The remaining interests in the consolidated VIEs are included in noncontrolling interests on the Consolidated Balance Sheets. Where we do not have a controlling financial interest in an entity, proportionate consolidation, equity method accounting or accounting for investments in equity securities with or without readily determinable fair value is applied. We apply proportionate consolidation when we have an undivided interest in an asset and are proportionately liable for our share of each liability associated with the asset. We proportionately consolidate our undivided ownership interest in jointly owned electric plants. Under proportionate consolidation, we separately record our proportionate share of the assets, liabilities, revenues and expenses related to the undivided interest in the asset. See Note 9 & # x2014; Jointly Owned Electric Plant for additional information on application of proportionate consolidation. We apply equity method accounting when we have a significant influence over an investee through an ownership in equity, which generally approximates a 20 % to 50 % voting interest. & lt; / span & gt; & lt; / div & gt; & lt; div style="margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style="color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; We apply equity method accounting to certain investments and joint ventures. Under equity method accounting, we report our interest in the entity as an investment and our percentage share of the earnings from the entity as single line items in our consolidated financial statements. We use accounting for investments in equity securities with or without readily determinable fair values if we lack a significant influence, which generally results when we hold less than 20 % of the common stock of an entity. Under accounting for investments in equity securities with readily determinable fair values, the investments are reported based on quoted prices in active markets and realized and unrealized gains and losses are included in earnings. Under accounting for investments in equity securities without readily determinable fair values, the investments are reported at cost adjusted for changes & lt; / span & gt; & lt; / div & gt; & lt; div style="margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style="color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; from observable transactions for identical or similar investments of the same issuer, less impairment, and changes in measurement are reported in earnings. & lt; / span & gt; & lt; / div & gt; & lt; div style="margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style="color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 700; line- height: 120 %" & gt; Separation from Exelon & lt; / span & gt; & lt; / div & gt; & lt; div style="margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style="color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; On February 1, 2022, Exelon completed the separation through a pro- rata distribution of all of the outstanding shares of our common stock, no par value, on the basis of one such share for every three shares of Exelon common stock held on January 20, 2022, the record date of the distribution. Areas in which significant estimates have been made include, but are not limited to, the accounting for nuclear decommissioning costs and other AROs, pension and OPEB plans, inventory reserves, allowance for credit losses, long- lived asset valuations and impairment assessments, derivative instruments, goodwill, unamortized energy contracts, fixed asset depreciation, environmental costs and other loss contingencies, taxes and unbilled energy revenues. We recognize revenue from contracts with customers to depict the transfer of goods or services to customers in an amount that we expect to be entitled to in exchange for those goods or services. At the end of each reporting period, we accrue an estimate for the unbilled amount of power and natural gas delivered or services provided to customers. & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- style: italic; font- weight: 700; line- height: 120 %" & gt; Commodity Derivatives. & lt; / span & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; Derivative instruments are generally recorded at fair value with subsequent changes in fair value recognized as realized and unrealized revenue or expense. The classification of revenue or expense is based on the intent of the transaction. Some of these taxes are imposed on the customer, but paid by us, while others are imposed on us. Where these taxes are imposed on the customer, such as sales taxes, they are reported on a net basis in revenues. However, where these taxes are imposed on us, such as gross receipts taxes, they are reported on a gross basis in expense. Accordingly, revenues are recognized for the taxes collected from customers along with an offsetting expense in Taxes other than income taxes in the Consolidated Statements of Operations and Comprehensive Income. Operating lease ROU assets are included in Other deferred debits and other assets and operating lease liabilities are included in Other current liabilities and Other deferred credits and other liabilities on the Consolidated Balance Sheets. The ROU asset is measured as the sum of (1) the present value of all remaining fixed and in- substance fixed payments using the rate implicit in the lease whenever that is readily determinable or our incremental borrowing rate, (2) any lease payments made at or before the commencement date (less any lease incentives received) and (3) any initial direct costs incurred. The lease liability is measured the same as the ROU asset, but excludes any payments made before the commencement date and initial direct costs incurred. Lease terms include options to extend or terminate the lease if it is reasonably certain they will be exercised. We include non- lease components for most asset classes, which are service- related costs that are not integral to the use of the asset, in the measurement of the ROU asset and lease liability. & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; Expense for operating leases and leases with a term of one year or less is recognized on a straight- line basis over the term of the lease, unless another systematic and rational basis is more representative of the derivation of benefit from use of the leased property. Variable lease payments are recognized in