 Acquisition- Related Costs12 — ERP System Implementation Costs (e) 25 22 Change in Environmental Liabilities43 10 Prior Merger Commitment (f) — (50) Noncontrolling Interests (g) (77) (49) Adjusted EBITDA (non- GAAP) $ 4 , 025 $ 2, 667 _____ (a) Includes amounts contractually owed to Exelon under the TMA reflected in Other, net. (b) Includes mark- to- market on economic hedges and fair value adjustments related to gas imbalances and equity investments. (c) Reflects all gains and losses associated with NDTs, ARO accretion, ARO remeasurement, and impacts of contractual offset for Regulatory Agreement Units. (d) Represents certain incremental costs related to the separation (system- related costs, third- party costs paid to advisors, consultants, lawyers, and other experts assisting in the separation), including a portion of the amounts billed to us pursuant to the TSA. (e) Reflects costs related to a multi- year ERP system implementation. (f) Reversal of a charge related to a 2012 merger commitment. (g) Represents elimination from results for the noncontrolling interests related to certain adjustments. 20232022 Favorable (Unfavorable) VarianceOperating revenues $ 24, 918 $ 24, 440 $ 478 Operating expensesPurchased power and fuel16, 001 17, 462 1, 461 Operating and maintenance5, 685 4, 841 (844) Depreciation and amortization1, 096 1, 091 (5 **billion**) Taxes other than income taxes553 552 (1) Total operating expenses23, 335 23, 946 611 Gain (loss) on sales of assets and businesses27 1 26 Operating income (loss) 1, 610 495 1, 115 Other income and (deductions) Interest expense, net (431) (251) (180) Other, net1, 268 (786) 2, 054 Total other income and (deductions) 837 (1, 037) 1, 874 Income (loss) before income taxes 2, 447 (542) 2, 989 Income tax (benefit) expense859 (388) (1, 247) Equity in **cash and** income (losses) of unconsolidated affiliates (11) (13) 2 Net income (loss) 1, 577 (167) 1, 744 Net income (loss) attributable to noncontrolling interests (46) (7) (39) Net income (loss) attributable to common shareholders $ 1, 623 $ (160) $ 1, 783 Year Ended December 31, 2023 Compared to Year Ended December 31, 2022. Net income (loss) attributable to common shareholders was favorable by **issuing 50** $ 1, 783 million primarily due to: • Favorable market and portfolio conditions primarily driven by higher realized margins on load contracts and generation- to- load optimization; • Favorable net realized and unrealized NDT activity; and • Unrealized gains resulting from an investment that became a publicly traded company in the second quarter of 2023. The favorable items were partially offset by: • Higher labor, contracting and materials; • Lower capacity revenues; • Impact of our annual update to the nuclear ARO for Non- Regulatory Agreement Units; • Unfavorable impacts of nuclear outages; and • Higher interest expense. Operating revenues. The basis for our reportable segments is the integrated management of our electricity business that is located in different geographic regions, and largely representative of the footprints of RTO / ISO and / or NERC regions, which utilize multiple supply sources to provide electricity through various distribution channels (wholesale and retail). Our hedging strategies and risk metrics are also aligned with these same geographic regions. Our five reportable segments are Mid- Atlantic, Midwest, New York, ERCOT, and Other Power Regions. See Note 5 — Segment Information of the Combined Notes to Consolidated Financial Statements for additional information on these reportable segments. Wholesale and retail sales of natural gas, as well as sales of other energy- related products and sustainable solutions and other miscellaneous business activities that are not significant to overall results of operations are reported under Other and not allocated to a region. For the year ended December 31, 2023 compared to 2022, Operating revenues were as follows: 2023 vs. 202220232022Variance % Change (a) Mid- Atlantic $ 5, 138 $ 5, 164 $ (26) (0. 5) % Midwest4, 658 4, 650 8 0. 2 % New York2, 021 1, 595 426 26. 7 % ERCOT1, 346 1, 543 (197) (12. 8) % Other Power Regions5, 851 6, 732 (881) (13. 1) % Total reportable segment electric revenues19, 014 19, 684 (670) (3. 4) % Other4, 505 5, 944 (1, 439) (24. 2) % Mark- to- market gains (losses) 1, 399 (1, 188) 2, 587 Total Operating revenues $ 24, 918 $ 24, 440 $ 478 2. 0 % _____ (a) % Change in mark- to- market is not a meaningful measure. Sales and Supply Sources. Our sales and supply sources by region are summarized below: 2023 vs. 2022Supply Source (GWhs) 20232022Variance % ChangeNuclear Generation (a) Mid- Atlantic53, 012 53, 214 (202) (0. 4) % Midwest93, 768 95, 090 (1, 322) (1. 4) % New York25, 546 25, 046 500 2. 0 % ERCOT1, 721 — 1, 721 100. 0 % Total Nuclear Generation174, 047 173, 350 697 0. 4 % Natural Gas, Oil and RenewablesMid- Atlantic2, 014 2, 097 (83) (4. 0) % Midwest1, 024 1, 202 (178) (14. 8) % ERCOT16, 877 14, 124 2, 753 19. 5 % Other Power Regions8, 512 10, 189 (1, 677) (16. 5) % Total Natural Gas, Oil and Renewables28, 427 27, 612 815 3. 0 % Purchased PowerMid- Atlantic 16, 509 15, 366 1, 143 7. 4 % Midwest984 610 374 61. 3 % ERCOT5, 530 3, 575 1, 955 54. 7 % Other Power Regions44, 192 51, 131 (6, 939) (13. 6) % Total Purchased Power67, 215 70, 682 (3, 467) (4. 9) % Total Supply / Sales by RegionMid- Atlantic71, 535 70, 677 858 1. 2 % Midwest95, 776 96, 902 (1, 126) (1. 2) % New York25, 546 25, 046 500 2. 0 % ERCOT24, 128 17, 699 6, 429 36. 3 % Other Power Regions52, 704 61, 320 (8, 616) (14. 1) % Total Supply / Sales by

Region269, 689 271, 644 (1, 955) (0. 7) % (a) Includes the proportionate share **shares** of output where we have an undivided ownership interest in jointly- owned generating plants. Nuclear Fleet Capacity Factor. The following table presents nuclear fleet operating data for our plants, which reflects ownership percentage of stations operated by us, excluding Salem and STP, which are operated by PSEG and STPNOC, respectively. The nuclear fleet capacity factor presented in the table is defined as the ratio of the actual output of a plant over a period of time to its output if the plant had operated at its net monthly mean capacity for that time period. We consider capacity factor to be a useful measure to analyze the nuclear fleet performance between periods. We have included the analysis below as a complement to the financial information provided in accordance with GAAP. However, these measures are not a presentation defined under GAAP and may not be comparable to other companies' presentations or be more useful than the GAAP information provided elsewhere in this report. 20232022Nuclear fleet capacity factor94. 4 % 94. 8 % Refueling outage days256 212 Non- refueling outage days51 54 ZEC Prices. We are compensated through state programs for the carbon- free attributes of our nuclear generation. ZEC programs are a significant contributor to our total operating revenues. The following table includes the average ZEC reference prices ($ / MWh) for each of our major regions in which state programs have been enacted. Prices reflect the weighted average price for the various delivery periods within the years ended December 31, 2023 and 2022. 2023 vs. 2022State (Region) (a) 20232022Variance % ChangeNew Jersey (Mid- Atlantic) (b) $ 9. 95 $ 9. 93 $ 0. 02 0. 2 % Illinois (Midwest) (c) 5. 18 13. 88 (8. 70) (62. 7) % New York (New York) 19. 05 21. 38 (2. 33) (10. 9) % (a) See ITEM 1. BUSINESS, Environmental Matters for additional information on the plants receiving payments through state programs. (b) The ZEC price is expected to be $ 10. 00 / MWh for each delivery period and is subject to an annual update once full year generation is known. Following the latest annual update, on August 16, 2023 the ZEC price for the delivery period beginning June 1, 2022 through May 31, 2023 was calculated to be $ 9. 88. (c) See Note 4 — Revenue from Contracts with Customers of the Combined Notes to Consolidated Financial Statements for additional information on the Illinois ZEC program. Illinois CMC Price. The price received (paid) for each CMC is determined by the IPA monthly and is based on the accepted CMC bid, less the sum of (a) monthly weighted average PJM busbar price, (b) ComEd zone capacity price and (c) any federal tax credit or subsidy received, and is subject to a customer protection cap ($ 30. 30 per MWh for initial delivery period June 1, 2022 through May 31, 2023 and $ 32. 50 per MWh for the period June 1, 2023 through May 31, 2024). If the monthly CMC price per MWh calculation results in a net positive value, ComEd will multiply that value by the delivered quantity and pay the total to us. If the CMC price per MWh calculation results in a net negative value, we will multiply this value by the delivered quantity and pay the net value to ComEd. The average CMC prices per MWh were $ 4. 13 and ($ 42. 20) for the years ended December 31, 2023 and 2022, respectively. Capacity Prices. We participate in capacity auctions in each of our major regions, except ERCOT which does not have a capacity market. We also incur capacity costs associated with load served, which are factored into customer sales prices. Capacity prices have a significant impact on our operating revenues and purchased power and fuel expense. We report capacity on a net monthly basis within each region in either Operating revenues or Purchased power and fuel expense, depending on our net monthly position. The following table presents the average capacity prices ($ / MW Day) for each of our major regions. Prices reflect the weighted average price for the various auction periods within the years ended December 31, 2023 and 2022. 2023 vs. 2022Location (Region) 20232022Variance % ChangeEastern Mid- Atlantic Area Council (Mid- Atlantic and Midwest) $ 69. 64 $ 126. 14 $ (56. 50) (44. 8) % ComEd (Midwest) 48. 64 121. 71 (73. 07) (60. 0) % Rest of State (New York) 137. 88 85. 36 52. 52 61. 5 % Southeast New England (Other) 91. 67 138. 21 (46. 54) (33. 7) % Electricity Prices. As a producer and supplier of electricity, the price of electricity has a significant impact on our operating revenues and purchased power cost. We report the sale and purchase of electricity in the spot market on a net hourly basis in either Operating revenues or Purchased power and fuel expense within each region, depending on our net hourly position. The price of electricity is impacted by several variables, including but not limited to, the price of fuels, generation resources in the region, weather, on- going competition, emerging technologies, as well as macroeconomic and regulatory factors. The following table presents an average day- ahead around- the- clock reference price ($ / MWh) for the periods presented for each of our major regions and does not necessarily reflect prices we ultimately realized. 2023 vs. 2022Location (Region) 20232022Variance % ChangePJM West (Mid- Atlantic) $ 33. 06 $ 72. 90 $ (39. 84) (54. 7) % ComEd (Midwest) 26. 64 60. 24 (33. 60) (55. 8) % Central (New York) 26. 97 57. 52 (30. 55) (53. 1) % North (ERCOT) 55. 15 64. 38 (9. 23) (14. 3) % Southeast Massachusetts (Other) (a) 37. 35 86. 02 (48. 67) (56. 6) % (a) Reflects New England, which comprises the majority of the activity in the Other region. For the year ended December 31, 2023 compared to 2022, changes in Operating revenues by region were approximately as follows: 2023 vs. 2022Variance % Change (a) DescriptionMid- Atlantic $ (26) (0. 5) % • unfavorable settled economic hedges of ($ 305) due to settled prices relative to hedged prices • unfavorable retail load revenue of ($ 40) primarily due to lower contracted energy prices; partially offset by • favorable wholesale load revenue of $ 250 due to higher contracted energy prices and higher volumes • favorable PJM net performance bonuses of $ 45 associated with the December 2022 weather event (b) Midwest8 0. 2 % • favorable settled economic hedges of $ 210 due to settled prices relative to hedged prices • favorable ZEC revenue of $ 85 primarily due to revenue recognized for Illinois ZECs delivered in prior planning years partially offset by a decrease in the ZEC price in current planning year • favorable retail load revenue of $ 25 primarily due to higher load volumes, partially offset by lower contracted energy prices; partially offset by • unfavorable net generation and wholesale load revenue of ($ 280) primarily due to lower nuclear generation and lower load volumes, partially offset by CMC program activity and net capacity revenue • unfavorable PJM performance bonuses of ($ 40), associated with the December 2022 weather event (b), 2023 vs. 2022Variance % Change (a) DescriptionNew York426 26. 7 % • favorable settled economic hedges of $ 520 due to settled prices relative to hedged prices • favorable retail load revenue of $ 105 primarily due to higher contracted energy prices; partially offset by • unfavorable net generation revenue of ($ 150) primarily due to lower energy prices • unfavorable ZEC revenue of ($ 50) primarily due to lower ZEC price partially offset by higher generation volumesERCOT (197) (12. 8) % • unfavorable settled economic hedges of ($ 570) due to settled prices relative to hedged prices; partially offset by • favorable wholesale load revenue of $ 330 due to higher volumes and higher contracted energy pricesOther Power Regions (881) (13. 1) % • unfavorable settled economic hedges of ($ 845) due to settled prices relative to hedged prices • unfavorable wholesale load revenue of ($ 190) primarily due to lower volumes; partially offset by • favorable retail load revenue of $ 175 primarily due to higher contracted energy pricesOther (1, 439) (24. 2) % • unfavorable gas revenue, including settled economic hedges, of ($ 1, 240) primarily due to lower gas prices • unfavorable revenues in the United Kingdom of ($ 225) primarily due to lower energy pricesMark- to- market (c) 2, 587 • gains on economic hedging activities of $ 1, 399 in 2023 compared to losses of ($ 1, 188) in 2022Total $ 478 2. 0 % (b) See Note 3 — Regulatory Matters of the Combined Notes to Consolidated Financial Statements for additional information on PJM performance bonuses (c) See Note 16 — Derivative Financial Instruments of the Combined Notes to Consolidated Financial Statements for additional information on mark- to- market gains and losses. Purchased power and fuel. See Operating revenues above for discussion of our reportable segments and hedging strategies and for supplemental statistical data, including supply sources by region, nuclear fleet capacity factor, capacity prices, and electricity prices. The following business activities are not allocated to a region and are reported under Other: wholesale and retail sales of natural gas, as well as other miscellaneous business activities that are not significant to overall results of operations. For the year ended December 31, 2023 compared to 2022, Purchased power and fuel expense were as follows: 2023 vs. 202220232022Variance % Change (a) Mid- Atlantic $ 2, 214 $ 3, 026 $ 812 26. 8 % Midwest1, 403 1, 886 483 25. 6 % New York770 528 (242) (45. 8) % ERCOT764 1, 136 372 32. 7 % Other Power Regions4, 611 5, 811 1, 200 20. 7 % Total electric purchased power and fuel9, 762 12, 387 2, 625 21. 2 % Other3, 868 5, 250 1, 382 26. 3 % Mark- to- market losses (gains) 2, 371 (175) (2, 546) Total purchased power and fuel $ 16, 001 $ 17, 462 $ 1, 461 8. 4 % For the year ended December 31, 2023 compared to 2022, changes in Purchased power and fuel expense by region were approximately as follows: 2023 vs. 2022Variance % Change (a) DescriptionMid- Atlantic $ 812 26. 8 % • favorable purchased power and net capacity impact of $ 960 primarily due to lower energy and capacity prices; partially offset by • unfavorable environmental products activity of ($ 160) primarily due to higher load served and REC pricesMidwest483 25. 6 % • favorable cost associated with power delivery and net capacity impact of $ 525 primarily due to lower energy and capacity prices earnedNew York (242) (45. 8) % • unfavorable settlement of economic hedges of ($ 360) due to settled prices relative to hedged prices; partially offset by • favorable cost associated with power delivery and net capacity impact of $ 130 primarily due to lower energy prices and partially offset by higher capacity pricesERCOT372 32. 7 % • favorable settlement of economic hedges of $ 245 due to settled prices relative to hedged prices • favorable fuel cost of $ 70 primarily due to lower gas prices partially offset by higher generation • favorable purchased power of $ 65 primarily due to lower energy prices and higher generation partially offset by higher load servedOther Power Regions1, 200 20. 7 % • favorable purchased power and fuel of $ 3, 235 primarily due to lower energy prices and lower load served; partially offset by • unfavorable settlement of economic hedges of ($ 1, 965) due to settled prices relative to hedged prices • unfavorable environmental products activity of ($ 55) primarily driven higher REC prices 2023 vs. 2022Variance % Change (a) DescriptionOther1, 382 26. 3 % • favorable net gas purchase costs and settlement of economic hedges of $ 1, 160 primarily due to lower gasprices • favorable purchases in the United Kingdom of $ 180 primarily due to lower energy prices • favorable fair value adjustment related to gas imbalances of $ 45Mark- to- market (b) (2, 546) • losses on economic hedging activities of ($ 2, 371) in 2023 compared to gains of $ 175 in 2022Total $ 1, 461 8. 4 % _____ (b) See Note 16 — Derivative Financial Instruments of the Combined Notes to Consolidated Financial Statements for additional information on mark- to- market gains and losses. The changes in Operating and maintenance expense consisted of the following: 2023 vs. 2022Increase (Decrease) Labor, other benefits, contracting, and materials (a) $ 349 Decommissioning- related activities (b) 169 Nuclear refueling outage costs, including the co- owned Salem plants157 Asset impairments71 Prior merger commitment50 Change in environmental liabilities34 Other14 Total increase $ 844 (a) Primarily reflects increased employee- related costs, including labor and other incentives, and certain non- essential maintenance work. (b) Primarily reflects a decreased benefit related to the annual nuclear ARO update for non- regulatory agreement units. Interest expense, net increased for the year ended December 31, 2023 compared to the same period in 2022, primarily due to the issuance of senior notes and tax- exempt bonds, increased fees and interest on short term borrowings, and changes in the 13- week Treasury rate for our SNF obligation. See Note 17 — Debt and Credit Agreements of the Combined Notes to Consolidated Financial Statements for additional information on our senior notes, tax- exempt bonds, and short- term borrowings. See Note 19 — Commitments and Contingencies of the Combined Notes to Consolidated Financial Statements for additional information on our SNF obligation. Other, net was favorable for the year ended December 31, 2023 compared to the same period in 2022, due to activity described in the table below: Other, netFor the Years Ended December 31, Income (Deductions) Income (Deductions) 20232022Decommissioning- related activities (a) $ 803 $ (902) Non- service net periodic benefit credit (cost) (b) 54 110 Net realized and unrealized gains (losses) from equity investments (c) 307 (13) Return to provision adjustment (d) 19 (49) Other (e) 85 68 Other, net $ 1, 268 $ (786) _____ (a) Includes net realized and net unrealized gains (losses) on NDT fund investments, the elimination of decommissioning- related activities, and the elimination of income taxes related to all NDT fund activity for the Regulatory Agreement Units except for decommissioning- related impacts that were not offset for the Byron units starting in the second quarter of 2021. With our September 15, 2021 reversal of the previous decision to retire Byron, we resumed contractual offset for Byron as of that date. See Note 10 — Asset Retirement Obligations of the Combined Notes to Consolidated Financial Statements for additional information regarding the accounting for nuclear decommissioning and the contractual offset suspension for the Byron units. See Note 23 — Supplemental Financial Information of the Combined Notes to Consolidated Financial Statements for additional information. (b) Prior to separation, we were allocated our portion of pension and OPEB non- service credits (costs) from Exelon, which was included in Operating and maintenance expense. Effective February 1, 2022, the non- service credit (cost) components are included in Other, net, in accordance with single employer plan accounting. See Note 15 — Retirement Benefits of the Combined Notes to Consolidated Financial Statements for additional information. (c) For 2023, includes unrealized gain resulting from equity investment that became publicly traded in the second quarter of 2023 and now has a readily determinable fair value (and no longer is accounted for as an equity method investment due to lack of significant influence). We record the fair value of this investment in Investments on the Consolidated Balance Sheets based on quoted market price of the stock. See Note 18 — Fair Value of Financial Assets and Liabilities of the Combined Notes to Consolidated Financial Statements for additional information. For 2022, represents Net realized and unrealized (losses) gains from equity investments. (d) This reflects amounts contractually owed to Exelon under the TMA, which is offset in Income taxes. See Note 14 — Income Taxes of the Combined Notes to Consolidated Financial Statements for additional information. (e) Includes amounts we billed Exelon for services pursuant to the TSA. See Note 1 — Basis of Presentation of the Combined Notes to Consolidated Financial Statements for additional information. Effective income tax rates were 35. 1 % and 71. 6 % for the years ended December 31, 2023 and 2022, respectively. We do not expect the effective tax rate to deviate from the statutory tax rate with the exception of realized and unrealized gains and losses of the nuclear decommissioning trust funds. In 2022, the rate was also impacted by one- time adjustments. See Note 14 — Income Taxes of the Combined Notes to Consolidated Financial Statements for additional information. Net income attributable to noncontrolling interests primarily relates to CRP for the years ended December 31, 2023 and 2022. For discussion of the year ended December 31, 2022 compared to the year ended December 31, 2021, refer to Liquidity and Capital Resources of MANAGEMENT' S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS in the 2022 Form 10- K which was filed with the SEC on February 16, 2023. All results included throughout the liquidity and capital resources section are presented on a GAAP basis. Our operating and capital expenditures requirements are provided by internally generated cash flows from operations, the sale of certain receivables, as well as funds from external sources in the capital markets and through bank borrowings. Our business is capital intensive and requires considerable capital resources. We annually evaluate our financing plan and credit line sizing, focusing on maintaining our investment grade ratings while meeting our cash needs to fund capital requirements, including construction expenditures, retire debt, pay dividends, fund pension and OPEB obligations, and invest in new and existing ventures. A broad spectrum of financing alternatives beyond the core financing options can be used to meet our needs and fund growth including monetizing assets in the portfolio via project financing, asset sales, and the use of other financing structures (e. g., joint ventures, minority partners, etc.). Our access to external financing on reasonable terms depends on our credit ratings and current overall capital market business conditions. If these conditions deteriorate to the extent that we no longer have access to the capital markets at reasonable terms, we have access to credit facilities with aggregate bank commitments of $ 6. 1 billion. We utilize our credit facilities to support

our commercial paper programs, provide for other short- term borrowings and to issue letters of credit. See the " Credit Matters and Cash Requirements " section below for additional information. We expect cash flows to be sufficient to meet operating expenses, financing costs, and capital expenditure requirements. See Note 17 — Debt and Credit Agreements of the Combined Notes to Consolidated Financial Statements for additional information on our debt and credit agreements. Pursuant to the Separation Agreement between us and Exelon, we received a cash payment of $ 1. 75 billion from Exelon on January 31, 2022. See Note 1 — Basis of Presentation of the Combined Notes to Consolidated Financial Statements for additional information on the separation. NRC Minimum Funding Requirements NRC regulations require that licensees of nuclear generating facilities demonstrate reasonable assurance that sufficient funds will be available in certain minimum amounts to decommission the facility. These NRC minimum funding levels are typically based upon the assumption that decommissioning activities will commence after the end of the current licensed life of each unit. If a unit fails the NRC minimum funding test, then the plant' s owners or parent companies would be required to take steps, such as providing financial guarantees through surety bonds, letters of credit, or parent company guarantees or making additional cash contributions to the NDT fund to ensure sufficient funds are available. See Note 10- Asset Retirement Obligations of the Combined Notes to Consolidated Financial Statements for additional information. If a nuclear plant were to retire before the end of its licensed life, there is a risk that it will no longer meet the NRC minimum funding requirements due to the earlier commencement of decommissioning activities and a shorter time period over which the NDT funds could appreciate in value. A shortfall could require that we address the shortfall by providing additional financial assurances, such as surety bonds, letters of credit, or parent company guarantees for our share of the funding assurance. However, the amount of any assurance will ultimately depend on the decommissioning approach, the associated level of costs, and the NDT fund investment performance going forward. No later than two years after shutting down a plant, we must submit a Post- shutdown Decommissioning Activities Report (PSDAR) to the NRC that includes the planned option for decommissioning the site. Upon issuance of any additional financial assurance mechanisms to address a decommissioning funding shortfall, subject to satisfying various regulatory preconditions, each site would be able to utilize the respective NDT funds for radiological decommissioning costs, which represent the majority of the total expected decommissioning costs. However, under the regulations, the NRC must approve an exemption in order for us to utilize the NDT funds to pay for non- radiological decommissioning costs (i. e., spent fuel management and site restoration costs, if applicable). Any amounts not covered by an exemption would be borne by us without reimbursement. As of December 31, 2023, we are not required to provide any additional financial assurance for TMI Unit 1 under the SAFSTOR scenario that is the planned decommissioning option, as described in the TMI Unit 1 PSDAR filed with the NRC on April 5, 2019. On October 16, 2019, the NRC granted our exemption request to use the TMI Unit 1 NDT funds for spent fuel management costs. On June 8, 2022, the NRC granted our exemption request to use the TMI Unit 1 NDT funds for site restoration costs. On November 16, 2023, Zion Station was transferred back to us from ZionSolutions. As of December 31, 2023, we have adequate NDT funds for the remaining radiological decommissioning cost at Zion Station. Decommissioning costs other than radiological may require funding from us. See Note 10 — Asset Retirement Obligations of the Combined Notes to Consolidated Financial Statements for additional information on Zion Station Decommissioning. Cash Flows from Operating Activities Our cash flows from operating activities primarily result from the sale of electric energy and energy- related products and services to customers. Our future cash flows from operating activities may be affected by future demand for, and market prices of, energy and our ability to continue to produce and supply power at competitive costs, as well as to obtain collections from customers and the sale of certain receivables. See Note 3 — Regulatory Matters and Note 19 — Commitments and Contingencies of the Combined Notes to Consolidated Financial Statements for additional information on regulatory and legal proceedings and proposed legislation. The following table provides a summary of the change in cash flows from operating activities for the years ended December 31, 2023 and 2022: For the Years Ended December 31, Cash flows from operating activities20232022ChangeNet income (loss) $ 1, 577 $ (167) $ 1, 744 Adjustments to reconcile net income (loss) to cash: Changes in working capital and other noncurrent assets and liabilities (a) (8, 355) (5, 246) (3, 109) Collateral received (posted), net (1, 491) (351) (1, 140) Option premiums received (paid), net26 (177) 203 Pension and non- pension postretirement benefit contributions (54) (237) 183 Total non- cash operating activities (b) 2, 996 3, 825 (829) Net cash flows provided by (used in) operating activities $ (5, 301) $ (2, 353) $ (2, 948) (a) Includes changes in Accounts receivable, Receivables from and payables to affiliates, net, Inventories, Accounts payable and accrued expenses, Income taxes, and Other assets and liabilities. (b) See the Consolidated Statements of Cash Flows for details of non- cash operating activities, includes Depreciation, amortization, and accretion, Asset impairments, Gain on sales of assets and businesses, Deferred income taxes and amortization of ITCs, Net fair value changes related to derivatives, and Net realized and unrealized activity associated with NDTs and equity investments. See Note 23 — Supplemental Financial Information of the Combined Notes to Consolidated Financial Statements for additional information on the Other non- cash operating activities line. Changes in our cash flows from operations were generally consistent with changes in results of operations, as adjusted by changes in working capital in the normal course of business, except as discussed below. In addition, significant operating cash flow impacts for 2023 and 2022 were as follows: • A net increase in cash outflows for changes in working capital and other noncurrent assets and liabilities primarily relates to a decrease in Accounts payable and accrued expenses, primarily driven by lower gas prices and a decrease in CMC program activity for the current year. This was partially offset by a decrease in Accounts receivable, mainly driven by higher contracted prices and volumes at year end 2022, including the impact of the December 2022 weather event. Additionally, there was a decrease in Other assets and liabilities, primarily driven by an increase in cash collections applied to DPP due to a decrease in the drawn customer accounts receivable Facility balance in 2023 compared to 2022. See Note 6 — Accounts Receivable of the Combined Notes to Consolidated Financial Statements for additional information on the sales of customer accounts receivable. • Depending upon whether we are in a net mark- to- market liability or asset position, collateral may be required to be posted with or collected from our counterparties. In addition, the collateral posting and collection requirements differ depending on whether the transactions are on an exchange or in the over- the- counter markets. See Note 16 — Derivative Financial Instruments of the Combined Notes to Consolidated Financial Statements for additional information on collateral. • Option premiums paid, net relate to options contracts that we purchase and sell as part of our established policies and procedures to manage risks associated with market fluctuations in commodity prices. Note 16 — Derivative Financial Instruments of the Combined Notes to Consolidated Financial Statements for additional information on derivative contracts. • Decrease in cash outflows for pension and non- pension postretirement benefit contributions is primarily due to our annual qualified pension contribution of $ 21 million and $ 192 million made in July 2023 and February 2022, respectively. See Note 15 — Retirement Benefits of the Combined Notes to Consolidated Financial Statements for additional information on pension and non- pension postretirement benefit plans. Cash Flows from Investing Activities The following table provides a summary of the change in cash flows from investing activities for the years ended December 31, 2023 and 2022: For the Years Ended December 31, Cash flows from investing activities20232022ChangeAcquisitions of assets and businesses $ (1, 690) $ (29) $ (1, 661) Capital expenditures (2, 422) (1, 689) (733) Proceeds from sales of assets and businesses24 52 (28) Investment in NDT funds, net (228) (221) (7) Collection of DPP, net7, 340 4, 964 2, 376 Other investing activities7 27 (20) Net cash flows provided by (used in) investing activities $ 3, 031 $ 3, 104 $ (73) Significant investing cash flow impacts for 2023 and 2022 were as follows: • See Note 2 — Mergers, Acquisitions, and Dispositions of the Combined Notes to Consolidated Financial Statements for additional information related to the STP acquisition. • Variances in capital expenditures are primarily due to the timing of cash payments for capital projects. See the" Credit Matters and Cash Requirements" section below for additional information on projected capital expenditure spending. • Collection of DPP, net increased due to cash collections from the customer accounts receivable Facility, as discussed in the Cash Flows from Operating Activities section above. This was partially offset by a reduction in cash proceeds received from the Purchasers in 2023 compared to 2022. See Note 6 — Accounts Receivable of the Combined Notes to Consolidated Financial Statements for additional information. Cash Flows from Financing Activities The following table provides a summary of the change in cash flows from financing activities for the years ended December 31, 2023 and 2022: For the Years Ended December 31, Cash flows from financing activities20232022ChangeLong- term debt, net $ 3, 027 $ (1, 406) $ 4, 433 Changes in short- term borrowings, net485 (923) 1, 408 Dividends paid on common stock (366) (185) (181) Repurchases of common stock (992) — (992) Contributions from Exelon — 1, 750 (1, 750) Other financing activities42 (35) 77 Net cash flows provided by (used in) financing activities $ 2, 196 $ (799) $ 2, 995 Significant financing cash flow impacts for 2023 and 2022 were as follows: • Long- term debt, net, varies due to debt issuances and redemptions each year. **While we** Refer to debt issuances and redemptions tables below for additional information. • Changes in short- term borrowings, net, is driven by repayments on and issuances of notes due in less than 365 days. Refer to Note 17 — Debt and Credit Agreements of the Combined Notes to Consolidated Financial Statements for additional information on short- term borrowings. • Refer to ITEM 5. — MARKET FOR REGISTRANT' S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES for additional information on dividend restrictions. See below for quarterly dividends declared. • Repurchases of common stock is related to our share repurchase program that commenced in March 2023. See Note 20 — Shareholders' Equity of the Combined Notes to Consolidated Financial Statements for additional information. • Contributions from Exelon is primarily related to a cash contribution of $ 1. 75 billion from Exelon on January 31, 2022, pursuant to the Separation Agreement. See Note 1 — Basis of Presentation of the Combined Notes to Consolidated Financial Statements for additional information on the separation. Debt Issuances and Redemptions See Note 17 — Debt and Credit Agreements of the Combined Notes to Consolidated Financial Statements for additional information on our long- term debt. Debt activity for 2023 and 2022 was as follows: During 2023, the following long- term debt was issued: TypeInterest RateMaturityAmount Use of Proceeds2053 Senior Notes6. 50 % October 1, 2053 $ 900 To fund the acquisition of STP and general corporate purposes2028 Senior Notes5. 60 % March 1, 2028750 To fund general corporate purposes, including repayment of short- term borrowings2033 Senior Notes5. 80 % March 1, 2033600 To fund general corporate purposes, including repayment of short- term borrowings2034 Senior Notes6. 13 % January 15, 2034500 To fund the acquisition of STP and general corporate purposesTax- Exempt Notes Reoffering4. 10 %- 4. 45 % 2025- 2053 (b) 435 To fund general corporate purposes, including repayment of short- term borrowingsEnergy Efficiency Project Financing (a) 2. 20 %- 4. 96 % March 31, 2024- June 30, 202411 Funding to install energy conservation measuresTotal $ 3, 196 (a) For Energy Efficiency Project Financing, the maturity dates represent the expected -- **expect to** date of project completion, upon which the respective customer assumes the outstanding debt. (b) The Tax- Exempt Notes have a maturity date of March 1, 2025- April 1, 2053, and a mandatory purchase date that ranges from March 1, 2025- June 1, 2029. During 2022, the following long- term debt was issued: TypeInterest RateMaturityAmountUse of ProceedsEnergy Efficiency Project Financing (a) 2. 20 %- 6. 96 % March 31, 2023- May 1, 2024 $ 14 Funding to install energy conservation measures During 2023, the following long- term debt was retired and / or redeemed: TypeInterest RateMaturityAmountEnergy Efficiency Project Financing2. 44 %- 6. 96 % May 31, 2023- March 31, 2024 $ 44 CR Nonrecourse Debt3- month SOFR 2. 76 % (a) December 15, 202739West Medway II Nonrecourse Debt1- month SOFR 2. 975 %- 3. 225 % (b) (d) March 31, 202626Continental Wind Nonrecourse Debt6. 00 % February 28, 203325Antelope Valley DOE Nonrecourse Debt (c) 2. 29 %- 3. 56 % January 5, 203725RPG Nonrecourse Debt4. 11 % March 31, 20359Total $ 168 (a) The interest rate for long- term debt redemptions prior to June 2023 were based on LIBOR 2. 50 %. See Note 17 — Debt and Credit Agreements of the Combined Notes to Consolidated Financial Statements for additional information on the CR nonrecourse debt. (b) The interest rate for long- term debt redemptions prior to May 2023 were based on LIBOR 2. 875 %. Beginning in May 2023, these redemptions are based on SOFR the variable interest rate of 2. 975 %- 3. 225 %. See Note 17 — Debt and Credit Agreements of the Combined Notes to Consolidated Financial Statements for additional information on the West Medway II nonrecourse debt. (c) On January 5, 2024, we redeemed $ 5. 5 million of 2. 29 %- 3. 56 % Antelope Valley DOE nonrecourse debt. (d) The nonrecourse debt has an average blended interest rate. During 2022, the following long- term debt was retired and / or redeemed: TypeInterest RateMaturityAmountSenior Notes3. 40 % March 15, 2022 $ 500 Senior Notes4. 25 % June 15, 2022523CR Nonrecourse Debt (a) 3- month LIBOR 2. 50 % December 15, 202741Continental Wind Nonrecourse Debt (a) 6. 00 % February 28, 203337West Medway II Nonrecourse Debt (a) 1 month LIBOR 2. 875 % (c) March 31, 202624Antelope Valley DOE Nonrecourse Debt (a) (b) 2. 29 %- 3. 56 % January 5, 203725RPG Nonrecourse Debt (a) 4. 11 % March 31, 20359Energy Efficiency Project Financing3. 71 % December 31, 20223Total $ 1, 162 (a) See Note 17 — Debt and Credit Agreements of the Combined Notes to Consolidated Financial Statements for additional information on nonrecourse debt. (b) On January 6, 2023, we redeemed $ 5 million of 2. 29 %- 3. 56 % Antelope Valley DOE nonrecourse debt. (c) The nonrecourse debt has an average blended interest rate. From time to time and as market conditions warrant, we may engage in long- term debt retirements via tender offers, open market repurchases or other viable options to reduce debt. Quarterly dividends declared by our Board of Directors during 2023 and for the first quarter of 2024 were as follows: PeriodDeclaration DateShareholder of Record DateDividend Payable DateCash per ShareFirst Quarter of 2023February 15, 2023February 27, 2023March 10, 2023 $ 0. 2820 Second Quarter of 2023April 25, 2023May 12, 2023June 9, 2023 $ 0. 2820 Third Quarter of 2023August 1, 2023August 14, 2023September 8, 2023 $ 0. 2820 Fourth Quarter of 2023November 1, 2023November 17, 2023December 8, 2023 $ 0. 2820 First Quarter of 2024February 26, 2024March 8, 2024March 19, 2024 $ 0. 3525 We fund liquidity needs for capital expenditures, working capital, energy hedging and other financial commitments through cash flows from operations, public debt offerings, commercial paper markets and large, diversified credit facilities. As of December 31, 2023, we have access to facilities with aggregate bank commitments of $ 6. 1 billion. We had access to the commercial paper markets and had availability under our revolving credit facilities during 2023 to fund our short- term liquidity needs, when necessary. We routinely review the sufficiency of our liquidity position, including appropriate sizing of credit facility commitments, by performing various stress test scenarios, such as commodity price movements, increases in margin- related transactions, changes in hedging levels, and the impacts of hypothetical credit downgrades. We closely monitor events in the financial markets and the financial institutions associated with the credit facilities, including monitoring credit ratings and outlooks, credit default swap levels, capital raising, and merger activity. See PART I, ITEM 1A. RISK FACTORS for additional information regarding the effects of uncertainty in the capital and credit markets. We believe our cash flow from operating activities, access to credit markets and our credit facilities provide sufficient liquidity to support the estimated future cash requirements discussed below. If we had lost our investment grade credit ratings as of December 31, 2023, we would have been required to provide incremental