the period in which the related obligation is incurred and consist primarily of payments for purchases of electricity under contracted generation that are based on the electricity produced by those generating assets. Operating lease expense and variable lease payments are recorded to Purchased power and fuel expense for contracted generation or Operating and maintenance expense for all other lease agreements in the Consolidated Statements of Operations and Comprehensive Income. & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; Income from operating leases, including subleases, is recognized on a straight- line basis over the term of the lease, unless another systematic and rational basis is more representative of the pattern in which income is earned over the term of the lease. Variable lease payments are recognized in the period in which the related obligation is performed and consist primarily of payments received from sales of electricity under contracted generation that are based on the electricity produced by those generating assets. Operating lease income and variable lease payments are recorded to Operating revenues in the Consolidated Statements of Operations and Comprehensive Income. & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; Our operating leases consist primarily of contracted generation, real estate including office buildings, and vehicles and equipment. We generally account for contracted generation in which the generating asset is not renewable as a lease if the customer has dispatch rights and obtains substantially all the economic benefits. We & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; generally do not account for contracted generation in which the generating asset is renewable as a lease if the customer does not design the generating asset. ITCs have been deferred in the Consolidated Balance Sheets and are recognized in book income over the life of the related property. We account for uncertain income tax positions using a benefit recognition model with a two- step approach; a more- likely- than- not recognition criterion; and a measurement approach that measures the position as the largest amount of tax benefit that is greater than 50 % likely of being realized upon ultimate settlement. If it is not more- likely- than- not that the benefit of the tax position will be sustained on its technical merits, no benefit is recorded. Uncertain tax positions that relate only to timing of when an item is included on a tax return are considered to have met the recognition threshold. We recognize accrued interest related to unrecognized tax benefits in Interest expense, net or Other, net (interest income) and recognize penalties related to unrecognized tax benefits in Other, net in the Consolidated Statements of Operations and Comprehensive Income. & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 700; line- height: 120 %" & gt; Cash and Cash Equivalents & lt; / span & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- style: italic; font- weight: 700; line- height: 120 %" & gt; & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; We consider investments purchased with an original maturity of three months or less to be cash equivalents. & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 700; line- height: 120 %" & gt; Restricted Cash and Cash Equivalents & lt; / span & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- style: italic; font- weight: 700; line- height: 120 %" & gt; & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; Restricted cash and cash equivalents represent funds that are restricted to satisfy designated current liabilities. The allowance for credit losses for our wholesale customers is developed using a credit monitoring process, like that used for retail customers. When a wholesale customer & # x2019; s risk characteristics are no longer aligned with the pooled population, we use specific identification to develop an allowance for credit losses. Adjustments to the allowance for credit losses are recorded in Operating and maintenance expense in the Consolidated Statements of Operations and Comprehensive Income. & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; We have certain non- customer receivables in Current Assets and Other deferred debits and other assets which primarily are with governmental agencies. Acquired cost includes construction- related direct labor and material costs. When appropriate, acquired cost also includes capitalized interest. Costs associated with nuclear outages and planned major maintenance activities, are expensed to Operating and maintenance expense or capitalized to Property, plant, and equipment based on the nature of the activities in the period incurred. Upon replacement of an asset, the costs to remove the asset, net of salvage, are capitalized to gross plant when incurred as part of the cost of the newly installed asset and recorded to depreciation expense over the life of the new asset. Removal costs, net of salvage, incurred for property that will not be replaced is charged to Operating and maintenance expense as incurred. Such capitalized amounts are amortized ratably over the expected lives of the projects when they become operational, generally not to exceed five years. & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- style: italic; font- weight: 700; line- height: 120 %" & gt; Capitalized Interest. & lt; / span & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; During construction, we capitalize the costs of debt funds. Most projects will use a debt rate calculated using the general corporate debt pool. In some cases, projects are specifically financed and use a project specific debt rate, which is excluded from the general corporate debt pool. Capitalization of debt funds is recorded as a charge to construction work in progress and as a non- cash credit to interest expense. Two methods of depreciating multiple asset groups exist: the group method and the composite method. The group method is typically for groups of assets that are largely homogenous and have approximately the same useful lives. The composite method is used when the assets are heterogeneous and have different lives. Under both methods, a reporting entity depreciates the assets over the average life of the assets in the group. The estimated service lives are based on a combination of depreciation studies, historical retirements, site licenses and management estimates of operating costs and expected future energy market conditions. See Note 7 & # x2014; Early Plant Retirements for additional information on the impacts of early plant retirements, Note 8 & # x2014; Property, Plant, and Equipment for additional information regarding depreciation, and Note 23 & # x2014; Supplemental Financial Information for additional information regarding nuclear fuel. & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 700; line- height: 120 %" & gt; Asset Retirement Obligations & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; We estimate and recognize a liability for our legal obligation to perform asset retirement activities even though the timing and / or methods of settlement may be conditional on future events. We generally update our nuclear decommissioning ARO annually, unless circumstances warrant more frequent updates, based on our annual evaluation of cost escalation factors and probabilities assigned to the multiple outcome scenarios within our probability- weighted discounted cash flow models. Our multiple outcome scenarios are generally based on decommissioning cost studies which are updated, on a rotational basis, for each of our nuclear units at least every five years, unless circumstances warrant more frequent updates. AROs are accreted throughout each year to reflect the time value of money for these present value obligations through a charge to Operating and maintenance expense in the Consolidated Statements of Operations and Comprehensive Income for Non- Regulatory Agreement Units and through an offsetting decrease in noncurrent payables related to Regulatory Agreement Units. Indicators of impairment may include a deteriorating business climate, including, but not limited to, declines in energy prices,

condition of the asset, or plans to dispose of a long- lived asset significantly before the end of its useful life. We determine if long- lived assets or asset groups are potentially impaired by comparing the undiscounted expected future cash flows to the carrying value when indicators of impairment exist. When the undiscounted cash flow analysis indicates a long- lived asset or asset group may not be recoverable, the amount of the impairment loss is determined by measuring the excess of the carrying amount of the long- lived asset or asset group over its fair value. Generally, pre- tax impairment losses are recorded in Operating and maintenance expense in the Consolidated Statements of Operations and Comprehensive Income. See Note 12 & # x2014; Asset Impairments for additional information. & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- style: italic; font- weight: 700; line- height: 120 %" & gt; Goodwill. & lt; / span & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; Goodwill represents the excess of the purchase price paid over the estimated fair value of the net assets acquired and liabilities assumed in the acquisition of a business. Goodwill is not amortized, but is tested for impairment at least annually or in an interim basis if an event occurs or circumstances change that would more likely than not reduce the fair value of a reporting unit below its carrying value. An impairment is recorded when the investment has experienced a decline in value that is other- than- temporary in nature. Additionally, if the entity in which we hold an investment recognizes an impairment loss, we would record their proportionate share of that impairment loss and evaluate the investment for an other- than- temporary decline in value. These impairment losses are recorded in Equity in (losses) earnings of unconsolidated affiliates in the Consolidated Statements of Operations and Comprehensive Income. & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- style: italic; font- weight: 700; line- height: 120 %" & gt; Equity Security Investments. & lt; / span & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; Equity investments with readily determinable fair values are measured and recorded at fair value with any changes in fair value recorded in Other, net in the Consolidated Statements of Operations and Comprehensive Income. Investments in equity securities without readily determinable fair values are qualitatively assessed for impairment each reporting period. NPNS are contracts where physical delivery is probable, quantities are expected to be used or sold in the normal course of business over a reasonable period and will not be financially settled. Revenues and expenses on derivative contracts that qualify, and are designated, as NPNS are recognized when the underlying physical transaction is completed. The plan obligations and costs of providing benefits under these plans were measured upon separation as of February 1, 2022 and remeasured as of December & # 160; 31, 2023 and 2022. The measurements involved various factors, assumptions, and accounting elections. The impact of assumption changes or experience different from that assumed on pension and OPEB obligations is recognized over time rather than immediately recognized in the Consolidated Statements of Operations and Comprehensive Income. Gains or losses more than the greater of ten percent of the PBO or the MRV of plan assets are amortized over the expected average remaining service period of plan participants. Gains or losses more than the greater of ten percent of the APBO or the MRV of plan assets are amortized over the average future remaining lifetime of the current inactive population for the OPEB plans. & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; We report the pension and OPEB service cost and non- service cost (credit) components of net periodic benefit costs (credits) for all plans separately in our Consolidated Statements of Operations and Comprehensive Income. & lt; / span & gt; & lt; span style =" background- color: # ffffff; color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; Effective & lt; / span & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; February 1, 2022 & lt; / span & gt; & lt; span style =" background- color: # ffffff; color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt;, the service cost component continues to be included in Operating and maintenance expense and Property, plant, and equipment, net (where criteria for capitalization of direct labor has been met) while the non- service cost (credit) components are included in Other, net, in accordance with single