collateral estimated to be approximately $ 1. 9 billion to meet collateral obligations for derivatives, non- derivatives, NPNS, and applicable payables and receivables, net of the contractual right of offset under master netting agreements. A loss of investment grade credit rating would have required a three notch downgrade by S & P or a two notch downgrade by Moody' s from their current levels of BBB and Baa2, to BB and Ba1 or below. respectively. As of December 31, 2023, we had $ 3. 1 billion of available capacity and $ 0. 4 billion of cash on hand **needed for closing** . In the event of a credit downgrade below investment grade and a resulting requirement to provide incremental collateral exceeding our available capacity and cash on hand , we would be required to **complete** access additional liquidity through the capital markets. See Note 16 — Derivative Financial Instruments and Note 17 — Debt and Credit Agreements of the Combined Notes to Consolidated Financial Statements for additional information. Capital Expenditures Our most recent estimate of capital expenditures is approximately $ 2. 8 billion and $ 2. 3 billion for 2024 and 2025 respectively. Approximately 44 % - 47 % of projected capital expenditures are for the acquisition of nuclear fuel, which includes additional nuclear fuel to increase inventory levels. This is a strategic decision in response to the potential for the continuing Russia and Ukraine conflict to impact our long- term nuclear fuel supply. Additionally, the above estimates of capital expenditures includes $ 875 million of growth capital expenditures, including nuclear uprates and license renewals, wind repowering, and hydrogen with policy support. The remaining amounts primarily reflect additions and upgrades to existing generation facilities (including material condition improvements during nuclear refueling outages). See ITEM 7. MANAGEMENT' S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS, Other Key Business Drivers for more information on the Russia and Ukraine conflict. Planned additions and upgrades and other investments are subject to periodic review and revision to reflect changes in economic conditions impacting our generating assets and other factors, including, but not limited to, market power prices, results of capacity auctions, potential legislative and regulatory actions, impacts of inflation, changes in the cost of materials and labor, and financing costs. We anticipate funding these capital expenditures with a combination of internally generated funds and borrowings. Pension and Other Postretirement Benefits We consider various factors when making pension funding decisions, including actuarially - determined minimum contribution requirements under ERISA, contributions required to avoid benefit restrictions and at - risk status as defined by the Pension Protection Act, and management of the pension obligation. The Pension Protection Act requires the attainment of certain funding levels to avoid benefit restrictions (such as an inability to pay lump sums or to accrue benefits prospectively) and at - risk status (which triggers higher minimum contribution requirements and participant notification). The contributions below reflect a funding strategy to make levelized annual contributions with the objective of achieving 100 % funded status over time. This level - funding strategy helps minimize volatility of future period required pension contributions. Unlike the qualified pension plans, our non - qualified pension plans are not funded, given that they - **the transaction even** are not subject to statutory minimum contribution requirements. OPEB plans are also not subject to statutory minimum contribution requirements, though we have funded certain of our plans. For our funded OPEB plans, we consider several factors in determining the level of contributions including liabilities management and levels of benefit claims paid. The following table provides our planned contributions to our qualified pension plans, non- qualified pension plans, and OPEB plans in 2024 (including our benefit payments related to unfunded plans): Qualified Pension PlansNon - Qualified Pension PlansOPEBTotalPlanned contributions $ 161 $ 13 $ 20 $ 194 To the extent interest rates decline significantly or the pension and OPEB plans earn less than the expected asset returns, annual pension contribution requirements in future years could increase. Conversely, to the extent interest rates increase significantly or the pension and OPEB plans earn greater than the expected asset returns, annual pension and OPEB contribution requirements in future years could decrease. Additionally, expected contributions could change if we **experience a cash shortfall** change our pension or OPEB funding strategy - **This could require us** See Note 15 — Retirement Benefits of the Combined Notes to **obtain** Consolidated Financial Statements for additional information on pension and OPEB contributions. Cash Requirements for Other Financial Commitments The following table summarizes our future estimated cash payments as of December 31, 2023 under existing financial commitments: 2024Beyond 2024TotalTime PeriodLong - term debt $ 121 $ 7, 556 $ 7, 677 2024 - 2053Interest payments on long - term debt (a) 403 4, 699 5, 102 2024 - 2053Operating leases (b) 54 463 517 2024 - 2056Purchase power obligations (c) 958 1, 164 2, 122 2024 - 2033Fuel purchase agreements (d) 1, 464 8, 634 10, 098 2024 - 2040Other purchase obligations (e) 1, 198 1, 121 2, 319 2024 - 2049SNF obligation — 1, 296 1, 296 2024 - 2035Pension contributions (f) 161 672 833 2024 - 2029Total cash requirements $ 4, 359 $ 25, 605 $ 29, 964 (a) Interest payments are estimated based on final maturity dates of debt securities outstanding at December 31, 2023 and do not reflect anticipated future refinancing - **financing** , early redemptions, or debt issuances. Variable rate interest obligations are estimated based on rates as of December 31, 2023. (b) Capacity payments associated with contracted generation lease agreements are net of sublease and capacity offsets of $ 47 million and $ 275 million for 2024 and beyond 2024, respectively and $ 322 million in total. (c) Purchase power obligations primarily include expected payments for REC purchases and capacity payments associated with contracted generation agreements, which may **cause us** be reduced based on plant availability. Expected payments exclude payments on renewable generation contracts that are contingent in nature. (d) Represents commitments to **incur** purchase nuclear fuel and related services and natural gas - related transportation and capacity. (e) Represents the future estimated value at December 31, 2023 of the cash flows associated with all contracts, both cancellable and non - cancellable, entered into with third - parties for the provision of services and materials, entered into in the normal course of business not specifically reflected elsewhere in this table. These estimates are subject to significant variability from period to period. (f) These amounts represent our expected contributions to our qualified pension plans. Qualified pension contributions for years after 2029 are not included. See Note 3 — Regulatory Matters and Note 19 — Commitments and Contingencies of the Combined Notes to Consolidated Financial Statements for additional **costs** information of our other commitments potentially triggered by future events. Additionally, see below for where to find additional information regarding the financial commitments in the table above in the Combined Notes to Consolidated Financial Statements. ItemLocation within Combined Notes to Consolidated Financial StatementsLong - term debtNote 17 — Debt and Credit AgreementsInterest payments on long - term debtNote 17 — Debt and Credit AgreementsOperating leasesNote 11 — LeasesSNF obligationNote 19 — Commitments and ContingenciesPension contributionsNote 15 — Retirement Benefits Sales of Customer Accounts Receivable We have an accounts receivable financing facility with a number of financial institutions and a commercial paper conduit to sell certain receivables, which expires on August 15, 2025 unless renewed by the mutual consent of the parties in accordance with its terms. See Note 6 — Accounts Receivable of the Combined Notes to Consolidated Financial Statements for additional information. Project financing is based upon a nonrecourse financial structure, in which project debt is paid back from the cash generated by a specific asset or portfolio of assets. Borrowings under these agreements are secured by the assets and equity of each respective project. Lenders do not have recourse against us in the event of a default. If a project financing entity does not maintain compliance with its specific debt covenants, there could be a requirement to accelerate repayment of the associated debt or other project - related borrowings earlier than the stated maturity dates. In these instances, if such repayment were not satisfied, or restructured, the lenders or security holders would generally have rights to foreclose against the project - specific assets and related collateral . The potential requirement to repay the debt or other borrowings earlier than otherwise anticipated could lead to impairments due to a higher likelihood of disposing of the respective project - specific assets significantly before the end of their useful lives. See Note 17 — Debt and Credit Agreements of the Combined **combined** Notes to Consolidated Financial Statements for additional information on project finance credit facilities and nonrecourse debt. Credit Facilities We meet our short - term liquidity requirements primarily through the issuance of commercial paper. We may use our credit facilities for general corporate purposes, including meeting short - term funding requirements and the issuance of letters of credit. See Note 17 — Debt and Credit Agreements of the Combined Notes to Consolidated Financial Statements for additional information on our credit facilities. Capital Structure At December 31, 2023, our capital structure consisted of the following: Percentage of Capital StructureCommercial paper and notes payable8 % Long - term debt37 % Member' s equity55 % Our access to the capital markets, including the commercial paper market, and our financing costs in those markets, may depend on our securities ratings. Our borrowings are not subject to default or prepayment as a result of a downgrade of our securities, although such a downgrade could increase fees and interest charges under our credit agreements. As part of the normal course of business, we enter into contracts that contain express provisions or otherwise permit us and our counterparties to demand adequate assurance of future performance when there are reasonable grounds for doing so. In accordance with the contracts and applicable contracts law, if we are downgraded by a credit rating agency, it is possible that a counterparty would attempt to rely on such a downgrade as a basis for making a demand for adequate assurance of future performance, which could include the posting of additional collateral. See Note 16 — Derivative Financial Instruments of the Combined Notes to Consolidated Financial Statements for additional information on collateral provisions. At separation, S & P and Moody' s affirmed our senior unsecured ratings of BBB - and Baa2, respectively. Fitch also affirmed their final rating of BBB, prior to formally withdrawing coverage on January 5th, 2022. We have only engaged S & P and Moody' s for ratings coverage following separation. On October 13, 2022, S & P raised our senior unsecured debt rating to' BBB' from' BBB -' citing the passage of the IRA as a material credit positive for us. On November 22, 2023, S & P further raised our senior unsecured debt rating to' BBB ' from' BBB' citing the expected benefits from nuclear PTCs. ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISKWe are exposed to market risks associated with adverse changes in commodity prices, counterparty credit, interest rates, and equity prices. We manage these risks through risk management policies and objectives for risk assessment, control and valuation, counterparty credit approval, and the monitoring and reporting of risk exposures. After the separation on February 1, 2022, reporting on risk management issues is to the Executive Committee and the Audit and Risk Committee of the Board of Directors. Commodity Price Risk Commodity price risk is associated with price movements resulting from changes in supply and demand, fuel costs, market liquidity, weather conditions, governmental, regulatory, and environmental policies, and other factors. To the extent the total amount of energy we produce or procure differs from the amount of energy we have contracted to sell, we are exposed to market fluctuations in commodity prices. We seek to mitigate our commodity price risk through the sale and purchase of electricity, natural gas and oil, and other commodities. Electricity available from our owned or contracted generation supply in excess of our obligations to customers is sold into the wholesale markets. To reduce commodity price risk caused by market fluctuations, we enter non - derivative contracts as well as derivative contracts, including swaps, futures, forwards, and options, with approved counterparties to hedge anticipated exposures. We use derivative instruments as economic hedges to mitigate exposure to fluctuations in commodity prices. We expect the settlement of the majority of our economic hedges will occur during 2024 through 2026. In general, increases and decreases in forward market prices have a positive and negative impact, respectively, on owned and contracted generation positions that have not been hedged. Beginning in 2024, our nuclear fleet is eligible for the nuclear PTC provided by the IRA, an important tool in managing commodity price risk for each nuclear unit not already receiving state support. The nuclear PTC provides increasing levels of support as unit revenues decline below levels established in the IRA and is further adjusted annually for inflation over the duration of the program. In locations and periods where our load serving activities do not naturally offset existing generation portfolio risk, remaining commodity price exposure is managed through portfolio hedging activities. Portfolio hedging activities are generally concentrated in the prompt three years, when customer demand and market liquidity enable effective price risk mitigation. During this prompt three - year period, we seek to mitigate price risk associated with our load serving contracts, non - nuclear generation, and any residual price risk for our nuclear generation that the nuclear PTC and state programs may not fully mitigate. We also enter transactions that further optimize the economic benefits of our overall portfolio. Market price risk exposure is the risk of a change in the value of unhedged positions. The forecasted market price risk exposure is the risk of a change in the value of unhedged positions. The forecasted market price risk exposure for our entire economic hedge portfolio associated with a $ 5 / MWh reduction in the annual average around - the - clock energy price based on December 31, 2023 market conditions and hedged position results in an immaterial impact to net income (loss) for 2024 and 2025, respectively. See Note 16 — Derivative Financial Instruments of the Combined Notes to Consolidated Financial Statements for additional information. Fuel Procurement We procure natural gas through long - term and short - term contracts, and spot - market purchases. Nuclear fuel assemblies are obtained predominantly through long - term uranium concentrate supply contracts, contracted conversion services, contracted enrichment services, or a combination thereof, including contracts sourced from Russia, and contracted fuel fabrication services. The supply markets for uranium concentrates and certain nuclear fuel services are subject to price fluctuations and availability restrictions. Supply market conditions may make our procurement contracts subject to credit risk related to the potential non - performance of counterparties to deliver the contracted commodity or service at the contracted prices. We engage a diverse set of suppliers to ensure we can secure the nuclear fuel needed to continue to operate our nuclear fleet long - term. Approximately 55 % of our uranium concentrate requirements from 2024 through 2028 are supplied by three suppliers. To - date, we have not experienced any counterparty credit risk associated with these suppliers stemming from the Russia and Ukraine conflict. In the event of non - performance by these or other suppliers, we believe that replacement uranium concentrate can be obtained, although at prices that may be unfavorable when compared to the prices under the current supply agreements. Geopolitical developments, including the Russia and Ukraine conflict and United States, United Kingdom, European Union, and Canadian sanctions against Russia, have the potential to impact delivery from multiple suppliers in the international uranium processing industry. Non - performance by these counterparties could have a material adverse impact on our consolidated financial statements. To - date, we have not experienced any delivery or non - performance issues from our suppliers, nor any degradation in the quality of fuel we have received, and we are closely monitoring developments from the conflict. See ITEM 7. MANAGEMENT' S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS, Other Key Business Drivers for more information on the Russia and Ukraine conflict. Trading and Non - Trading Marketing Activities The following table provides detail on changes in our commodity mark - to - market net asset or liability balance sheet position from December 31, 2021 to December 31, 2023. It indicates the drivers behind changes in the balance sheet amounts. This table incorporates the mark - to - market activities that are immediately recorded in earnings. This table excludes all NPNS contracts and does not segregate proprietary trading activity. See Note 16 — Derivative Financial Instruments of the Combined Notes to Consolidated Financial Statements for additional information on the balance sheet classification of the mark - to - market energy contract net assets (liabilities) recorded as of December 31, 2023 and 2022. 20232022Beginning balance as of January 1 (a) $ 1, 046 $ 1, 622 Total change in fair value of contracts recorded in result of operations (2, 530) (647) Reclassification

(b) Includes derivative contracts acquired or sold through upfront payments or receipts of cash, excluding option premiums and the associated amortizations. Fair Values The following table presents maturity and source of fair value for mark- to- market commodity contract net assets (liabilities). See Note 18 — Fair Value of Financial Assets and Liabilities of the Combined Notes to Consolidated Financial Statements for additional information regarding fair value measurements and the fair value hierarchy. Maturities WithinTotal FairValue20242025202620272028 2029 and BeyondNormal Operations, Commodity derivative contracts (a) (b): Actively quoted prices (Level 1) $ 103 $ 90 $ 46 $ 9 $ (8) $ — $ 240 Prices provided by external sources (Level 2) (276) 186 91 (1) (1) — (1) Prices based on model or other valuation methods (Level 3) 712 133 (9) 9 1 23 869 Total $ 539 $ 409 $ 128 $ 17 $ (8) $ 23 $ 1, 108 (a) Mark- to- market gains and losses on other economic hedge and trading derivative contracts that are recorded in the results of operations. (b) Amounts are shown net of collateral paid / (received) from counterparties (and offset against mark- to- market assets and liabilities) of $ 2, 400 million at December 31, 2023. Credit Risk We would be exposed to credit- related losses in the event of non- performance by counterparties that execute derivative instruments. The credit exposure of derivative contracts, before collateral, is represented by the fair value of contracts at the reporting date. See Note 16 — Derivative Financial Instruments of the Combined Notes to Consolidated Financial Statements for a detailed discussion of credit risk. Credit- Risk- Related Contingent Features As part of the normal course of business, we routinely enter into physically or financially settled contracts for the purchase and sale of capacity, electricity, fuels, emissions allowances, and other energy- related products. In accordance with the contracts and applicable law, if we are downgraded by a credit rating agency, especially if such downgrade is to a level below investment grade, it is possible that a counterparty would attempt to rely on such a downgrade as a basis for making a demand for adequate assurance of future performance. Depending on our net position with a counterparty, the demand could be for the posting of collateral. In the absence of expressly agreed- to provisions that specify the collateral that must be provided, collateral requested will be a function of the facts and circumstances of the situation at the time of the demand. See Note 16 — Derivative Financial Instruments of the Combined Notes to Consolidated Financial Statements for additional information regarding collateral requirements and Note 19 — Commitments and Contingencies of the Combined Notes to Consolidated Financial Statements for additional information regarding the letters of credit supporting the cash collateral. We transact output through bilateral contracts. The bilateral contracts are subject to credit risk, which relates to the ability of counterparties to meet their contractual payment obligations. Any failure to collect these payments from counterparties could have a material impact on our consolidated financial statements. As market prices rise above or fall below contracted price levels, we are required to post collateral with purchasers; as market prices fall below contracted price levels, counterparties are required to post collateral with us. To post collateral, we depend on access to bank credit facilities, which serve as liquidity sources to fund collateral requirements. See ITEM 7. Liquidity and Capital Resources — Credit Matters and Cash Requirements — Credit Facilities for additional information. We participate in all of the established wholesale spot energy markets that are administered by PJM, ISO- NE, NYISO, CAISO, MISO, SPP, AESO, and ERCOT. ERCOT is not subject to regulation by FERC but performs a similar function in Texas to that performed by RTOs in markets regulated by FERC. In these areas, power is traded through bilateral agreements between buyers and sellers and on the spot energy markets that are administered by the RTOs or ISOs, as applicable. In areas where there is no spot energy market, electricity is purchased and sold solely through bilateral agreements. For sales into the spot markets administered by an RTO or ISO, the RTO or ISO maintains financial assurance policies that are established and enforced by those administrators. The credit policies of the RTOs and ISOs may, under certain circumstances, require that losses arising from the default of one member on spot energy market transactions be shared by the remaining participants. Non- performance or non- payment by a major member of an RTO / ISO could result in a material adverse impact on our consolidated financial statements. Exchange- Traded Transactions We enter into commodity transactions on NYMEX, ICE, NASDAQ, NGX, and the Nodal exchange (each an Exchange and, collectively, Exchanges). The Exchange clearinghouses act as the counterparty to each trade. Transactions on the Exchanges must adhere to comprehensive collateral and margining requirements. As a result, transactions on Exchanges are significantly collateralized and have limited counterparty credit risk. Interest Rate and Foreign Exchange Risk We use a combination of fixed- rate and variable- rate debt to manage interest rate exposure. We may also utilize interest rate swaps to manage our interest rate exposure. A hypothetical 50 basis point increase in the interest rates associated with unhedged variable- rate debt (excluding Commercial Paper) and fixed- to- floating swaps would not have resulted in a material decrease in our pre- tax income for the year ended December 31, 2023. To manage foreign exchange rate exposure associated with international energy purchases in currencies other than U. S. dollars, we utilize foreign currency derivatives, which are typically designated as economic hedges. See Equity Price Risk We maintain trust funds, as required by the NRC, to fund the costs of decommissioning our nuclear plants. Our NDT funds are reflected at fair value in the Consolidated Balance Sheets. The mix of securities in the trust funds is designed to provide returns to be used to fund decommissioning and to compensate us for inflationary increases in decommissioning costs; however, the equity securities in the trust funds are exposed to price fluctuations in equity markets, and the value of fixed- rate, fixed- income securities are exposed to changes in interest rates. We actively monitor the investment performance of the trust funds and periodically review asset allocations in accordance with our NDT fund investment policy. A hypothetical 25 basis points increase in interest rates and 10 % decrease in equity prices would have resulted in a $ 885 million reduction in the fair value of our NDT trust assets as of December 31, 2023. This calculation holds all other variables constant and assumes only the discussed changes in interest rates and equity prices. See Liquidity and Capital Resources section of ITEM 7. MANAGEMENT' S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS, and Note 10 — Asset Retirement Obligations of the Combined Notes to Consolidated Financial Statements for additional information. Our employee benefit plan trusts also hold investments in equity and debt securities. See ITEM 7. MANAGEMENT' S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS — Critical Accounting Policies and Estimates for sensitivity analysis of key assumptions in the valuation of our Pension and OPEB obligations. ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA Management' s Report on Internal Control Over Financial Reporting The management of Constellation Energy Corporation (CEG Parent) is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Exchange Act Rule 13a- 15 (f). Internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate. CEG Parent' s management assessed the effectiveness of CEG Parent' s internal control over financial reporting as of December 31, 2023. In making this assessment, management used the criteria in Internal Control — Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on this assessment, CEG Parent' s management concluded that, as of December 31, 2023, CEG Parent' s internal control over financial reporting was effective. The effectiveness of CEG Parent' s internal control over financial reporting as of December 31, 2023, has been audited by PricewaterhouseCoopers LLP, an independent registered public accounting firm, as stated in their report which appears herein. February 27, 2024 The management of Constellation Energy Generation, LLC (Constellation) is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Exchange Act Rule 13a- 15 (f). Internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. Constellation' s management assessed the effectiveness of Constellation' s internal control over financial reporting as of December 31, 2023. In making this assessment, management used the criteria in Internal Control — Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on this assessment, Constellation' s management concluded that, as of December 31, 2023, Constellation' s internal control over financial reporting was effective. Report of Independent Registered Public Accounting Firm To the Board of Directors and Shareholders of Constellation Energy Corporation Opinions on the Financial Statements and Internal Control over Financial Reporting We have audited the consolidated financial statements, including the related notes, as listed in the index appearing under Item 15 (a) (1) (i), and the financial statement schedule listed in the index appearing under Item 15 (a) (1) (ii), of Constellation Energy Corporation and its subsidiaries (the " Company ") (collectively referred to as the " consolidated financial statements "). We also have audited the Company' s internal control over financial reporting as of December 31, 2023, based on criteria established in Internal Control- Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the Company as of December 31, 2023 and 2022, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2023 in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2023, based on criteria established in Internal Control- Integrated Framework (2013) issued by the COSO. Basis for Opinions The Company' s management is responsible for these consolidated financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in Management' s Report on Internal Control Over Financial Reporting appearing under Item 8. Our responsibility is to express opinions on the Company' s consolidated financial statements and on the Company' s internal control over financial reporting based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Company in accordance with the U. S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB. We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud, and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the consolidated financial statements included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions. Definition and Limitations of Internal Control over Financial Reporting A company' s internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company' s internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company' s assets **, liabilities or results of operations could be negatively impacted by unknown or unexpected events, conditions or actions** that could have a material effect on **might occur at Calpine prior to** the **closing of the merger. The Calpine assets, liabilities, business,** financial **condition, cash flows, operating results and prospects** statements. Critical Audit Matters The critical audit matter communicated below is a matter arising from the current period audit of the consolidated financial statements that was communicated or required to be **acquired** communicated to the audit committee and that (i) relates to accounts or disclosures that are material to the consolidated financial statements and (ii) involved our **or assumed by us** especially challenging, subjective, or complex judgments. The communication of critical audit matters does not alter in any way **the merger could be negatively impacted before** our **or after** opinion on the **merger closing** consolidated financial statements, taken as a **result** whole, and we are not, by communicating the critical audit matter below, providing a separate opinion on the critical audit matter or on the accounts or disclosures to which it relates. Nuclear Decommissioning Asset Retirement Obligations (ARO) Assessment As described in Notes 1 and 10 to the consolidated financial statements, the Company has a legal obligation to decommission its nuclear power plants following the permanent cessation of **previously unknown events** operations. To estimate its decommissioning obligations management uses a probability- weighted, discounted cash flow model which, on a unit- by- unit basis, considers multiple outcome scenarios that include significant estimates and assumptions, and are based on decommissioning cost studies, cost escalation rates, probabilistic cash flow models, and discount rates. Management updates its ARO annually, unless circumstances warrant more frequent updates, based on its review of updated cost studies and its annual evaluation of cost escalation factors and probabilities assigned to various scenarios. As of December 31, 2023, the nuclear decommissioning ARO was $ 13. 9 billion. The principal considerations for our **or conditions occurring** our **or existing before** determination that performing procedures relating to the Company **merger closes. Adverse changes in Calpine** ' s nuclear decommissioning ARO assessment is **business or operations could occur or arise as** a critical audit matter are (i) **result of actions by Calpine, legal or regulatory developments including the emergence or unfavorable resolution of pre- merger loss contingencies, deteriorating general business, market, industry or economic conditions, and** the **other factors both within and beyond the control of Calpine. A** significant **decline in the value of Calpine assets to be acquired or** judgment by management when estimating its decommissioning obligations; (ii) a **significant increase** high degree of auditor

judgment, subjectivity, and effort in performing procedures and evaluating **Calpine liabilities to be assumed could negatively impact** the **combined company** reasonableness of management ' s **future business** discounted cash flow model and significant assumptions related to decommissioning cost studies; and (iii) the audit effort involved the use of professionals with specialized skill and knowledge. Addressing the matter involved performing procedures and evaluating audit evidence in connection with forming our overall opinion on the consolidated financial statements. These procedures included testing the effectiveness of controls relating to management' s development of the inputs , **operating** assumptions, and discounted cash flow model used in management' s ARO assessment. These procedures also included, among others (i) testing management' s process for estimating the decommissioning obligations by evaluating the appropriateness of the discounted cash flow model; (ii) testing the completeness and accuracy of data used by management; and (iii) evaluating the reasonableness of management' s significant assumptions related to decommissioning cost studies. Professionals with specialized skill and knowledge were used to assist in evaluating the results of decommissioning cost studies. / s / PricewaterhouseCoopers LLP Baltimore , Maryland February 27, 2024 We have served as the Company' s auditor since 2022. To the Board of Directors and Member of Constellation Energy Generation, LLC Opinion on the Financial Statements We have audited the consolidated financial statements, including the related notes, as listed in the index appearing under Item 15 (a) (2) (i), and the financial statement schedule listed in the index appearing under Item 15 (a) (2) (ii), of Constellation Energy Generation, LLC and its subsidiaries (the " Company ") (collectively referred to as the " consolidated financial statements "). In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2023 and 2022, and the results of its operations and its cash flows **, financial conditions or prospects. In addition, there could be potential unknown liabilities and unforeseen expenses as a result of the merger, some of which we may not discover during our due diligence or adequately adjust** for each of the three years in the period ended December 31, 2023 in conformity with accounting principles generally accepted in the United States of America. These consolidated financial statements are the responsibility of the Company ' s management. Our responsibility is to express an opinion on the Company' s consolidated financial statements based on our audits **merger arrangements** . We **may record goodwill** are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Company in accordance with the U. S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB. We conducted our audits of these consolidated financial statements in accordance with the standards of the PCAOB. Those standards require that **could become impaired** we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud. The Company is not required to have, nor were we engaged to perform, an **and adversely affect** audit of its internal control over financial reporting. As part of our audits we are required to obtain an understanding of internal control over financial reporting but not for the purpose of expressing an opinion on the effectiveness of the Company' s internal control over financial reporting. Accordingly, we express no such opinion. Our audits included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or **our** fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. We believe that our audits provide a reasonable basis for our opinion. The principal considerations for our determination that performing procedures relating to the Company ' s nuclear decommissioning ARO assessment is a critical audit matter are (i) the significant judgment by management when estimating its decommissioning obligations; (ii) a high degree of auditor judgment, subjectivity, and effort in performing procedures and evaluating the reasonableness of management ' s discounted cash flow model and significant assumptions related to decommissioning cost studies; and (iii) the audit effort involved the use of professionals with specialized skill and knowledge. Addressing the matter involved performing procedures and evaluating audit evidence in connection with forming our overall opinion on the consolidated financial statements. These procedures included testing the effectiveness of controls relating to management ' s development of the inputs, assumptions, and discounted cash flow model used in management ' s ARO assessment. These procedures also included, among others; (i) testing management ' s process for estimating the decommissioning obligations by evaluating the appropriateness of the discounted cash flow model; (ii) testing the completeness and accuracy of data used by management; and (iii) evaluating the reasonableness of management ' s significant assumptions related to decommissioning cost studies. Professionals with specialized skill and knowledge were used to assist in evaluating the results of decommissioning cost studies. We have served as the Company' s auditor since 2001. Basis of Presentation Description of Business We are a producer of carbon- free energy and a supplier of energy products and services. Our generating capacity includes primarily nuclear, wind, solar, natural gas and hydroelectric assets. Through our integrated business operations, we sell electricity, natural gas, and other energy- related products and sustainable solutions to various types of customers, including distribution utilities, municipalities, cooperatives, and commercial, industrial, governmental, and residential customers in markets across multiple geographic regions. We have five reportable segments: Mid- Atlantic, Midwest, New York, ERCOT and Other Power Regions. On February 21, 2021, the Board of Directors of Exelon authorized management to pursue a plan to separate its competitive generation and customer- facing energy businesses, conducted through Constellation Energy Generation, LLC (" Constellation ", formerly Exelon Generation Company, LLC) and its subsidiaries, into an independent, publicly- traded company. CEG Parent, a direct, wholly owned subsidiary of Exelon, was newly formed for the purpose of separation and had not engaged in any business activities nor had any assets or liabilities prior to the separation. On February 1, 2022, the separation was completed and CEG Parent holds all the interests in Constellation previously held by Exelon. As an individual registrant, Constellation has historically filed consolidated financial statements to reflect its financial position and operating results as a stand- alone, wholly owned subsidiary of Exelon. **In** The accompanying Consolidated Financial Statements have been prepared in accordance with GAAP **, the merger will be accounted** for **as a business combination** annual financial statements and in accordance with the instructions to Form 10- K and Regulation S- X promulgated by the SEC. The **assets** Consolidated Financial Statements include the accounts of our subsidiaries and **liabilities** all intercompany transactions have been eliminated. CEG Parent' s prior period financial statements have been adjusted to reflect the balances of **Calpine will be** Constellation in accordance with applicable guidance. Amounts disclosed relate to CEG Parent and Constellation unless specifically noted as relating to CEG Parent only. Unless otherwise indicated or the context otherwise requires, references herein to the terms " we, " " us, " and " our " refer collectively to CEG Parent and Constellation. We own 100 % of our significant consolidated **in** subsidiaries, either directly or **our** indirectly, except for certain consolidated VIEs, including CRP, of which we hold a 51 % interest. The remaining interests in the consolidated VIEs are included in noncontrolling interests on the Consolidated Balance **balance** Sheets **sheet**. **Any excess** See Note 22 — Variable Interest Entities for additional information on consolidated VIEs. We consolidate the accounts of entities in which we have a controlling financial interest, after the elimination of intercompany transactions. Where we do not have a controlling financial interest in an entity, proportionate consolidation — **consideration transferred** , equity method accounting or accounting for investments in equity securities with or without readily determinable fair value is applied. We apply proportionate consolidation when we have an undivided interest in an asset and are proportionately liable for our share of each liability associated with the asset. We proportionately consolidate our undivided ownership interest in jointly owned electric plants. Under proportionate consolidation, we separately record our proportionate share of the assets, liabilities, revenues and expenses related to the undivided interest in the asset. See Note 9 — Jointly Owned Electric Plant for additional information on application of proportionate consolidation. We apply equity method accounting when we have a significant influence over an investee through an ownership in equity, which generally approximates a 20 % to 50 % voting interest. We apply equity method accounting to certain investments and joint ventures. Under equity method accounting, we report our interest in the entity as an investment and our percentage share of the earnings from the entity as single line items in our consolidated financial statements. We use accounting for investments in equity securities with or without readily determinable fair values **of Calpine' s assets and liabilities,** if we lack a significant influence **any, will be recorded as goodwill. The amount of goodwill** , which **could be material, will be allocated to** generally results when we hold less than 20 % of the **appropriate reporting units of the combined company. Pursuant to the Merger Agreement, the stock consideration at the closing will consist of 50 million newly issued shares of Constellation** common stock **,** of an entity. Under accounting for investments in equity securities with readily determinable fair values, the investments are reported based on quoted prices in active markets and realized and unrealized gains and losses are included in earnings. Under accounting for investments in equity securities without readily determinable fair values, the investments are reported at cost adjusted for changesCombined Notes to Consolidated Financial Statements (Dollars in millions, unless otherwise noted) Note 1 — Basis of Presentation from observable transactions for identical or similar investments of the same issuer, less impairment, and changes in measurement are reported in earnings. On February 1, 2022, Exelon completed the separation through a pro- rata distribution of all of the outstanding shares of our common stock, no par value **. However** , **the total value of consideration transferred will be determined, in part, based** on the basis **market price** of one such share for every three — **the 50 million** shares **at** of Exelon common stock held on January 20, 2022, the record **closing** date of the distribution. **The number** We are an independent, publicly traded company listed on the Nasdaq Stock Market under the symbol " CEG ", and regular- way trading began on February 2, 2022. Exelon no longer retains any ownership interest in CEG Parent or Constellation. Prior to completion of **shares** the separation, our financial statements include certain transactions with affiliates of Exelon, which are disclosed as related party transactions. After February 1, 2022, all transactions with Exelon or its affiliates are no longer related party transactions. In order to govern the ongoing relationships with Exelon after the separation, and to facilitate an orderly transition, we **expect** entered into several agreements with Exelon, including the following: • Separation Agreement — sets forth the principal actions to **issue** be taken in connection with the **stock consideration will not** separation, including the transfer of assets and assumption of liabilities and establishes certain rights and obligations between us following the distribution • Transition Services Agreement (TSA) — governs all matters relating to the provision of services between us and Exelon on a transitional basis, in addition to providing us with certain services for an expected period of two- years, provided that certain services may be longer than the term and services may be extended with approval from both parties; the services include support for information technology, accounting, finance, human resources, security, and various other administrative and operational services • Employee Matters Agreement (EMA) — addresses certain employment, compensation and benefits matters, including the allocation of employees between us and Exelon and the allocation and treatment of certain assets and liabilities relating to our employees and former employees • Tax Matters Agreement (TMA)- governs the respective rights, responsibilities, and obligations between us and Exelon with respect to all tax matters (excluding employee- related taxes covered under EMA), in addition to certain restrictions which generally prohibit us from taking or failing to take any action in the two- year period following the distribution that would prevent the distribution from qualifying as tax- free for U. S. federal income tax purposes, including limitations on our ability to pursue certain equity issuances, strategic transactions, repurchases or other transactions Pursuant to the Separation Agreement, we received a cash contribution of $ 1. 75 billion from Exelon on January 31, 2022, the proceeds of which were used to settle $ 258 million of an intercompany loan from Exelon and $ 200 million of short- term debt outstanding prior to separation, in addition to a $ 192 million contribution to our pension plans. We also entered into two new five- year credit facility agreements providing $ 4. 5 billion of capacity. See Note 17 — Debt and Credit Agreements for additional information on these facility agreements. The amounts Exelon billed us for services pursuant to the TSA were $ 151 million and $ 266 million for the years ended December 31, 2023 and 2022, respectively. The amounts we billed Exelon for services pursuant to the TSA were $ 14 million and $ 43 million for the years ended December 31, 2023 and 2022, respectively. Use of Estimates The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Areas in which significant estimates have been made include, but are not limited to, the accounting for nuclear decommissioning costs and other AROs, pension and OPEB plans, inventory reserves, allowance for credit losses, long- lived asset valuations and impairment assessments, derivative instruments, goodwill, unamortized energy contracts, fixed asset depreciation, environmental costs and other loss contingencies, taxes and unbilled energy revenues. Actual results could differ from those estimates. Operating Revenues. Our operating revenues generally consist of revenues from contracts with customers involving competitive sales of power, natural gas, and other energy- related products and sustainable solutions. We recognize revenue from contracts with customers to depict the transfer of goods or services to customers in an amount that we expect to be entitled to in exchange for those goods or services. At the end of each reporting period, we accrue an estimate for the unbilled amount of power and natural gas delivered or services provided to customers. Commodity Derivatives. Derivative instruments are generally recorded at fair value with subsequent changes in fair value recognized as realized and unrealized revenue or expense. The classification of revenue or expense is based on the intent of the transaction. See Note 16 — Derivative Financial Instruments for