employer plan accounting. & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 700; line- height: 120 %" & gt; Renewable Energy Credits & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; RECs are included in Renewable energy credits in the Consolidated Balance Sheets. Purchased RECs are recorded at cost on the date they are purchased and internally generated RECs are recognized at a zero- cost basis when generated. The cost of RECs purchased on a stand- alone basis is based on the transaction price, while the cost of RECs acquired through PPAs represents the difference between the total contract price and the market price of energy at contract inception. Generally, revenue for RECs that are sold to a counterparty under a contract that specifically identifies a power plant are recognized at a point in time when the power is produced. This includes both bundled and unbundled REC sales. Otherwise, the revenue is recognized upon physical transfer of the REC to the customer. & lt; / span & gt; & lt; / div & gt; < / us- gaap: BasisOfPresentationAndSignificantAccountingPoliciesTextBlock > < us- gaap: NumberOfReportableSegments contextRef =" c- 1" decimals =" INF" id =" f- 902" unitRef =" segment" > 5 < / us- gaap: NumberOfReportableSegments > < us- gaap: BasisOfAccountingPolicyPolicyTextBlock contextRef =" c- 1" id =" f- 903" > & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 700; line- height: 120 %" & gt; Basis of Presentation & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" background- color: # ffffff; color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; On February 21, 2021, the Board of Directors of Exelon authorized management to pursue a plan to separate its competitive generation and customer- facing energy businesses, conducted through Constellation Energy Generation, LLC (& lt; / span & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; & # x201c; & lt; / span & gt; & lt; span style =" background- color: # ffffff; color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; Constellation & lt; / span & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; & # x201d; & lt; / span & gt; & lt; span style =" background- color: # ffffff; color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt;, formerly Exelon Generation Company, LLC) and its subsidiaries, into an independent, publicly- traded company. & lt; / span & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; CEG Parent, & lt; / span & gt; & lt; span style =" background- color: # ffffff; color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; a direct, wholly owned subsidiary of Exelon, was newly formed for the purpose of separation and had not engaged in any business activities nor had any assets or liabilities prior to the separation. Where we do not have a controlling financial interest in an entity, proportionate consolidation, equity method accounting or accounting for investments in equity securities with or without readily determinable fair value is applied. We apply proportionate consolidation when we have an undivided interest in an asset and are proportionately liable for our share of each liability associated with the asset. We proportionately consolidate our undivided ownership interest in jointly owned electric plants. Under proportionate consolidation, we separately record our proportionate share of the assets, liabilities, revenues and expenses related to the undivided interest in the asset. See Note 9 & # x2014; Jointly Owned Electric Plant for additional information on application of proportionate consolidation. Under equity method accounting, we report our interest in the entity as an investment and our percentage share of the earnings from the entity as single line items in our consolidated financial statements. We use accounting for investments in equity securities with or without readily determinable fair values if we lack a significant influence, which generally results when we hold less than 20 % of the common stock of an entity. Under accounting for investments in equity securities with readily determinable fair values, the investments are reported based on quoted prices in active markets and realized and unrealized gains and losses are included in earnings. Under accounting for investments in equity securities without readily determinable fair values, the investments are reported at cost adjusted for

Operating lease expense and variable lease payments are recorded to Purchased power and fuel expense for contracted generation or Operating and maintenance expense for all other lease agreements in the Consolidated Statements of Operations and Comprehensive Income. & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; Income from operating leases, including subleases, is recognized on a straight- line basis over the term of the lease, unless another systematic and rational basis is more representative of the pattern in which income is earned over the term of the lease. Variable lease payments are recognized in the period in which the related obligation is performed and consist primarily of payments received from sales of electricity under contracted generation that are based on the electricity produced by those generating assets. Operating lease income and variable lease payments are recorded to Operating revenues in the Consolidated Statements of Operations and Comprehensive Income. & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; Our operating leases consist primarily of contracted generation, real estate including office buildings, and vehicles and equipment. We generally account for contracted generation in which the generating asset is not renewable as a lease if the customer has dispatch rights and obtains substantially all the economic benefits. We & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; generally do not account for contracted generation in which the generating asset is renewable as a lease if the customer does not design the generating asset. ITCs have been deferred in the Consolidated Balance Sheets and are recognized in book income over the life of the related property. We account for uncertain income tax positions using a benefit recognition model with a two- step approach; a more- likely- than- not recognition criterion; and a measurement approach that measures the position as the largest amount of tax benefit that is greater than 50 % likely of being realized upon ultimate settlement. If it is not more- likely- than- not that the benefit of the tax position will be sustained on its technical merits, no benefit is recorded. Uncertain tax positions that relate only to timing of when an item is included on a tax return are considered to have met the recognition threshold. We recognize accrued interest related to unrecognized tax benefits in Interest expense, net or Other, net (interest income) and recognize penalties related to unrecognized tax benefits in Other, net in the Consolidated Statements of Operations and Comprehensive Income. & lt; / span & gt; & lt; / div & gt; < / us- gaap: IncomeTaxPolicyTextBlock > < us- gaap: CashAndCashEquivalentsPolicyTextBlock contextRef =" c- 1" id =" f- 923" > & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 700; line- height: 120 %" & gt; Cash and Cash Equivalents & lt; / span & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- style: italic; font- weight: 700; line- height: 120 %" & gt; & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; We consider investments purchased with an original maturity of three months or less to be cash equivalents. & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 700; line- height: 120 %" & gt; Restricted Cash and Cash Equivalents & lt; / span & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- style: italic; font- weight: 700; line- height: 120 %" & gt; & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; Restricted cash and cash equivalents represent funds that are restricted to satisfy designated current liabilities. Two methods of depreciating multiple asset groups exist: the group method and the composite method. The group method is typically for groups of assets that are largely homogenous and have approximately the same useful lives. The composite method is used when the assets are heterogeneous and have different lives. Under both methods, a reporting entity depreciates the assets over the average life of the assets in the group. The estimated service lives are based on a combination of depreciation studies, historical retirements, site licenses and management estimates of operating costs and expected future energy market conditions. We generally update our nuclear decommissioning ARO annually, unless circumstances warrant more frequent updates, based on our annual evaluation of cost escalation factors and probabilities assigned to the multiple outcome scenarios within our probability- weighted discounted cash flow models. Our multiple outcome scenarios are generally based on decommissioning cost studies which are updated, on a rotational basis, for each of our nuclear units at least every five years, unless circumstances warrant more frequent updates. AROs are accreted throughout each year to reflect the time value of money for these present value obligations through a charge to Operating and maintenance expense in the Consolidated Statements of Operations and Comprehensive Income for Non-Regulatory Agreement Units and through an offsetting decrease in noncurrent payables related to Regulatory Agreement Units. Indicators of impairment may include a deteriorating business climate, including, but not limited to, declines in energy prices, condition of the asset, or plans to dispose of a long- lived asset significantly before the end of its useful life. We determine if long- lived assets or asset groups are potentially impaired by comparing the undiscounted expected future cash flows to the carrying value when indicators of impairment exist. When the undiscounted cash flow analysis indicates a long- lived asset or asset group may not be recoverable, the amount of the impairment loss is determined by measuring the excess of the carrying amount of the long- lived asset or asset group over its fair value. Generally, pre- tax impairment losses are recorded in Operating and maintenance expense in the Consolidated Statements of Operations and Comprehensive Income. Other owners include City Public Service Board of San Antonio (CPS, 40 %) and the City of Austin, Texas (Austin Energy, 16 %). This acquisition is complementary to and aligned strategically with our existing clean energy business operations. & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; As part of the transaction, we acquired ownership of two decommissioning trust funds established to provide funding for decontamination and decommissioning of STP. The trust funds have been funded with amounts collected from predecessor utilities. We maintain the ability to collect additional funds from utility customers in the event of a shortfall and are required to return any excess funds to utility customers upon completion of decommissioning. As such, our accounting for the future decommissioning of our interest in STP will mirror that of our existing Regulatory Agreement Units. See Note 1 & # x2014; Basis of Presentation and Note 10 & # x2014; Asset Retirement Obligations for additional information on our accounting policy for Regulatory Agreement Units. & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; The acquisition was accounted for using the acquisition method of accounting in accordance with authoritative guidance, which requires, among other things, the assets acquired and liabilities assumed to be recognized at their respective fair value as of the acquisition date. The excess of the purchase price over fair value of our proportionate share of the assets acquired and liabilities assumed was recorded to goodwill. The goodwill recognized is primarily driven by the opportunity for continued operations through 80 years and the value of STP & # x2019; s carbon- free energy that is not fully reflected by the markets. The goodwill amount has been assigned entirely to the ERCOT operating segment. See Note 13 & # x2014; Intangible Assets for additional information. The total amount of goodwill is expected to be deductible for tax purposes over the amortization period. & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; The fair values of STP & # x2019; s assets and liabilities were determined based on significant estimates and assumptions that are judgmental in nature, including projected future cash flows (including timing), discount rates reflecting risk inherent in the future cash flows and future power and fuel market prices. Accounting guidance provides that the allocation of the purchase price may be modified up to one year from the date of the acquisition to the extent