additional information. Taxes Directly Imposed on Revenue- Producing Transactions. We collect certain taxes from customers such as sales and gross receipts taxes, along with other taxes, surcharges and fees, that are levied by state or local governments on the sale or distribution of electricity and natural gas and any taxable energy- related products and services. Some of these taxes are imposed on the customer, but paid by us, while others are imposed on us. Where these taxes are imposed on the customer, such as sales taxes, they are reported on a net basis in revenues. However, where these taxes are imposed on us, such as gross receipts taxes, they are reported on a gross basis in expense. Accordingly, revenues are recognized for the taxes collected from customers along with an offsetting expense in Taxes other than income taxes in the Consolidated Statements of Operations and Comprehensive Income. See Note 23 — Supplemental Financial Information for the taxes that are presented on a gross basis. We recognize a ROU asset and lease liability for operating leases with a term of greater than one year. Operating lease ROU assets are included in Other deferred debits and other assets and operating lease liabilities are included in Other current liabilities and Other deferred credits and other liabilities on the Consolidated Balance Sheets. The ROU asset is measured as the sum of (1) the present value of all remaining fixed and in- substance fixed payments using the rate implicit in the lease whenever that is readily determinable or our incremental borrowing rate, (2) any lease payments made at or before the commencement date (less any lease incentives received) and (3) any initial direct costs incurred. The lease liability is measured the same as the ROU asset, but excludes any payments made before the commencement date and initial direct costs incurred. Lease terms include options to extend or terminate the lease if it is reasonably certain they will be exercised. We include non- lease components for most asset classes, which are service- related costs that are not integral to the use of the asset, in the measurement of the ROU asset and lease liability. Expense for operating leases and leases with a term of one year or less is recognized on a straight- line basis over the term of the lease, unless another systematic and rational basis is more representative of the derivation of benefit from use of the leased property. Variable lease payments are recognized in the period in which the related obligation is incurred and consist primarily of payments for purchases of electricity under contracted generation that are based on the electricity produced by those generating assets. Operating lease expense and variable lease payments are recorded to Purchased power and fuel expense for contracted generation or Operating and maintenance expense for all other lease agreements in the Consolidated Statements of Operations and Comprehensive Income. Income from operating leases, including subleases, is recognized on a straight- line basis over the term of the lease, unless another systematic and rational basis is more representative of the pattern in which income is earned over the term of the lease. Variable lease payments are recognized in the period in which the related obligation is performed and consist primarily of payments received from sales of electricity under contracted generation that are based on the electricity produced by those generating assets. Operating lease income and variable lease payments are recorded to Operating revenues in the Consolidated Statements of Operations and Comprehensive Income. Our operating leases consist primarily of contracted generation, real estate including office buildings, and vehicles and equipment. We generally account for contracted generation in which the generating asset is not renewable as a lease if the customer has dispatch rights and obtains substantially all the economic benefits. We generally do not account for contracted generation in which the generating asset is renewable as a lease if the customer does not design the generating asset. We account for land right arrangements that provide for exclusive use as leases while shared use land arrangements are generally not leases. See Note 11 — Leases for additional information. Deferred federal and state income taxes are recorded on temporary differences between the book and tax basis of assets and liabilities and for tax benefits carried forward. ITCs have been deferred in the Consolidated Balance Sheets and are recognized in book income over the life of the related property. We account for uncertain income tax positions using a benefit recognition model with a two- step approach; a more- likely- than- not recognition criterion; and a measurement approach that measures the position as the largest amount of tax benefit that is greater than 50 % likely of being realized upon ultimate settlement. If it is not more- likely- than- not that the benefit of the tax position will be sustained on its technical merits, no benefit is recorded. Uncertain tax positions that relate only to timing of when an item is included on a tax return are considered to have met the recognition threshold. We recognize accrued interest related to unrecognized tax benefits in Interest expense, net or Other, net (interest income) and recognize penalties related to unrecognized tax benefits in Other, net in the Consolidated Statements of Operations and Comprehensive Income. Cash and Cash Equivalents We consider investments purchased with an original maturity of three months or less to be cash equivalents. Restricted Cash and Cash Equivalents Restricted cash and cash equivalents represent funds that are restricted to satisfy designated current liabilities. As of December 31, 2023 and 2022, restricted cash and cash equivalents primarily represented the payment of medical, dental, vision, and long- term disability benefits and project- specific nonrecourse financing structures for debt service and financing of operations of the underlying entities. See Note 17 — Debt and Credit Agreements and Note 23 — Supplemental Financial Information for additional information. Allowance for Credit Losses on Accounts Receivables The allowance for credit losses reflects our best estimate of losses on the customers' accounts receivable balances based on historical experience, current information, and reasonable and supportable forecasts. The allowance for credit losses for our retail customers is based on accounts receivable aging historical experience coupled with specific identification through a credit monitoring process, which considers current conditions and forward- looking information such as industry trends, macroeconomic factors, changes in the regulatory environment, external credit ratings, publicly available news, payment status, payment history, and the exercise of collateral calls. The allowance for credit losses for our wholesale customers is developed using a credit monitoring process, like that used for retail customers. When a wholesale customer' s risk characteristics are no longer aligned with the pooled population, we use specific identification to develop an allowance for credit losses. Adjustments to the allowance for credit losses are recorded in Operating and maintenance expense in the Consolidated Statements of Operations and Comprehensive Income. We have certain non- customer receivables in Current Assets and Other deferred debits and other assets which primarily are with governmental agencies. As such, the allowance for credit losses related to these receivables is not material. We monitor these balances and will record an allowance if there are indicators of a decline in credit quality. We account for our investments in and arrangements with VIEs based on the following specific requirements: • qualitative assessment of factors determinant in whether we have a controlling financial interest, • ongoing reconsideration of this assessment, and • where we consolidate a VIE (as primary beneficiary), disclosure of (1) the assets of the consolidated VIE, if they can be used to only settle specific obligations of the consolidated VIE, and (2) the liabilities of a consolidated VIE for which creditors do not have recourse to the general credit of the primary beneficiary. See Note 22 — Variable Interest Entities for additional information. Inventory is recorded at the lower of weighted average cost or net realizable value. Provisions are recorded for excess and obsolete inventory. Natural gas, oil, materials and supplies, and emissions allowances are generally included in inventory when purchased. Natural gas, oil, and emissions allowances are expensed to Purchased power and fuel expense when consumed. Materials and supplies generally include items utilized within our generating plants and are expensed to Operating and maintenance or capitalized to Property, plant and equipment, as appropriate, when installed or used. Debt and Equity Security Investments Debt and Equity Investments within NDT funds. We have debt and equity securities held in our NDT funds which are measured and recorded at fair value. Realized and unrealized gains and losses, net of trust level taxes, on our NDT funds associated with the Regulatory Agreement Units are offset in Noncurrent payables related to Regulatory Agreement Units. Realized and unrealized gains and losses, net of trust level taxes, on our NDT funds associated with the Non- Regulatory Agreement Units are included in Other, net in the Consolidated Statements of Operations and Comprehensive Income. For equity securities without readily determinable fair values, we have elected to use the measurement alternative to measure these investments, defined as cost adjusted for changes from observable transactions for identical or similar investments of the same issuer, less impairment. Our NDT funds are classified as current or noncurrent assets, depending on the timing of the decommissioning activities and income taxes on trust earnings. See Note 18 — Fair Value of Financial Assets and Liabilities and Note 10 — Asset Retirement Obligations for additional information. Equity Security Investments with Readily Determinable Fair Values. We have certain equity securities with readily determinable fair values. Realized and unrealized gains and losses are included in Other, net in the Consolidated Statements of Operations and Comprehensive Income. See Note 18 — Fair Value of Financial Assets and Liabilities for additional information. Equity Security Investments without Readily Determinable Fair Values. We have certain equity securities without readily determinable fair values. We have elected to use the measurement alternative to measure these investments, defined as cost adjusted for changes from observable transactions for identical or similar investments of the same issuer, less impairment. Changes in measurement are reported in Other, net in the Consolidated Statements of Operations and Comprehensive Income. See Note 18 — Fair Value of Financial Assets for additional information. Property, Plant and Equipment Property, plant and equipment is recorded at acquired cost. Acquired cost includes construction- related direct labor and material costs. When appropriate, acquired cost also includes capitalized interest. Costs associated with nuclear outages and planned major maintenance activities, are expensed to Operating and maintenance expense or capitalized to Property, plant, and equipment based on the nature of the activities in the period incurred. The cost of repairs and maintenance and minor replacements of property is charged to Operating and maintenance expense as incurred. Upon retirement, the cost of property is generally charged to accumulated depreciation in accordance with the composite and group methods of depreciation. Upon replacement of an asset, the costs to remove the asset, net of salvage, are capitalized to gross plant when incurred as part of the cost of the newly installed asset and recorded to depreciation expense over the life of the new asset. Removal costs, net of salvage, incurred for property that will not be replaced is charged to Operating and maintenance expense as incurred. Certain assets follow the unitary method of depreciation and recognize gains and losses in the period of replacement or retirement. These gains and losses are recorded in Operating and maintenance expense in the Consolidated Statements of Operations and Comprehensive Income. Capitalized Software. Certain costs, such as design, coding, and testing incurred during the application development stage of software projects that are internally developed or purchased for operational use are capitalized in Property, plant and equipment in the Consolidated Balance Sheets. Similar costs incurred for cloud- based solutions treated as service arrangements are capitalized in Other current assets and Deferred debits and other assets in the Consolidated Balance Sheets. Such capitalized amounts are amortized ratably over the expected lives of the projects when they **the price** become operational, generally not to exceed five years. Capitalized Interest. During construction, we capitalize the costs of **our common stock** debt funds. Most projects will use a debt rate calculated using the general corporate debt pool. In some cases, projects are specifically financed and use a project specific debt rate, which **may vary significantly** is excluded from the general corporate debt pool. Capitalization of debt funds is recorded as a charge to construction work in progress and as a non- cash credit to interest expense. See Note 8 — Property, Plant, and Equipment, Note 9 — Jointly Owned Electric Plant and Note 23 — Supplemental Financial Information for additional information. The cost of nuclear fuel is capitalized in Property, plant and equipment and charged to Purchased power and fuel using the unit- of- production method. Any **increase in** potential future SNF disposal fees will also be expensed through Purchased power and fuel expense. Additionally, certain on- site SNF storage costs are being reimbursed by the **value of** DOE since a DOE (or **our common stock** government- owned) long- term storage facility has not been completed. See Note 19 — Commitments and Contingencies for additional information regarding the cost of SNF storage and disposal. Except for the amortization of nuclear fuel, depreciation, inclusive of ARC, is generally recorded over the estimated service lives of property, plant and equipment on a straight- line basis using the group, composite or unitary methods of depreciation. Two methods of depreciating multiple asset groups exist: the group method and the composite method. The group method is typically for groups of assets that are largely homogenous and have approximately the same useful lives. The composite method is used when the assets are heterogeneous and have different lives. Under both methods, a reporting entity depreciates the assets over the average life of the assets in the group. The estimated service lives are based on a combination of depreciation studies, historical retirements, site licenses and management estimates of operating costs and expected future energy market conditions. See Note 7 — Early Plant Retirements for additional information on the impacts of early plant retirements, Note 8 — Property, Plant, and Equipment for additional information regarding depreciation, and Note 23 — Supplemental Financial Information for additional information regarding nuclear fuel. We estimate and recognize a liability for our legal obligation to perform asset retirement activities even though the timing and / or methods of settlement may be **reflected as** conditional **additional goodwill** on future events. We generally update our nuclear decommissioning ARO annually, unless circumstances warrant more frequent updates, based on our annual evaluation of cost escalation factors and probabilities assigned to the multiple outcome scenarios within our probability- weighted discounted cash flow models. Our multiple outcome scenarios are **required** generally based on decommissioning cost studies which are updated, on a rotational basis, for each of our nuclear units at least every five years, unless circumstances warrant more frequent updates. AROs are accreted throughout each year to reflect the time value of money for these present value obligations through a charge to Operating and maintenance expense in the Consolidated Statements of Operations and Comprehensive Income for Non- Regulatory Agreement Units and through an offsetting decrease in noncurrent payables related to Regulatory Agreement Units. See Note 10 — Asset Retirement Obligations for additional information. Accounting Implications of the Regulatory Agreement Units Based on the requirements of the ICC, PAPUC, and PUCT that dictate our obligations related to the shortfall or excess of NDT funds necessary for decommissioning the former ComEd, former PECO, and STP units, decommissioning- related activities net of applicable taxes, including realized and unrealized gains and losses on the NDT funds, depreciation of the ARC, and accretion of the decommissioning obligation are generally offset in the Consolidated Statements of Operations and Comprehensive Income and are recorded as noncurrent payables in the Consolidated Balance Sheets (within Payables related to Regulatory Agreement Units). See Note 10 — Asset Retirement Obligations for additional information. Long- Lived Assets. We regularly monitor and evaluate the carrying value of long- lived assets **assess** or asset groups for recoverability whenever events or changes in circumstances indicate that the carrying value of those assets may not be recoverable. Indicators of impairment may include a deteriorating business climate, including, but not limited to, declines in energy prices, condition of the asset, or plans to dispose of a long- lived asset significantly before the end of its useful life. We determine if long- lived assets or asset groups are potentially impaired by comparing the undiscounted expected future cash flows to the carrying value when indicators of impairment exist. When the undiscounted cash flow analysis indicates a long- lived asset or asset group may not be recoverable, the amount of the impairment loss is determined by measuring the excess of the carrying amount of the long- lived asset or asset group over its fair value. Generally, pre- tax impairment losses are recorded in Operating and maintenance expense in the Consolidated Statements of Operations and Comprehensive Income. See Note 12 — Asset Impairments for additional information. Goodwill **goodwill** . Goodwill represents the excess of the purchase price paid over the estimated fair value of the net assets acquired and liabilities assumed

in the acquisition of a business. Goodwill is not amortized, but is tested for impairment at least annually or **by comparing the fair value of reporting units to the carrying value of those reporting units. A potential impairment could result** in **a material non- cash** an interim basis if an event occurs or circumstances change **charge** that would **have** more likely than not reduce the fair value of a **material negative impact on our future operating results** reporting unit below its carrying value. See Note 2 — Mergers, Acquisitions, and Dispositions and Note 13 — Intangible Assets for **or** additional information **financial position**. Equity Method Investments. We regularly monitor and evaluate equity method investments to determine whether they are impaired. An impairment is recorded when the investment has experienced a decline in value that is other- than- temporary in nature. Additionally, if the entity in which we hold an investment recognizes an impairment loss, we would record their proportionate share of that impairment loss and evaluate the investment for an other- than- temporary decline in value. These **The merger may** impairment losses are recorded in Equity in (losses) earnings of unconsolidated affiliates in the Consolidated Statements of Operations and Comprehensive Income. Equity Security Investments. Equity investments with readily determinable fair values are measured and recorded at fair value with any changes in fair value recorded in Other, net in the Consolidated Statements of Operations and Comprehensive Income. Investments in equity securities without readily determinable fair values are qualitatively assessed for impairment each reporting period. If it is determined that the equity security is impaired, an impairment loss will be **completed** recognized in Other, net in the Consolidated Statements of Operations and Comprehensive Income to the amount by which the security's carrying amount exceeds its fair value. All derivatives are recognized on the balance sheet at their fair value unless they qualify for certain exceptions, including NPNS. For derivatives intended to serve as economic hedges, changes in fair value are recognized in earnings each period. Amounts classified in earnings are included in Operating revenues, Purchased power and fuel, or Interest expense in the Consolidated Statements of Operations and Comprehensive Income based on the activity the transaction is economically hedging. While most of the derivatives serve as economic hedges, there are also derivatives entered into for proprietary trading purposes, subject to our RMP, and changes in the fair value of those derivatives are recorded in Operating revenues in the Consolidated Statements of Operations and Comprehensive Income. Cash inflows and outflows related to derivative instruments are included as a component of operating, investing, or financing cash flows in the Consolidated Statements of Cash Flows, depending on the nature of each transaction. As part of the energy marketing business, we enter into contracts to buy and sell energy to meet the requirements of our customers. These contracts include short- term **terms** and long- term commitments to purchase and sell energy and energy- related products in the energy markets with the intent and ability to deliver or take delivery of the underlying physical commodity. NPNS are contracts where physical delivery is probable, quantities are expected to be used or sold in the normal course of business over a reasonable period and will not be financially settled. Revenues and expenses on derivative contracts that qualify, and are designated, as NPNS are recognized when the underlying physical transaction is completed. While these contracts are considered derivative financial instruments, they are not required to be recorded at fair value. See Note 16 — Derivative Financial Instruments for additional information. Prior to separation, Exelon sponsored defined benefit pension plans and OPEB plans as described in Note 15 — Retirement Benefits. The plan obligations and costs of providing benefits under these plans were measured as of December 31, 2021. We accounted for our participation in Exelon's pension and OPEB plans by applying multi- employer accounting. Exelon allocated costs related to its pension and OPEB plans to its subsidiaries based on both active and retired employee participation in each plan. We included the service cost and non- service cost components in Operating and maintenance expense and Property, plant, and equipment, net in the consolidated financial statements. Effective upon separation, we sponsor defined benefit pension and OPEB plans as described in Note 15 — Retirement Benefits. The plan obligations and costs of providing benefits under these plans were measured upon separation as of February 1, 2022 and remeasured as of December 31, 2023 and 2022. The measurements involved various factors, assumptions, and accounting elections. The impact of assumption changes or experience different from **that assumed on pension and OPEB obligations is recognized over time rather than immediately recognized in the those** Consolidated Statements **contained in the Merger Agreement. Prior to the completion** of Operations **the merger, we and Calpine could, by mutual agreement,** and **amend** Comprehensive Income. Gains or losses more than the greater of ten percent of the PBO or the MRV of plan assets are amortized over the expected average remaining service period of plan participants. Gains or losses more than the greater of ten percent of the APBO or the MRV of plan assets are amortized over the average future remaining lifetime of the current inactive population for **or alter** the OPEB plans. We report the pension and OPEB service cost and non- service cost (credit) components of net periodic benefit costs (credits) for all plans separately in our Consolidated Statements of Operations and Comprehensive Income. Effective February 1, 2022, the service cost component continues to be included in Operating and maintenance expense and Property, plant, and equipment, net (where criteria for capitalization of direct labor has been met) while the non- service cost (credit) components are included in Other **the terms of the Merger Agreement**. **including** net, in accordance with **respect** single employer plan accounting. Renewable Energy Credits RECs are included in Renewable energy credits in the Consolidated Balance Sheets. Purchased RECs are recorded at cost on the date they are purchased and internally generated RECs are recognized at a zero- cost basis when generated. The cost of RECs purchased on a stand- alone basis is based on the transaction price, while the cost of RECs acquired through PPAs represents the difference between the total contract price and the market price of energy at contract inception. Generally, revenue for RECs that are sold to a counterparty under a contract that specifically identifies a power plant are recognized at a point in time when the power is produced. This includes both bundled and unbundled REC sales. Otherwise, the revenue is recognized upon physical transfer of the REC to the customer. 2. Mergers, Acquisitions, and Dispositions On November 1, 2023, we completed the acquisition of NRG South Texas LP (renamed and converted as Constellation South Texas, LLC), which owns a 44 % undivided ownership interest in the jointly owned STP, a 2, 645 MW, dual- unit nuclear plant located in Bay City, Texas. The net cash paid was $ 1. 65 billion, after certain purchase price adjustments. The current renewed NRC licenses for the STP units expire in 2047 and 2048, and the NRC licensed operator is STP Nuclear Operating Company (STPNOC), acting on behalf of the joint owners. Other owners include City Public Service Board of San Antonio (CPS, 40 %) and the City of Austin, Texas (Austin Energy, 16 %). This acquisition is complementary to and aligned strategically with our existing clean energy business operations. As part of the transaction, we acquired ownership of two **to** decommissioning trust funds established to provide funding for decontamination and decommissioning of STP. The trust funds have been funded with amounts collected from predecessor utilities. We maintain the ability to collect additional funds from utility customers in the event of a shortfall and are required to return any excess funds to utility customers upon completion of decommissioning. As such, our accounting for the future decommissioning of our interest in STP will mirror that of our existing Regulatory Agreement Units. See Note 1 — Basis of Presentation and Note 10 — Asset Retirement Obligations for additional information on our accounting policy for Regulatory Agreement Units. Combined Notes to Consolidated Financial Statements (Dollars in millions, unless otherwise noted) Note 2 — Mergers, Acquisitions, and Dispositions The acquisition was accounted for using the acquisition method of accounting in accordance with authoritative guidance, which requires, among other things, the assets acquired and liabilities assumed to be recognized at their respective fair value as of the acquisition date. The excess of the purchase price over fair value of our proportionate share of the assets acquired and liabilities assumed was recorded to goodwill. The goodwill recognized is primarily driven by the opportunity for continued operations through 80 years and the value of STP's carbon- free energy that is not fully reflected by the markets. The goodwill amount has been assigned entirely to the ERCOT operating segment. See Note 13 — Intangible Assets for additional information. The total amount of goodwill is expected to be deductible for tax purposes over the amortization period. The fair values of STP's assets and liabilities were determined based on significant estimates and assumptions that are judgmental in nature, including projected future cash flows (including timing), discount rates reflecting risk inherent in the future cash flows and future power and fuel market prices. Accounting guidance provides that the allocation of the purchase price may be modified up to one year from the date of the acquisition to the extent that additional information is obtained about the facts and circumstances that existed as of the acquisition date. Any changes could result in a change in the amount of goodwill recorded. The following table summarizes the acquisition- date fair value of the consideration transferred and the assets and liabilities assumed for the STP acquisition: Cash paid for purchase price $ 1, 654 Identifiable assets acquired and liabilities assumedProperty, plant, and equipment1, 254 Nuclear decommissioning trust funds869 Inventories, net47 Other long- term assets40Other current assets11Total assets2, 221 Asset retirement obligations429 Payables related to Regulatory Agreement Units376 Deferred income taxes and unamortized investment tax credits65Accounts payable and accrued expenses45Pension and OPEB obligations25Other long- term liabilities5 Total liabilities945 Total net identifiable assets, at fair value1, 276 Goodwill $ 378 For the year ended December 31, 2023, we incurred immaterial merger and integration- related costs which are included within Operating and maintenance expense in our Consolidated Statements of Operations and Comprehensive Income. The operating revenues and results of operations for STP have been included in the Consolidated Statements of Operations and Comprehensive Income from the date of acquisition and were not material for the year ended December 31, 2023. The pro forma effects of this acquisition are not significant to our reported results for any periods presented. Accordingly, no pro forma financial statements have been presented herein. On July 28, 2023 NRG accepted service of a lawsuit filed by the City of San Antonio, Texas, acting by and through CPS, in the 130th District Court of Matagorda County, Texas against NRG and certain of its subsidiaries, claiming the existence of a right of first refusal that applies to the transaction contemplated between us and NRG. On July 31, 2023 we intervened in the lawsuit and Austin Energy also intervened in the lawsuit claiming a similar right of first refusal. Per the terms of the Equity Purchase Agreement, NRG made representations that no right of first refusal applied to the transaction contemplated between us. Separately, on July 31, 2023, San Antonio and Austin filed motions to dismiss and (in the alternative) immediately stay proceedings and petitions to intervene on the application for June 12, 2023 license transfer application that was filed with the NRC. These motions and petitions remain pending before the NRC. Notwithstanding this, the NRC issued approval of the license transfer application on October 30, 2023. However, the NRC staff's approval of the license transfer is subject to the Commission's authority to reseind, modify, or condition the approved transfer based on the outcome of any post- effectiveness hearing or motions on the license transfer application. On February 20, 2024, we (along with San Antonio, Austin and NRG) jointly filed a motion to stay of the issuance of a decision by the NRC on the pending petition and motions. The motion requested that the NRC stay any decision so that the parties can attempt to finalize a settlement agreement that would result in the withdrawal of San Antonio's pending petition and motions. The ongoing legal proceedings did not prohibit NRG and CEG from consummating the transaction, and Constellation is working with all parties to reach a resolution to the matter. We cannot reasonably predict the outcome of the lawsuit or NRC litigation; however, we do not expect it to have a material impact to our consolidated financial statements. CENG Put Option Prior to August 6, 2021, we owned a 50. 01 % membership interest in CENG, a joint venture with EDF, which wholly owned the Calvert Cliffs and Ginna nuclear stations and Nine Mile Point Unit 1, in addition to an 82 % undivided ownership interest in Nine Mile Point Unit 2. CENG is 100 % consolidated in our financial statements. On April 1, 2014, we entered into various agreements with EDF including a Nuclear Operating Services Agreement, an amended LLC Operating Agreement, an Employee Matters Agreement, and a Put Option Agreement, among others. Under the amended LLC Operating Agreement, CENG made a $ 400 million special distribution to EDF and committed to make preferred distributions to us until we had received aggregate distributions of $ 400 million plus a return of 8. 50 % per annum. Under the terms of the Put Option Agreement, EDF had the option to sell its 49. 99 % equity interest in CENG exercisable beginning on January 1, 2016 and thereafter until June 30, 2022. On November 20, 2019, we received notice of EDF's intention to exercise the put option, and the put automatically exercised on January 19, 2020 at the end of the sixty- day advance notice period. The transaction required approval by FERC and the NYPSC, which approvals were received on July 30, 2020 and April 15, 2021, respectively. On August 6, 2021, we entered into a settlement agreement pursuant to which we purchased EDF' s equity interest in CENG for a net purchase price of $ 885 million, which included, among other things, an adjustment for EDF' s share of the outstanding balance of the preferred distribution payable to us by CENG. The difference between the net purchase price and EDF' s noncontrolling interest as of August 6, 2021 was recorded to Membership interest in the Consolidated Balance Sheet. As a result of the transaction, we also recorded deferred tax liabilities of $ 288 million in Membership interest in the Consolidated Balance Sheet. See Note 14 — Income Taxes for additional information. The following table summarizes the effects of the changes in our ownership interest in CENG in Member' s Equity: For the Year Ended December 31, 2021Net loss attributable to membership interest $ (205) Pre- tax increase in membership interest for purchase of EDF' s 49. 99 % equity interest (a) 1, 080 Decrease in membership interest due to deferred tax liabilities resulting from purchase of EDF' s equity interest (a) (288) Change from net loss attributable to membership interest and transfers from noncontrolling interest $ 587 _____ (a) Represents non- cash activity in the consolidated financial statements. Agreement for Sale of Our Biomass Facility On April 28, 2021, we entered into a purchase agreement with ReGenerate Energy Holdings, LLC (" ReGenerate"), under which ReGenerate agreed to purchase our interest in the Albany Green Energy biomass facility. As a result, in the second quarter of 2021, we recorded a pre- tax impairment charge of $ 140 million in Operating and maintenance expense in the Consolidated Statement of Operations and Comprehensive Income. Completion of the transaction was subject to the satisfaction of various customary closing conditions that were satisfied in the second quarter of 2021. The sale was completed on June 30, 2021 for a net purchase price of $ 36 million. Agreement for Sale of Our Solar Business On December 8, 2020, we entered into an agreement with an affiliate of Brookfield Renewable, for the sale of a significant portion of our solar business, including 360 MWs of generation in operation or under construction across more than 600 sites across the United States. We retained certain solar assets not included in this agreement, primarily Antelope Valley. Completion of the transaction contemplated by the sale agreement was subject to the satisfaction of several closing conditions that were satisfied in the first quarter of 2021. The sale was completed on March 31, 2021 for a purchase price of $ 810 million. We received cash proceeds of $ 675 million, net of $ 125 million long- term debt assumed by the buyer and certain working capital and other post- closing adjustments. We recognized a pre- tax gain of $ 68 million which is included in Gain on sales of assets and businesses in the Consolidated Statement of Operations and Comprehensive Income. 3. Regulatory Matters The following matters below discuss the status of our material regulatory and legislative proceedings. PJM Performance Bonuses On December 23, 2022, and continuing through the morning of December 25, 2022, winter storm Elliott blanketed the entirety of PJM' s footprint with record low temperatures and extreme weather conditions. A significant portion of PJM' s fossil generation fleet failed to perform as reserves were called. In accordance with PJM' s tariff, funds collected from non- performance charges are redistributed as bonuses to generating resources that

overperformed during the event, including our nuclear fleet. Complaints were filed at FERC by underperforming generators alleging, among other things, that PJM' s tariff is unjust and unreasonable, and that PJM violated its tariff or otherwise acted negligently in operating the system during that period, seeking to reduce or eliminate any penalty. In 2023, a proposed settlement was filed with FERC, and FERC subsequently approved the settlement as uncontested. We recognized $ 120 million and $ 109 million for bonuses (pre- tax), net of non- performance charges, in 2023 and 2022, respectively, associated with this event, primarily driven by the overperformance of our nuclear fleet. Remaining amounts on our balance sheet as of December 31, 2023 associated with this event are not material. New England Regulatory Matters Mystic Units 8 and 9 Cost of Service Agreement. On December 20, 2018, FERC issued an order accepting a cost of service agreement for Mystic Units 8 and 9 for the period between June 1, 2022 to May 31, 2024. The agreement is intended to preserve the two units for the two- year period while allowing the Mystic units to recover their costs of operating, including a substantial portion of the costs associated with the adjacent EMT we acquired in October 2018. In 2020, FERC issued several orders that, together, affirmed the recovery of key elements of Mystic' s cost of service compensation, including recovery of costs associated with the operation of EMT. Several parties appealed the orders to the U. S. Court of Appeals for the D. C. Circuit. On August 23, 2022, the court issued its opinion and remanded several issues back to FERC, including the amount of the EMT' s fixed costs that can be recovered via the Mystic COS. On March 28, 2023, FERC issued an order on remand from the D. C. Circuit' s August 2022 decision (FERC Remand Order). Among other things, the FERC Remand Order affirmed that 91 % of EMT' s fixed costs will beCombined Notes to Consolidated Financial Statements (Dollars in millions, unless otherwise noted) Note 3 — Regulatory Matters recovered via the Mystic COS, subject to the reinstatement of a margin sharing mechanism on forward sales of vapor. The Mystic COS requires an annual process whereby we identify and support our projected costs under the agreement and / or true- up previous projections to the actual costs incurred. The first annual process resulted in a filing at FERC on September 15, 2021 and included our projection of capital expenditures to be recovered under the Mystic COS between June 1, 2022 and December 31, 2022. On April 28, 2022, FERC issued an order setting for settlement and / or hearing the issue of whether our projected 2022 capital expenditures can be recovered. A settlement was filed at FERC in March 2023 and was approved by FERC on August 1, 2023. The settlement reduces the recovery we receive for capital projects over the term of the Mystic COS. The settlement also eliminates the potential that we would need to return EMT capital expenditures that were recovered via COS if EMT continues operating after the Mystic COS terminates. The approval of this offer of settlement does not have a material financial statement impact. On September 15, 2022, we made our second annual filing at FERC. On December 5, 2023, FERC issued an order setting for settlement / hearing certain components of the second annual filing, including the issue of Mystic' s recovery of historical rate base costs. We cannot reasonably predict the outcome of the settlement and / or hearing. See Note 7 — Early Plant Retirements and Note 12 — Asset Impairments for additional information on the impacts of our August 2020 decision to retire Mystic Units 8 and 9 upon expiration of the cost of service agreement. Federal Regulatory Matters Inflation Reduction Act of 2022. On August 16, 2022, President Biden signed into law the IRA, which, among other things, includes federal tax credits, certain of which are transferable or fully refundable, for a number of clean energy technologies including existing nuclear plants. The nuclear PTC recognizes the contributions of carbon- free nuclear power by providing a federal tax credit of up to $ 15 / MWh, subject to phase- out, beginning in 2024 and continuing through 2032. The nuclear PTC includes adjustments for inflation. With the nuclear PTC policy support, we expect that many of our nuclear assets will operate through the end of the nuclear PTC period. Further, the IRA includes a 15 % book- minimum tax on applicable corporations that we do not expect to have a material impact to our consolidated financial statements. The U. S. Department of Treasury has begun the process of issuing guidance on the relevant tax provisions included in the legislation but has not yet addressed the nuclear PTC. Operating License Renewals Conowingo Hydroelectric Project. In 2012, we submitted an application to FERC for a new license for the Conowingo Hydroelectric Project (Conowingo). In connection with our efforts to obtain a water quality certification pursuant to Section 401 of the Clean Water Act (401 Certification) from MDE for Conowingo, we had been working with MDE and other stakeholders to resolve water quality licensing issues, including: (1) water quality, (2) fish habitat, and (3) sediment. In 2019, we and MDE filed with FERC a Joint Offer of Settlement (Offer of Settlement) that would resolve all outstanding issues relating to the 401 Certification. FERC subsequently issued a new 50- year license for Conowingo, effective March 1, 2021. Several environmental groups appealed FERC' s ruling to the U. S. Court of Appeals for the D. C. Circuit. The court of appeals issued a decision vacating FERC' s decision to grant Conowingo its license renewal and sending the matter back to FERC for further proceedings. Upon issuance of the mandate from the U. S. Court of Appeals for the D. C. Circuit, we began operating under an annual license, which renews automatically, containing the same terms as the license that was in effect prior to the 2021 FERC order. MDE informed us that as a result of the U. S. Court of Appeals decision, they would be resuming their administrative reconsideration of the 401 Certification. In response to the procedure outlined by the MDE, supplemental briefs on the 401 Certification were filed by the Lower Susquehanna Riverkeeper Association and Waterkeepers Chesapeake (jointly) and us. In addition, we filed a supplemental reply brief. We are unable to further predict the outcome of this proceeding at this time. Depreciation provisions continue to assume operation through 2071 given our expectation that a 50- year license will be issued. Peach Bottom Units 2 and 3. On March 6, 2020, the NRC approved a second 20- year license renewal for Peach Bottom Units 2 and 3. As a result, Peach Bottom Units 2 and 3 were granted the authority to operate through 2053 and 2054, respectively. Notwithstanding its 2020 approval, on February 24, 2022, the NRC took action to modify Peach Bottom' s subsequently renewed licenses in response to a request for hearing that the NRC had not previously adjudicated. In its February 2022 decision, the NRC reversed itself and concluded that the previous environmental review required by the National Environmental Policy Act (NEPA) for the Peach Bottom subsequently renewed licenses was incomplete because it did not adequately address environmental impacts resulting from renewing the units' licenses for an additional 20 years. As a result, the NRC has undertaken a rulemaking to modify its regulations and guidance to specifically address environmental impacts during the period of subsequent license renewal. In addition, the NRC modified the expiration dates for the Peach Bottom licenses from 2053 and 2054 to 2033 and 2034, respectively, pending the completion of the updated NEPA analysis. We expect that the license expiration dates will be restored to 2053 and 2054, respectively, once the NRC' s reevaluation of environmental impacts resulting from subsequent license renewal is complete. In September 2023, the NRC announced that its schedule to complete the rulemaking has delayed by several months and now intends to be complete by August 2024. This delay does not alter our expectation that the license expiration dates for Peach Bottom will be restored. Depreciation provisions and ARO assumed retirement dates continue to assume Peach Bottom Units 2 and 3 will operate through 2053 and 2054, respectively, given our expectation that the previously approved expiration dates will be restored. 4. Revenue from Contracts with Customers We recognize revenue from contracts with customers to depict the transfer of goods or services to customers at an amount that we expect to be entitled to in exchange for those goods or services. Our primary sources of revenue include competitive sales of power, natural gas, and other energy- related products and sustainable solutions. The performance obligations, revenue recognition, and payment terms associated with these sources of revenue are further discussed in the table below. There are no significant financing components for these sources of revenue. Unless otherwise noted, for each of the significant revenue categories and related performance obligations described below, we have the right to consideration from the customer in an amount that corresponds directly with the value transferred to the customer for the performance completed to date. Therefore, we generally recognize revenue in the amount for which we have the right to invoice the customer. As a result, there are generally no significant judgments used in determining or allocating the transaction price. Combined Notes to Consolidated Financial Statements (Dollars in millions, unless otherwise noted) Note 4 — Revenue from Contracts with Customers Revenue SourceDescriptionPerformance ObligationTiming of Revenue RecognitionPayment Terms Power Sales Sales of power and other energy- related commodities to wholesale and retail customers through our customer- facing businessVarious, including the delivery of power (generally delivered over time) and other energy- related commodities such as capacity (generally delivered over time), CMCs, ZECs, RECs or other ancillary services (generally delivered at a point in time) Concurrently as power is generated for bundled power sale contracts (a) Generally within the month following delivery to the customerNatural Gas Sales Sales of natural gas to wholesale and retail customers through our customer- facing businessVarious, including the delivery of natural gas (generally delivered overtime) and sustainable natural gas attributes (generally delivered at a point in time) Over time as the natural gas is delivered to the customerGenerally within the month following delivery to the customerOther Products and ServicesSales of other energy- related products and sustainable solutions such as long- term construction and installation of energy efficiency assets and new power generating facilities, primarily to C & I customersConstruction and / or installation of the asset for the customerRevenues and associated costs are recognized throughout the contract term using an input method to measure progress towards completion (b) Generally within 30 or 45 days from the invoice date (a) Certain contracts may contain limits on the total amount of revenue we are able to collect over the entire term of the contract. In such cases, we estimate the total consideration expected to be received over the term of the contract net of the constraint and allocate the expected consideration to the performance obligations in the contract such that revenue is recognized ratably over the term of the entire contract as the performance obligations are satisfied. (b) The method recognizes revenue based on the various inputs used to satisfy the performance obligation, such as costs incurred and total labor hours expended. The total amount of revenue that will be recognized is based on the agreed upon contractually- stated amount. The average contract term for these projects is approximately 18 months. We incur incremental costs in order to execute certain retail power and gas sales contracts. These costs, which primarily relate to retail broker fees and sales commissions, are capitalized when incurred as contract acquisition costs and generally amortized over the corresponding term of the contract. These capitalized costs and related amortization were not material as of and for the years ended December 31, 2023 and 2022. Contract Balances We record contract assets for the revenue recognized on the construction and installation of energy efficiency assets and new power generating facilities before we have an unconditional right to bill for and receive the consideration from the customer. These contract assets are subsequently reclassified to receivables when the right to payment becomes unconditional. We record contract assets and contract receivables in Other current assets and Customer accounts receivable, net, respectively, in the Consolidated Balance Sheets. The following table provides a rollforward of the contract assets reflected in the Consolidated Balance Sheets: 20232022Beginning balance as of January 1 $ 130 $ 149 Amounts reclassified to receivables (127) (81) Revenues recognized79 62 Ending balance as of December 31 $ 82 $ 130 Contract Liabilities We record contract liabilities when consideration is received or due prior to the satisfaction of the performance obligations. We record contract liabilities in Other current liabilities and Other deferred credits and other liabilities in the Consolidated Balance Sheets. These contract liabilities primarily relate to upfront consideration received or due for equipment service plans, the Mystic COS, and the Illinois ZEC program. The Mystic COS includes upfront consideration received or due that differs from the recognized earnings over the cost of the service period. The Illinois ZEC program introduces an annual cap on the total consideration to be received by us **Calpine stockholders** for **or any covenants or agreements** each delivery period. The ZEC price is established on a per MWh of production basis with a maximum annual cap for total **respect to the parties' respective operations pending** compensation **completion** to be received for each planning year, while requiring delivery of all ZECs produced by our participating facilities during each delivery period. ZECs delivered to Illinois utilities in excess of the annual cost cap **merger. In addition, we could choose to waive requirements of the Merger Agreement, including some conditions to closing of the merger. Lawsuits** may be paid **filed against us or our Board** in **connection with** subsequent years if the payments do not exceed **merger. An adverse ruling in any such lawsuit could result in an injunction preventing** the prescribed annual **completion of the merger and / or substantial** cost **costs** cap for **to us. Securities class action lawsuits and derivative lawsuits are often brought against public companies** that year. There were no outstanding contract liabilities for the Illinois ZEC program as of December 31, 2023, and were not material as of December 31, 2022. The following table provides a rollforward of the contract liabilities reflected in the Consolidated Balance Sheets: 20232022021Beginning balance as of January 1 $ 47 $ 75 $ 84 Consideration received or due331 339 251 Revenues recognized (338) (367) (263) Contract liabilities reclassified as held for sale — — — 3 Ending balance as of December 31 $ 40 $ 47 $ 75 The following table reflects revenues recognized in the years ended December 31, 2023, 2022 and 2021, which were included in contract liabilities at December 31, 2022, 2021, and 2020, respectively: 202320222021Revenues recognized $ 26 $ 71 $ 82 Transaction Price Allocated to Remaining Performance Obligations The following table shows the amounts of future revenues expected to be recorded in each year for performance obligations that are unsatisfied or partially unsatisfied as of December 31, 2023. This disclosure only includes contracts for which the total consideration is fixed and determinable at contract inception. The average contract term varies by customer type and commodity but ranges from one month to several years. This disclosure excludes mark- to- market derivatives and certain power and gas sales contracts which contain variable volumes and / or variable pricing. 2024202520262027202820 and thereafterTotalRemaining performance obligations $ 152 $ 44 $ 20 $ 18 $ 130 $ 364 Transaction Price Allocated to Previously Satisfied Performance Obligations Illinois ZEC Revenues The ZEC price and annual compensation cap effective for each planning year are administratively determined by the IPA. For the June 1, 2023 to May 31, 2024 planning year the ZEC price has been established at $ 0. 30 per ZEC, subject to an annual cap of $ 224 million. ZECs generated and delivered during this planning year will not exceed the annual cap, providing capacity to compensate for ZECs delivered in prior planning years in excess of the compensation cap. In 2023, we recognized $ 218 million of revenue as a receivable for ZECs delivered in prior planning years, with payment expected in the third quarter of 2024. As of December 31, 2023, this receivable is included within Customer accounts receivable, net in the Consolidated Balance Sheets. For the year ended December 31, 2023, we recognized a benefit of $ 120 million (pre- tax) for performance bonuses (net of non- performance charges), primarily driven by the overperformance of our nuclear fleet during the 2022 winter storm Elliott. See Note 3 — Regulatory Matters for additional information on the PJM performance bonuses. Revenue Disaggregation We disaggregate the revenue recognized from contracts with customers into categories that depict how the nature, amount, timing, and uncertainty of revenue and cash flows are affected by economic factors. See Note 5 — Segment Information for the presentation of revenue disaggregation. 5. Segment Information Operating segments are determined based on information used by the CODM in deciding how to evaluate performance and allocate resources. We have **entered acquisition** five reportable segments consisting of the Mid- Atlantic, **merger** Midwest, New York, ERCOT, and all other power regions referred to collectively as " Other Power Regions. " The basis for **or** our reportable segments is the integrated management of our electricity business that is located in different geographic regions, and largely representative of the footprints of ISO / RTO and / or NERC regions, which utilize

multiple supply sources to provide electricity through various distribution channels (wholesale and retail). Our hedging strategies and risk metrics are also aligned to these same geographic regions. Descriptions of each of our five reportable segments are as follows: • Mid- Atlantic represents operations in the eastern half of PJM, which includes New Jersey, Maryland, Virginia, West Virginia, Delaware, the District of Columbia, and parts of Pennsylvania and North Carolina. • Midwest represents operations in the western half of PJM and the United States footprint of MISO, excluding MISO' s Southern Region. • New York represents operations within NYISO. • ERCOT represents operations within Electric Reliability Council of Texas that covers a majority of the state of Texas. • Other Power Regions: • New England represents operations within ISO- NE. Combined Notes to Consolidated Financial Statements (Dollars in millions, unless otherwise noted) Note 5 — Segment Information • South represents operations in FRCC, MISO' s Southern Region, and the remaining portions of SERC not included within MISO or PJM. • West represents operations in WECC, which includes CAISO. • Canada represents operations across the entire country of Canada and includes AESO, OIESO, and the Canadian portion of MISO. The CODM evaluates the performance of our electric business activities and allocates resources based on Operating revenues net of Purchased power and fuel expense (RNF). We believe this is a useful measurement of operational performance, although it is not a presentation defined under GAAP and may not be comparable to other companies' presentations or deemed more useful than the GAAP information provided elsewhere in this report. Our operating revenues include all sales to third parties and affiliate sales to Exelon' s utility subsidiaries, prior to the separation on February 1, 2022. Purchased power costs include all costs associated with the procurement and supply of electricity including capacity, energy, and ancillary services. Fuel expense includes the fuel costs for our owned generation and fuel costs associated with tolling agreements. The results of our other business activities **combination agreements like the Merger Agreement. Even if such a lawsuit is without merit, defending against these claims can result in substantial costs and divert management time and resources. An adverse judgment could result in monetary damages, which could have a negative impact on our liquidity and financial condition. Although we** are not regularly reviewed **aware of any pending or threatened lawsuits relating to the transactions contemplated** by the **Merger Agreement** CODM and are therefore not classified as operating segments or included in the regional reportable segment amounts. These activities include wholesale and retail sales of natural gas, **lawsuits arising out** energy- related sales in the United Kingdom, as well as sales of other, **the** energy- related products and sustainable solutions **transactions contemplated by the Merger Agreement could be filed in the future. One of the conditions to the closing of the merger is** that are not **no** significant to **applicable law of any governmental entity having competent jurisdiction is in effect at the time of closing, which makes the consummation of the merger illegal** our **or** overall **otherwise prohibits, restrains or enjoins the consummation of the merger. Consequently, if a plaintiff is successful in obtaining an injunction prohibiting completion of the merger, that injunction may delay or prevent the merger from being completed within the expected timeframe or at all, which may adversely affect our business, financial position and** results of operations. **Even if such injunction is eventually lifted** Further, our unrealized mark- to- market gains and **the** losses on economic hedging activities and our amortization of certain intangible assets and liabilities relating to commodity contracts recorded at fair value from mergers, **merger is later completed,** and acquisitions are also excluded from the regional reportable segment amounts. The CODM does not use a measure of total assets in making decisions regarding allocating resources to or assessing the performance of these, **the** reportable segments. The **resulting delays and costs incurred may continue to affect the combined company** following tables disaggregate **the completion of the merger. Additionally,** the **there can be no assurance** revenue recognized from contracts with customers into categories that depict how the nature, amount, timing, and uncertainty of revenue and cash flows are affected by economic factors. The disaggregation of revenues reflects our two primary products of power sales and natural gas sales, with further disaggregation of power sales provided by geographic region. The following tables also show the reconciliation of reportable segment revenues and RNF to our total revenues and RNF for the years ended December 31, 2023, 2022, and 2021. 2023Revenues from external customers Contracts with customersOther (a) TotalIntersegment RevenuesTotal RevenuesMid- Atlantic $ 5, 453 $ (265) $ 5, 188 $ (50) $ 5, 138 Midwest4, 846 (191) 4, 655 3 4, 658 New York1, 910 56 1, 966 55 2, 021 ERCOT1, 232 109 1, 341 5 1, 346 Other Power Regions 4, 956 908 5, 864 (13) 5, 851 Total Reportable Segment Power Revenues18, 397 617 19, 014 — 19, 014 Total Natural Gas Revenues 1, 859 1, 866 3, 725 — 3, 725 Total Other Revenues (b) 585 1, 594 2, 179 — 2, 179 Total Consolidated Operating Revenues $ 20, 841 $ 4, 077 $ 24, 918 $ — $ 24, 918 2022Revenues from external customers (c) Contracts with customersOther (a) TotalIntersegment RevenuesTotal RevenuesMid- Atlantic $ 5, 264 $ (105) $ 5, 159 $ 5 $ 5, 164 Midwest5, 164 (507) 4, 657 (7) 4, 650 New York2, 004 (408) 1, 596 (1) 1, 595 ERCOT954 602 1, 556 (13) 1, 543 Other Power Regions 5, 035 1, 681 6, 716 16 6, 732 Total Reportable Segment Power Revenues18, 421 1, 263 19, 684 — 19, 684 Total Natural Gas Revenues 2, 559 2, 408 4, 967 — 4, 967 Total Other Revenues (b) 591 (802) (211) — (211) Total Consolidated Operating Revenues $ 21, 571 $ 2, 869 $ 24, 440 $ — $ 24, 440 2021Revenues from external customers (c) Contracts with customersOther (a) TotalIntersegment RevenuesTotal RevenuesMid- Atlantic $ 4, 381 $ 183 $ 4, 564 $ 20 $ 4, 584 Midwest4, 265 (205) 4, 060 — 4, 060 New York1, 633 (57) 1, 576 (1) 1, 575 ERCOT896 276 1, 172 9 1, 181 Other Power Regions 3, 937 981 4, 918 (28) 4, 890 Total Reportable Segment Power Revenues15, 112 1, 178 16, 290 — 16, 290 Total Natural Gas Revenues 1, 777 1, 602 3, 379 — 3, 379 Total Other Revenues (b) 365 (385) (20) — (20) Total Consolidated Operating Revenues $ 17, 254 $ 2, 395 $ 19, 649 $ — $ 19, 649 (a) Includes revenues from derivatives and leases. (b) Represents activities not allocated to a region. See text above for a description of included activities. Includes unrealized mark- to- market gains of $ 1, 399 million and losses of $ 1, 188 million, and $ 633 million for the years ended December 31, 2023, 2022, and 2021, respectively. (c) Includes all wholesale and retail electric sales to third parties and affiliated sales to Exelon' s utility subsidiaries prior to the separation on February 1, 2022. See text above for a description of included activities. Primarily includes: • Unrealized mark- to- market losses of $ 972 million and $ 1, 013 million and gains of $ 565 million for the years ended December 31, 2023, 2022, and 2021, respectively; and • Accelerated nuclear fuel amortization associated with the announced early plant retirements as discussed in Note 7- Early Plant Retirements of $ 148 million for the year ended December 31, 2021. (b) Includes purchases and sales from / to third parties and affiliated sales to Exelon' s utility subsidiaries prior to the separation on February 1, 2022. See Note 24 — Related Party Transactions for additional information. 6. Accounts Receivable Unbilled Customer Revenue We recorded $ 372 million and $ 564 million of unbilled customer revenues in Customer accounts receivables, net in the Consolidated Balance Sheets as of December 31, 2023 and 2022, respectively. On April 8, 2020, NER, a bankruptcy remote, special purpose entity, which is wholly owned by us, entered into a revolving accounts receivable financing arrangement with a number of financial institutions and a commercial paper conduit (Purchasers) to sell certain customer accounts receivable (Facility). On August 16, 2022, we entered into an amendment on the Facility, which increased the maximum funding limit of the Facility from $ 900 million to $ 1. 1 billion and extended the term of the Facility through August 15, 2025, unless renewed by the mutual consent of the parties in accordance with its terms. Under the Facility, NER may sell eligible short- term customer accounts receivable to the Purchasers in exchange for cash and subordinated interest. The transfers are reported as sales of receivables in the consolidated financial statements. The subordinated interest in collections upon the receivables sold to the Purchasers is referred to as the DPP, which is reflected in Other current assets in the Consolidated Balance Sheets. The Facility requires the balance of eligible receivables to be maintained at or above the balance of cash proceeds received from the Purchasers. To the extent the eligible receivables decrease below such balance, we are required to repay cash to the Purchasers. When eligible receivables exceed cash proceeds, we have the ability to increase the cash received up to the maximum funding limit. These cash inflows and outflows impact the DPP. Combined Notes to Consolidated Financial Statements (Dollars in millions, unless otherwise noted) Note 6 — Accounts Receivable The following table summarizes the impact of the sale of certain receivables: As of December 31, 20232022Derecognized receivables transferred at fair value $ 1, 516 $ 1, 615 Less: Cash proceeds received300 1, 100 DPP $ 1, 216 $ 515 For the Years Ended December 31, 20232022021Loss on sale of receivables (a) $ 75 $ 69 $ 36 (a) Reflected in Operating and maintenance expense in the Consolidated Statements of Operations and Comprehensive Income. This represents the amount by which the accounts receivable sold into the Facility are discounted, limited to credit losses. For the Years Ended December 31, 20232022021Proceeds from new transfers (a) $ 3, 649 $ 6, 108 $ 6, 095 Cash collections received on DPP and reinvested in the Facility (b) 8, 140 4, 764 3, 502 Cash collections reinvested in the Facility $ 11, 789 $ 10, 872 $ 9, 597 (a) Customer accounts receivable sold into the Facility were $ 11, 746 million, $ 11, 274 million, and $ 9, 747 million for the years ended December 31, 2023, 2022, and 2021, respectively. (b) Does not include the $ 800 million net cash payments to the Purchasers in 2023, the $ 200 million net cash proceeds received from the Purchasers in 2022, or $ 400 million cash proceeds received from the Purchases in 2021. Our risk of loss following the transfer of accounts receivable is limited to the DPP outstanding. Payment of DPP is not subject to significant risks other than delinquencies and credit losses on accounts receivable transferred. We recognize the cash proceeds received upon sale in Cash flows from operating activities in the Consolidated Statements of Cash Flows. The collection and reinvestment of DPP is recognized in Cash flows from investing activities in the Consolidated Statements of Cash Flows. See Note 18 — Fair Value of Financial Assets and Liabilities and Note 22 — Variable Interest Entities for additional information. Other Sales of Customer Accounts Receivables We are required, under supplier tariffs, to sell customer receivables to utility companies. The following table presents the total receivables sold: For the Years Ended December 31, 20232022021Total receivables sold $ 356 $ 423 $ 147 7. Early Plant Retirements We continuously evaluate factors that affect the current and expected economic value of our plants, including, but not limited to: market power prices, results of capacity auctions, potential legislative and regulatory solutions to ensure plants are fairly compensated for benefits they provide through their carbon- free emissions, reliability or fuel security, and the impact of potential rules from the EPA requiring reduction of carbon and other emissions and the efforts of states to implement those final rules. We remain committed to continued operations for our nuclear plants receiving state- supported payments under the Illinois CMC (Byron, Dresden, and Braidwood), Illinois ZES (Clinton and Quad Cities), New Jersey ZEC program (Salem), and the New York CES (FitzPatrick, Ginna, and Nine Mile Point), assuming the continued effectiveness of each program. While the current ZECCombined Notes to Consolidated Financial Statements (Dollars in millions, unless otherwise noted) Note 7 — Early Plant Retirements program in New York ends in 2029, the state has acknowledged our nuclear assets are vital to achieving its clean energy goals and we believe New York will continue to promote policies that support nuclear in the state beyond 2029. With the passage of the IRA, we expect that many of our nuclear assets will operate at least through the end of the nuclear PTC period, concluding at the end of 2032. To enable long term operations, we plan to file applications to extend the licenses of our nuclear fleet to 80 years for the units that receive continued support under federal or state policies or a combination of both. See Note 8 — Property, Plant, and Equipment for additional information on depreciable provisions of the stations, and Note 10 — Asset Retirement Obligations for additional information on ARO. On August 27, 2020, we announced our intention to permanently cease our operations at Byron in September 2021 and at Dresden in November 2021. On September 15, 2021, we announced that we had reversed our previous decision to retire Byron and Dresden given the opportunity for additional revenue under the Illinois Clean Energy Law. Our Byron, Dresden, and Braidwood nuclear plants were each awarded CMC contracts. In 2021, we reversed $ 81 million of severance benefit costs and $ 13 million of other one- time charges initially recorded in Operating and maintenance expense in 2020 associated with the early retirements. In addition, we updated the expected economic useful life for both facilities to 2044 and 2046, for Byron Units 1 and 2, respectively, and to 2029 and 2031 for Dresden Units 2 and 3, respectively, the end of the respective NRC operating license for each unit. Depreciation was therefore adjusted beginning September 15, 2021, to reflect these extended useful life estimates. See Note 10 — Asset Retirement Obligations for additional detail on changes to the nuclear decommissioning ARO balances resulting from the initial decision and subsequent reversal of the decision to early retire Byron and Dresden. The total impact for the year ended December 31, 2021 in the Consolidated Statements of Operations and Comprehensive Income resulting from the initial decision and subsequent reversal of the decision to early retire Byron and Dresden is summarized in the table below: Income statement expense (pre- tax) For the Year Ended December 31, 2021Depreciation and amortization Accelerated depreciation (a) $ 1, 805 Accelerated nuclear fuel amortization148 Operating and maintenance One- time charges (94) Other charges9 Contractual offset (b) (451) Total $ 1, 417 _____ (a) Includes the accelerated depreciation of plant assets including any ARC. (b) Reflects contractual offset for ARO accretion, ARC depreciation, ARO remeasurement, and excludes any changes in earnings in the NDT funds. Decommissioning- related impacts were not offset for the Byron units starting in the second quarter of 2021 due to the inability to recognize a regulatory asset at ComEd. With our September 15, 2021 reversal of the previous decision to retire Byron, we resumed contractual offset for Byron as of that date. Based on the regulatory agreement with the ICC, decommissioning- related activities are offset in the Consolidated Statements of Operations and Comprehensive Income as long as the net cumulative decommissioning- related activity result in a regulatory liability at ComEd. The offset resulted in an equal adjustment to the noncurrent payables to ComEd. See Note 10- Asset Retirement Obligations for additional information. Other, **the defendants** Generation In March 2018, we notified ISO- NE of our plans to early retire the Mystic Generating Station' s units 8 and 9 (" Mystic 8 and 9") absent regulatory reforms to properly value reliability and regional fuel security. Thereafter, ISO- NE identified Mystic 8 and 9 as being needed to ensure fuel security for the region and entered into a cost of service agreement with these two units for the period between June 1, 2022 to May 31, 2024. The agreement was approved by FERC in December 2018. In August 2020, we announced we will permanently cease generation operations at Mystic 8 and 9 at the expiration of the cost of service commitment in May 2024. See Note 3 — Regulatory Matters for additional discussion of Mystic' s cost of service agreement. The annual financial impacts stemming from shortening the expected economic useful life of Mystic 8 and 9 were not material to the periods presented. 8. Property, Plant, and Equipment The following table presents a summary of property, plant, and equipment by asset category as of December 31, 2023 and 2022: Asset CategoryDecember 31, 2023December 31, 2022Electric $ 32, 889 $ 30, 804 Nuclear fuel (a) 5, 503 5, 106 Construction work in progress1, 133 630 Other property, plant, and equipment14 8 Total

property, plant, and equipment39, 539 36, 548 Less: accumulated depreciation (b) 17, 423 16, 726 Property, plant, and equipment, net $ 22, 116 $ 19, 822 _____ (a) Includes nuclear fuel that is in the fabrication and installation phase of $ 1, 265 million and $ 937 million as of December 31, 2023 and 2022, respectively. (b) Includes accumulated amortization of nuclear fuel in the reactor core of $ 2, 484 million and $ 2, 657 million as of December 31, 2023 and 2022, respectively. The following table presents the average service life for each asset category in number of years: Asset CategoryAverage Service Life (years) Electric 1- 60Nuclear fuel1- 8Other property, plant, and equipment1- 10 Depreciation provisions are based on the estimated useful lives of the stations, which generally correspond with the term of the NRC operating licenses, except for Clinton, Dresden Units 2 and 3, Ginna, NMP Unit 1, Peach Bottom Units 2 and 3 and Conowingo. Depreciation provisions for Clinton, Dresden Units 2 and 3, Ginna, NMP Unit 1, and Peach Bottom Units 2 and 3 all assume an additional 20 years beyond current license expiration. Conowingo depreciation provisions are based on an estimated useful life through 2071, in anticipation that a 50- year license will be issued **successful in the outcome of any potential lawsuits** . **The defense** See Note 3 — Regulatory Matters for **or settlement of any lawsuit** additional information regarding license renewals for **or claim that remains unresolved at** Peach Bottom and Conowingo. Beginning August 2020, Byron and Dresden depreciation provisions were based on their **the time** announced shutdown dates of September 2021, November 2021, and May 2024, respectively. On September 15, 2021, we updated the **merger** estimated useful lives for Byron and Dresden to reflect the end of the available NRC operating license for each unit. Beginning in the third quarter of 2022, we updated Dresden depreciation provisions consistent with the license renewal of 2029. See Note 3 — Regulatory Matters for additional information regarding license renewals for Peach Bottom and Conowingo. See Note 7 — Early Plant Retirements for additional information on the impacts related to Byron and Dresden. Annual depreciation rates for electric generation were 3. 26 %, 3. 46 %, and 8. 67 % for the years ended December 31, 2023, 2022, and 2021, respectively. Nuclear fuel amortization is charged to fuel expense using the unit- of- production method and not included in the annual depreciation rates. Combined Notes to Consolidated Financial Statements (Dollars in millions, unless otherwise noted) Note 9 — Jointly Owned Electric Plant 9. Jointly Owned Electric Plant Our material undivided ownership interests in jointly owned nuclear plants as of December 31, 2023 and 2022 were as follows: Nuclear GenerationQuad CitiesPeachBottomSalemNine Mile Point Unit 2South Texas ProjectOperatorConstellationConstellationPSEG NuclearConstellationSTPNOCOwnership interest75. 00 % 50. 00 % 42. 59 % 82. 00 % 44. 00 % Our share as of December 31, 2023Plant in service $ 1, 263 $ 1, 552 $ 781 $ 1, 073 $ 1, 089 Accumulated depreciation805 689 357 292 5 Construction work in progress8 14 49 35 13 Our share as of December 31, 2022Plant in service $ 1, 243 $ 1, 534 $ 772 $ 1, 063 $ — Accumulated depreciation761 659 328 256 — Construction work in progress7 12 23 26 — Our undivided ownership interests are financed with our funds and all operations are proportionately consolidated consistent with our ownership interest. Our share of direct expenses of the jointly owned plants are included in Purchased power and fuel and Operating and maintenance expenses in the Consolidated Statements of Operations and Comprehensive Income. 10. Asset Retirement Obligations We have a legal obligation to decommission our nuclear power plants following the permanent cessation of operations. To estimate our nuclear decommissioning obligations we use a probability- weighted, discounted cash flow model which, on a unit- by- unit basis, considers multiple outcome scenarios that include significant estimates and assumptions, and are based on decommissioning cost studies, cost escalation rates, probabilistic cash flow models, and discount rates. We update our AROs annually, unless circumstances warrant more frequent updates, based on our review of updated cost studies and our annual evaluation of cost escalation factors and probabilities assigned to various scenarios. We began decommissioning the TMI nuclear plant upon permanently ceasing operations in 2019. See below for further discussion of the decommissioning of Zion Station. The financial statement impact for changes in the ARO, on an individual unit basis, due to the changes in and timing of estimated cash flows generally result in a corresponding change in the unit' s ARC in Property, plant, and equipment in the Consolidated Balance Sheets. If the ARO decreases for a Non- Regulatory Agreement unit without any remaining ARC, the corresponding change is recorded as a decrease in Operating and maintenance expense in the Consolidated Statements of Operations and Comprehensive Income, whereas the correspondingCombined Notes to Consolidated Financial Statements (Dollars in millions, unless otherwise noted) Note 10 — Asset Retirement Obligations decrease for Regulatory Agreement Units without any remaining ARC results in an increase to the Payables related to Regulatory Agreement Units in the Consolidated Balance Sheets. The following table provides a rollforward of the nuclear decommissioning AROs reflected in the Consolidated Balance Sheets from January 1, 2022 to December 31, 2023: 20232022Beginning balance as of January 1 $ 12, 500 $ 12, 676 Net increase (decrease) due to changes in, and timing of, estimated future cash flows411 (648) Accretion expense582 532 Acquisition of joint ownership in STP (b) 429 — Costs incurred related to decommissioning plants (31) (60) Ending balance as of December 31 (a) $ 13, 891 $ 12, 500 (a) Includes $ 30 million and $ 40 million as the current portion of the ARO as of December 31, 2023 and 2022, respectively, which is included in Other current liabilities in the Consolidated Balance Sheets. (b) Reflects our estimated share of the STP decommissioning obligation. See Note 2 — Mergers, Acquisitions, and Dispositions for additional information. The net $ 411 million increase in the ARO during 2023 for changes in the amounts and timing of estimated decommissioning cash flows was driven by multiple adjustments, including the following: • An increase of approximately $ 610 million due to an increase in cost escalation rates, partially offset by an increase in discount rates. • Net increase of approximately $ 470 million due to updated cost assumptions for dry cask storage across the fleet and revised cost studies for Dresden, Limerick and Peach Bottom. • Net decrease of approximately $ 675 million due to changes in assumed retirement dates for Ginna, NMP Unit 1, and Salem. The 2023 ARO updates resulted in a decrease of $ 68 million in Operating and maintenance expense for the year ended December 31, 2023 in the Consolidated Statement of Operations and Comprehensive Income. The net $ 648 million decrease in the ARO during 2022 for changes in the amounts and timing of estimated decommissioning cash flows was driven by multiple adjustments throughout the year, including the following: • Net decrease of approximately $ 790 million due to an increase in discount rates partly offset by an increase in cost escalation rates, primarily labor and energy. • A decrease of approximately $ 235 million due to changes in assumed retirement dates as a result of the passage of the IRA and useful life extension for Clinton and Dresden plants. See Note 3- Regulatory Matters for additional information. • An increase of approximately $ 320 million due to revisions to the projected decommissioning schedule for our New York nuclear plants in connection with our separation from Exelon as discussed further below. • Net increase of approximately $ 75 million due to higher estimated decommissioning costs resulting from the completion of updated cost studies for our New York nuclear plants, Quad Cities, Calvert Cliffs, and Three Mile Island. The 2022 ARO updates resulted in a decrease of $ 226 million in Operating and maintenance expense for the year ended December 31, 2022 in the Consolidated Statement of Operations and Comprehensive Income. NDT Funds NDT funds have been established for each of our nuclear units to satisfy our nuclear decommissioning obligations, as required by the NRC, and withdrawals from these funds for reasons other than to pay for decommissioning are restricted pursuant to NRC requirements until all decommissioning activities have been completed . Generally, NDT funds established for a particular unit may not be used to fund the decommissioning obligations of any other unit. The NDT funds associated with our nuclear units have been funded with amounts collected from the previous owners and their respective utility customers. PECO is authorized to collect funds, in revenues, through regulated rates for decommissioning the former PECO nuclear plants, and these collections are scheduled through the operating lives of these former PECO plants. The amounts collected from PECO customers are remitted to us and deposited into the NDT funds for the unit for which funds are collected. Every five years, PECO files a rate adjustment with the PAPUC that reflects PECO' s calculations of the estimated amount needed to decommission each of the former PECO units based on updated fund balances and estimated decommissioning costs. The rate adjustment is used to determine the amount collectible from PECO customers. On March 31, 2022, PECO filed its Nuclear Decommissioning Cost Adjustment with the PAPUC proposing an annual recovery from customers of approximately $ 4 million. On August 19, 2022, the PAPUC approved the filing, and the new rates became effective January 1, 2023. Additionally, for the newly acquired STP units, we maintain decommissioning trust funds for those units proportionate to our 44 % ownership. We also retain the authority through the PUCT to obtain additional decommissioning funding through CenterPoint Energy Houston Electric, LLC and AEP Texas, Inc. Any shortfall of funds necessary for decommissioning, determined for each generating station unit, are generally required to be funded by us, with the exception of STP and the former PECO nuclear plants. We have recourse to collect additional amounts from the respective utility customers through the utility commissions for the former PECO units and STP in the event of a shortfall of NDT funds. Collection of additional amounts for the former PECO units are subject to certain limitations and thresholds, as prescribed by an order from the PAPUC that limits collection of amounts associated with the first $ 50 million of any shortfall of trust funds compared to decommissioning costs, as well as 5 % of any additional shortfalls, on an aggregate basis for all former PECO units. The initial $ 50 million and up to 5 % of any additional shortfalls would be borne by us. Aside from the former PECO units and STP, no recourse exists to collect additional amounts from utility customers for any of our other nuclear units. With respect to the Regulatory Agreement Units, any funds remaining in the NDTs after all decommissioning has been completed are required to be refunded to the respective utility customers, subject to certain limitations that allow sharing of excess funds with us related to the former PECO units. With respect to our other nuclear units, we retain any funds remaining after decommissioning. However, in connection with CENG' s acquisition of the Nine Mile Point and Ginna plants and settlements with certain regulatory agencies, certain conditions pertaining to NDT funds apply that, if met, could possibly result in obligations to make payments to certain third parties (clawbacks). For Nine Mile Point and Ginna, the clawback provisions are triggered only in the event that the required decommissioning activities are discontinued or not started or completed in a timely manner. In the event that the clawback provisions are triggered for Nine Mile Point, then, depending upon the triggering event, an amount equal to 50 % of the total amount withdrawn from the funds for non- decommissioning activities as defined in the agreement or 50 % of any excess funds in the trust funds above the amounts required for decommissioning (including SNF management and site restoration) is to be paid to the Nine Mile Point sellers. In the event that the clawback provisions are triggered for Ginna, then an amount equal to any estimated cost savings realized by not completing any of the required decommissioning activities is to be paid to the Ginna sellers. We expect to comply with applicable regulations and timely commence and complete all required decommissioning activities. We had NDT funds totaling $ 16, 398 million and $ 14, 127 million as of December 31, 2023 and 2022, respectively. As of December 31, 2023, there was no current portion of the NDT funds. $ 13 million of the NDT funds were current as of December 31, 2022, and included in Other current assets in the Consolidated Balance Sheets. See Note 23 — Supplemental Financial Information for additional information on activities of the NDT funds. See Note 1 — Basis of Presentation for additional information on the accounting policy for Regulatory Agreement Units. For the former PECO units and STP, given the symmetric settlement provisions that allow for continued recovery of decommissioning costs from the respective utility customers in the event of a shortfall and the obligation for us to ultimately return excess funds to the respective utility customers (on an aggregate basis for all seven former PECO units and on the underlying utility customer basis for STP) decommissioning- related activities are generally offset in the Consolidated Statements of Operations and Comprehensive Income regardless of whether the NDT funds are expected to exceed or fall short of the total estimated decommissioning obligation. The offset of decommissioning- related activities in the Consolidated Statements of Operations and Comprehensive Income results in an equal adjustment to noncurrent payables or noncurrent receivables. Any changes to the existing PECO or STP regulatory agreements could impact our ability to offset decommissioning- related activities in the Consolidated Statements of Operations and Comprehensive Income, and the potential impact to our consolidated financial statements could be material. For the former ComEd units, given no further recovery from ComEd customers is permitted and we retain an obligation to ultimately return any unused NDTs to ComEd customers (on a unit- by- unit basis), to the extent the related NDT investment balances are expected to exceed the total estimated decommissioning obligation for each unit, decommissioning- related activities are offset in the Consolidated Statements of Operations and Comprehensive Income which results in us recognizing a noncurrent payable. However, given the asymmetric settlement provision that does not allow for continued recovery from ComEd customers in the event of a shortfall, recognition of a receivable related to former ComEd Units is not permissible and accounting for decommissioning- related activities for that unit would not be offset, and the impact to the Consolidated Statements of Operations and Comprehensive Income could be material during such periods. For the year ended December 31, 2021, a pre- tax charge of $ 193 million was recorded in the Consolidated Statement of Operations and Comprehensive Income for decommissioning- related activities that were not offset for the Byron units due to contractual offset being temporarily suspended. With our September 15, 2021 reversal of the previous decision to retire Byron and the corresponding adjustment to the ARO for Byron discussed previously, we resumed contractual offset for Byron as of that date. The following table presents our noncurrent payables to ComEd and PECO, as well as CenterPoint Energy Houston Electric, LLC and AEP Texas, Inc. for STP, which are recorded as Payables related to Regulatory Agreement Units in the Consolidated Balance Sheets as of December 31, 2023 and 2022: As of December 31, 20232022ComEd $ 2, 955 $ 2, 660 PECO278 237 CenterPoint Energy Houston Electric, LLC338 — AEP Texas, Inc. 117 — Payables related to Regulatory Agreement Units $ 3, 688 $ 2, 897 As of December 31, 2023, decommissioning- related activities for all of the former ComEd units, except for Zion (see Zion Station Decommissioning below), are currently offset in the Consolidated Statements of Operations and Comprehensive Income. The decommissioning- related activities for the Non- Regulatory Agreement Units are reflected in the Consolidated Statements of Operations and Comprehensive Income within Operating and maintenance expense, Depreciation and amortization expense, and in Other, net. In 2010, we completed an ASA under which ZionSolutions assumed responsibility for decommissioning Zion Station and we transferred to ZionSolutions substantially all the Zion Station' s assets, including the related NDT funds. On November 16, 2023, ZionSolutions completed its contractual obligations and transferred the NRC license back to us. We will store the SNF at Zion Station until it is transferred to the DOE for ultimate disposal and complete all remaining decommissioning activities associated with the SNF dry storage facility. Any shortage of funds necessary to maintain the SNF and decommission the SNF storage facility is ultimately required to be funded by us. As of December 31, 2023 and 2022, the ARO associated with Zion' s SNF storage facility is $ 139 million and $ 138 million, respectively, and the NDT funds available to fund this obligation are $ 62 million and $ 58 million, respectively. NRC regulations require that licensees of nuclear generating facilities demonstrate reasonable assurance that funds will be available in specified minimum amounts to decommission the facility at the end of its life. The estimated decommissioning obligations are calculated using an NRC methodology that is different from the ARO recorded in the Consolidated Balance Sheets primarily due to differences in the type of costs included in the estimates, the basis for estimating such costs, and assumptions regarding the

decommissioning alternatives to be used, potential license renewals, decommissioning cost escalation, and the growth rate in the NDT funds. Under NRC regulations, if the minimum funding requirements for radiological decommissioning calculated under the NRC methodology are greater than the future value of the NDT funds, also calculated under the NRC methodology, then the NRC requires resolution of the shortfalls which could include further funding or other financial guarantees. Key assumptions used in the minimum funding calculation for radiological decommissioning costs using the NRC methodology at December 31, 2023 include: (1) consideration of costs only for the removal of radiological contamination at each unit; (2) the option on a unit- by- unit basis to use generic, non- site specific cost estimates; (3) consideration of only one decommissioning scenario for each unit; (4) the plants cease operation at the end of their current license lives (with no assumed license renewals for those units that have not already received renewals); (5) the assumption of current nominal dollar cost estimates that are neither escalated through the anticipated period of decommissioning, nor discounted using the CARFR; and (6) assumed annual after- tax returns on the NDT funds of 2 % (3 % for the former PECO units, as specified by the PAPUC). In contrast, the key criteria and assumptions used by us to determine the ARO and to forecast the target growth in the NDT funds as of December 31, 2023 include: (1) the use of site specific cost estimates that are updated at least once every five years; (2) the inclusion in the ARO estimate of all legally unavoidable costs required to decommission the unit (e. g., radiological decommissioning and full site restoration for certain units, on- site SNF maintenance and storage subsequent to ceasing operations and until DOE acceptance, and disposal of certain LLRW); (3) as applicable, the consideration of multiple scenarios where decommissioning and site restoration activities, as applicable, are completed under possible scenarios ranging from 10 to 70 years after the cessation of plant operations or the end of the current licensed operating life; (4) the consideration of multiple end of life scenarios; (5) the measurement of the obligation at the present value of the future estimated costs and an annual average accretion of the ARO of approximately 4 % through a period of approximately 30 years after the end of the extended lives of the units; and (6) an estimated targeted annual pre- tax return on the NDT funds of 6. 1 % to 7. 1 % (as compared to a historical 5- year annual average pre- tax return of approximately 8. 0 %). We are required to provide to the NRC a biennial report by unit (annually for units that have been retired or are within five years of license expiration), based on values as of December 31, addressing our ability to meet the NRC minimum funding levels. Depending on the value of the trust funds, we may be required to take steps, such as providing financial guarantees through surety bonds, letters of credit, or parent company guarantees or making additional contributions to the trusts, which could be significant, to ensure that the trusts are adequately funded and that NRC minimum funding requirements are met. As a result, our cash flows and financial position may be significantly adversely affected affect . We filed our biennial decommissioning funding status report with the NRC on March 23, 2023 for all units, including our shutdown units, except for Zion Station which was included in a separate report to the NRC submitted by ZionSolutions, LLC. The status report demonstrated adequate decommissioning funding assurance as of December 31, 2022 for all units except for Peach Bottom Unit 1. As a former PECO plant, financial assurance for decommissioning Peach Bottom Unit 1 is provided by the NDT fund, collections from PECO customers, and the ability to adjust those the collections in accordance with the approved PAPUC tariff. See NDT Funds section above for additional information. Additionally, the STP units demonstrated adequate decommissioning funding assurance as of December 31, 2022 in the decommissioning funding status report filed with the NRC by STPNOC on March 29, 2023. We will file the next decommissioning funding status report with the NRC by March 31, 2024. This report will reflect the status of decommissioning funding as of December 31, 2023 for shutdown units, including Zion, and any units within five years of license expiration. We expect the funding status report to demonstrate adequate funding assurance for all units except for Peach Bottom Unit 1. Financial assurance for decommissioning Peach Bottom Unit 1 is provided by the collections from PECO customers as mentioned above. Additionally, the decommissioning funding status report for STP following our November 1, 2023 acquisition of a 44 % interest will be filed by STPNOC in March 2024. The status report will demonstrate adequate funding assurance as of December 31, 2023. As the future values of trust funds change due to market conditions, the NRC minimum funding status of our units will change. In addition, if changes occur to the regulatory agreements with the PAPUC or the PUCT that currently allow amounts to be collected from utility customers for decommissioning the former PECO and STP units, the NRC minimum funding status of those plants could change at subsequent NRC filing dates. Impact of Separation from Exelon Satisfying a condition precedent, on December 16, 2021, the NYPSC authorized our separation from Exelon and accepted the terms of a Joint Proposal that became binding upon closing of the separation on February 1, 2022. As part of the Joint Proposal, among other items, we have projected completion of radiological decommissioning and site restoration activities necessary to achieve a partial site release from the NRC (release of the site for unrestricted use, except for any on- site dry cask storage) within 20 years from the end of licensed life for each of our Ginna and FitzPatrick units and from the end of licensed life for the last of the NMP operating units. While there is flexibility under the Joint Proposal, there was an increase to the AROs, as noted above, associated with our New York nuclear plants during the first quarter of 2022. The Joint Proposal also required a contribution of $ 15 million to the NDT for NMP Unit 2 in January 2022 and requires various financial assurance mechanisms through the duration of decommissioning and site restoration, including a minimum NDT balance for each unit, adjusted for specific stages of decommissioning, and a parent guaranty for site restoration costs updated annually as site restoration progresses, which must be replaced with a third- party surety bond or equivalent financial instrument in the event we were to fall below investment grade. See Note 1 — Basis of Presentation for additional information on the separation. Non- Nuclear Asset Retirement Obligations We have AROs for plant closure costs associated with our natural gas, oil, and renewable generating facilities, including asbestos abatement, removal of certain storage tanks, restoring leased land to the condition it was in prior to construction of renewable generating stations, and other decommissioning- related activities. See Note 1 — Basis of Presentation for additional information on the accounting policy for AROs. The following table provides a rollforward of the non- nuclear AROs reflected in the Consolidated Balance Sheets from January 1, 2022 to December 31, 2023: 20232022Beginning balance as of January 1 $ 239 $ 216 Net increase due to changes in, and timing of, estimated future cash flows14 18 Accretion expense14 11 Asset divestitures (9) (1) Payments (1) (5) Ending balance as of December 31 $ 257 $ 239. Combined Notes to Consolidated Financial Statements (Dollars in millions, unless otherwise noted) Note 11 — Leases 11. Leases Lessee We have operating leases for which we are the lessee. The significant types of leases are contracted generation, real estate, and vehicles and equipment. The following table outlines other terms and conditions of the lease agreements as of December 31, 2023. We did not have material finance leases in 2023, 2022, or 2021. In YearsRemaining lease terms1- 32Options to extend the term2- 30Options to terminate within1 The components of operating lease costs were as follows: For the Years Ended December 31, 20232022021Operating lease costs $ 96 $ 109 $ 161 Variable lease costs146 169 168 Total lease costs (a) $ 242 $ 278 $ 329 (a) Excludes $ 50 million, $ 49 million, $ 44 million of sublease income recorded for each of the years ended December 31, 2023, 2022, and 2021, respectively. The following table provides additional information regarding the presentation of operating lease ROU assets and lease liabilities in the Consolidated Balance Sheets: As of December 31, 20232022Operating lease ROU assets (a) Other deferred debits and other assets $ 494 $ 545 Operating lease liabilities (a) Other current liabilities67 67 Other deferred credits and other liabilities583 643 Total operating lease liabilities $ 650 $ 710 (a) The operating ROU assets and lease liabilities include $ 212 million and $ 334 million, respectively, related to contracted generation as of December 31, 2023, and $ 248 million and $ 377 million, respectively, as of December 31, 2022. The weighted average remaining lease terms, in years, and the weighted average discount rates for operating leases were as follows: As of December 31, 202320222021Weighted average remaining lease term8. 49. 310. 1Weighted average discount rate5. 0 % 5. 0 % 5. 0 % The following table reconciles the undiscounted cash flows for our operating leases to the operating lease liabilities recorded on our consolidated balance sheet as of December 31, 2023: 2024 $ 101 2025104 2026104 2027102 2028103 Thereafter325 Total lease payments839 Less: Imputed interest189 Operating lease liabilities $ 650 Supplemental cash flow information related to operating leases was as follows: For the Years Ended December 31, 20232022021Cash paid for amounts included in the measurement of operating lease liabilities $ 102 $ 114 $ 162 ROU assets obtained in exchange for operating lease obligations13 14 2 Lessor We have operating leases for which we are the lessor. The significant types of leases are contracted generation and real estate. The following table outlines other terms and conditions of the lease agreements as of December 31, 2023. In YearsRemaining lease terms1- 17Options to extend the term1- 20 The components of lease income were as follows: For the Years Ended December 31, 20232022021Operating lease income $ 51 $ 51 $ 47 Variable lease income248 258 261 The following table presents maturity analysis of the lease payments we expect to receive as of December 31, 2023: 2024 $ 48 202548 202649 202749 202848 Thereafter85 Total $ 327 12. Asset Impairments We evaluate the carrying value of long- lived assets or asset groups for recoverability whenever events or changes in circumstances indicate that the carrying value of those assets may not be recoverable. Indicators ofCombined Notes to Consolidated Financial Statements (Dollars in millions, unless otherwise noted) Note 12 — Asset Impairments impairment may include a deteriorating business climate, including, but not limited to, declines in energy prices, condition of the asset, or plans to dispose of a long- lived asset significantly before the end of its useful life. We determine if long- lived assets or asset groups are potentially impaired by comparing the undiscounted expected future cash flows to the carrying value when indicators of impairment exist. When the undiscounted cash flow analysis indicates a long- lived asset or asset group may not be recoverable, the amount of the impairment loss is determined by measuring the excess of the carrying amount of the long- lived asset or asset group over its fair value. The fair value analysis is primarily based on the income approach using significant unobservable inputs (Level 3) including revenue and generation forecasts, projected capital and maintenance expenditures and discount rates. A variation in the assumptions used could lead to a different conclusion regarding the recoverability of an asset or asset group and, thus, could potentially result in material future impairments of our long- lived assets. Generally, pre- tax impairment losses on long- lived assets or asset groups are recorded in Operating and maintenance expense in the Consolidated Statements of Operations and Comprehensive Income. New England Asset Group In the second quarter of 2021, an overall decline in the asset group' s portfolio value suggested that the carrying value of the New England asset group may be impaired. We completed a comprehensive review of the estimated undiscounted future cash flows of the New England asset group and concluded that the carrying value was not recoverable and that its fair value was less than its carrying value. As a result, a pre- tax impairment charge of $ 350 million was recorded in the second quarter of 2021 in Operating and maintenance expense in the Consolidated Statement of Operations and Comprehensive Income. 13. Intangible Assets The following table presents the carrying amount of goodwill as of December 31, 2023 and 2022. There were no impairment losses during the years ended December 31, 2023, 2022, and 2021. GoodwillBalance at December 31, 2022 $ 47 Goodwill resulting from acquisition of STP (a) 378 Balance at December 31, 2023 $ 425 (a) See Note 2 — Mergers, Acquisitions, and Dispositions for additional information. See Note 1 — Basis of Presentation for our policy regarding goodwill. Our operating segments are also considered reporting units for goodwill impairment assessment purposes. The goodwill recognized in 2023 has been assigned entirely to the ERCOT operating segment. Other Intangible Assets and Liabilities Our other intangible assets and liabilities, included in Other current assets, Other deferred debits and other assets, Other current liabilities, Other deferred credits and other liabilities in the Consolidated Balance Sheets, consisted of the following as of December 31, 2023 and 2022. The intangible assets and liabilities shown below are generally amortized on a straight line basis, except for unamortized energy contracts which are amortized in relation to the expected realization of the underlying cash flows: December 31, 2023December 31, 2022GrossAccumulated AmortizationNetGrossAccumulated AmortizationNetUnamortized Energy Contracts $ 1, 892 $ (1, 631) $ 261 $ 1, 960 $ (1, 708) $ 252 Customer Relationships242 (167) 75 356 (265) 91 Total $ 2, 134 $ (1, 798) $ 336 $ 2, 316 $ (1, 973) $ 343Combined Notes to Consolidated Financial Statements (Dollars in millions, unless otherwise noted) Note 13 — Intangible Assets The following table summarizes the amortization expense related to our other intangible assets and liabilities for each of the years ended December 31, 2023, 2022, and 2021: For the Years Ended December 31, Amortization Expense (a) 2023 $ 58 202261 202180 (a) See Note 23 — Supplemental Financial Information for additional information related to the amortization of unamortized energy contracts. The following table summarizes the estimated future amortization expense related to our other intangible assets and liabilities as of December 31, 2023: For the Years Ending December 31, Estimated Future Amortization Expense2024 $ 62 202558 202651 202737 202831 2029 and thereafter97 14. Income Taxes Components of Income Tax Expense or Benefit Income taxes are comprised of the following components: For the Years Ended December 31, 20232022021FederalCurrent $ 464 $ 219 $ 394 Deferred301 (655) (153) ITC amortization (15) (15) (15) StateCurrent142 34 36 Deferred (33) 29 (37) Total income tax (benefit) expense $ 859 $ (388) $ 225Combined Notes to Consolidated Financial Statements (Dollars in millions, unless otherwise noted) Note 14 — Income Taxes Rate Reconciliation The effective income tax rate varies from the U. S. federal statutory rate principally due to the following: For the Years Ended December 31, 2023 (a) 2022 (b) 2021 (a) U. S. federal statutory rate21. 0 % 21. 0 % 21. 0 % (Decrease) increase due to: State income taxes, net of federal income tax benefit (c) 3. 5 (9. 2) — Qualified NDT fund income and losses10. 3 46. 3 165. 1 Amortization of investment tax credit, including deferred taxes on basis differences (0. 5) 2. 2 (9. 0) Production tax credits and other credits (0. 6) 7. 7 (28. 7) Noncontrolling interests0. 4 (0. 3) (3. 0) Other (d) 1. 0 3. 9 2. 6 Effective income tax rate (e) 35. 1 % 71. 6 % 148. 0 % (a) Positive percentages represent income tax expense. Negative percentages represent income tax benefit. (b) As there was a pre- tax loss during 2022, negative percentages represent income tax expense. Positive percentages represent income tax benefit. (c) Includes ($ 4) million and $ 30 million related to state rate changes and certain state tax positions in 2023 and 2022, respectively. (d) Primarily related to disallowed excess officer compensation in 2023 and $ 32 million prior period income tax adjustment recorded in 2022. (e) The change in effective tax rate in 2023 is primarily due to the impacts of higher realized NDT income and significant pretax income in 2023 compared to pretax loss in 2022. Tax Differences and Carryforwards The tax effects of temporary differences and carryforwards, which give rise to significant portions of the deferred tax assets (liabilities), as of December 31, 2023 and 2022 are presented below: December 31, 2023December 31, 2022Plant basis differences $ (3, 130) $ (3, 005) Accrual- based contracts (32) (35) Derivatives and other financial instruments984 43 Deferred pension and postretirement obligation (314) 287 Nuclear decommissioning activities (640) (371) Tax loss carryforward, net of valuation allowances47 67 Tax credit carryforward — 179 Investment in partnerships (193) (205) Other, net460 407 Deferred income tax liabilities (net) (2, 818) (2, 633) Unamortized ITCs (339) (354) Total deferred income tax liabilities (net) and unamortized ITCs $ (3, 157) $ (2, 987) The following table provides our carryforwards, of which the state- related items are presented on a post- apportioned basis, and any corresponding valuation allowances as of December 31, 2023: FederalDecember 31, 2023Federal general business credits carryforwards and other carryforwards $ — Year in which net operating loss or credit carryforwards will begin to expire2043StateState net operating losses and other