that additional information is obtained about the facts and circumstances that existed as of the acquisition date. Any changes could result in a change in the amount of goodwill recorded. & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; On July 31, 2023 we intervened in the lawsuit and Austin Energy also intervened in the lawsuit claiming a similar right of first refusal. Per the terms of the Equity Purchase Agreement, NRG made representations that no right of first refusal applied to the transaction contemplated between us. & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; Separately, on July 31, 2023, San Antonio and Austin filed motions to dismiss and (in the alternative) immediately stay proceedings and petitions to intervene on the application for June 12, 2023 license transfer application that was filed with the NRC. These motions and petitions remain pending before the NRC. Notwithstanding this, the NRC issued approval of the license transfer application on October 30, 2023. However, the NRC staff & # x2019; s approval of the license transfer is subject to the Commission & # x2019; s authority to rescind, modify, or condition the approved transfer based on the outcome of any post- effectiveness hearing or motions on the license transfer application. On February 20, 2024, we (along with San Antonio, Austin and NRG) jointly filed a motion to stay of the issuance of a decision by the NRC on the pending petition and motions. The motion requested that the NRC stay any decision so that the parties can attempt to finalize a settlement agreement that would result in the withdrawal of San Antonio & # x2019; s pending petition and motions. & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; The ongoing legal proceedings did not prohibit NRG and CEG from consummating the transaction, and Constellation is working with all parties to reach a resolution to the matter. On November 20, 2019, we received notice of EDF & # x2019; s intention to exercise the put option, and the put automatically exercised on January 19, 2020 at the end of the sixty- day advance notice period. The transaction required approval by FERC and the NYPSC, which approvals were received on July 30, 2020 and April 15, 2021, respectively. On August 6, 2021, we entered into a settlement agreement pursuant to which we purchased EDF' s equity interest in CENG for a net purchase price of $ 885 million, which included, among other things, an adjustment for EDF' s share of the outstanding balance of the preferred distribution payable to us by CENG. The difference between the net purchase price and EDF' s noncontrolling interest as of August 6, 2021 was recorded to Membership interest in the Consolidated Balance Sheet. As a result of the transaction, we also recorded deferred tax liabilities of $ 288 & # 160; million in Membership interest in the Consolidated Balance Sheet. A significant portion of PJM' s fossil generation fleet failed to perform as reserves were called. In accordance with PJM' s tariff, funds collected from non- performance charges are redistributed as bonuses to generating resources that overperformed during the event, including our nuclear fleet. Complaints were filed at FERC by underperforming generators alleging, among other things, that PJM & # x2019; s tariff is unjust and unreasonable, and that PJM violated its tariff or otherwise acted negligently in operating the system during that period, seeking to reduce or eliminate any penalty. In 2023, a proposed settlement was filed with FERC, and FERC subsequently approved the settlement as uncontested. We recognized $ 120 & # 160; million and $ 109 & # 160; million for bonuses (pre- tax), net of non- performance charges, in 2023 and 2022, respectively, associated with this event, primarily driven by the overperformance of our nuclear fleet. Remaining amounts on our balance sheet as of December & # 160; 31, 2023 associated with this event are not material. & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 700; line- height: 120 %" & gt; New England Regulatory Matters & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- style: italic; font- weight: 700; line- height: 120 %" & gt; Mystic Units 8 and 9 Cost of Service Agreement. & lt; / span & gt; & lt; span style =" color: # 008080; font- family:' Arial', sans- serif; font- size: 12pt; font- weight: 400; line- height: 120 %" & gt; & lt; / span & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; On December 20, 2018, FERC issued an order accepting a cost of service agreement for Mystic Units 8 and 9 for the period between June 1, 2022 to May 31, 2024. The agreement is intended to preserve the two units for the two- year period while allowing the Mystic units to recover their costs of operating, including a substantial portion of the costs associated with the adjacent EMT we acquired in October 2018. & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; In 2020, FERC issued several orders that, together, affirmed the recovery of key elements of Mystic' s cost of service compensation, including recovery of costs associated with the operation of EMT. Several parties appealed the orders to the U. S. Court of Appeals for the D. C. Circuit. On August 23, 2022, the court issued its opinion and remanded several issues back to FERC, including the amount of the EMT & # x2019; s fixed costs that can be recovered via the Mystic COS. & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; On March 28, 2023, FERC issued an order on remand from the D. C. Circuit & # x2019; s August 2022 decision (FERC Remand Order). Among other things, the FERC Remand Order affirmed that 91 % of EMT & # x2019; s fixed costs will be & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; recovered via the Mystic COS, subject to the reinstatement of a margin sharing mechanism on forward sales of vapor. & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; The Mystic COS requires an annual process whereby we identify and support our projected costs under the agreement and / or true- up previous projections to the actual costs incurred. The first annual process resulted in a filing at FERC on September 15, 2021 and included our projection of capital expenditures to be recovered under the Mystic COS between June 1, 2022 and December 31, 2022. On April 28, 2022, FERC issued an order setting for settlement and / or hearing the issue of whether our projected 2022 capital expenditures can be recovered. A settlement was filed at FERC in March 2023 and was approved by FERC on August 1, 2023. The settlement reduces the recovery we receive for capital projects over the term of the Mystic COS. The settlement also eliminates the potential that we would need to return EMT capital expenditures that were recovered via COS if EMT continues operating after the Mystic COS terminates. The approval of this offer of settlement does not have a material financial statement impact. On September 15, 2022, we made our second annual filing at FERC. On December 5, 2023, FERC issued an order setting for settlement / hearing certain components of the second annual filing, including the issue of Mystic & # x2019; s recovery of historical rate base costs. We cannot reasonably predict the outcome of the settlement and / or hearing. & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; See Note 7 & # x2014; Early Plant Retirements and Note 12 & # x2014; Asset Impairments for additional information on the impacts of our August 2020 decision to retire Mystic Units 8 and 9 upon expiration of the cost of service agreement. & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 700; line- height: 120 %" & gt; Federal Regulatory Matters & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- style: italic; font- weight: 700; line- height: 120 %" & gt; Inflation Reduction Act of 2022. & lt; / span & gt; & lt; span style =" color: # 008080; font- family:' Arial', sans- serif; font- size: 12pt; font- weight: 700; line- height: 120 %" & gt; & lt; / span & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; On August 16, 2022, President Biden signed into law the IRA, which, among other things, includes federal tax credits, certain of which are transferable or fully refundable, for a number of clean energy technologies including existing nuclear plants. The nuclear PTC recognizes the contributions of carbon- free nuclear power by providing a federal tax credit of up to $ 15 / MWh, subject to phase- out, beginning in 2024 and continuing through 2032. The nuclear PTC includes adjustments for inflation. With the nuclear PTC policy support, we expect that many of our nuclear assets will operate through the end of the nuclear PTC period. Further, the IRA includes a 15 % book- minimum tax on applicable corporations that we do not expect to have a material impact to our consolidated financial statements. The U. S. Department of Treasury has begun the process of issuing guidance on the relevant tax provisions included in the legislation but has not yet addressed the nuclear PTC. & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 700; line- height: 120 %" & gt; Operating License Renewals & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- style: italic; font- weight: 700; line- height: 120 %" & gt; Conowingo Hydroelectric Project. & lt; / span & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 700; line- height: 120 %" & gt; & lt; / span & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; In & lt; / span & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 700; line- height: 120 %" & gt; & lt; / span & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; 2012, we submitted an application to FERC for a new license for the Conowingo Hydroelectric Project (Conowingo). In connection with our efforts to obtain a water quality certification pursuant to Section 401 of the Clean Water Act (401 Certification) from MDE for Conowingo, we had been working with MDE and other stakeholders to resolve water quality licensing issues, including: (1) water quality, (2) fish habitat, and (3) sediment. & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; In 2019, we and MDE filed with FERC a Joint Offer of Settlement (Offer of Settlement) that would resolve all outstanding issues relating to the 401 Certification. FERC subsequently issued a new 50- year license for Conowingo, effective March 1, 2021. Several environmental groups appealed FERC & # x2019; s ruling to the U. S. Court of Appeals for the D. C. Circuit. The court of appeals issued a decision vacating FERC & # x2019; s decision to grant Conowingo its license renewal and sending the matter back to FERC for further proceedings. Upon issuance of the mandate from the U. S. Court of Appeals for the D. C. Circuit, we began operating under an annual license, which renews automatically, containing the same terms as the license that was in effect prior to the 2021 FERC order. & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; MDE informed us that as a result of the U. S. Court of Appeals decision, they would be resuming their administrative reconsideration of the 401 Certification. In response to the procedure outlined by the MDE, supplemental briefs on the 401 Certification were filed by the Lower Susquehanna Riverkeeper Association and Waterkeepers Chesapeake (jointly) and us. In addition, we filed a supplemental reply brief. We are unable to further predict the outcome of this proceeding at this time. Depreciation provisions continue to assume operation through 2071 given our expectation that a 50- year license will be issued. & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- style: italic; font- weight: 700; line- height: 120 %" & gt; Peach Bottom Units 2 and 3. & lt; / span & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; On March 6, 2020, the NRC approved a second 20- year license renewal for Peach Bottom Units 2 and 3. As a result, Peach Bottom Units 2 and 3 were granted the authority to operate through 2053 and 2054, respectively. & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; Notwithstanding its 2020 approval, on February 24, 2022, the NRC took action to modify Peach Bottom' s subsequently renewed licenses in response to a request for hearing that the NRC had not previously adjudicated. In its February 2022 decision, the NRC reversed itself and concluded that the previous environmental review required by the National Environmental Policy Act (NEPA) for the Peach Bottom subsequently renewed licenses was incomplete because it did not adequately address environmental impacts resulting from renewing the units & # x2019; licenses for an additional 20 years. As a result, the NRC has undertaken a rulemaking to modify its regulations and guidance to specifically address environmental impacts during the period of subsequent license renewal. In addition, the NRC modified the expiration dates for