carryforwards477 Deferred taxes on state tax attributes (net) 21 Valuation allowance on state tax attributes (10) ForeignForeign net operating losses and other carryforwards145 Deferred taxes on foreign tax attributes (net) 36 Unrecognized Tax Benefits Our unrecognized tax benefits were not material as of and for the 12 months ended December 31, 2023, 2022, and 2021, and if recognized, would not significantly impact our effective tax rate. Further, these amounts are not expected to significantly increase or decrease within the next 12 months. Total amounts of interest and penalties recognized We did not record material interest and penalty expense related to tax positions reflected in the Consolidated Balance Sheets. Interest expense and penalty expense are recorded in Interest expense, net and Other, net, respectively, in Other income and deductions in the Consolidated Statements of Operations and Comprehensive Income. Description of tax years open to assessment by major jurisdiction Major JurisdictionOpen Years (a) Federal consolidated income tax returns2010- 2022Illinois unitary corporate income tax returns2012- 2022New Jersey separate corporate income tax returns2017- 2018New Jersey combined corporate income tax returns2019- 2022New York combined corporate income tax returns2015- 2022Pennsylvania separate corporate income tax returns2020- 2022 (a) Tax years open to assessment include years when we were consolidated by Exelon. See discussion below under the Tax Matters Agreement for responsibility of taxes of these open years. Other Tax Matters Allocation of Tax Benefits Prior to separation, we were a party to an agreement with Exelon and other subsidiaries of Exelon that provided for the allocation of consolidated tax liabilities and benefits (Tax Sharing Agreement). The Tax Sharing Agreement provided that each party was allocated an amount of tax similar to that which would be owed had the party been separately subject to tax. In addition, any net federal and state benefits attributable to Exelon were reallocated to the parties. That allocation was treated as a contribution from Exelon to the party receiving the benefit. The allocation of tax benefits from Exelon to us under the Tax Sharing Agreement at December 31, 2021 was $ 64 million. In connection with the separation, we entered into a Tax Matters Agreement (TMA) with Exelon. The TMA governs the respective rights, responsibilities, and obligations between us and Exelon after the separation with respect to tax liabilities and benefits, tax attributes, tax returns, tax contests and other tax sharing regarding U. S. federal, state, local and foreign income taxes, other tax matters and related tax returns. Responsibility and Indemnification for Taxes. As a former subsidiary of Exelon, we have joint and several liability with Exelon to the IRS and certain state jurisdictions relating to the taxable periods that we were included in federal and state filings. However, the TMA specifies the portion of this tax liability for which we will bear contractual responsibility, and we and Exelon agreed to indemnify each other against any amounts for which such indemnified party is not responsible. Specifically, we will be liable for taxes due and payable in connection with tax returns that we are required to file. We will also be liable for our share of certain taxes required to be paid by Exelon with respect to taxable years or periods (or portions thereof) ending on or prior to the separation to the extent that we would have been responsible for such taxes under the Exelon tax sharing agreement then existing. As such, our Consolidated Balance Sheets at separation reflected a payable of $ 103 million for tax liabilities where we maintain contractual responsibility to Exelon, with $ 53 million recognized in Accounts payable and accrued expenses and $ 50 million in Noncurrent other liabilities. As of December 31, 2023 and 2022, respectively, we had $ 11 million and $ 18 million in Other accounts receivable, no payables in Accounts payable and accrued expenses and $ 37 million and $ 50 million in Noncurrent other liabilities. Tax Refunds and Attributes. The TMA provides for the allocation of certain pre- closing tax attributes between us and Exelon. Tax attributes will be allocated in accordance with the principles set forth in the existing Exelon tax sharing agreement, unless otherwise required by law. Under the TMA, we will be entitled to refunds for taxes for which we are responsible. In addition, it is expected that Exelon will have tax attributes that may be used to offset Exelon' s future tax liabilities. A significant portion of such attributes were generated by our business. Upon separation, we reclassified $ 508 million from Deferred income taxes to reflect receivables of $ 11 million and $ 497 million in Other accounts receivable and Other deferred debits and other assets, respectively, in the Consolidated Balance Sheets for the tax attributes expected to be utilized by Exelon after separation in accordance with the terms of the TMA. As of December 31, 2023 and 2022, respectively, we had $ 336 million and $ 168 million in Other accounts receivable and $ 178 million and $ 362 million in Other deferred debits and other assets for the reclassified tax attributes. Subsequent to the balance sheet date but prior to issuance we executed an amendment to the TMA that modified the timing of Exelon' s payment of amounts due to us. The impact results in a reclassification of $ 152 million from Other accounts receivable to Other deferred debits in our Consolidated Balance Sheet and will be reflected in the first quarter of 2024. 15. Retirement Benefits Defined Benefit Pension and OPEB The majority of current employees participate in the defined benefit pension and OPEB plans that we sponsor. As the plan sponsor, our Consolidated Balance Sheets reflect underfunded pension and OPEB liabilities equal to an excess of either the PBO or APBO over the fair value of the plan assets, consistent with a single employer benefit plan. Newly hired employees are generally not eligible for either pension or OPEB benefits; instead, these employees are eligible to receive an enhanced non- discretionary fixed employer contribution under our sponsored defined contribution savings plan. Effective February 1, 2022, in connection with the separation, pension and OPEB obligations and the related plan assets for participants (inclusive of employees and certain former employees and their beneficiaries assigned to us from Exelon upon separation) were transferred to pension and OPEB plans established by us as the plan sponsor. We no longer account for our interest in Exelon sponsored pension and OPEB plans under the multi- employer benefit plan guidance as we are no longer participants. That previous approach historically resulted in the recognition of a net prepaid pension asset in our Consolidated Balance Sheets representing an excess of contributions over cumulative costs. Benefit Obligations, Plan Assets, and Funded Status As of February 1, 2022, we assumed from Exelon the PBO, APBO, and plan assets for our plan participants in connection with the separation. The defined benefit pension and OPEB plans were remeasured to determine the obligations and related plan assets to be transferred to us as of that date. The pension assets allocated to us were based on the rules prescribed by ERISA for transfers of assets in connection with a pension plan separation. A portion of the Exelon OPEB plan assets, which are held in VEBA trusts, were also allocated to usCombined Notes to Consolidated Financial Statements (Dollars in millions, unless otherwise noted) Note 15 — Retirement Benefits separately for each funding vehicle based on the ratio of the APBO assumed by us to the total APBO attributed to each funding vehicle. The remeasurement completed at separation is reflected in the table below as a separation- related adjustment and resulted in the recognition of pension obligations of $ 953 million, net of pension plan assets of $ 8, 267 million, and OPEB obligations of $ 876 million, net of OPEB plan assets of $ 904 million. Additionally, we recognized $ 2, 006 million (after- tax) in Accumulated other comprehensive loss for actuarial losses and prior service costs that had accrued over the lives of the plans prior to separation, primarily based on our proportionate share of the total projected pension and OPEB obligations at Exelon prior to separation. In connection with the acquisition of STP in the fourth quarter of 2023, Constellation recorded pension and OPEB obligations, net of plan assets, reflected in the tables below as an acquisition- related adjustment of $ 17 million and $ 14 million, respectively. Refer to Note 2- Mergers, Acquisitions and Dispositions for additional discussion of the acquisition of STP. We use a December 31 measurement date for our pension and OPEB obligations and the related plan assets. The actuarial losses experienced upon remeasurement as of December 31, 2023 were offset against AOCI and attributable to decreases in the discount rates used to measure the benefit obligations net of actual investment performance that was less than expected. See the table below for the actuarial loss associated with the pension valuation. The following tables provide a rollforward of the changes in the benefit obligations and plan assets for the years ended December 31, 2023 and 2022 for all plans combined: Pension BenefitsOPEB2023202220232022Change in benefit obligation: Benefit obligation as of the beginning of the year $ 7, 275 $ — $ 1, 360 $ 847 Separation- related adjustment — 9, 220 — 933 Benefit obligation as of February 1, 2022 — 9, 220 — 1, 780 Service cost89 115 16 23 Interest cost394 269 74 52 Plan participants' contributions — — 23 20 Actuarial loss / (gain), net368 (1, 756) 99 (401) Acquisition- related adjustment (a) 187 — 14 — Settlements — (15) — — — Gross benefits paid (543) (558) (143) (114) Benefit obligation as of the end of year $ 7, 770 $ 7, 275 $ 1, 443 $ 1, 360 (a) Pension and OPEB adjustment related to the acquisition of STP in 2023. The following table presents the components of our net periodic benefit (credits) costs, prior to capitalization and co- owner allocations, for the years ended December 31 2023, 2022 and 2021: Pension BenefitsOPEBTotal Pension Benefits and OPEB202320222021 (a) 202320222021 (a) 202320222021 (a) Components of net periodic benefit (credit) cost: Service cost $ 89 $ 126 $ 145 $ 16 $ 25 $ 29 $ 105 $ 151 $ 174 Non- service components of pension benefits & OPEB (credit) cost: Interest cost404290 235 76 55 45 480 345 280 Expected return on assets (520) (565) (493) (45) (55) (58) (565) (620) (551) Amortization of: Prior service (credit) cost11 1 1 (10) (7) (9) (9) (6) (8) Actuarial (gain) loss48148 199 (12) (1) 10 36 147 209 Settlement charges — 6 20 — — — — 6 20 Non- service components of pension benefits & OPEB credit (cost) (b) (67) (120) (38) 9 (8) (12) (58) (128) (50) Net periodic benefit (credit) cost (c) (d) (e) $ 22 $ 6 $ 107 $ 25 $ 17 $ 17 $ 47 $ 23 $ 124 (a) Costs recognized for the year ended December 31, 2021 were allocated to us by Exelon under the Exelon sponsored pension and OPEB plans prior to separation. (b) Effective February 1, 2022, these non- service (credits) costs are reflected in Other, net in the Consolidated Statements of Operations and Comprehensive Income. (c) The pension benefit and OPEB service costs reflected in the Consolidated Statements of Operations and Comprehensive Income for the year ended December 31, 2023 totaled $ 94 million. The pension benefit and OPEB non- service credits reflected in the Consolidated Statements of Operations and Comprehensive Income for the year ended December 31, 2023 totaled ($ 54) million. (d) The pension benefit and OPEB service costs reflected in the Consolidated Statements of Operations and Comprehensive Income for the year ended December 31, 2022 totaled $ 131 million. The pension benefit and OPEB non- service credits reflected in the Consolidated Statements of Operations and Comprehensive Income for the year ended December 31, 2022 totaled ($ 116) million. Our portion of the total net periodic benefit (credits) costs allocated to us from Exelon in January 2022 prior to separation was not material and remains in total Operating and maintenance expense. (e) The pension benefit and OPEB service costs reflected in the Consolidated Statements of Operations and Comprehensive Income for the year ended December 31, 2021 totaled $ 144 million. The pension benefit and OPEB non- service credits reflected in the Consolidated Statements of Operations and Comprehensive Income for the year ended December 31, 2021 totaled ($ 50) million. Components of AOCI We recognize the overfunded or underfunded status of defined benefit pension and OPEB plans as an asset or liability on our balance sheet, with offsetting entries to AOCI. The following tables provide the pre- tax components of AOCI for the years ended December 31, 2023 and 2022, for all plans combined: Pension BenefitsOPEB2023202220232022Changes in plan assets and benefit obligations recognized in AOCI: Separation- related adjustment $ — $ 2, 664 $ — $ 22 Current year actuarial (gain) loss509 11 94 (253) Amortization of actuarial (loss) gain (46) (134) 14 1 Amortization of prior service (cost) credit (1) (1) 6 7 Settlements — (6) — — — Total recognized in AOCI $ 462 $ 2, 534 $ 114 $ (223) The following table provides the components of gross accumulated other comprehensive loss that have not been recognized as components of periodic benefit cost as of December 31, 2023 and 2022, for all plans combined: Pension BenefitsOPEB2023202220232022Prior service (credit) cost $ 9 $ 10 $ (24) $ (30) Actuarial (gain) loss2, 985 2, 524 (85) (193) Total $ 2, 994 $ 2, 534 $ (109) $ (223) Average Remaining Service Period For pension benefits, we amortize the unrecognized prior service (credits) costs and certain actuarial gains and losses reflected in AOCI, as applicable, based on participants' average remaining service periods. For OPEB, we amortize the unrecognized prior service (credits) costs reflected in AOCI over participants' average remaining service period to benefit eligibility age, and amortize certain actuarial gains and losses reflected in AOCI over participants' average remaining service period to expected retirement. The resulting average remaining service periods for pension and OPEB were as follows as of December 31, 2023 and 2022: December 31, 2023December 31, 2022Pension plans12. 412. 2OPEB plans: Benefit Eligibility Age7. 57. 4Expected Retirement8. 38. 3 The measurement of the plan obligations and costs of providing benefits under our defined benefit pension and OPEB plans involves various factors, including the development of valuation assumptions and inputs and accounting policy elections. The measurement of benefit obligations and costs is impacted by several assumptions and inputs, as shown below, among other factors. When developing the required assumptions, we consider historical information as well as future expectations. Discount Rate. The discount rates are determined by developing a spot rate curve based on the yield to maturity of a universe of high- quality non- callable (or callable with make whole provisions) bonds with similar maturities to the related pension and OPEB obligations. The spot rates are used to discount the estimated future benefit distribution amounts under the pension and OPEB plans. The discount rate is the single level rate that Expected Rate of Return. In determining the EROA, we consider historical economic indicators (including inflation and GDP growth) that impact asset returns, as well as expectation regarding future long- term capital market performance, weighted by our target asset class allocations. Mortality. The mortality assumption is composed of a base table that represents the current expectation of life expectancy of the population adjusted by an improvement scale that attempts to anticipate future improvements in life expectancy. Upon remeasurement as of December 31, 2023 and December 31, 2022, we utilized the mortality tables and projection scales released by the SOA. The following assumptions were used to determine the benefit obligations for the plans as of December 31, 2023 and December 31, 2022. Assumptions used to determine year- end benefit obligations are the assumptions used to estimate the subsequent year' s net periodic benefit costs. Pension BenefitsOPEBDecember 31, 2023December 31, 2022December 31, 2023December 31, 2022Discount rate (a) 5. 17 % 5. 52 % 5. 15 % 5. 50 % Investment crediting rate (b) 5. 07 % 5. 15 % N / AN / ARate of compensation increase (c) 4. 25 % 3. 75 % 4. 25 % 3. 75 % Mortality tablePri- 2012 table with MP- 2021 improvement scale (adjusted) Pri- 2012 table with MP- 2021 improvement scale (adjusted) Pri- 2012 table

We consider various factors when making qualified pension funding decisions, including actuarially determined minimum contribution requirements under ERISA, contributions required to avoid benefit restrictions and at- risk status as defined by the Pension Protection Act, and management of the pension obligation. The Pension Protection Act requires the attainment of certain funding levels to avoid benefit restrictions (such as an inability to pay lump sums or to accrue benefits prospectively), and at- risk status (which triggers higher minimum contribution requirements and participant notification). The projected contributions below reflect a funding strategy to make levelized annual contributions with the objective of achieving 100 % funded status over time. This level funding strategy helps minimize the volatility of future period required pension contributions. Based on this funding strategy and current market conditions, which are both subject to change, we made our annual qualified pension contribution in July 2023. Our non- qualified pension plans are not funded given that they are not subject to statutory minimum contribution requirements. OPEB plans are also not subject to statutory minimum contribution requirements, though we have funded certain plans. For our funded OPEB plans, we consider several factors in determining the level of contributions to these plans, including liabilities management and levels of benefit claims paid. The following table provides our contributions paid to our qualified pension plans, non- qualified pension plans, and OPEB plans for the years ended December 31, 2023, 2022, and 2021: 202320222021 (b) Pension contributions (a) $ 26 $ 212 $ 231 OPEB contributions28 26 28 Total contributions $ 54 $ 238 $ 259 (a) In 2023 and 2022, our annual qualified pension contributions were $ 21 million and $ 192 million, respectively. The benefit payments to the non- qualified pension plans in 2023 and 2022 were not material. (b) Prior to separation, Exelon allocated contributions related to its legacy Exelon sponsored pension and OPEB plans to its subsidiaries based on accounting cost or employee participation (both active and retired). Estimated Future Benefit Payments Estimated future benefit payments to participants over the next ten years in all pension and OPEB plans as of December 31, 2023 are as follows: Pension BenefitsOPEB2024 $ 576 $ 117 2025575 116 2026581 115 2027581 114 2028587 114 2029 through 20332, 880 546 Total estimated future benefits payments through 2033 $ 5, 780 $ 1, 122 On a regular basis, we evaluate our investment strategy to ensure that plan assets will be sufficient to pay plan benefits when due. We have developed and implemented a liability hedging investment strategy for our qualified pension plans that has reduced the volatility of these pension assets relative to the associated pension obligations. We are likely to continue to gradually increase the liability hedging portfolio as the funded status of the plans improve. The overall objective is to achieve attractive risk- adjusted returns that will balance with the liquidity requirements of the plans' liabilities while striving to minimize the risk of significant losses. Trust assets for our OPEB plans are managed in a diversified investment strategy that prioritizes maximizing liquidity and returns while minimizing asset volatility. Actual asset returns have an impact on the costs reported for the pension and OPEB plans. The actual asset returns across our pension and OPEB plans for the year ended December 31, 2023 were 6. 50 % and 9. 50 %, respectively, compared to an expected long- term return assumption of 6. 50 % and 6. 50 %, respectively. We used an EROA of 6. 50 % to estimate both our 2024 pension and OPEB costs. Our pension and OPEB plan target asset allocations as of December 31, 2023 and 2022 were as follows: December 31, 2023December 31, 2022Asset CategoryPension BenefitsOPEBPension BenefitsOPEBEquity securities21 % 17 % 21 % 43 % Fixed income securities54 % 70 % 54 % 45 % Alternative investments (a) 25 % 13 % 25 % 12 % Total100 % 100 % 100 % 100 % (a) Alternative investments include private equity, hedge funds, real estate, and private credit. We evaluated our pension and OPEB plans' asset portfolios for the existence of significant concentrations of credit risk as of December 31, 2023. Types of concentrations that were evaluated include, but are not limited to, investment concentrations in a single entity, type of industry, foreign country, and individual fund. As of December 31, 2023, our pension and OPEB plans held no credit risk concentrations surpassing 10 % of plan assets. Fair Value Measurements The following table presents pension and OPEB plan assets measured and recorded at fair value as a net component of Pension obligations and Non- pension postretirement benefit obligations in our Consolidated Balance Sheets on a recurring basis and their level within the fair value hierarchy as of December 31, 2023 and 2022: December 31, 2023December 31, 2022Level 1Level 2Level 3TotalLevel 1Level 2Level 3TotalPension plan assets (a) Cash equivalents $ 192 $ — $ — $ 192 $ 216 $ — $ — $ 216 Equities (b) 598 — — 598 776 — — 776 Fixed income740 2, 137 — 2, 877 693 1, 951 8 2, 652 Private equity — — — — — — 180 180 Total assets measured at fair value1, 530 2, 137 — 3, 667 1, 685 1, 951 188 3, 824 Assets measured at NAV — — — 3, 283 — — — 2, 879 Pension plan assets subtotal1, 530 2, 137 — 6, 950 1, 685 1, 951 188 6, 703 OPEB plan assets (a) Cash equivalents — — — $ — 40 — — — $ 40 Equities232 — — 232 152 — — — 152 Fixed income62 94 — 156 67 61 — 128 Total assets measured at fair value294 94 — 388 259 61 — 320 Assets measured at NAV — — — 304 — — — 414 OPEB plan assets subtotal294 94 — 692 259 61 — 734 Total pension and OPEB plan assets (c) $ 1, 824 $ 2, 231 $ — $ 7, 642 $ 1, 944 $ 2, 012 $ 188 $ 7, 437 _____ (a) See Note 18 — Fair Value of Financial Assets and Liabilities for a description of levels within the fair value hierarchy. (b) Includes derivative instruments of $ 31 million and $ 6 million for the years ended December 31, 2023 and 2022, respectively, which have total notional amounts of $ 1, 986 million and $ 1, 879 million as of December 31, 2023 and 2022, respectively. The notional principal amounts for these instruments provide one measure of the transaction volume outstanding as of the fiscal years ended and do not represent the amount of the company' s exposure to credit or market loss. (c) Excludes net liabilities of $ 263 million and $ 43 million as of December 31, 2023 and 2022, respectively, which include certain derivative assets that have notional amounts of $ 15 million and $ 41 million as of December 31, 2023 and 2022, respectively. These items are required to reconcile to the fair value of net plan assets and consist primarily of receivables or payables related to pending securities sales and purchases, and interest and dividends receivable. The following table presents the reconciliation of Level 3 assets and liabilities measured at fair value for pension and OPEB plans for the years ended December 31, 2023 and 2022: Pension AssetsFixed IncomePrivate EquityTotalBalance as of January 1, 2023 $ 8 $ 180 $ 188 Actual return on plan assets: Relating to assets still held as of the reporting date — 12 12 Relating to assets sold during the period — (13) (13) Purchases and settlements: Purchases — 8 8 Settlements (a) — (187) (187) Transfers out of Level 3 (8) — (8) Balance as of December 31, 2023 $ — $ — $ — Pension AssetsFixed IncomePrivate EquityTotalBalance as of January 1, 2022 $ — $ — $ — Separation- related adjustment9 — 9 Actual return on plan assets: Relating to assets still held as of the reporting date (1) (54) (55) Purchases and settlements: Purchases — 18 18 Settlements (a) — (4) (4) Transfers out of Level 3 (b) — 220 220 Balance as of December 31, 2022 $ 8 $ 180 $ 188 _____ (a) Represents cash settlements only. (b) Includes certain private equity investments previously measured at fair value using NAV or its equivalent as a practical expedient at separation transferred to Level 3 primarily due to changes in market liquidity or data. Valuation Techniques Used to Determine Fair Value The techniques used to fair value the pension and OPEB assets invested in cash equivalents, equities, fixed income, derivatives, private equity, real estate, and private credit investments are the same as the valuation techniques for these types of investments in NDT funds. See Cash Equivalents and NDT Fund Investments in Note 18 — Fair Value of Financial Assets and Liabilities for further information. Pension and OPEB assets also include investments in hedge funds. Hedge fund investments include those that employ a broad range of strategies to enhance returns and provide additional diversification. The fair value of hedge funds is determined using NAV or its equivalent as a practical expedient, and therefore, hedge funds are not classified within the fair value hierarchy. We have the ability to redeem these investments at NAV or its equivalent subject to certain restrictions which may include a lock- up period or a gate. Defined Contribution Savings Plan We sponsor the Constellation Employee Savings Plan, a 401 (k) defined contribution savings plan. The plan allows employees to contribute a portion of their pre- tax and / or after- tax income in accordance with specified guidelines. We match a percentage of the employee contributions up to certain limits. In addition, certain employees are eligible for a fixed non- discretionary employer contribution in lieu of a pension benefit. The employer contributions to the savings plan were $ 106 million, $ 90 million and $ 53 million for the years ended December 31, 2023, 2022, and 2021, respectively. Combined Notes to Consolidated Financial Statements (Dollars in millions, unless otherwise noted) Note 16 — Derivative Financial Instruments 16. Derivative Financial Instruments We use derivative instruments to manage commodity price risk, interest rate risk, and foreign exchange risk related to ongoing business **, financial condition, results of** operations . Authoritative guidance requires that derivative instruments be recognized as either assets or liabilities at fair value, with changes in fair value of the derivative recognized in earnings immediately. Other accounting treatments are available through special election and designation, provided they meet specific, restrictive criteria both at the time of designation and on an **and** ongoing basis. These alternative permissible accounting treatments include NPNS, cash flow hedges, and fair value hedges. All derivative instruments, excluding NPNS and cash flow hedges, are recorded at fair value through earnings. For all NPNS derivative instruments, accounts receivable or accounts payable are recorded when derivatives settle, and revenue or expense is recognized in earnings as the underlying physical commodity is sold or delivered. Authoritative guidance about offsetting assets and liabilities requires the fair value of derivative instruments to be shown in the Combined Notes to Consolidated Financial Statements on a gross basis, even when the derivative instruments are subject to legally enforceable master netting agreements and qualify for net presentation in the Consolidated Balance Sheets. A master netting agreement is an agreement between two counterparties that may have derivative and non- derivative contracts with each other providing for the net settlement of all referenced contracts via one payment stream, which takes place as the contracts deliver, when collateral is requested or in the event of default. In the tables below, which present fair value balances, our energy- related economic hedges and proprietary trading derivatives are shown gross. The impact of the netting of fair value balances with the same counterparty that are subject to legally enforceable master netting agreements, as well as netting of cash collateral, including margin on exchange positions, is aggregated in the collateral and netting columns. Our use of cash collateral is generally unrestricted unless we were downgraded below investment grade. As our senior unsecured debt rating is currently rated at BBB and Baa2 by S & P and Moody' s, respectively, it would take a three notch downgrade by S & P or a two notch downgrade by Moody' s for us to go below investment grade. We employ established policies and procedures to manage our risks associated with market fluctuations in commodity prices by entering physical and financial derivative contracts, including swaps, futures, forwards, options, and short- term and long- term commitments to purchase and sell energy and energy- related products. We believe these instruments, which are either determined to be non- derivative or classified as economic hedges, mitigate exposure to fluctuations in commodity prices. To the extent the amount of energy we produce or procure differs from the amount of energy we have contracted to sell and in connection with portfolio optimization, we are exposed to market fluctuations in the prices of electricity, natural gas, and other commodities. We use a variety of derivative and non- derivative instruments to manage the commodity price risk of our electric generation facilities, including power and gas sales, fuel and power purchases, natural gas transportation and pipeline capacity agreements, and other energy- related products marketed and purchased. To manage these risks, we may enter fixed- price derivative or non- derivative contracts to hedge the variability in future cash flows from expected sales of power and gas and purchases of power and fuel . The objectives for executing such hedges include fixing the price for a portion of anticipated future electricity sales at a level that provides an acceptable return. We are also exposed to differences between the locational settlement prices of certain economic hedges and the hedged generating units. This price difference is actively managed through other instruments which include derivative congestion products, whose changes in fair value are recognized in earnings each period, and auction revenue rights, which are accounted for on an accrual basis. Additionally, we are exposed to certain market risks through our proprietary trading activities. The proprietary trading activities are a complement to our energy marketing portfolio but represent a small portion of our overall energy marketing activities and are subject to limits established by the Executive Committee. Proprietary trading includes all contracts executed with the intent of benefiting from shifts or changes in market prices as opposed to those executed with the intent of hedging or managing risk. Gains and losses associated with proprietary trading are reported as Operating revenues in the Consolidated Statements of Operations and Comprehensive Income and are included in the Net fair value changes related to derivatives line in the Consolidated Statements of Cash Flows. For the years ended December 31, 2023, 2022, and 2021, net pre- tax commodity mark- to- market gains and losses were not material. The following tables provide a summary of the derivative fair value balances recorded as of December 31, 2023 and 2022: December 31, 2023EconomicHedgesProprietaryTradingCollateral (a) (b) Netting (a) TotalMark- to- market derivative assets (current) $ 7, 927 $ 2 $ 703 $ (7, 472) $ 1, 160 Mark- to- market derivative assets (noncurrent) 3, 345 — 330 (2, 682) 993 Total mark- to- market derivative assets11, 272 2 1, 033 (10, 154) 2, 153 Mark- to- market derivative liabilities (current) (9, 019) (2) 922 7, 472 (627) Mark- to- market derivative liabilities (noncurrent) (3, 545) — 445 2, 682 (418) Total mark- to- market derivative liabilities (12, 564) (2) 1, 367 10, 154 (1, 045) Total mark- to- market derivative net assets (liabilities) $ (1, 292) $ — $ 2, 400 $ — $ 1, 108 December 31, 2022Mark- to- market derivative assets (current) $ 15, 296 $ 10 $ 161 $ (13, 123) $ 2, 344 Mark- to- market derivative assets (noncurrent) 5, 100 — 217 (4, 074) 1, 243 Total mark- to- market derivative assets20, 396 10 378 (17, 197) 3, 587 Mark- to- market derivative liabilities (current) (15, 049) (6) 374 13, 123 (1, 558) Mark- to- market derivative liabilities (noncurrent) (5, 203) — 146 4, 074 (983) Total mark- to- market derivative liabilities (20, 252) (6) 520 17, 197 (2, 541) Total mark- to- market derivative net assets (liabilities) $ 144 $ 4 $ 898 $ — $ 1, 046 (a) We net all available amounts allowed in our Consolidated Balance Sheets in accordance with authoritative guidance for derivatives. These amounts include unrealized derivative transactions with the same counterparty under legally enforceable master netting agreements and cash collateral. (b) Includes $ 1, 712 million of variation margin posted and $ 836 million of variation margin held from the exchanges as of December 31, 2023 and 2022, respectively. Economic Hedges (Commodity Price Risk) For the years ended December 31, 2023, 2022, and 2021, we recognized the following net pre- tax commodity mark- to- market gains (losses), which are also included in the Net fair value changes related to derivatives line in the Consolidated Statements of Cash Flows. For the Years

Ended December 31, Income Statement Location20232022021Operating revenues $ 1, 402 $ (1, 193) $ (635) Purchased power and fuel (2, 368) 167 1, 206 Total $ (966) $ (1, 026) $ 571 In general, increases and decreases in forward market prices have a positive and negative impact, respectively, on owned and contracted generation positions that have not been hedged. Beginning in 2024, our nuclear fleet is eligible for the nuclear PTC provided by the IRA, an important tool in managing commodity price risk for each nuclear unit not already receiving state support. The nuclear PTC provides increasing levels of support as unit revenues decline below levels established in the IRA and is further adjusted annually for inflation over the duration of the program. We utilize interest rate swaps to manage our interest rate exposure and foreign currency derivatives to manage foreign exchange rate exposure associated with international commodity purchases in currencies other than U. S. dollars, both of which are treated as economic hedges. The notional amounts were $ 562 million and $ 524 million as of December 31, 2023 and 2022, respectively. The following table provides the mark- to- market derivative assets and liabilities as of December 31, 2023 and 2022: December 31, 2023December 31, 2022EconomicHedgesNetting (a) TotalEconomicHedgesNetting (a) TotalMark- to- market derivative assets (current) $ 20 $ (1) $ 19 $ 29 $ (5) $ 24 Mark- to- market derivative assets (noncurrent) 2 — 2 18 — 18 Total mark- to- market derivative assets22 (1) 21 47 (5) 42 Mark- to- market derivative liabilities (current) (6) 1 (5) (5) 5 — Mark- to- market derivative liabilities (noncurrent) (1) — (1) — — — Total mark- to- market derivative liabilities (7) 1 (6) (5) 5 — Total mark- to- market derivative net assets (liabilities) $ 15 $ — $ 15 $ 42 $ — $ 42 _____ (a) We net all available amounts in our Consolidated Balance Sheets in accordance with authoritative guidance for derivatives. These amounts include unrealized derivative transactions with the same counterparty under legally enforceable master netting agreements. The mark- to- market gains and losses associated with management of interest rate and foreign currency exchange rate risk for the years ended December 31, 2023, 2022, and 2021 were not material, which are also included in the Net fair value changes related to derivatives line in the Consolidated Statements of Cash Flows. We would be exposed to credit- related losses in the event of non- performance by counterparties on executed derivative instruments. The credit exposure of derivative contracts, before collateral, is represented by the fair value of contracts as of the reporting date. For commodity derivatives, we enter into enabling agreements that allow for payment netting with our counterparties, which reduces our exposure to counterparty risk by providing for the offset of amounts payable to the counterparty against amounts receivable from the counterparty. Typically, each enabling agreement is for a specific commodity and, with respect to each individual counterparty, netting is limited to transactions involving that specific commodity product, except where master netting agreements exist with a counterparty that allows for cross product netting. In addition to payment netting language in the enabling agreement, our credit department establishes credit limits, margining thresholds and collateral requirements for each counterparty, which are defined in the derivative contracts. Counterparty credit limits are based on an internal credit review process that considers a variety of factors, including the results of a scoring model, leverage, liquidity, profitability, credit ratings by credit rating agencies, and other risk management criteria. To the extent that a counterparty' s margining thresholds are exceeded, the counterparty is required to post collateral with us, as specified in each enabling agreement. Our credit department monitors current and forward credit exposure to counterparties and their affiliates, both on an individual and an aggregate basis. The following tables provide information on the credit exposure for all derivative instruments, NPNS and payables and receivables, net of collateral and instruments that are subject to master netting agreements, as of December 31, 2023. The tables further delineate that exposure by credit rating of the counterparties and provide guidance on the concentration of credit risk by types of counterparties. The amounts in the tables below exclude credit risk exposure from individual retail counterparties and exposure through RTOs, ISOs, NYMEX, ICE, NASDAQ, NGX, and Nodal commodity exchanges. Rating as of December 31, 2023TotalExposureBefore CreditCollateralCreditCollateral (a) NetExposureNumber ofCounterpartiesGreater than 10 % of Net ExposureNet Exposure ofCounterpartiesGreater than 10 % of Net ExposureInvestment grade $ 1, 257 $ 51 $ 1, 206 1 $ 222 Non- investment grade22 7 15 — — — No external ratingsInternally rated — investment grade116 — 116 — — — Internally rated — non- investment grade259 45 214 — — — Total $ 1, 654 $ 103 $ 1, 551 1 $ 222 _____ (a) As of December 31, 2023, credit collateral held from counterparties where we had credit exposure included $ 44 million of cash and $ 59 million of letters of credit. The credit collateral does not include non- liquid collateral. Net Credit Exposure by Type of CounterpartyAs of December 31, 2023Investor- owned utilities, marketers, power producers $ 1, 271 Energy cooperatives and municipalities132 Financial Institutions49 Other99 Total $ 1, 551 As part of the normal course of business, we routinely enter into physically or financially settled contracts for the purchase and sale of capacity, electricity, fuels, emissions allowances, and other energy- related products. Certain of our derivative instruments contain provisions that require us to post collateral. We also enter into commodity transactions on exchanges where the exchanges act as the counterparty to each trade. Transactions on the exchanges must adhere to comprehensive collateral and margining requirements. This collateral may be posted in the form of cash or credit support with thresholds contingent upon our credit ratings from S & P and Moody' s. The collateral and credit support requirements vary by contract and by counterparty. These credit- risk- related contingent features stipulate that if we were to be downgraded or lose our investment grade credit ratings (based on our senior unsecured debt rating), we would be required to provide additional collateral. This incremental collateral requirement allows for the offsetting of derivative instruments that are assets with the same counterparty, where the contractual right of offset exists under applicable master netting agreements. In the absence of expressly agreed- to provisions that specify the collateral that must be provided, collateral requested will be a function of the facts and circumstances of the situation at the time of the demand. In this case, we believe an amount of several months of future payments (e. g., capacity payments) rather than a calculation of fair value is the best estimate for the contingent collateral obligation, which has been factored into the disclosure below. The aggregate fair value of all derivative instruments with credit- risk- related contingent features in a liability position that are not fully collateralized (excluding transactions on the exchanges that are fully collateralized) is detailed in the table below: As of December 31, Credit- Risk- Related Contingent Features20232022Gross fair value of derivative contracts containing this feature $ (1, 894) $ (4, 736) Offsetting fair value of in- the- money contracts under master netting arrangements925 2, 048 Net fair value of derivative contracts containing this feature $ (969) $ (2, 688) As of December 31, 2023 and 2022, we posted or held the following amounts of cash collateral and letters of credit on derivative contracts with external counterparties, after giving consideration to offsetting derivative and non- derivative positions under master netting agreements. As of December 31, 20232022Cash collateral posted (a) $ 2, 449 $ 1, 636 Letters of credit posted (a) 777 947 Cash collateral held (a) 64 765 Letters of credit held (a) 61 115 Additional collateral required in the event of a credit downgrade below investment grade (at BB / Ba1) (b) (c) (d) 1, 914 3, 337 _____ (a) The cash collateral and letters of credit amounts are inclusive of NPNS contracts. (b) Certain of our contracts contain provisions that allow a counterparty to request additional collateral when there has been a subjective determination that our credit quality has deteriorated, generally termed " adequate assurance. " Due to the subjective nature of these provisions, we estimate the amount of collateral that we may ultimately be required to post in relation to the maximum exposure with the counterparty. (c) The downgrade collateral is inclusive of all contracts in a liability position regardless of accounting treatment and excludes any contracts with individual retail counterparties. (d) A loss of investment grade credit rating would require a significant reduction in credit ratings from their current levels of BBB and Baa2 at S & P and Moody' s, respectively. We enter into supply forward contracts with certain utilities with one- sided collateral postings only from us. If market prices fall below the benchmark price levels in these contracts, the utilities are not required to post collateral. However, when market prices rise above the benchmark price levels, we are required to post collateral once certain unsecured credit limits are exceeded. 17. Debt and Credit Agreements Short- Term Borrowings We meet our short- term liquidity requirements primarily through the issuance of commercial paper. We may use our credit facility for general corporate purposes, including meeting short- term funding requirements and the issuance of letters of credit. On February 1, 2022, we entered into a credit agreement establishing a $ 3. 5 billion five- year revolving credit facility at a variable interest rate of SOFR plus 1. 275 % and on February 9, 2022 we entered into a $ 1 billion five- year liquidity facility with the primary purpose of supporting our letter of credit issuances. Many of our bilateral credit agreements remain in effect. Borrowings under our revolving credit agreement bear interest at a rate based upon either the Daily Simple SOFR rate or a Term SOFR rate, plus an adder based upon our credit ratings. The adders for the Daily Simple SOFR based borrowings and Term SOFR borrowings are 27. 5 basis points and 127. 5 basis points, respectively. Combined Notes to Consolidated Financial Statements (Dollars in millions, unless otherwise noted) Note 17 — Debt and Credit Agreements If we lose our investment grade rating, the maximum adders for Daily Simple SOFR rate borrowings and Term SOFR rate borrowings would be 100 basis points and 200 basis points, respectively. The credit agreements also require us to pay facility fees based upon the aggregate commitments. The fee varies depending upon our credit rating. See below for additional details. As of December 31, 2023 and 2022 we had the following aggregate bank commitments, credit facility borrowings and available capacity under our respective credit facilities: Facility TypeAggregate BankCommitmentFacility DrawsOutstandingLetters of CreditOutstandingCommercial Paper (a) Available Capacity as of December 31, 2023Syndicated Revolver $ 3, 500 $ — $ 60 $ 1, 107 $ 2, 333 Bilaterals1, 500 — 878 — 622 Liquidity Facility971 — 720 — 191 (b) Project Finance137 — 117 — 20 Total $ 6, 108 $ — $ 1, 775 $ 1, 107 $ 3, 166 Facility TypeAggregate BankCommitmentFacility DrawsOutstandingLetters of CreditOutstandingCommercial Paper (a) Available Capacity as of December 31, 2022Syndicated Revolver $ 3, 500 $ — $ 765 $ 959 $ 1, 776 Bilaterals1, 200 — 867 — 333 Liquidity Facility971 — 732 — 139 (b) Project Finance131 — 111 — 20 Total $ 5, 802 $ — $ 2, 475 $ 959 $ 2, 268 (a) Our commercial paper program is supported by the revolving credit agreement. In order to maintain our commercial paper program in the amounts indicated above, we must have a credit facility in place, at least equal to the amount of our commercial paper program. As of both December 31, 2023 and 2022, the maximum program size of our commercial paper program was $ 3. 5 billion. We do not issue commercial paper in an aggregate amount exceeding the then available capacity under our credit facility. The weighted average interest rate on commercial paper borrowings was 5. 66 % and 4. 90 % as of December 31, 2023 and 2022, respectively. (b) The maximum amount of the bank commitment is not to exceed $ 971 million. The aggregate available capacity of the facility is subject to market fluctuations based on the value of U. S Treasury Securities which determines the amount of collateral held in the trust. We may post additional collateral to borrow up to the maximum bank commitment. As of December 31, 2023 and 2022, without posting additional collateral, the actual availability of facility, prior to outstanding letters of credit was $ 911 million and $ 871 million, respectively. Bilateral Credit Agreements The following table reflects the bilateral credit agreements at December 31, 2023: Date Initiated Latest Amendment DateMaturity Date (a) AmountJanuary 5, 2016 (b) April 4, 2023April 3, 2026 $ 150 October 25, 2019 (b) N / AN / A200November 20, 2019 (b) N / AN / A300November 21, 2019 (b) N / AN / A100November 21, 2019 (b) November 15, 2022November 21, 2024100May 15, 2020 (b) March 31, 2023N / A300August 12, 2022 (b) N / AN / A50March 29, 2023 (b) N / AMarch 29, 2025100December 8, 2023 (b) N / AN / A200 (a) Credit facilities that do not contain a maturity date are specific to the agreements set within each contract. In some instances, credit facilities are automatically renewed based on the contingency standards set within the specific agreement. (b) Bilateral credit agreements solely support the issuance of letters of credit and do not back our commercial paper program. Short- Term Loan Agreements On March 31, 2020, we entered into a term loan agreement for $ 300 million. We repaid $ 100 million of the term loan on March 29, 2022. The remaining $ 200 million from the loan agreement was renewed on March 29, 2022 and repaid on March 29, 2023. Pursuant to the loan agreement, loans made thereunder bear interest at a variable rate equal to SOFR plus 0. 80 % and all indebtedness thereunder is unsecured. The loan was reflected in Short- term borrowings in the Consolidated Balance Sheets as of December 31, 2022. On January 26, 2023, we entered into a term loan agreement for $ 100 million. The loan agreement has an expiration of January 25, 2024. Pursuant to the loan agreement, loans made thereunder bear interest at a variable rate equal to SOFR plus 0. 80 % and all indebtedness thereunder is unsecured. The loan was reflected in Short- term borrowings in the Consolidated Balance Sheet as of December 31, 2023. We repaid this loan on January 25, 2024. On February 9, 2023, we entered into a term loan agreement for $ 400 million. The loan agreement has an expiration of February 8, 2024. Pursuant to the loan agreement, loans made thereunder bear interest at a variable rate equal to SOFR plus 1. 05 % and all indebtedness thereunder is unsecured. The loan was reflected in Short- term borrowings in the Consolidated Balance Sheet as of December 31, 2023. We repaid this loan on February 8, 2024. On February 12, 2024, we entered into a term loan agreement for $ 200 million. The loan agreement has an expiration of February 8, 2025. Pursuant to the loan agreement, loans made thereunder bear interest at a variable rate equal to SOFR plus 0. 90 % and all indebtedness thereunder is unsecured. Long- Term Debt The following table presents the outstanding long- term debt as of December 31, 2023 and 2022: MaturityDateDecember 31, Rates20232022Long- term debtSenior unsecured notes3. 25 %- 6. 50 % 2025- 2053 $ 5, 688 $ 2, 938 Tax- exempt notes4. 10 %- 4. 45 % 2025- 2053 (a) 435 — Notes payable and other2. 10 %- 5. 85 % 2024- 202934 68 Nonrecourse debt: Fixed rates2. 29 %- 6. 00 % 2031- 2037780 839 Variable rates7. 24 %- 8. 57 % 2026- 2027740 805 Total long- term debt7, 677 4, 650 Unamortized debt discount and premium, net (4) (5) Unamortized debt issuance costs (56) (36) Long- term debt due within one year (121) (143) Long- term debt $ 7, 496 $ 4, 466 _____ (a) The Tax- exempt notes have a maturity date of March 1, 2025- April 1, 2053, and a mandatory purchase date that ranges from March 1, 2025- June 1, 2029. Long- term debt maturities in the periods 2024 through 2028 and thereafter are as follows: 2024 $ 121 20251, 010 2026121 2027705 20281, 160 Thereafter4, 560 Total $ 7, 677 Debt Covenants As of December 31, 2023, we are in compliance with all debt covenants. We have also issued nonrecourse debt, for which approximately $ 2 billion of generating assets have been pledged as collateral as of both December 31, 2023 and 2022, respectively. Borrowings under these agreements are secured by the assets and equity of each respective project. The lenders do not have recourse against us in the event of a default. If a specific project financing entity does not maintain compliance with its specific nonrecourse debt covenants, there could be a requirement to accelerate repayment of the associated debt or other borrowings earlier than the stated maturity dates. In these instances, if such repayment was not satisfied, the lenders or security holders would generally have rights to foreclose against the project- specific assets and related collateral. The potential requirement to satisfy the associated debt or other borrowings earlier than otherwise anticipated could lead to impairments due to a higher likelihood of disposing of the respective project- specific assets significantly before the end of their useful lives. Antelope Valley Solar Ranch One. In December 2011, the DOE Loan Programs Office issued a guarantee for up to $ 646 million for a nonrecourse loan from the Federal Financing Bank to support the financing of the construction of the Antelope Valley facility. The project became fully operational in 2014. The loan will mature on January 5, 2037. Interest rates on the loan were fixed upon each advance at a spread of 37. 5 basis points above U. S. Treasuries of comparable maturity. The advances were completed as of December 31, 2015 and the outstanding loan balance bears interest at an average blended interest rate of 2. 82 %. As of December 31, 2023 and 2022, approximately $ 390 million

and $ 415 million were outstanding, respectively. In addition, we have issued letters of credit to support the equity investment in the project, with $ 36 million and $ 37 million outstanding as of December 31, 2023 and 2022, respectively. In December 2017, our interests in Antelope Valley were contributed to and are pledged as collateral for the CR financing structures referenced below. Continental Wind, LLC. In September 2013, Continental Wind, our indirect subsidiary, completed the issuance and sale of $ 613 million senior secured notes. Continental Wind owns and operates a portfolio of wind farms in Idaho, Kansas, Michigan, Oregon, New Mexico and Texas with a total net capacity of 667 MWs. The net proceeds were distributed to us for general business purposes. The notes are scheduled to mature on February 28, 2033. The notes bear interest at a fixed rate of 6. 00 % with interest payable semi- annually. As of December 31, 2023 and December 31, 2022, approximately $ 315 million and $ 345 million were outstanding, respectively. In addition, Continental Wind has a $ 128 million letter of credit facility and $ 4 million working capital revolver facility. Continental Wind has issued letters of credit to satisfy certain of its credit support and security obligations. As of December 31, 2023 and 2022, the Continental Wind letter of credit facility had $ 116 million and $ 111 million in letters of credit outstanding related to the project, respectively. In 2017, our interests in Continental Wind were contributed to CRP. See Note 22- Variable Interest Entities for additional information on CRP. Renewable Power Generation. In March 2016, RPG, our indirect subsidiary, issued $ 150 million aggregate principal amount of nonrecourse senior secured notes. The net proceeds were distributed to us for paydown of long term debt obligations at Sacramento PV Energy and Constellation Solar Horizons and for general business purposes. The loan is scheduled to mature on March 31, 2035. The term loan bears interest at a fixed rate of 4. 11 % payable semi- annually. As of December 31, 2023 and December 31, 2022, approximately $ 70 million and $ 80 million were outstanding, respectively. In 2017, our interests in RPG were contributed to CRP. See Note 22- Variable Interest Entities for additional information on CRP. Constellation Renewables. In November 2017, CR, our indirect subsidiary, entered into an $ 850 million nonrecourse senior secured term loan credit facility agreement with a maturity date of November 28, 2024. In addition to the financing, CR entered into interest rate swaps to manage a portion of the interest rate exposure in connection with the financing. The swap had an initial notional amount of $ 636 million and fixed the 3- month LIBOR at 2. 32 %. In December 2020, CR entered into a financing agreement for a $ 750 million nonrecourse senior secured term loan credit facility, scheduled to mature on December 15, 2027. Beginning in June 2023, the term loan bears interest at a variable rate equal to 3- month SOFR plus 2. 76 %, subject to a 1 % SOFR floor with interest payable quarterly. Redemptions prior to June 2023 were based on LIBOR 2. 50 %. In addition to the financing, CR entered into interest rate swaps to manage a portion of the interest rate exposure in connection with the financing. The swap had an initial notional amount of $ 516 million and fixed the 3- month LIBOR at 1. 05 %. Beginning in June 2023, the swap fixed the 3- month SOFR at 0. 8295 %. The proceeds were used to repay the November 2017 nonrecourse senior secured term loan credit facility of $ 850 million, of which $ 709 million was outstanding as of the retirement date in December 2020, and to settle the November 2017 interest rate swap. Our interests in CRP and Antelope Valley remain contributed to and pledged as collateral for this financing. As of December 31, 2023 and 2022, $ 650 million and $ 690 million was outstanding, respectively. See Note 22 — Variable Interest Entities for additional information on CRP and Note 16 — Derivative Financial Instruments for additional information on interest rate swaps. West Medway II, LLC. On May 13, 2021, West Medway II, LLC (West Medway II), our indirect subsidiary, entered into a financing agreement for a $ 150 million nonrecourse senior secured term loan credit facility with a maturity date of March 31, 2026. Beginning in May 2023, the term loan bears interest at a variable rate equal to 1- month SOFR plus the variable interest rate of 2. 975 %- 3. 225 %, paid quarterly. Redemptions prior to May 2023 were based on LIBOR 2. 875 %. In addition to the financing, West Medway II entered into interest rate swaps to manage a portion of the interest rate exposure in connection with the financing. The swaps had an initial notional amount of $ 113 million and fixed the 1- month LIBOR at 0. 61 %. Beginning in May, the swap fixed the 1- month SOFR at 0. 5365 %. We used the net proceeds for general corporate purposes. Our interests in West Medway II, were pledged as collateral for this financing. As of December 31, 2023 and 2022, approximately $ 85 million and $ 115 million was outstanding, respectively. See Note 16 — Derivative Financial Instruments for additional information on interest rate swaps. 18. Fair Value of Financial Assets and Liabilities We measure and classify fair value measurements in accordance with the hierarchy as defined by GAAP. The hierarchy prioritizes the inputs to valuation techniques used to measure fair value into three levels as follows: • Level 1 — quoted prices (unadjusted) in active markets for identical assets or liabilities that we have the ability to liquidate as of the reporting date. • Level 2 — inputs other than quoted prices included within Level 1 that are directly observable for the asset or liability or indirectly observable through corroboration with observable market data. • Level 3 — unobservable inputs, such as internally developed pricing models or third- party valuations for the asset or liability due to little or no market activity for the asset or liability. Fair Value of Financial Liabilities Recorded at Amortized Cost The following tables present the carrying amounts and fair values of our long- term debt and the SNF obligation as of December 31, 2023 and 2022. We have no financial liabilities classified as Level 1. The carrying amounts of the short- term liabilities as presented in the Consolidated Balance Sheets are representative of their fair value (Level 2) because of the short- term nature of these instruments. December 31, 2023December 31, 2022Carrying AmountFair ValueCarrying AmountFair ValueLevel 2Level 3TotalLevel 2Level 3TotalLong- Term Debt, including amounts due within one year $ 7, 617 $ 7, 140 $ 774 $ 7, 914 $ 4, 609 $ 3, 688 $ 859 $ 4, 547 SNF Obligation1, 296 1, 222 — 1, 222 1, 230 1, 021 — 1, 021Combined Notes to Consolidated Financial Statements (Dollars in millions, unless otherwise noted) Note 18 — Fair Value of Financial Assets and Liabilities We use the following methods and assumptions to estimate fair value of our financial liabilities recorded at carrying cost: TypeLevelValuationLong- term Debt, including amounts due within one yearTaxable Debt Securities2The fair value is determined by a valuation model that is based on a conventional discounted cash flow methodology and utilizes assumptions of current market pricing curves. We obtain credit spreads based on trades of our existing debt securities as well as other issuers in the utility sector with similar credit ratings. The yields are then converted into discount rates of various tenors that are used for discounting the respective cash flows of the same tenor for each bond or note. Variable Rate Financing Debt2Debt rates are reset on a regular basis and the carrying value approximates fair value. Government Backed Fixed Rate Project Financing Debt3The fair value is similar to the process for taxable debt securities. Due to the lack of market trading data on similar debt, the discount rates are derived based on the original loan interest rate spread to the applicable U. S. Treasury rate as well as a current market curve derived from government- backed securities. Non- Government Backed Fixed Rate Nonrecourse Debt3Fair value is based on market and quoted prices for its own and other nonrecourse debt with similar risk profiles. Given the low trading volume in the nonrecourse debt market, the price quotes used to determine fair value will reflect certain qualitative factors, such as market conditions, investor demand, new developments that might significantly impact the project cash flows or off- taker credit, and other circumstances related to the project. SNF Obligation SNF Obligation2 The carrying amount is derived from a contract with the DOE to provide for disposal of SNF from certain of our nuclear generating stations. See Note 19 — Commitments and Contingencies for further details. When determining the fair value of the obligation, the future carrying amount of the SNF obligation is calculated by compounding the current book value of the SNF obligation at the 13- week U. S. Treasury rate. The compounded obligation amount is discounted back to present value using our discount rate, which is calculated using the same methodology as described above for the taxable debt securities, and an estimated maturity date of 2035. Recurring Fair Value Measurements The following tables present assets and liabilities measured and recorded at fair value in the Consolidated Balance Sheets on a recurring basis and their level within the fair value hierarchy as of December 31, 2023 and 2022: As of December 31, 2023As of December 31, 2022Level 1Level 2Level 3TotalLevel 1Level 2Level 3TotalAssetsCash equivalents (a) $ 42 $ — $ — $ 42 $ 41 $ — $ — $ 41 NDT fund investmentsCash equivalents (b) 356 87 — 443 181 88 — 269 Equities4, 574 1, 990 1 6, 565 3, 462 1, 498 — 4, 960 Fixed income2, 043 1, 523 277 3, 843 2, 017 1, 044 264 3, 325 Private credit — — 151 151 — — 159 159 Assets measured at NAV — — — 5, 396 — — — 5, 414 NDT fund investments subtotal (c) 6, 973 3, 600 429 16, 398 5, 660 2, 630 423 14, 127 Rabbi trust investments48 33 1 82 40 27 1 68 Investments in equities (d) 372 — — 372 6 — — 6 Commodity derivative assetsEconomic hedges2, 330 5, 821 3, 143 11, 294 3, 505 11, 353 5, 585 20, 443 Proprietary trading — — 2 2 — 4 6 10 Effect of netting and allocation of collateral (e) (f) (1, 996) (5, 195) (1, 931) (9, 122) (2, 951) (10, 348) (3, 525) (16, 824) Commodity derivative assets subtotal334 626 1, 214 2, 174 554 1, 009 2, 066 3, 629 DPP consideration — 1, 216 — 1, 216 — 515 — 515 Total assets measured at fair value7, 769 5, 475 1, 644 20, 284 6, 301 4, 181 2, 490 18, 386 Total assets7, 769 5, 475 1, 644 20, 284 6, 301 4, 181 2, 490 18, 386 LiabilitiesCommodity derivative liabilitiesEconomic hedges (2, 681) (7, 154) (2, 736) (12, 571) (3, 171) (11, 498) (5, 588) (20, 257) Proprietary trading — — (2) (2) — (4) (2) (6) Effect of netting and allocation of collateral (e) (f) 2, 587 6, 542 2, 393 11, 522 3, 279 10, 700 3, 743 17, 722 Commodity derivative liabilities subtotal (94) (612) (345) (1, 051) 108 (802) (1, 847) (2, 541) Deferred compensation obligation — (69) — (69) — (57) — (57) Total liabilities (94) (681) (345) (1, 120) 108 (859) (1, 847) (2, 598) Total net assets $ 7, 675 $ 4, 794 $ 1, 299 $ 19, 164 $ 6, 409 $ 3, 322 $ 643 $ 15, 788 (a) CEG Parent has $ 54 million of Level 1 cash equivalents as of December 31, 2023. We exclude cash of $ 349 million and $ 390 million as of December 31, 2023 and December 31, 2022, respectively, and restricted cash of $ 49 million and $ 70 million as of December 31, 2023 and December 31, 2022, respectively. CEG Parent has excluded an additional $ 2 million and $ 19 million of cash as of December 31, 2023 and 2022, respectively. (b) Includes net liabilities of $ 115 million and $ 168 million as of December 31, 2023 and 2022, respectively, which include certain derivative assets that have notional amounts of $ 64 million and $ 59 million as of December 31, 2023 and 2022, respectively. These items consist of receivables related to pending securities sales, interest and dividend receivables, repurchase agreement obligations, and payables related to pending securities purchases. The repurchase agreements are generally short- term in nature with durations generally of 30 days or less. In the prior year net liabilities were excluded, prior year amounts have been updated for consistency with current year presentation. (c) Includes derivative assets and liabilities that are not material, which have total notional amounts of $ 884 million and $ 494 million as of December 31, 2023 and 2022, respectively. The notional principal amounts provide one measure of the transaction volume outstanding as of the periods ended and do not represent the amount of our exposure to credit or market loss. (d) Includes an equity investment that became publicly traded in the second quarter of 2023 and now has a readily determinable fair value (and no longer is accounted for as an equity method investment due to lack of significant influence). We record the fair value of this investment in Investments on the Consolidated Balance Sheets based on the quoted market price of the stock at June 30, 2023, which resulted in an unrealized gain of $ 313 million within Other, net in the Consolidated Statements of Operations and Comprehensive Income for the year ended December 31, 2023. (e) Net collateral posted to / (received from) counterparties totaled $ 591 million, $ 1, 347 million, and $ 462 million allocated to Level 1, Level 2, and Level 3 mark- to- market derivatives, respectively, as of December 31, 2023. Net collateral posted to / (received from) counterparties totaled $ 328 million, $ 352 million, and $ 218 million allocated to Level 1, Level 2, and Level 3 mark- to- market derivatives, respectively, as of December 31, 2022. (f) Includes $ 1, 712 million of variation margin posted and $ 836 million of variation margin held from the exchanges as of December 31, 2023 and 2022, respectively. As of December 31, 2023, our NDTs have outstanding commitments to invest in private credit, private equity, and real estate investments of $ 344 million, $ 88 million, and $ 373 million, respectively. These commitments will be funded by our existing NDT funds. Equity Security Investments without Readily Determinable Fair Values. We hold investments without readily determinable fair values with carrying amounts of $ 103 million and $ 46 million as of December 31, 2023 and 2022, respectively. Changes in fair value, cumulative adjustments, and impairments were not material for the years ended December 31, 2023 and 2022. Reconciliation of Level 3 Assets and Liabilities The following tables present the fair value reconciliation of Level 3 assets and liabilities measured at fair value on a recurring basis during the years ended December 31, 2023 and 2022: For the Year Ended December 31, 2023NDT Fund InvestmentsMark- to- MarketDerivativesLife Insurance ContractsTotalBalance as of January 1, 2023 $ 423 $ 219 $ 1 $ 643 Total realized / unrealized gains (losses) Included in net income (loss) 2 171 (a) — 173 Included in Payables related to Regulatory Agreement Units10 — — 10 Change in collateral — 243 — 243 Purchases, sales, issuances and settlementsPurchases — 160 — 160 Sales1 (29) — (28) Settlements (7) 32 — 25 Transfers into Level 3 — 46 (b) — 46 Transfers out of Level 3 — 27 (b) — 27 Balance as of December 31, 2023 $ 429 $ 869 $ 1 $ 1, 299 The amount of total gains (losses) included in income attributed to the change in unrealized gains (losses) related to assets and liabilities as of December 31, 2023 $ 2 $ 1, 194 $ — $ 1, 196 For the Year Ended December 31, 2022NDT Fund InvestmentsMark- to- MarketDerivativesLife Insurance ContractsTotalBalance as of January 1, 2022 $ 464 $ (94) $ — $ 370 Total realized / unrealized gains (losses) Included in net income (loss) (2) (753) (a) (2) (757) Included in Payables related to Regulatory Agreement Units (10) — — (10) Change in collateral — 253 — 253 Impacts of separation — — 3 3 Purchases, sales, issuances and settlementsPurchases5 594 — 599 Sales — (50) — (50) Settlements (35) (102) — (137) Transfers into Level 3 2 381 (b) — 383 Transfers out of Level 3 (1) (10) (b) — (11) Balance as of December 31, 2022 $ 423 $ 219 $ 1 $ 643 The amount of total gains (losses) included in income attributed to the change in unrealized gains (losses) related to assets and liabilities as of December 31, 2022 $ (2) $ (1, 265) $ (2) $ (1, 269) (a) Includes a reduction of ($ 991) million for realized gains and an addition of $ 410 million for realized losses due to the settlement of derivative contracts for the years ended December 31, 2023 and 2022, respectively. (b) Transfers into and out of Level 3 generally occur when the contract tenor becomes less and more observable, respectively, primarily due to changes in market liquidity or assumptions for certain commodity contracts. The following table presents the income statement classification of the total realized and unrealized gains (losses) included in income for Level 3 assets and liabilities measured at fair value on a recurring basis during the years ended December 31, 2023, 2022, and 2021: OperatingRevenuesPurchasedPower andFuelOther, net202320222021202320222021202320222021Total gains (losses) included in net income $ 706 $ (860) $ (1, 343) $ (503) $ 5 $ 531 $ 2 $ (4) $ 5 Total unrealized gains (losses) 1, 673 (1, 330) (1, 577) (479) 65 355 2 (2) 5 Cash Equivalents. Investments with original maturities of three months or less when purchased, including mutual and money market funds, are considered cash equivalents. The fair values are based on observable market prices and, therefore, are included in the recurring fair value measurements hierarchy as Level 1. NDT Fund Investments. The trust fund investments have been established to satisfy our nuclear decommissioning obligations as required by the NRC. The NDT funds hold debt and equity securities directly and indirectly through commingled funds and mutual funds, which are included in equities and fixed income. Our NDT fund investments policies outline investment guidelines for the trusts and limit the trust funds' exposures to investments in highly illiquid markets and other alternative investments, including private credit, private equity, and real estate. Investments with maturities of three months or less when purchased, including certain short- term fixed income securities are considered cash equivalents and included in the recurring fair value measurements hierarchy as Level 1 or Level 2. Equities. These investments consist of individually held equity securities, equity mutual funds, and equity commingled funds

in domestic and foreign markets. With respect to individually held equity securities, the trustees obtain prices from pricing services, whose prices are generally obtained from direct feeds from market exchanges, which we are able to independently corroborate. Equity securities held individually, including real estate investment trusts, rights, and warrants, are primarily traded on exchanges that contain only actively traded securities due to the volume trading requirements imposed by these exchanges. The equity securities that are held directly by the trust funds are valued based on quoted prices in active markets and categorized as Level 1. Certain equity securities have been categorized as Level 2 because they are based on evaluated prices that reflect observable market information, such as actual trade information or similar securities. Certain private placement equity securities are categorized as Level 3 because they are not publicly traded and are priced using significant unobservable inputs. Equity commingled funds and mutual funds are maintained by investment companies, and fund investments are held in accordance with a stated set of fund objectives. The values of some of these funds are publicly quoted. For mutual funds which are publicly quoted, the funds are valued based on quoted prices in active markets and have been categorized as Level 1. For equity commingled funds and mutual funds which are not publicly quoted, the fund administrators value the funds using the NAV per fund share, derived from the quoted prices in active markets on the underlying securities and are not classified within the fair value hierarchy. These investments can typically be redeemed monthly or more frequently, with 30 or less days of notice and without further restrictions. Fixed income. For fixed income securities, which consist primarily of corporate debt securities, U. S. government securities, foreign government securities, municipal bonds, asset and mortgage- backed securities, commingled funds, mutual funds, and derivative instruments, the trustees obtain multiple prices from pricing vendors whenever possible, which enables cross-provider validations in addition to checks for unusual daily movements. A primary price source is identified based on asset type, class, or issue for each security. With respect to individually held fixed income securities, the trustees monitor prices supplied by pricing services and may use a supplemental price source or change the primary price source of a given security if the portfolio managers challenge an assigned price and the trustees determine that another price source is preferable. We have obtained an understanding of how these prices are derived, including the nature and observability of the inputs used in deriving such prices. Additionally, we selectively corroborate the fair values of securities by comparison to other market- based price sources. Investments in U. S. Treasury securities have been categorized as Level 1 because they trade in highly- liquid and transparent markets. Certain private placement fixed income securities have been categorized as Level 3 because they are priced using certain significant unobservable inputs and are typically illiquid. The remaining fixed income securities, including certain other fixed income investments, are based on evaluated prices that reflect observable market information, such as actual trade information of similar securities, adjusted for observable differences and are categorized as Level 2. This includes equity investments sold short during the period, which represent liabilities. Other fixed income investments primarily consist of fixed income commingled funds and mutual funds, which are maintained by investment companies and hold fund investments in accordance with a stated set of fund objectives. The values of some of these funds are publicly quoted. For mutual funds which are publicly quoted, the funds are valued based on quoted prices in active markets and have been categorized as Level 1. For fixed income commingled funds and mutual funds which are not publicly quoted, the fund administrators value the funds using the NAV per fund share, derived from the quoted prices in active markets of the underlying securities and are not classified within the fair value hierarchy. These investments typically can be redeemed monthly or more frequently, with 30 or less days of notice and without further restrictions. Derivative instruments. These instruments, consisting primarily of futures and swaps to manage risk, are recorded at fair value. Over- the- counter derivatives are valued daily, based on quoted prices in active markets and trade in open markets, and have been categorized as Level 1. Derivative instruments other than over- the- counter derivatives are valued based on external price data of comparable securities and have been categorized as Level 2. Private credit. Private credit investments primarily consist of investments in private debt strategies. These investments are generally less liquid assets with an underlying term of 3 to 5 years and are intended to be held to maturity. The fair value of these investments is determined by the fund manager or administrator using a combination of valuation models including cost models, market models, and income models and typically cannot be redeemed until maturity of the term loan. Private credit investments held directly by us are categorized as Level 3 because they are based largely on inputs that are unobservable and utilize complex valuation models. For certain private credit funds, the fair value is determined using a combination of valuation models including cost models, market models, and income models and typically cannot be redeemed until maturity of the term loan. These investments are not classified within the fair value hierarchy because their fair value is determined using NAV or its equivalent as a practical expedient. Private equity. These investments include those in limited partnerships that invest in operating companies that are not publicly traded on a stock exchange such as leveraged buyouts, growth capital, venture capital, distressed investments, and investments in natural resources. These investments typically cannot be redeemed and are generally liquidated over a period of 8 to 10 years from the initial investment date, which is based on our understanding of the investment funds. Private equity valuations are reported by the fund manager and are based on the valuation of the underlying investments, which include unobservable inputs such as cost, operating results, discounted future cash flows, and market- based comparable data. These valuation inputs are unobservable. The fair value of private equity investments is determined using NAV or its equivalent as a practical expedient, and therefore, these investments are not classified within the fair value hierarchy. Real estate. These investments are funds with a direct investment in pools of real estate properties. These funds are reported by the fund manager and are generally based on independent appraisals of the underlying investments from sources with professional qualifications, typically using a combination of market- based comparable data and discounted cash flows. These valuation inputs are unobservable. Certain real estate investments cannot be redeemed and are generally liquidated over a period of 8 to 10 years from the initial investment date, which is based on our understanding of the investments funds. The remaining liquid real estate investments are generally redeemable from the investment vehicle quarterly, with 30 to 90 days of notice. The fair value of real estate investments is determined using NAV or its equivalent as a practical expedient, and therefore, these investments are not classified within the fair value hierarchy. We evaluated our NDT portfolios for the existence of significant concentrations of credit risk as of December 31, 2023. Types of concentrations that were evaluated include, but are not limited to, investment concentrations in a single entity, type of industry, foreign country, and individual fund. As of December 31, 2023, there were no significant concentrations (generally defined as greater than 10 percent) of risk in the NDT assets. See Note 10 — Asset Retirement Obligations for additional information on the NDT fund investments. Rabbi Trust Investments. The Rabbi trusts were established to hold assets related to deferred compensation plans existing for certain active and retired members of executive management and directors. The Rabbi trusts' assets are included in investments in the Consolidated Balance Sheets and consist primarily of money market funds, mutual funds, and life insurance policies. Money market funds and mutual funds are publicly quoted and have been categorized as Level 1 given the clear observability of the prices. The life insurance policies are valued using the cash surrender value of the policies, net of loans against those policies, which is provided by a third- party. Certain life insurance policies, which consist primarily of mutual funds that are priced based on observable market data, have been categorized as Level 2 because the life insurance policies can be liquidated at the reporting date for the value of the underlying assets. Deferred Compensation Obligations. Our deferred compensation plans allow participants to defer certain cash compensation into a notional investment account. We include such plans in other current and noncurrent liabilities in the Consolidated Balance Sheets. The value of our deferred compensation obligations is based on the market value of the participants' notional investment accounts. The underlying notional investments are comprised primarily of equities, mutual funds, commingled funds, and fixed income securities which are based on directly and indirectly observable market prices. Since the deferred compensation obligations themselves are not exchanged in an active market, they are categorized as Level 2 in the fair value hierarchy. The value of certain employment agreement obligations (which are included with the Deferred compensation obligation in the table above) are based on a known and certain stream of payments to be made over time and are categorized as Level 2 within the fair value hierarchy. Investments in Equities. We hold certain investments in equity securities with readily determinable fair values in addition to those held within the NDT funds. These equity securities are valued based on quoted prices in active markets and are categorized as Level 1. Deferred Purchase Price Consideration. We have DPP consideration for the sale of certain receivables of retail electricity. This amount is valued based on the sales price of the receivables net of allowance for credit losses based on accounts receivable aging historical experience coupled with specific identification through a credit monitoring process, which considers current conditions and forward- looking information such as industry trends, macroeconomic factors, changes in the regulatory environment, external credit ratings, publicly available news, payment status, payment history, and the exercise of collateral calls. Since the DPP consideration is based on the sales price of the receivables, it is categorized as Level 2 in the fair value hierarchy. See Note 6 — Accounts Receivable for additional information on the sale of certain receivables. Mark- to- Market Derivatives. Derivative contracts are traded in both exchange- based and non- exchange- based markets. Exchange- based derivatives that are valued using unadjusted quoted prices in active markets are categorized in Level 1 in the fair value hierarchy. Certain derivatives' pricing is verified using indicative price quotations available through brokers or over- the- counter, on- line exchanges and are categorized in Level 2. These price quotations reflect the average of the bid- ask, mid-point prices and are obtained from sources that we believe provide the most liquid market for the commodity. The price quotations are reviewed and corroborated to ensure the prices are observable and representative of an orderly transaction between market participants. This includes consideration of actual transaction volumes, market delivery points, bid- ask spreads, and contract duration. The remainder of derivative contracts are valued using the Black model, an industry standard option valuation model. The Black model considers inputs such as contract terms, including maturity, and market parameters, including assumptions of the future prices of energy, interest rates, volatility, credit worthiness, and credit spread. For derivatives that trade in liquid markets, such as generic forwards, swaps, and options, model inputs are generally observable. Such instruments are categorized in Level 2. Our derivatives are predominantly at liquid trading points. For derivatives that trade in less liquid markets with limited pricing information, model inputs generally would include both observable and unobservable inputs. These valuations may include an estimated basis adjustment from an illiquid trading point to a liquid trading point for which active price quotations are available. Such instruments are categorized in Level 3. For valuations that include both observable and unobservable inputs, if the unobservable input is determined to be significant to the overall inputs, the entire valuation is categorized in Level 3. This includes derivatives valued using indicative price quotations whose contract tenure extends into unobservable periods. In instances where observable data is unavailable, consideration is given to the assumptions that market participants would use in valuing the asset or liability. This includes assumptions about market risks such as liquidity, volatility, and contract duration. Such instruments are categorized in Level 3 as the model inputs generally are not observable. Forward price curves for the power market utilized by the front office to manage the portfolio, are reviewed and verified by the middle office, and used for financial reporting by the back office. We consider credit and non- performance risk in the valuation of derivative contracts categorized in Level 2 and 3, including both historical and current market data, in our assessment of credit and non- performance risk by counterparty. Due to master netting agreements and collateral posting requirements, the impacts of credit and non- performance risk were not material to the consolidated financial statements. Disclosed below is detail surrounding our significant Level 3 valuations. The calculated fair value includes marketability discounts for margining provisions and other attributes. The Level 3 balance generally consists of forward sales and purchases of power and natural gas and certain transmission congestion contracts. We utilize various inputs and factors including market data and assumptions that market participants would use in pricing assets or liabilities as well as assumptions about the risks inherent in the inputs to the valuation technique. The inputs and factors include forward commodity prices, commodity price volatility, contractual volumes, delivery location, interest rates, credit quality of counterparties, and credit enhancements. For commodity derivatives, the primary input to the valuation models is the forward commodity price curve for each instrument. Forward commodity price curves are derived by risk management for liquid locations and by the traders and portfolio managers for illiquid locations. All locations are reviewed and verified by risk management considering published exchange transaction prices, executed bilateral transactions, broker quotes, and other observable or public data sources. The relevant forward commodity curve used to value each of the derivatives depends on a number of factors, including commodity type, delivery location, and delivery period. Price volatility varies by commodity and location. When appropriate, we discount future cash flows using risk- free interest rates with adjustments to reflect the credit quality of each counterparty for assets and our own credit quality for liabilities. The level of observability of a forward commodity price varies generally due to the delivery location and delivery period. Certain delivery locations including PJM West Hub (for power) and Henry Hub (for natural gas) are more liquid and prices are observable for up to three years in the future. The observability period of volatility is generally shorter than the underlying power curve used in option valuations. The forward curve for a less liquid location is estimated by using the forward curve from the liquid location and applying a spread to represent the cost to transport the commodity to the delivery location. This spread does not typically represent a majority of the instrument' s market price. As a result, the change in fair value is closely tied to liquid market movements and not a change in the applied spread. The change in fair value associated with a change in the spread is generally immaterial. An average spread calculated across all Level 3 power and gas delivery locations is approximately $ 47. 76 and $ 3. 09 for power and natural gas, respectively as of December 31, 2023. Many of the commodity derivatives are short term in nature and thus a majority of the fair value may be based on observable inputs even though the contract as a whole must be classified as Level 3. See Note 16 — Derivative Financial Instruments for additional information on mark- to- market derivatives. The following table presents the significant inputs to the forward curve used to value these positions: Type of tradeFair Value as of December 31, 2023Fair Value as of December 31, 2022ValuationTechniqueUnobservableInput2023 Range & Arithmetic Average2022 Range & Arithmetic AverageMark- to- market derivatives — Economic hedges (a) (b) $ 407 $ (3) Discounted Cash FlowForward powerprice $ 9. 64- $ 216 $ 48 $ 0. 63- $ 283 $ 72Forward gasprice $ 1. 20- $ 14 $ 3. 09 $ 1. 67- $ 26 $ 4. 57Option ModelVolatilitypercentage23 %- 200 % 87 % 97 %- 119 % 111 % (a) The valuation techniques, unobservable inputs, ranges, and arithmetic averages are the same for the asset and liability positions. (b) The fair values do not include cash collateral posted (received) on Level 3 positions of $ 462 million and $ 218 million as of December 31, 2023 and December 31, 2022, respectively. The inputs listed above, which are as of the balance sheet date, would have a direct impact on the fair values of the above instruments if they were adjusted. The significant unobservable inputs used in the fair value measurement of our commodity derivatives are forward commodity prices and for options is price volatility. Increases (decreases) in the forward commodity price in isolation would result in significantly higher (lower) fair values for long positions (contracts that give us the obligation or option to purchase a

commodity), with offsetting impacts to short positions (contracts that give us the obligation or right to sell a commodity). Increases (decreases) in volatility would increase (decrease) the value for the holder of the option (writer of the option). Generally, a change in the estimate of forward commodity prices is unrelated to a change in the estimate of volatility of prices. An increase to the heat rate or renewable factors would increase the fair value accordingly. Generally, interrelationships exist between market prices of natural gas and power. As such, an increase in natural gas pricing would potentially have a similar impact on forward power markets. 19. Commitments and Contingencies Commercial Commitments. Commercial commitments as of December 31, 2023, representing commitments potentially triggered by future events, were as follows: Expiration withinTotal20242025202620272028202920 and beyondLetters of credit $ 1, 775 $ 1, 631 $ 27 $ 1 $ — $ 116 $ — Surety bonds (a) 824 824 — — — — — — Total commercial commitments $ 2, 599 $ 2, 455 $ 27 $ 1 $ — $ 116 $ — (a) Surety bonds — Guarantees issued related to contract and commercial agreements, excluding bid bonds. Combined Notes to Consolidated Financial Statements (Dollars in millions, unless otherwise noted) Note 19 — Commitments and Contingencies Nuclear Insurance We are subject to liability, property damage and other risks associated with major incidents at any of our nuclear stations. Our financial exposure to these risks is mitigated through insurance and other industry risk- sharing provisions. The Price- Anderson Act was enacted to ensure the availability of funds for public liability claims arising from an incident at any of the U. S. licensed nuclear facilities and to limit the liability of nuclear reactor owners for such claims from any single incident. As of December 31, 2023, the current liability limit per incident is $ 16. 2 billion and is subject to change to account for the effects of inflation and changes in the number of licensed reactors at least once every five years with the last adjustment effective November 1, 2018. In accordance with the Price- Anderson Act, we maintain financial protection at levels equal to the amount of liability insurance available from private sources through the purchase of private nuclear energy liability insurance for public liability claims that could arise in the event of an incident. Effective January 1, 2024, the required amount of nuclear energy liability insurance purchased is $ 500 million for each operating site. Claims exceeding that amount are covered through mandatory participation in a financial protection pool, as required by the Price Anderson- Act, which could provide up to approximately an additional $ 15. 8 billion per incident at any U. S. nuclear power reactor in funds available for public liability claims. Participation in this secondary financial protection pool requires the operator of each reactor to fund its proportionate share of costs for any single incident at any U. S. nuclear power reactor that exceeds the primary layer of financial protection. Our share of this secondary layer would be approximately $ 3. 5 billion, based on our ownership interest in the insured nuclear reactors, however, any amounts payable under this secondary layer would be capped at $ 520 million per incident within one calendar year. In addition, the U. S. Congress could impose revenue- raising measures on the nuclear industry to pay public liability claims exceeding the $ 16. 2 billion limit for a single incident. We are required by the NRC to maintain minimal levels of property insurance that demonstrates to the satisfaction of the NRC that we possess an equivalent amount of protection covering the licensee' s obligation, in the event of an accident at the licensee' s reactor, to stabilize and decontaminate the reactor and the reactor station site at which the reactor experiencing the accident is located. The insurance maintained for each facility is currently provided through insurance policies purchased from NEIL, an industry mutual insurance company of which we are a member. Currently, NRC requires that we maintain a minimum coverage limit for each reactor site of $ 1. 06 billion, which is what our NEIL policies provide. NEIL may declare distributions to its members as a result of favorable operating experience. In recent years, NEIL has made distributions to its members. Our portion of the annual distribution declared by NEIL is estimated to be $ 59 million for 2023, and was $ 30 million and $ 114 million for 2022 and 2021, respectively. The distributions were recorded as a reduction to Operating and maintenance expense in the Consolidated Statements of Operations and Comprehensive Income. Premiums paid to NEIL by its members are also subject to a potential assessment for adverse loss experience in the form of a retrospective premium obligation. NEIL has never assessed this retrospective premium since its formation in 1973, and we cannot predict the level of future assessments, if any. The current maximum aggregate annual retrospective premium obligation for us is approximately $ 254 million. NEIL requires its members to maintain an investment grade credit rating or to ensure collectability of their annual retrospective premium obligation by providing a financial guarantee, letter of credit, deposit premium, or some other means of assurance. NEIL provides " all risk " property damage, decontamination and premature decommissioning insurance for each station for losses resulting from damage to its nuclear plants, either due to accidents or acts of terrorism. If the decision is made to decommission the facility, a portion of the insurance proceeds will be allocated to a fund, which we are required by the NRC to maintain, to provide for decommissioning the facility. In the event of an insured loss, we are unable to predict the timing of the availability of insurance proceeds to us and the amount of such proceeds that would be available. In the event that one or more acts of terrorism cause accidental property damage within a twelve- month period from the first accidental property damage under one or more policies for all insured plants, the maximum recovery by us will be an aggregate of $ 3. 2 billion plus such additional amounts as the insurer may recover for all such losses from reinsurance, indemnity and any other source, applicable to such losses. For our insured losses, we are self- insured to the extent that losses are within the policy deductible or exceed the amount of insurance maintained. Uninsured losses and other expenses, to the extent not recoverable from insurers or the nuclear industry, could also be borne by us. Any such losses could have a material adverse effect on our consolidated financial statements. Spent Nuclear Fuel Obligation Under the NWPA, the DOE is responsible for the development of a geologic repository for and the disposal of SNF and high- level radioactive waste. As required by the NWPA, we are a party to contracts with the DOE (Standard Contracts) to provide for disposal of SNF from our nuclear generating stations. In accordance with the NWPA and the Standard Contracts, we had previously paid the DOE one mill ($ 0. 001) per kWh of net nuclear generation for the cost of SNF disposal. The DOE reduced the SNF disposal fee to zero in May 2014. Until a new fee structure is in effect, we will not accrue any further costs related to SNF disposal fees. This fee may be adjusted prospectively to ensure full cost recovery. We currently assume the DOE will begin accepting SNF in 2035 and use that date for purposes of estimating the nuclear decommissioning AROs. The SNF acceptance date assumption is based on management' s estimate of the amount of time required for DOE to select a site location and develop the necessary infrastructure for long- term SNF storage. The NWPA and the Standard Contracts required the DOE to begin taking possession of SNF generated by nuclear generating units no later than January 31, 1998. The DOE, however, failed to meet that deadline and its performance has been, and is expected to remain, delayed. In August 2004, we and the DOJ, in close consultation with the DOE, reached a settlement under which the government agreed to reimburse us, subject to certain damage limitations based on the extent of the government' s breach, for costs associated with storage of SNF at our nuclear stations pending the DOE' s fulfillment of its obligations. That settlement agreement does not expire until all SNF has been collected from the sites that it covers. Calvert Cliffs, Ginna, Nine Mile Point, Fitzpatrick, and STP each have separate settlement agreements in place with the DOE which were extended during 2023 to provide for the reimbursement of SNF storage costs through December 31, 2025. We and the DOE have the option to extend those settlements every three years upon mutual consent. Under the settlement agreements, we received total cumulative cash reimbursements of $ 1, 855 million through December 31, 2023 for costs incurred. After considering the amounts due to co- owners of certain nuclear stations, we received net cumulative cash reimbursements of $ 1, 615 million. As of December 31, 2023 and 2022, the amount of SNF storage costs for which reimbursement has been or will be requested from the DOE under the DOE settlement agreements is as follows: December 31, 2023December 31, 2022DOE receivable- current (a) $ 229 $ 125 DOE receivable- noncurrent (b) 40 130 Amounts owed to co- owners (c) (23) (12) (a) Recorded in Other accounts receivable. (b) Recorded in Deferred debits and other assets, other. (c) Recorded primarily in Accounts payable and accrued expenses and Other accounts receivable. Represents amounts owed to the co- owners of Peach Bottom, Quad Cities, and Nine Mile Point Unit 2 generating facilities. The Standard Contracts with the DOE also required the payment to the DOE of a one- time fee applicable to nuclear plants that generated SNF prior to April 7, 1983. The below table outlines the SNF liability recorded as of December 31, 2023 and 2022: December 31, 2023December 31, 2022Former ComEd units (a) $ 1, 158 $ 1, 100 Fitzpatrick (b) 138 130 Total SNF Obligation $ 1, 296 $ 1, 230 (a) ComEd previously elected to defer payment of the one- time fee of $ 277 million for its units that began operations before April 7, 1983, with interest to the date of payment, until just prior to the first delivery of SNF to the DOE. The unfunded liabilities for SNF disposal costs, including the one- time fee, were transferred to us as part of Exelon' s 2001 corporate restructuring. See Note 10 — Asset Retirement Obligations for additional detail on Zion Station' s SNF obligation which is included in the table above. (b) A prior owner of FitzPatrick elected to defer payment of the one- time fee of $ 34 million, with interest to the date of payment, for the FitzPatrick unit. As part of the FitzPatrick acquisition on March 31, 2017, we assumed a SNF liability for the DOE one- time fee obligation with interest related to FitzPatrick along with an offsetting asset, included in Other deferred debits and other assets, for the contractual right to reimbursement from NYPA, a prior owner of FitzPatrick, for amounts paid for the FitzPatrick DOE one- time fee obligation. Interest for our SNF liabilities accrues at the 13- week Treasury Rate. The 13- week Treasury Rate in effect for calculation of the interest accrual at December 31, 2023 was 5. 488 % for the deferred amount transferred from ComEd and 5. 509 % for the deferred FitzPatrick amount. The following table summarizes sites for which we do not have an outstanding SNF Obligation: DescriptionSitesFees have been paid or began operations after April 7, 1983Former PECO units, Braidwood, Byron, Calvert Cliffs, Clinton, LaSalle Unit 2, Nine Mile Point Unit 2, and STPOutstanding SNF Obligation remains with former ownersNine Mile Point Unit 1, Ginna and TMI Environmental Remediation Matters General. Our operations have in the past, and may in the future, require substantial expenditures to comply with environmental laws. Additionally, under Federal and state environmental laws, we are generally liable for the costs of remediating environmental contamination of property now or formerly owned by us and of property contaminated by hazardous substances generated by us. We own or lease several real estate parcels, including parcels on which our operations or the operations of others may have resulted in contamination by substances that are considered hazardous under environmental laws. In addition, we are currently involved in proceedings relating to sites where hazardous substances have been deposited and may be subject to additional proceedings in the future. Unless otherwise disclosed, we cannot reasonably estimate whether we will incur significant liabilities for additional investigation and remediation costs at these or additional sites identified by us, environmental agencies or others. Additional costs could have a material, unfavorable impact on our consolidated financial statements. As of December 31, 2023 and 2022, we had accrued undiscounted amounts for environmental liabilities of $ 149 million and $ 119 million, respectively, in Accounts payable and accrued expenses and Other deferred credits and other liabilities in the Consolidated Balance Sheets. Cotter Corporation. The EPA has advised Cotter Corporation (N. S. L.) (Cotter), a former ComEd subsidiary, that it is potentially liable in connection with radiological contamination at two sites in Missouri. In 2000, ComEd sold Cotter to an unaffiliated third- party. As part of the sale, ComEd agreed to indemnify Cotter for any liability arising from these two Missouri superfund sites, West Lake Landfill and Latty Avenue. In connection with Exelon' s 2001 corporate restructuring, this responsibility to indemnify Cotter was transferred to us, and ultimately retained by us per the terms of our separation from Exelon. Refer to Note 1 — Basis of Presentation for additional information on the separation. West Lake Landfill. Including Cotter, there are three PRPs currently participating in the West Lake Landfill remediation proceeding. In September 2018, the EPA issued its Record of Decision Amendment (RODA) for the selection of a final remedy that requires partial excavation of the radiological materials and capping the landfill. The EPA and the PRPs have entered into a Consent Agreement to perform the Remedial Design, which is expected to be completed in 2024. In March 2019, the PRPs received Special Notice Letters from the EPA to perform the Remedial Action work. The total estimated cost of the remedy, considering the current EPA technical requirements, is approximately $ 305 million, including cost escalation on an undiscounted basis. Our investigation has identified several other parties who also may be PRPs and could be liable to contribute to the final remedy. In September 2018, the three identified PRPs, including Cotter, signed an Administrative Settlement Agreement and Order on Consent for the performance by the PRPs of the groundwater Remedial Investigation Feasibility Study (RI / FS). The purpose of this RI / FS is to define the nature and extent of any groundwater contamination from the West Lake Landfill site and evaluate remedial alternatives. We estimate the undiscounted cost for the groundwater RI / FS to be approximately $ 50 million. At this time we cannot predict the likelihood, or the extent to which remediation activities, if any, may be required and therefore cannot estimate a reasonably possible range of loss for response costs beyond those associated with the RI / FS component. We determined a loss associated with the EPA' s partial excavation and landfill cover remedy and the groundwater RI / FS is probable and have recorded a liability for each, both of which are included in the total amount as discussed above, that reflects management' s best estimate of Cotter' s allocable share of the cost among the PRPs. Given the joint and several nature of these two liabilities, the amount of our ultimate liability will depend on the actual costs incurred to implement each required remedy as well as on the nature and terms of any cost- sharing arrangements with the final group of PRPs. It is reasonably possible that the ultimate cost and Cotter' s associated allocable share could differ significantly once these uncertainties are resolved, which could have a material impact on our consolidated financial statements. Latty Avenue and Vicinity Properties. In August 2011, Cotter was notified by the DOJ that Cotter is considered a PRP with respect to the government' s clean- up costs for contamination attributable to low level radioactive residues at a former storage and reprocessing facility named Latty Avenue near St. Louis, Missouri. Latty Avenue was investigated and remediated by the United States Army Corps of Engineers pursuant to funding under the Formerly Utilized Sites Remedial Action Program. On August 3, 2020, the DOJ advised Cotter that it is seeking approximately $ 90 million from all the PRPs. In April 2023, Cotter was informed by the DOJ about potential additional liability for all PRPs of approximately $ 90 million associated with the Latty Avenue site as well as certain allegedly contaminated properties in the vicinity of Latty Avenue, for which the government alleges that Cotter is a PRP. Pursuant to a series of agreements since 2011, the DOJ and Cotter have extended the Statute of Limitations through August 31, 2024. We have determined that a loss associated with these claims is probable and have recorded an estimated liability, included in the total amount as discussed above, that reflects management' s best estimate of Cotter' s allocable share of the cost. It is reasonably possible that Cotter' s allocable share could differ significantly, which could have a material impact on our consolidated financial statements. Litigation General. We are involved in various other litigation matters that are being defended and handled in the ordinary course of business. The assessment of whether a loss is probable or reasonably possible, and whether the loss or a range of loss is estimable, often involves a series of complex judgments about future events. We maintain accruals for such losses that are probable of being incurred and subject to reasonable estimation. Management is sometimes unable to estimate an amount or range of reasonably possible loss, particularly where (1) the damages sought are indeterminate, (2) the proceedings are in the early stages, or (3) the matters involve novel or unsettled legal theories. In such cases, there is considerable uncertainty regarding the timing or ultimate resolution of such matters, including a possible

eventual loss. Impacts of the February 2021 Extreme Cold Weather Event and Texas- based Generating Assets Outages. Beginning on February 15, 2021, our Texas- based generating assets within the ERCOT market, specifically Colorado Bend II, Wolf Hollow II, and Handley, experienced outages as a result of extreme cold weather conditions. In addition, those weather conditions drove increased demand for service, dramatically increased wholesale power prices, and also increased gas prices in certain regions. As a result of the event and outages, we incurred a loss of approximately $ 800 million for the year ended December 31, 2021. The estimated impact reduced our overall Net loss by approximately $ 50 million for the year ended December 31, 2022, attributable to a payment to ERCOT from a defaulting market participant, the bankruptcy settlement of a defaulting ERCOT market participant, and the settlement of a dispute related to gas penalties. There was no change to the financial impact in 2023. Various lawsuits have been filed against us since the February 2021 event and outages. On March 5, 2021, we, along with more than 150 power generators and transmission and distribution companies, were sued by approximately 160 individually named plaintiffs, purportedly on behalf of all Texans who allegedly suffered loss of life or sustained personal injury, property damage or other losses as a result of the weather events. The plaintiffs alleged that the defendants failed to properly prepare for the cold weather and failed to properly conduct their operations, seeking compensatory as well as punitive damages. Thereafter, numerous other plaintiffs filed multiple lawsuits against more than 300 defendants, including us, involving similar allegations of liability and claims of personal injury and property damage all arising out of the February weather events. These additional lawsuits allege wrongful death, property damage, or other losses. Co- defendants in these lawsuits include ERCOT, transmission and distribution utilities and other generators. On December 28, 2021, approximately 130 insurance companies which insured Texas homeowners and businesses filed a subrogation lawsuit against multiple defendants alleging that defendants were at fault for the energy failure that resulted from the winter storm, causing significant property damage to the insureds. Subsequently, several hundred other insurance companies filed similar claims. All of these cases were combined in a Multi- District- Litigation (MDL) pending in Texas state court, which established a bellwether process to consider initial motions to dismiss by the different industry groups of defendants. Defendants filed motions to dismiss the amended complaints in five bellwether cases in July 2022. On February 3, 2023, the court granted the motions to dismiss pertaining to us in part and denied them in part, leaving the plaintiffs' negligence and nuisance claims to proceed. Since the motions to dismiss were partially denied, thousands of new claimants, many in multiple mass tort actions, filed lawsuits in various Texas state courts naming us, among hundreds of other defendants. The majority of these cases were transferred to the MDL. The MDL involves over 200 cases brought by approximately 30, 000 plaintiffs, including more than 1, 300 insurance companies, and we are defendants in the majority of them. We are also named in an alleged class action that seeks to assert claims on behalf of over 4. 1 million Texans within ERCOT who lost power during Winter Storm Uri. On December 14, 2023, the Court of Appeals for the First District of Texas granted the power generator defendants' Petition for a Writ of Mandamus in the five bellwether cases and ordered the MDL court to dismiss the remaining claims against the power generator defendants, including our entities. The motions to dismiss in the five bellwether cases are expected to be applied to all of the claims against the power generator defendants in the MDL. Plaintiffs have sought rehearing of the decision with all judges of the court. We dispute liability and deny that we are responsible for any of plaintiffs' alleged claims and are vigorously contesting them. No loss contingencies have been reflected in the consolidated financial statements with respect to these matters, nor can we currently estimate a range of loss. It is reasonably possible, however, that resolution of these matters could have a material, unfavorable impact on our consolidated financial statements. Asbestos Personal Injury Claims. We maintain a reserve for claims associated with asbestos- related personal injury actions at certain facilities that are currently owned by us or were previously owned by ComEd, PECO, or BGE. The estimated liabilities are recorded on an undiscounted basis and exclude the estimated legal costs associated with handling these matters, which could be material. At December 31, 2023 and 2022, we recorded estimated liabilities of approximately $ 131 million and $ 95 million, respectively, in total for asbestos- related bodily injury claims. As of December 31, 2023, approximately $ 20 million of this amount related to 235 open claims presented to us, while the remaining $ 111 million is for estimated future asbestos- related bodily injury claims anticipated to arise through 2055, based on actuarial assumptions and analyses, which are updated on an annual basis. On a quarterly basis, we monitor actual experience against the number of forecasted claims to be received and expected claim payments and evaluate whether adjustments to the estimated liabilities are necessary. 20. Shareholders' Equity Share Repurchase Program (CEG Parent) On February 16, 2023, as part of our capital allocation plan, our Board of Directors announced a share repurchase program with a $ 1 billion authority without expiration. Share repurchases may be made through a variety of methods, which may include open market transactions, privately negotiated transactions, or purchases pursuant to a Rule 10b5- 1 trading plan, provided that the amounts spent do not exceed what is authorized. Any repurchased shares are constructively retired and cancelled. The program does not obligate us to acquire a minimum number of shares during any period and our repurchase of CEG' s common stock may be limited, suspended, or discontinued at any time at our discretion and without prior notice. Repurchases under this program commenced in March 2023. Combined Notes to Consolidated Financial Statements (Dollars in millions, unless otherwise noted) Note 20 — Shareholders' Equity During 2023, we repurchased from the open market approximately 10. 6 million shares of our common stock for a total cost, inclusive of taxes and transaction costs, of $ 1 billion. On December 12, 2023, our Board of Directors approved an increase to our previously announced $ 1 billion share repurchase program, authorizing the repurchase of up to an additional $ 1 billion of the Company' s outstanding common stock. As of December 31, 2023, there was $ 1 billion of remaining authority to repurchase shares. No other repurchase plans or programs have been authorized by our Board of Directors. Beginning in January 2024 through the date of this filing, we repurchased from the open market approximately 1. 2 million shares of our common stock for a total cost, inclusive of taxes and transaction costs, of $ 150 million. Changes in Accumulated Other Comprehensive Loss (All Registrants) The following tables present changes in AOCI, net of tax, by component: Gains (losses) on Cash Flow HedgesPension and Non- Pension Postretirement Benefit Plan Items (a) Foreign Currency ItemsTotalBalance at December 31, 2020 $ (7) $ — $ (23) $ (30) OCI before reclassifications (1) — — (1) Net current- period OCI (1) — — (1) Balance at December 31, 2021 $ (8) $ — $ (23) $ (31) Separation- related adjustments — (2006) — (2, 006) OCI before reclassifications (1) 186 (3) 182 Amounts reclassified from AOCI — 95 — 95 Net current- period OCI (1) (1, 725) (3) (1, 729) Balance at December 31, 2022 $ (9) $ (1, 725) $ (26) $ (1, 760) OCI before reclassifications (2) (453) 2 (453) Amounts reclassified from AOCI1 21 — 22 Net current- period OCI (1) (432) 2 (431) Balance at December 31, 2023 $ (10) $ (2, 157) $ (24) $ (2, 191) _____ (a) AOCI amounts are included in the computation of net periodic pension and OPEB cost. See Note 15 — Retirement Benefits for additional information. See our Consolidated Statements of Operations and Comprehensive Income for individual components of AOCI. The following table presents income tax (expense) benefit allocated to each component of our other comprehensive income (loss): Year Ended December 31, 202320222021Pension and non- pension postretirement benefit plans: Actuarial loss reclassified to periodic benefit cost $ (10) $ (33) $ — Pension and non- pension postretirement benefit plans valuation adjustment (a) 151 619 — _____ (a) Includes $ 680 million of income tax benefit related to the separation adjustment for the year ended December 31, 2022. 21. Stock- Based Compensation Plans Effective February 1, 2022, we established our own LTIP and began granting cash and stock- based awards that primarily include performance share awards and restricted stock units. Our LTIP authorized 20, 000, 000 shares of common stock for these awards. The existing, unvested cash and stock- based awards issued through the Exelon LTIP were modified in connection with the separation to align with our performance metrics and maintain an Combined Notes to Consolidated Financial Statements (Dollars in millions, unless otherwise noted) Note 21 — Stock- Based Compensation Plans equivalent value immediately before and after separation. The impact of this modification was not material to our stock- based compensation expense for the year ended December 31, 2022. Our employees were granted stock- based awards through the Exelon LTIP prior to separation, which primarily included performance share awards and restricted stock units. We also granted cash awards. The following table presents the stock- based compensation expense included in the Consolidated Statements of Operations and Comprehensive Income. The information does not include expenses related to the cash awards as they are not considered stock- based compensation plans under the applicable authoritative guidance: Year Ended December 31, 2023 (a) 2022 (a) 2021 (b) Total stock- based compensation expense included in operating and maintenance expense $ 178 $ 116 $ 47 Income tax benefit (45) (29) (12) Total after- tax stock- based compensation expense $ 133 $ 87 $ 35 _____ (a) Costs recognized for the years ended December 31, 2023 and 2022 are related to the Constellation LTIP. (b) Costs recognized for the year ended December 31, 2021 were allocated to us by Exelon under the Exelon LTIP prior to separation. We receive a tax deduction based on the intrinsic value of the award on the distribution date for performance share awards and restricted stock units. The tax deduction related to performance share awards and restricted stock units was not material for the years ended December 31, 2023 and 2022. For each award, throughout the requisite service period, we recognize the tax benefit related to compensation costs. For performance share awards and restricted stock units, our realized tax benefit when distributed was not material for the years ended December 31, 2023 and 2022. Performance Share Awards Performance share awards are granted under the LTIP. The performance share awards are typically settled 50 % in common stock and 50 % in cash at the end of the three- year performance period, subject to certain ownership thresholds that, if met, may result in cash settlement of the entire award. The common stock portion of the performance share awards is considered an equity award and is valued based on our stock price on the grant date. The cash portion of the performance share awards is considered a liability award which is remeasured each reporting period based on the current stock price. As the value of the common stock and cash portions of the awards are based on the stock price during the performance period, coupled with changes in the total expected payout of the award, the compensation costs are subject to volatility until payout is established. For nonretirement- eligible employees, performance share awards are recognized over the vesting period of three years using the straight- line method. For performance share awards granted to retirement- eligible employees, the value of the performance shares is recognized ratably over the vesting period, which is the year of grant. We process forfeitures as they occur for employees who do not complete the requisite service period. The following table summarizes our unvested performance share awards activity: SharesWeighted Average Grant Date Fair Value (per share) Unvested at December 31, 2022849, 342 $ 47. 40 Granted370, 874 83. 26 Change in performance471, 561 75. 31 Forfeited (20, 615) 57. 80 Undistributed vested awards (a) (834, 837) 90. 81 Unvested at December 31, 2023836, 325 $ 61. 47 _____ (a) Represents performance share awards that vested but were not distributed to retirement- eligible employees during 2023 and 2022. The following table summarizes the weighted average grant date fair value and the total fair value of performance share awards vested: December 31, 2023 (a) December 31, 2022 (a) Weighted average grant date fair value (per share) $ 83. 26 $ 48. 33 Total fair value of performance shares vested76 69 _____ (a) As of December 31, 2023 and 2022, $ 39 million and $ 28 million of total unrecognized compensation costs related to unvested performance shares are expected to be recognized over the remaining weighted- average period of 1. 6 years and 1. 7 years, respectively. Restricted Stock Units Restricted stock units are granted under the LTIP with the majority being settled in a specific number of shares of common stock after the service condition has been met. The corresponding cost is measured based on the grant date fair value of the restricted stock unit issued. The value of the restricted stock units is expensed over the requisite service period using the straight- line method. The requisite service period for restricted stock units is generally three to five years. However, certain restricted stock unit awards become fully vested upon the employee reaching retirement eligibility. The value of the restricted stock units granted to retirement- eligible employees is either recognized ratably over the first six months in the year of grant if the employee reaches retirement eligibility prior to July 1st of the grant year or through the date of which the employee reaches retirement eligibility. We process forfeitures as they occur for employees who do not complete the requisite service period. The following table summarizes our unvested restricted stock unit activity: SharesWeighted Average Grant Date Fair Value (per share) Unvested at December 31, 2022790, 668 $ 53. 72 Granted620, 002 86. 10 Vested (295, 370) 53. 46 Forfeited (27, 922) 69. 14 Undistributed vested awards (a) (222, 573) 80. 52 Unvested at December 31, 2023864, 805 $ 69. 42 (a) Represents restricted stock units that vested but were not distributed to retirement- eligible employees during 2023 and 2022. The following table summarizes the weighted average grant date fair value and the total fair value of restricted stock units vested: December 31, 2023 (a) December 31, 2022 (a) Weighted average grant date fair value (per share) $ 86. 10 $ 54. 17 Total fair value of restricted stock units vested34 35 (a) As of December 31, 2023 and 2022, $ 35 million and $ 27 million of total unrecognized compensation costs related to unvested restricted stock units are expected to be recognized over the remaining weighted- average period of 1. 9 years and 2. 0 years. 22. Variable Interest Entities As of December 31, 2023 and 2022, we consolidated several VIEs or VIE groups for which we are the primary beneficiary (see Consolidated VIEs below) and had significant interests in several other VIEs for which we do not have the power to direct the entities' activities and, accordingly, we were not the primary beneficiary (see Unconsolidated VIEs below). Consolidated and unconsolidated VIEs are aggregated to the extent that the entities have similar risk profiles. Combined Notes to Consolidated Financial Statements (Dollars in millions, unless otherwise noted) Note 22 — Variable Interest Entities The table below shows the carrying amounts and classification of the consolidated VIEs' assets and liabilities included in the consolidated financial statements as of December 31, 2023 and 2022. The assets, except as noted in the footnotes to the table below, can only be used to settle obligations of the VIEs. The liabilities, except as noted in the footnotes to the table below, are such that creditors, or beneficiaries, do not have recourse to our general credit. December 31, 2023December 31, 2022Cash and cash equivalents $ 48 $ 51 Restricted cash and cash equivalents47 46 Accounts receivableCustomer19 20 Other10 9 Inventories, netMaterials and supplies14 12 Other current assets1, 249 549 Total current assets1, 387 687 Property, plant and equipment, net 1, 979 1, 965 Other noncurrent assets166 190 Total noncurrent assets2, 145 2, 155 Total assets (a) $ 3, 532 $ 2, 842 Long- term debt due within one year $ 63 $ 60 Accounts payable11 17 Accrued expenses20 23 Other current liabilities — 2 Total current liabilities94 102 Long- term debt704 764 Asset retirement obligations190 173 Other noncurrent liabilities2 3 Total noncurrent liabilities896 940 Total liabilities (b) $ 990 $ 1, 042 (a) Our balances include unrestricted assets for current unamortized energy contract assets of $ 22 million and $ 23 million, disclosed within other current assets in the table above and noncurrent unamortized energy contract assets of $ 155 million and $ 178 million, disclosed within other noncurrent assets in the table above as of December 31, 2023 and 2022, respectively. (b) As of December 31, 2023, our balance does not include any liabilities with recourse. Our balance includes liabilities with recourse of $ 1 million as of December 31, 2022. As of December 31, 2023 and 2022, our consolidated VIEs included the following: Consolidated VIE or VIE groups: Reason entity is a VIE: Reason we are the primary beneficiary: CRP- A collection of wind and solar project entities. We have a 51 % equity ownership in CRP. See additional discussion below. Similar structure to a limited partnership and the limited partners do not have kick out rights with respect to the general partner. We conduct

the operational activities. Bluestem Wind Energy Holdings, LLC- A Tax Equity structure which is consolidated by CRP. Similar structure to a limited partnership and the limited partners do not have kick out rights with respect to the general partner. We conduct the operational activities. Antelope Valley- A solar generating facility, which is 100 % owned by us. Antelope Valley sells all of its output to PG & E through a PPA. The PPA contract absorbs variability through a performance guarantee. We conduct all activities. NER- A bankruptcy remote, special purpose entity which is 100 % owned by us, which purchases certain of our customer accounts receivable arising from the sale of retail electricity. NER' s assets will be available first and foremost to satisfy the claims of the creditors of NER. Refer to Note 6 — Accounts Receivable for additional information on the sale of receivables. Equity capitalization is insufficient to support its operations. We conduct all activities. CRP- CRP is a collection of wind and solar project entities and some of these project entities are VIEs that are consolidated by CRP. While we or CRP own 100 % of the solar entities and 100 % of the majority of the wind entities, it has been determined that the wholly owned solar and wind entities are VIEs because the entities' customers absorb price variability from the entities through fixed price power and / or REC purchase agreements. Additionally, for the wind entities that have minority interests, it has been determined that these entities are VIEs because the governance rights of some investors are not proportional to their financial rights. We are the primary beneficiary of these solar and wind entities that qualify as VIEs because we control operations and direct all activities of the facilities. There is limited recourse to us related to certain solar and wind entities. In 2017, our interests in CRP were contributed to and are pledged for the CR non- recourse debt project financing structure. Refer to Note 17 — Debt and Credit Agreements for additional information. Our variable interests in unconsolidated VIEs generally include equity investments and energy purchase and sale contracts. For the equity investments, the carrying amount of the investments is reflected in the Consolidated Balance Sheets in Investments. For the energy purchase and sale contracts (commercial agreements), the carrying amount of assets and liabilities in the Consolidated Balance Sheets that relate to our involvement with the VIEs are predominantly related to working capital accounts and generally represent the amounts owed by, or owed to, us for the deliveries associated with the current billing cycles under the commercial agreements. As of December 31, 2023 and 2022, we had significant unconsolidated variable interests in several VIEs for which we were not the primary beneficiary. These interests include certain equity method investments and certain commercial agreements. The following table presents summary information about our significant unconsolidated VIE entities: December 31, 2023December 31, 2022CommercialAgreementVIEsEquityInvestmentVIEsTotalCommercialAgreementVIEsEquityInvestmentVIEsTotalTotal assets (a) $ 704 $ — $ 704 $ 715 $ — $ 715 Total liabilities (a) 77 — 77 54 — 54 Other ownership interests in VIE (a) 627 — 627 661 — 661 (a) These items represent amounts on the unconsolidated VIE balance sheets, not in the Consolidated Balance Sheets. These items are included to provide information regarding the relative size of the unconsolidated VIEs. We do not have any exposure to loss as we do not have a carrying amount in the equity investment VIEs as of December 31, 2023 and 2022. As of December 31, 2023 and 2022, the unconsolidated VIEs consist of: Unconsolidated VIE groups: Reason entity is a VIE: Reason we are not the primary beneficiary: Equity investments in distributed energy companies. We have a 90 % equity ownership in a distributed energy company. We sold this investment in the fourth quarter of 2022 resulting in it no longer being classified as an unconsolidated VIE. Similar structures to a limited partnership and the limited partners do not have kick out rights with respect to the general partner. We do not conduct the operational activities. Energy Purchase and Sale agreements- We have several energy purchase and sale agreements with generating facilities. PPA contracts that absorb variability through fixed pricing. We do not conduct the operational activities. 23. Supplemental Financial Information Supplemental Statement of Operations Information The following tables provide additional information about material items recorded in the Consolidated Statements of Operations and Comprehensive Income. Taxes other than income taxesFor the Years Ended December 31, 202320222021Gross receipts (a) $ 139 $ 130 $ 99 Property253 274268Payroll142 130109 (a) Represent gross receipts taxes related to our retail operations. The offsetting collection of gross receipts taxes from customers is recorded in Operating revenues in the Consolidated Statements of Operations and Comprehensive Income. Combined Notes to Consolidated Financial Statements (Dollars in millions, unless otherwise noted) Note 23 — Supplemental Financial Information Other, netFor the Years Ended December 31, 202320222021Decommissioning- related activities: Net realized income on NDT funds (a) Regulatory Agreement Units $ 657 $ 333 $ 817 Non- Regulatory Agreement Units335 97 449 Net unrealized (losses) gains on NDT fundsRegulatory Agreement Units397 (1, 354) 351 Non- Regulatory Agreement Units259 (798) 209 Regulatory offset to NDT fund- related activities (b) (845) 820 (917) Total Decommissioning- related activities803 (902) 909 Non-service net periodic benefit credit (c) 54 110 — Net realized and unrealized (losses) gains from equity investments (d) 307 (13) (160) Return to provision adjustment (e) 19 (49) — Other (f) 85 68 46 Total Other, net $ 1, 268 $ (786) $ 795 (a) Realized income includes interest, dividends and realized gains and losses on sales of NDT fund investments. (b) Includes the elimination of decommissioning- related activities and the elimination of income taxes related to all NDT fund activity for the Regulatory Agreement Units except for decommissioning- related impacts that were not offset for the Byron units starting in the second quarter of 2021. With our September 15, 2021 reversal of the previous decision to retire Byron, we resumed contractual offset for Byron as of that date. See Note 10 — Asset Retirement Obligations for additional information regarding the accounting for nuclear decommissioning and the contractual offset suspension for the Byron units. (c) Prior to separation, we were allocated our portion of pension and OPEB non- service credits (costs) from Exelon, which was included in Operating and maintenance expense. Effective February 1, 2022, the non- service credit (cost) components are included in Other, net, in accordance with single employer plan accounting. See Note 15 — Retirement Benefits for additional information. (d) For 2023, includes unrealized gain resulting from equity investment that became publicly traded in the second quarter of 2023 and now has a readily determinable fair value (and no longer is accounted for as an equity method investment due to lack of significant influence). We recorded the fair value of this investment in Investments on the Consolidated Balance Sheets based on quoted market price of the stock. See Note 18 — Fair Value of Financial Assets and Liabilities for additional information. For 2022, represents Net realized and unrealized (losses) gains from equity investments. For 2021, represents Net unrealized (losses) gains from equity investments. (e) This reflects amounts contractually owed to Exelon under the TMA, which is offset in Income taxes. See Note 14 — Income Taxes for additional information. (f) Includes amounts we billed Exelon for services pursuant to the TSA. See Note 1 — Basis of Presentation for additional information. Supplemental Cash Flow Information The following tables provide additional information about material items recorded in the Consolidated Statements of Cash Flows. Related Party Transactions Prior to completion of the separation on February 1, 2022, we engaged in transactions with affiliates of Exelon in the normal course of business, these affiliate transactions are summarized in the tables below. After February 1, 2022, all transactions with Exelon or its affiliates are no longer related party transactions. The following table presents our Operating revenues from affiliates: For the Years Ended December 31, 2022 (a) 2021ComEd (b) $ 58 $ 376 PECO (c) 33 196 BGE (d) 18 236 PHI51 366 Pepco (e) 39 270 DPL (f) 10 79 ACE (g) 2 17 Other — 14 Total operating revenues from affiliates $ 160 $ 1, 188 (a) Represents only January 2022 costs prior to separation on February 1, 2022. (b) We have an ICC- approved RFP contract with ComEd to provide a portion of ComEd' s electricity supply requirements. We also sell RECs and ZECs to ComEd. (c) We provide electric supply to PECO under contracts executed through PECO' s competitive procurement process. In addition, we have a ten- year agreement with PECO to sell solar AECs. (d) We provide a portion of BGE' s energy requirements under its MDPSC- approved market- based SOS and gas commodity programs. (e) We provide electric supply to Pepco under contracts executed through Pepco' s competitive procurement process approved by the MDPSC and DCPSC. (f) We provide a portion of DPL' s energy requirements under its MDPSC and DEPSC approved market- based SOS commodity programs. (g) We provide electric supply to ACE under contracts executed through ACE' s competitive procurement process. Service Company Costs for Corporate Support We received a variety of corporate support services from Exelon. Through its business services subsidiary, BSC, Exelon provided support services at cost, including legal, human resources, financial, information technology, and supply management services. The costs of BSC were directly charged or allocated to us. Certain of these services continue after the separation and are covered by the TSA. See Note 1 — Basis of Presentation for additional information. The operating and maintenance service company costs from affiliates allocated to us prior to separation were $ 44 million and $ 588 million for the years ended December 31, 2022 and 2021, respectively. The capitalized service company costs allocated to us prior to separation were $ 15 million and $ 129 million for the years ended December 31, 2022 and 2021, respectively. ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURENone. ITEM 9A. CONTROLS AND PROCEDURES Disclosure Controls and Procedures During the fourth quarter of 2023, our principal executive officer and principal financial officer, evaluated the effectiveness of our disclosure controls and procedures related to the recording, processing, summarizing, and reporting of information in periodic reports that we file or submit with the SEC. These disclosure controls and procedures have been designed to ensure that (a) information relating to our consolidated subsidiaries, is accumulated and made known to our management, including our principal executive officer and principal financial officer, by other employees as appropriate to allow timely decisions regarding required disclosure, and (b) this information is recorded, processed, summarized, and reported, as applicable, within the time periods specified in the SEC' s rules and forms. Due to the inherent limitations of control systems, not all misstatements may be detected. These inherent limitations include the realities that judgments in decision- making can be faulty and that breakdowns can occur because of simple error or mistake. Additionally, controls could be circumvented by the individual acts of some persons or by collusion of two or more people. Accordingly, as of December 31, 2023, our principal executive officer and principal financial officer concluded that our disclosure controls and procedures were effective to accomplish their objectives. Changes in Internal Control Over Financial Reporting We continually strive to improve our disclosure controls and procedures to enhance the quality of our financial reporting and to maintain dynamic systems that change as conditions warrant. There have been no changes in internal control over financial reporting that occurred during the fourth quarter of 2023 that have materially affected, or are reasonably likely to materially affect, any of our internal control over financial reporting. Management is required to assess and report on the effectiveness of its internal control over financial reporting as of December 31, 2023. As a result of that assessment, management determined that there were no material weaknesses as of December 31, 2023 and, therefore, concluded that our internal control over financial reporting was effective. Management' s Report on Internal Control Over Financial Reporting is included in ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA. ITEM 9B. OTHER INFORMATIONNone. ITEM 9C. DISCLOSURE REGARDING FOREIGN JURISDICTIONS THAT PREVENT INSPECTIONSNot

Applicable. PART III Constellation Energy Generation, LLC meets the conditions set forth in General Instruction I (1) (a) and (b) of Form 10- K for a reduced disclosure format. Accordingly, all items in this section relating to Constellation are not presented. ITEM 10. DIRECTORS, EXECUTIVE OFFICERS, AND CORPORATE GOVERNANCEInformation about our Executive Officers as of February 27, 2024 NameAgePositionPeriodDominguez, Joseph61 President and Chief Executive Officer2022- PresentPresident and Chief Executive Officer, Exelon Generation Company, LLC2021- 2022Chief Executive Officer, ComEd2018- 2021Eggers, Daniel48 Executive Vice President and Chief Financial Officer2022- PresentExecutive Vice President and Chief Financial Officer, Exelon Generation Company, LLC2021- 2022Senior Vice President of Corporate Finance, Exelon2018- 2021Barrón, Kathleen53Executive Vice President and Chief Strategy Officer2022- PresentExecutive Vice President and Chief Strategy Officer, Exelon Generation Company, LLC2021- 2022Executive Vice President of Government and Regulatory Affairs, Exelon2018- 2021Hanson, Bryan C. 58Executive Vice President and Chief Generation Officer2022- PresentExecutive Vice President and Chief Generation Officer, Exelon Generation Company, LLC2020- 2022President and Chief Nuclear Officer, Exelon Nuclear; Senior Vice President, Exelon Generation Company, LLC2015- 2020Koehler, Michael R. 57Executive Vice President and Chief Administration Officer2022- PresentExecutive Vice President and Chief Administration Officer, Exelon Generation Company, LLC2021- 2022Senior Vice President and Chief Information and Chief Digital Officer, Exelon2016- 2021McHugh, James52Executive Vice President and Chief Commercial Officer2022- PresentExecutive Vice President and Chief Commercial Officer, Exelon Generation Company, LLC2021- 2022Executive Vice President, Exelon; Chief Executive Officer, competitive retail and commodities business, Exelon2018- 2021Dardis, David51Executive Vice President and General Counsel2022- PresentExecutive Vice President and General Counsel, Exelon Generation Company, LLC2021- 2022Senior Vice President and General Counsel, Exelon Generation Company, LLC2020- 2021Senior Vice President and General Counsel, competitive retail and commodities business, Exelon2016- 2020Bauer, Matthew47 Senior Vice President and Controller2022- PresentVice President and Controller, Exelon Generation Company, LLC2016- 2022 Directors, Director Nomination Process and Audit Committee The information required under ITEM 10 concerning directors and nominees for election as directors at the annual meeting of shareholders (Item 401 of Regulation S- K), the director nomination process (Item 407 (e) (3)), the audit committee (Item 407 (d) (4) and (d) (5)), and the beneficial reporting compliance (Sec. 16 (a)) is incorporated herein by reference to information to be contained in our definitive 2024 proxy statement (2024 Constellation Proxy Statement) to be filed with the SEC on or before April 30, 2024 pursuant to Regulation 14A or 14C, as applicable, under the Securities Exchange Act of 1934. Code of Conduct and Ethics In connection with the completion of the separation from Exelon, our Board of Directors adopted a code of conduct and ethics (Code of Ethics), effective February 1, 2022, that applies to all of our directors, officers and employees, including our principal executive officer, principal financial officer, principal accounting officer and persons performing similar functions. The Code of Ethics is available upon written request to our corporate secretary or on our website at www. ConstellationEnergy. com. If we amend provisions of our Code of Ethics that apply to, or grant a waiver from a provision of our Code of Ethics for any executive officer, we will publicly disclose such amendment or waiver on our website and as required by applicable law or regulation. The information contained on, or accessible from, our website is not part of this annual report by reference or otherwise. ITEM 11. EXECUTIVE COMPENSATIONThe information required by this item will be set forth under" Executive Compensation Data" and" Report of the Compensation Committee" in the Constellation Proxy Statement for the 2024 Annual Meeting of Shareholders which is incorporated herein by reference. ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS The information required by this item will be set forth under" Ownership of Constellation Stock" in the Constellation Proxy Statement for the 2024 Annual Meeting of Shareholders which is incorporated herein by reference. Securities Authorized for Issuance under Constellation Equity Compensation Plans [A] [B] [C] Number of securities to be issued upon exercise of outstanding Options, warrants and rights (Note 1) Weighted- average price of outstanding Options, warrants and rightsNumber of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in column [A]) (Note 2) Equity compensation plans approved by security holders $ 2, 937, 870 N / A $ 36, 890, 924 (1) Balance includes outstanding performance shares and restricted stock units that were granted under the Constellation LTIP (including shares awarded under those plans and deferred into the stock deferral plan) and deferred stock units granted to directors as part of their compensation. Unvested performance shares are subject to performance metrics and to a credit rating modifier. In addition, pursuant to the terms of the Constellation LTIP plan, 50 % of final payouts are made in the form of shares of common stock and 50 % is made in form of in cash, or if the participant has exceeded 200 % of their stock ownership requirement, 100 % of the final payout is made in cash. For performance shares, the total includes the maximum number of shares that could be issued assuming all participants receive 50 % of payouts in shares and assuming the performance and credit rating modifier metrics were both at maximum, representing best case performance, for a total of 1, 411, 383 shares. If the performance and total shareholder return modifier metrics were at" target", the number of securities to be issued for such awards would be 705, 692. The balance also includes 145, 301 shares to be issued upon the conversion of deferred stock units awarded to members of the Constellation board of directors. Conversion of the deferred stock units to shares of common stock occurs after a director terminates service on the Constellation board. (2) Includes 17, 397, 623 shares remaining available for issuance from the employee stock purchase plan and 19, 493, 301 shares remaining available for issuance to former Constellation employees with outstanding awards made under the prior Constellation LTIP. ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS AND DIRECTOR INDEPENDENCEThe additional information required by this item will be set forth under" Related Persons Transactions" and" Director Independence" in the Constellation Proxy Statement for the 2024 Annual Meeting of Shareholders which is incorporated herein by reference. ITEM 14. PRINCIPAL ACCOUNTING FEES AND SERVICESThe information required by this item will be set forth under" The Ratification of PricewaterhouseCoopers LLP as Constellation' s Independent Registered Public Accounting Firm for 2024" in the Constellation Proxy Statement for the 2024 Annual Meeting of Shareholders which is incorporated herein by reference. PART IV ITEM 15. PURPOSE 1. 1. The purpose of this Insider Trading Policy (the " Policy ") is to promote compliance with applicable securities laws to prevent insider trading violations by Covered Persons (defined below) of Constellation Energy Corporation (including its subsidiaries, hereafter the " Company " or " Constellation "). 2. TERMS AND DEFINITIONS 2. 1. Benefit Plan means any Company sponsored employee benefit plan or deferred compensation plan, as amended in accordance with their terms, whether tax qualified or not, including, but not limited to, the Constellation Energy Corporation Employee Savings Plan, the ESPP (defined below), and the Constellation Energy Corporation Deferred Compensation Plan. 2. 2. Benefit Plan Blackout Period means a specified period of time during which all employee participants of a particular Benefit Plan are not allowed to make any discretionary transactions through some administrative decision. 2. 3. Company means Constellation Energy Corporation and its subsidiaries. 2. 4. Covered Persons all directors, officers, employees, trustees, agents or fiduciaries, independent contractors, and consultants of the Company, and their Related Persons. 2. 5. ESPP means the Constellation Energy Corporation Employee Stock Purchase Plan. 2. 6. Executive Officer means an employee of the Company who has been designated by the Compensation Committee of the Board of Directors of Constellation to be an executive officer for purposes of reporting to the SEC. 2. 7. Constellation Securities means Constellation common stock (including Constellation stock held in a Benefit Plan) and any debt or equity securities issued by Constellation or any subsidiary. 2. 8. Insider Trading is buying or selling securities " on the basis of " Material Non- Public Information (defined below) obtained through employment or other involvement with a company, or by providing MNPI to others outside the company (" tipping "). Buying or selling securities " on the basis of " Material Non- Public Information means that the person trading is aware of the information at the time of purchase or sale (regardless of whether the MNPI is the basis for the trade). 2. 9. Material Non- Public Information or MNPI means information which is both " material, " and " non- public. " Information is material if there is a substantial likelihood that, considering all of the surrounding facts and circumstances, a reasonable investor would consider such information important to a decision to buy, sell, or hold a security. Information is deemed to be " non- public " until it has been disseminated by a method that is reasonably designed to provide broad distribution of the information to the public, usually by means of a press release, earnings call, or SEC filing. Examples of MNPI may include but are not limited to: information concerning earnings and earnings estimates or targets; significant operational problems; retirement of generating facilities; a significant cybersecurity event; dividends and changes to the dividend policy; liquidity and cash flow; proposals or agreements for significant mergers, acquisitions or divestitures; capital market transactions; significant capital investments; significant litigation developments; changes in credit ratings; management changes; and pending significant regulatory actions. 2. 10. OCG means the Office of Corporate Governance. 2. 11. Related Persons means: (a) your family members who reside with you (including a spouse, partner, a child, a child away at college, stepchildren, grandchildren, parents, stepparents, grandparents, siblings, and in- laws), anyone else who lives in your household, and any family members who do not live in your household but whose transactions in securities are directed by you or subject to your influence or control, such as parents or children who consult with you before they trade in securities and, when used in reference to an entity; and (b) any entities that you influence or control, including any corporations, partnerships or trusts. 2. 12. SEC means the United States Securities and Exchange Commission. 2. 13. Section 16 Insiders means all directors and Executive Officers of Constellation Energy Corporation. 2. 14. Short Sale means a sale of stock not then owned by the seller (in effect betting that the stock price will drop and that the seller can later buy at a lower price the shares necessary to complete the sale). 2. 15. Special Blackout Period means a blackout period in which Covered Persons have MNPI related to a special project, transaction or business development and will not be permitted to trade in Constellation Securities. 2. 16. Tier 1 Persons means vice presidents and certain key managers and staff determined likely to have access to MNPI through (1) routine job duties, or (2) participation in a specialized project, committee, or task force. 2. 17. Tier 2 Persons means all Section 16 Insiders, directors of any subsidiary that files reports with the SEC, all Senior Executive Vice Presidents, Executive Vice Presidents, Senior Vice Presidents, and other employees determined to regularly have access to MNPI through (1) routine job duties, or (2) participation in a specialized project, committee, or task force. 2. 18. Trading Plan means a pre- determined schedule of one or more trades to be executed under the terms and conditions established in a written document designed to conform to the provisions of SEC Rule 10b5- 1. 2. 19. Trading Window means a specified period of time determined by OCG during which Tier 1 and Tier 2 Persons and their Related Persons may execute approved transactions involving Constellation Securities or enter into a Trading Plan. 3. ROLES AND RESPONSIBILITIES 3. 1. Personal Responsibility. Each Covered Person is responsible for compliance with this Policy and must not engage in illegal trading and avoid any appearance of improper trading. Legal pre- clearance of trades or the approval of a Trading Plan does not constitute legal advice or insulate a Covered Person from liability under the applicable securities laws. Each individual is responsible for ensuring that each of his or her Related Persons also comply with the Policy. Before engaging in any transaction, individuals should consider how enforcement authorities, regulators, the media, and others might view the transaction in hindsight. 3. 2. OCG Responsibility. Questions about whether information may be regarded as MNPI or other questions related to this Policy should be directed to OCG. Additionally, OCG is responsible for establishing and maintaining procedures for: a) Communicating each quarter to Tier 1 and Tier 2 Persons about the restrictions applicable to each group and about the expected opening and closing dates of the Trading Window and announcing any changes to such dates, b) Reviewing, granting, or denying pre- clearance trading requests, c) The review and approval of Trading Plans, d) Determining and periodically updating individuals classified as " Tier 1 Persons " and " Tier 2 Persons, " e) Communicating to applicable individuals if they are subject to a Special Blackout Period, and f) Developing and implementing training plans and / or processes to Tier 1 and Tier 2 persons regarding insider trading and the requirements of this Policy. 4. PROCEDURE 4. 1 General Rules Applicable to All Covered Persons 4. 1. 1 Prohibition Against Insider Trading. Insider trading is a criminal offense and a violation of Company policy, including the Code of Business Conduct. If a Covered Person has MNPI about the Company, he or she may not buy or sell Constellation Securities until the Company has broadly disseminated the MNPI to the public. In the event the Company issues a press release or makes an SEC filing disclosing all of the MNPI known to a Covered Person, the Covered Person and Related Persons may only trade in Constellation Securities beginning on the second full trading day after such release or filing is made public. 4. 1. 2 Prohibition Against Tipping. A Covered Person must not share MNPI or information proprietary to the Company with Related Persons or anyone without a need to know, including family members, friends, and business associates. If a person receives MNPI from a Covered Person and uses that information to buy or sell securities, both the Covered Person and the person who used it may be deemed to have committed illegal insider trading, regardless of whether the Covered Person benefited personally from the other person' s trading. 4. 1. 3 Prohibition Against Short Sales and Put and Call Options. Covered Persons and their Related Persons are prohibited from engaging in short sales and the purchase or sale of put and call options on Constellation Securities. 4. 1. 4 Prohibition Against Hedging Transactions. Covered Persons and their Related Persons are prohibited from engaging in hedging or monetization transactions, including through the use of financial instruments such as prepaid variable forwards, equity swaps, collars and exchange funds. 4. 1. 5 Prohibition Against the Insider Trading of Securities of Other Companies. Individuals are prohibited from trading in the securities of other companies when in possession of MNPI about those companies. In the course of transacting business for Constellation, individuals may learn information about another company such as a supplier, customer, or an acquisition target that is non- public and material to that company. The preceding rules in this Section 4 apply to the securities of other companies. 4. 1. 6 Private Brokerage Accounts. All Covered Persons are strongly encouraged to hold Constellation Securities in accounts with Constellation' s equity administrator or in registered book entry accounts with Constellation' s transfer agent, and not in private brokerage accounts. (Additional rules apply to Tier 2 Persons; see Section 4. 4. 4 below.) 4. 1. 7 Special Blackout Periods. The Company may establish Special Blackout Periods during which designated Covered Persons and their Related Persons will not be permitted to trade in Constellation Securities. OCG will determine the persons subject to Special Blackout Periods and will provide notice to such individuals. Special Blackout Periods may be established in connection with a significant event, including, but not limited to: a) a pending or proposed merger, acquisition or tender offer, b) a significant cybersecurity incident, c) financial or accounting developments, d) significant operational events, e) legal or regulatory developments or proceedings, or f) pending senior management changes. 4. 1. 8 Prohibition Against Discussing Special Blackout Period. Individuals subject to Special Blackout Periods may not discuss the existence of the Special Blackout Period or the identity of any individuals subject to the Special Blackout Period with any other person not also subject to the Special Blackout Period. 4. 2 Benefit Plan Transactions 4. 2. 1 Benefit Plan Transactions Subject to Policy. Certain discretionary transactions effected through Benefit Plans or other plans are subject to this Policy and should only occur when a Covered Person has no MNPI (and subject to any other applicable restrictions set forth in this Policy). These include: a) Employee Savings Plan (401 (k) Plan) – Elections made under the 401 (k) plan to: (a) initially participate, or increase or decrease the percentage of periodic contributions allocated to the Company stock fund; (b) make an intra- plan transfer of an existing account balance into or out of the Company stock fund; (c) borrow money against your 401 (k) plan account if the loan will result in a liquidation of some or all of your Company stock fund balance; and (d) pre - pay

a plan loan if the pre- payment will result in allocation of loan proceeds to the Company stock fund. b) ESPP- An initial election to participate, any changes to your participation amount or type for any enrollment period, and market sales of Constellation Securities acquired under the ESPP or through related dividend reinvestment. c) Automatic Dividend Reinvestment – An initial election to participate in any dividend reinvestment plan, any change to your participation including any market sale of Constellation Securities acquired under the plan, or any voluntary purchases of Constellation Securities resulting from additional contributions made under the plan. d) Equity Awards- Any market sale of equity securities acquired through Company awards. 4. 2. 2 Benefit Plan Transactions NOT Subject to Policy. Certain Benefit Plan or other Company plan transactions are not subject to this Policy and can occur at any time. These include the following transactions executed on your behalf by Company or other Benefit Plan administrators: a) Employee Savings Plans (401 (k) Plans)- Acquisitions of Constellation Securities through one of the Constellation-sponsored 401 (k) plans resulting from periodic, ongoing contributions of money pursuant to payroll deduction. b) ESPP – Acquisitions of Constellation Securities through ongoing participation in the ESPP pursuant to and consistent with a prior election to participate. c) Dividend Reinvestment – Constellation Securities acquired through the automatic dividend reinvestment plan pursuant to a prior election to participate. d) Equity Awards- Vesting of company- awarded equity, or the election to exercise tax- withholding rights pursuant to which the Company withholds shares equal in value to satisfy tax- withholding obligations upon vesting of any equity award. 4. 3 Additional Rules Applicable to Tier 1 and Tier 2 Persons 4. 3. 1 Approved Trading Limited to Trading Windows. Tier 1 and Tier 2 Persons and their Related Persons may only engage in transactions involving Constellation Securities during a Trading Window unless trading is executed pursuant to an approved Trading Plan. Trading Windows generally begin in each calendar quarter at the beginning of the second trading day after the release of earnings for the prior quarter and continue for approximately six weeks unless otherwise specified by OCG. Trading Windows may open later or close earlier than described above at the discretion of OCG for various reasons. 4. 3. 2 Prohibition Against Holding Constellation Securities in Margin Accounts or Using Constellation Securities as Collateral for a Loan. Tier 1 and Tier 2 Persons and their Related Persons are prohibited from holding Constellation Securities in a margin account or otherwise pledging Constellation Securities as collateral for a loan. 4. 4 Additional Rules Applicable to Tier 2 Persons 4. 4. 1 Prior Approval Required. Tier 2 Persons and their Related Persons are required to obtain approval from OCG prior to any transaction involving any Constellation Securities subject to the exceptions noted in Section 4. 4. 2. Trading approval is valid for three business days. If a transaction is not completed within that time, the person wishing to trade must contact OCG to obtain new approval. For the avoidance of doubt, if OCG approves a person to trade and the person obtains MNPI prior to completing the transaction, such person is prohibited from executing such transaction. Examples of transactions for which prior approval is required include, but are not limited to: a) Open market purchases or sales of Constellation Securities, b) Exercising stock options involving Constellation Securities, c) Any Benefit Plan transactions subject to this Policy and listed in Section 4. 2. 1, d) Transactions or transfers of Constellation Securities between accounts pursuant to which there is a financial benefit, including but not limited to a tax benefit, and e) Gifts of Constellation Securities. 4. 4. 2 Transactions Exempt from Prior Approval Requirement. The following transactions do not require prior approval: a) Any purchase or sale of Constellation Securities made pursuant to a Trading Plan approved in advance by OCG, b) Any Benefit Plan transactions exempted from this Policy and listed in Section 4. 2. 2, c) Company matching contributions under the Employee Savings Plan or other Benefit Plans, and d) Any transaction specifically approved in advance in writing by OCG. 4. 4. 3 Approval Procedures. OCG has established and maintains procedures for the approval of transactions and maintains controls to ensure compliance with this Policy. These procedures are communicated to all Tier 1 and Tier 2 Persons at the beginning of each Trading Window. Approval by OCG of any transaction does not relieve anyone of the responsibility for compliance with federal securities laws and does not constitute legal or investment advice. 4. 4. 4 Broker Letters. Any Tier 2 Person who holds Constellation Securities in a private brokerage account must enter into an agreement with his / her broker that (a) requires the broker to obtain authorization from OCG before executing any trade and (b) authorizes the broker to provide immediate notice to OCG of all trades in Constellation Securities, and to confirm balances and provide other information as needed to OCG. 4. 4. 5 Rules Remain in Effect for 60 Days after Separation. Tier 2 Persons (and their Related Persons) remain subject to pre- approval of trading for 60 days after ceasing to serve in such role for any reason. However, in this case, the trading of Constellation Securities need not be limited to the Trading Windows. The 60- day period will be measured from the date the person officially terminates employment. (See Section 4. 5. 3 for related provision applicable to Section 16 Insiders.) 4. 5 Additional Rules Applicable to Section 16 Insiders 4. 5. 1 Reporting Requirements. All Section 16 Insiders are required by federal securities laws to file reports with the SEC disclosing initial beneficial ownership of, and any transactions in Constellation Securities. OCG maintains procedures to assist Section 16 Insiders with compliance with this requirement and to facilitate the reporting obligations of these individuals. 4. 5. 2 Prohibition Against Trading During Benefit Plan Blackout Periods. During a Benefit Plan Blackout Period, Section 16 Insiders may not buy or sell any Constellation common stock in any other account or in any other Benefit Plan. Any profit obtained by a Section 16 Insider from trades during a Benefit Plan Blackout Period must be returned to the Company. OCG maintains procedures for communicating to Section 16 Insiders about any Benefit Plan Blackout Periods. 4. 5. 3 Rules Remain in Effect for Six Months after Separation. Certain reporting requirements under federal securities laws remain in effect for Section 16 Insiders for six months after the termination of employment or cessation of serving in a Director or an Executive Officer role for any reason, therefore prior approval for trading also remains in effect for six months. However, trading of Constellation Securities need not be limited to Trading Windows. The six- month period will be measured from the date the person officially terminates employment. 4. 6 10b5- 1 Trading Plans 4. 6. 1 Trading Through Approved Trading Plans. The Company allows individuals to enter in to pre- set Trading Plans designed to meet the requirements of the SEC' s Rule 10b5- 1 (c) pursuant to which trades in Constellation Securities may be executed. Entry into a Trading Plan may only be made during an open Trading Window and so long as the individual establishing the plan has no MNPI and receives pre- clearance from OCG. See Attachment 6. 1 for additional details and requirements about the design, approval, and execution of such Trading Plans. 4. 6. 2 Trading Plan Limits. Individuals may not have multiple, overlapping Trading Plans; however, an individual may enter a new Trading Plan (subject to the same timing and pre- clearance requirements set forth in Section 4. 6. 1) that will take effect after the expiration or termination of a then- effective Trading Plan. An Individual with a Trading Plan in effect may not buy or sell Constellation Securities outside of that Trading Plan until the expiration or termination of that Trading Plan. 4. 6. 3 Amending Trading Plans. Trading Plans may not be amended; however, individuals may terminate an existing Trading Plan in accordance with Section 4. 6. 4 and commence a new Trading Plan subject to the same timing and pre- clearance requirements set forth in Section 4. 6. 1. 4. 6. 4 Terminating Trading Plans. Individuals may terminate an existing Trading Plan prior to the execution of the first trade under the Trading Plan by providing notice to OCG and the executing broker prior to termination. Exhibits ? Exhibit A: Design, Approval and Execution of Trading Plans Designed to Comply with the Provisions of SEC Rule 10b5- 1. EXHIBIT A Design, Approval and Execution of Trading Plans Designed to Comply with the Provisions of SEC Rule 10b5- 1 The procedures for establishing a 10b5- 1 Trading Plans set forth below are supplementary to the provisions of the Insider Trading Policy. Unless otherwise defined in these procedures, defined terms have their meanings as set forth in the Insider Trading Policy. Plan Provider ? Constellation works with an equity administration vendor to make Trading Plans available to Constellation incentive plan participants. ? Individuals may use Trading Plans established by other financial advisors / brokers subject to approval by OCG. Establishing a Plan ? Individuals wishing to enter a Trading Plan should contact Constellation' s equity administration vendor to discuss the design and parameters of the plan. ? Trading Plans may only be entered into during an open Trading Window when the individual has no MNPI. ? Any Covered Person may adopt a Trading Plan. Trading Plans are strongly encouraged for Section 16 Insiders wishing to engage in long- term trading to meet wealth management or estate planning goals. Plan Requirements and Approval ? The first trade under a Trading Plan may not be executed until at least 14 days have elapsed after entry into the Trading Plan. ? The plan must specify an amount, price, and date of transaction (s). Subject to approval by the broker that will execute the transaction, there is no minimum transaction size. ? Trades under a Trading Plan may occur at any time, including outside of an open Trading Window. ? The terms of any Trading Plan are generally subject to approval by the broker that will execute the transactions. Any questions about Trading Plans should be sent to the Constellation Office of Corporate Governance. I have reviewed this annual report on Form 10- K of Constellation Energy Corporation; 2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report; 3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report; 4. The registrant' s other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a- 15 (e) and 15d- 15 (e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a- 15 (f) and 15d- 15 (f)) for the registrant and have: (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared; (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles; (c) Evaluated the effectiveness of the registrant' s disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and (d) Disclosed in this report any change in the registrant' s internal control over financial reporting that occurred during the registrant' s most recent fiscal quarter (the registrant' s fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant' s internal control over financial reporting; and 5. The registrant' s other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant' s auditors and the audit committee of the registrant' s board of directors (or persons performing the equivalent functions): (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant' s ability to record, process, summarize and report financial information; and (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant' s internal control over financial reporting. / s / JOSEPH DOMINGUEZPresident and Chief Executive Officer (Principal Executive Officer) Date: February 27, 2024 Exhibit 31. 2 I, Daniel L. Eggers, certify that: / s / DANIEL L. EGGERSExecutive Vice President and Chief Financial Officer (Principal Financial Officer) Exhibit

I have reviewed this annual report on Form 10- K of Constellation Energy Generation, LLC; Exhibit 31. 4 Exhibit 32. 1 Certificate Pursuant to Section 1350 of Chapter 63 of Title 18 United States Code The undersigned officer hereby certifies, as to the Report on Form 10- K of Constellation Energy Corporation for the year ended December 31, 2023, that (i) the report fully complies with the requirements of section 13 (a) or 15 (d) of the Securities Exchange Act of 1934, and (ii) the information contained in the report fairly presents, in all material respects, the financial condition and results of operations of Constellation Energy Corporation. / s / JOSEPH DOMINGUEZJoseph DominguezPresident and Chief Executive Officer Exhibit 32. 2 / s / DANIEL L. EGGERSDaniel L. EggersExecutive Vice President and Chief Financial Officer Exhibit 32. 3 The undersigned officer hereby certifies, as to the Report on Form 10- K of Constellation Energy Generation, LLC for the year ended December 31, 2023, that (i) the report fully complies with the requirements of section 13 (a) or 15 (d) of the Securities Exchange Act of 1934, and (ii) the information contained in the report fairly presents, in all material respects, the financial condition and results of operations of Constellation Energy Generation, LLC. Exhibit 32. 4 CONSTELLATION ENERGY CORPORATION COMPENSATION CLAWBACK POLICY FOR EXECUTIVE OFFICERS Effective November 1, 2023 1. INTRODUCTION The Board of Directors (the " Board ") of Constellation Energy Corporation (the " Company ") has determined that it is in the best interests of the Company to adopt a policy (this " Policy ") providing for the Company' s recoupment of Erroneously Awarded Incentive- Based Compensation (as defined below) received by current or former executive officers of the Company. The Board may delegate determinations to be made under this Policy to the Compensation Committee of the Board (the " Compensation Committee "), and the Board and the Compensation Committee are collectively referred to in this Policy as the " Board. " This Policy is intended to comply with, shall be interpreted to comply with, and shall be deemed automatically amended to comply with, Rule 10D- 1 adopted under the Securities Exchange Act of 1934, as amended (the " Exchange Act "), and Nasdaq Stock Market LLC (" Nasdaq ") Listing Rule 5608, as such provisions may be amended from time to time, and any related rules, regulations or listing standards promulgated by the U. S. Securities and Exchange Commission (the " SEC ") or Nasdaq, including any additional or new requirements that become effective after the last date that this Policy was amended. Any such amendment shall be effective at such time as is necessary to comply with the applicable listing requirements of Nasdaq. This Policy shall be administered by the Board and, except as specifically provided herein, the Board shall have full and final authority to make any and all determinations required under this Policy. Any determination by the Board with respect to this Policy shall be final, conclusive and binding on all interested parties. The Board may amend or terminate this Policy at any time. 2. EFFECTIVE DATE This Policy shall be effective as of November 1, 2023, the effective date of Nasdaq Listing Rule 5608 (the " Effective Date "). The terms of this Policy shall apply to any Incentive- Based Compensation (as defined below) that is received by any Covered Individual (as defined below) on or after the Effective Date, even if such Incentive- Based Compensation was approved, awarded, granted or paid to a Covered Individual prior to the Effective Date. 3. DEFINITIONS For purposes of this Policy, the following terms shall have the meanings set forth below: " Covered Individual " shall mean each " Executive Officer " of the Company as such term is defined in Rule 10D- 1 adopted under the Exchange Act and Nasdaq Listing Rule 5608, and includes the Company' s president, principal financial officer, principal accounting officer (or if there is no such accounting officer, the controller), any vice- president of the Company in charge of a principal business unit, division, or function, any other officer who performs a significant policy- making function, or any other person who performs similar policy- making functions for the Company. Executive officers of the Company' s subsidiaries are deemed executive officers of the Company if they perform such policy- making functions for the Company. " Erroneously Awarded Incentive- Based Compensation " shall mean the amount of Incentive- Based Compensation received by a Covered Individual that exceeds the amount of Incentive- Based Compensation that otherwise would have been received had it been determined based on the restated amounts and must be computed without regard to any taxes paid. For Incentive- Based Compensation based on stock price or total shareholder return, where the amount is not subject to mathematical recalculation directly from the information in a Restatement (as defined below), the amount must be based on a reasonable estimate of the effect of the Restatement on the stock price or total shareholder return, as applicable, upon which the Incentive- Based Compensation was received, and the Company must maintain documentation of that reasonable estimate and provide such documentation to Nasdaq. For the purposes of this Policy, Incentive- Based Compensation will be deemed to be received in the fiscal period during which the financial reporting measure specified in the applicable Incentive- Based Compensation award is attained, even if the payment or grant occurs after the end of that period. " Incentive- Based Compensation " shall mean any compensation that is granted, earned, or vested based wholly or in part upon the attainment of a " financial reporting measure. " A " financial reporting measure " refers to measures that are determined and presented in accordance with Generally Accepted Accounting Principles which are used in preparing the Company' s financial statements, and any measures that are derived wholly or in part from such measures. Stock price and total shareholder return are also financial reporting measures for this purpose. For avoidance of doubt, a financial reporting measure need not be presented within the Company' s financial statements or included in a filing with the SEC. " Restatement " shall mean any required accounting restatement of the Company' s financial statements due to the material noncompliance of the Company with any financial reporting requirement under the U. S. federal securities laws, including any required accounting restatement to correct an error in previously issued financial statements that is material to the previously issued financial statements, or that would result in a material misstatement if the error were corrected in the current period or left uncorrected in the current period. 4. RECOUPMENT OF COMPENSATION If the Company is required to prepare a Restatement commencing after the adoption of this Policy, the Board shall recover reasonably promptly from any Covered Individual the amount of any Erroneously Awarded Incentive- Based Compensation. In determining the amount of Erroneously Awarded Incentive- Based Compensation to be recovered from a Covered Individual, this Policy shall apply to all Incentive- Based Compensation received by a Covered Individual: (i) after beginning service as an Executive Officer; (ii) who served as an Executive Officer at any time during the performance period for the Incentive- Based Compensation; (iii) while the Company has a class of securities listed on a national securities exchange or a national securities association; and (iv) during the three completed fiscal years immediately preceding the date that the Company is required to prepare a Restatement, including any applicable transition period that results from a change in the Company' s fiscal year within or immediately following those three completed fiscal years. For this purpose, the Company is deemed to be required to prepare a Restatement on the earlier of: (i) the date the Board, or the Company' s officers authorized to take such action if Board action is not required, concludes, or reasonably should have concluded, that the Company is required to prepare a Restatement; or (ii) the date a court, regulator, or other legally authorized body directs the Company to prepare a Restatement. The Company' s obligation to recover Erroneously Awarded Incentive- Based Compensation is not dependent on if or when the restated financial statements are filed with the SEC. The Company shall recover the Erroneously Awarded Incentive- Based Compensation from Covered Individuals unless the Board determines that recovery is impracticable because: (i) the direct expense to a third party to assist in enforcing this Policy would exceed the amount of Erroneously Awarded Incentive- Based Compensation, provided that the Company must make a reasonable attempt to recover the Erroneously Awarded Incentive- Based Compensation before concluding that recovery is impracticable, document such reasonable attempt to recover the Erroneously Awarded Incentive- Based Compensation, and provide such documentation to Nasdaq; or (ii) recovery would likely cause an otherwise tax- qualified retirement plan, under which benefits are broadly available to employees of the Company, to fail to meet the applicable requirements of 26 U. S. C. 401 (a) (13) or 26 U. S. C. 411 (a) and regulations thereunder. 5. INDEMNIFICATION In no event will the Company indemnify any Covered Individual for any amounts that are recovered under this Policy or pay or reimburse the cost of third- party insurance purchased by any Covered Individual to fund any potential obligations under this Policy. 6. SEVERABILITY If any provision of this Policy or the application of any such provision to any Covered Individual shall be adjudicated to be invalid, illegal or unenforceable in any respect, such invalidity, illegality or unenforceability shall not affect any other provisions of this Policy, and the invalid, illegal or unenforceable provisions shall be deemed amended to the minimum extent necessary to render any such provision or application enforceable. 7. NO IMPAIRMENT OF OTHER REMEDIES This policy is in addition to any and all other rights the Company may have to pursue remedies against an employee or former employee for misconduct in the course of employment by the Company, all of which are expressly retained by the Company. This Policy does not preclude the Company from taking any other action to enforce a Covered Individual' s obligations to the Company, including termination of employment, institution of civil proceedings, or reporting to appropriate governmental authorities. This Policy does not restrict the Company from seeking recovery from a Covered Individual under any other applicable clawback policy or provision, including the Company' s Compensation Clawback Policy for Incentive Plan Participants. This Policy is in addition to the requirements of Section 304 of the Sarbanes- Oxley Act of 2002 that are applicable to the Company' s Chief Executive Officer and Chief Financial Officer. Any amounts paid to the Company pursuant to Section 304 of the Sarbanes- Oxley Act of 2002 shall be considered in determining any amounts recoverable under this Policy. 9LZZ = 92 = D = 1117 (;! 1110 4444 % % % %!