the Peach Bottom licenses from 2053 and 2054 to 2033 and 2034, respectively, pending the completion of the updated NEPA analysis. We expect that the license expiration dates will be restored to 2053 and 2054, respectively, once the NRC' s reevaluation of environmental impacts resulting from subsequent license renewal is complete. In September 2023, the NRC announced that its schedule to complete the rulemaking has delayed by several months and now intends to be complete by August 2024. This delay does not alter our expectation that the license expiration dates for Peach Bottom will be restored. Depreciation provisions and ARO assumed retirement dates continue to assume Peach Bottom Units 2 and 3 will operate through 2053 and 2054, respectively, given our expectation that the previously approved expiration dates will be restored. & lt; / span & gt; & lt; / div & gt; < / us- gaap: PublicUtilitiesDisclosureTextBlock > < ceg: NonPerformanceChargesRedistributedBonuses contextRef =" c- 1" decimals =" - 6" id =" f- 986" unitRef =" usd" > 120000000 < / ceg: NonPerformanceChargesRedistributedBonuses > < ceg: NonPerformanceChargesRedistributedBonuses contextRef =" c- 11" decimals =" - 6" id =" f- 987" unitRef =" usd" > 109000000 < / ceg: NonPerformanceChargesRedistributedBonuses > < ceg: OperatingLicenseRenewalPeriod contextRef =" c- 143" id =" f- 989" > P20Y < / ceg: OperatingLicenseRenewalPeriod > < ceg: OperatingLicenseRenewalPeriod contextRef =" c- 143" id =" f- 988" > P20Y < / ceg: OperatingLicenseRenewalPeriod > < ceg: OperatingLicenseRenewalPeriod contextRef =" c- 143" id =" f- 990" > P20Y < / ceg: OperatingLicenseRenewalPeriod > < us- gaap: RevenueFromContractWithCustomerTextBlock contextRef =" c- 1" id =" f- 991" > Revenue from Contracts with Customers & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; We recognize revenue from contracts with customers to depict the transfer of goods or services to customers at an amount that we expect to be entitled to in exchange for those goods or services. Our primary sources of revenue include competitive sales of power, natural gas, and other energy- related products and sustainable solutions. The performance obligations, revenue recognition, and payment terms associated with these sources of revenue are further discussed in the table below. We record contract liabilities in Other current liabilities and Other deferred credits and other liabilities in the Consolidated Balance Sheets. These contract liabilities primarily relate to upfront consideration received or due for equipment service plans, the Mystic COS, and the Illinois ZEC program. The Mystic COS includes upfront consideration received or due that differs from the recognized earnings over the cost of the service period. The Illinois ZEC program introduces an annual cap on the total consideration to be received by us for each delivery period. The ZEC price is established on a per MWh of production basis with a maximum annual cap for total compensation to be received for each planning year, while requiring delivery of all ZECs produced by our participating facilities during each delivery period. ZECs delivered to Illinois utilities in excess of the annual cost cap may be paid in subsequent years if the payments do not exceed the prescribed annual cost cap for that year. There were no outstanding contract liabilities for the Illinois ZEC program as of December & # 160; 31, 2023, and were not material as of December & # 160; 31, 2022. & lt; / span & gt; & lt; / div & gt; ZECs delivered that, if paid, would result in the annual cap being exceeded may be paid in subsequent years at the vintage year price as long as the payments would not exceed the annual cap in the year paid. In each planning year since the program commenced on June 1, 2017, we delivered ZECs to the utilities in excess of the annual compensation cap. & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; The ZEC price and annual compensation cap effective for each planning year are administratively determined by the IPA. For the June 1, 2023 to May 31, 2024 planning year the ZEC price has been established at $ 0. 30 per ZEC, subject to an annual cap of $ 224 & # 160; million. ZECs generated and delivered during this planning year will not exceed the annual cap, providing capacity to compensate for ZECs delivered in prior planning years in excess of the compensation cap. In 2023, we recognized $ 218 & # 160; million of revenue as a receivable for ZECs delivered in prior planning years, with payment expected in the third quarter of 2024. As of December & # 160; 31, 2023, this receivable is included within Customer accounts receivable, net in the Consolidated Balance Sheets. & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- style: italic; font- weight: 700; line- height: 120 %" & gt; PJM Performance Bonuses & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; For the year ended December & # 160; 31, 2023, we recognized a benefit of $ 120 & # 160; million (pre- tax) for performance bonuses (net of non- performance charges), primarily driven by the overperformance of our nuclear fleet during the 2022 winter storm Elliott. line- height: 120 %" & gt; The CODM evaluates the performance of our electric business activities and allocates resources based on Operating revenues net of Purchased power and fuel expense (RNF). We believe this is a useful measurement of operational performance, although it is not a presentation defined under GAAP and may not be comparable to other companies & # x2019; presentations or deemed more useful than the GAAP information provided elsewhere in this report. Our operating revenues include all sales to third parties and affiliate sales to Exelon' s utility subsidiaries, prior to the separation on February 1, 2022. Purchased power costs include all costs associated with the procurement and supply of electricity including capacity, energy, and ancillary services. Fuel expense includes the fuel costs for our owned generation and fuel costs associated with tolling agreements. The results of our other business activities are not regularly reviewed by the CODM and are therefore not classified as operating segments or included in the regional reportable segment amounts. These activities include wholesale and retail sales of natural gas, energy- related sales in the United Kingdom, as well as sales of other energy- related products and sustainable solutions that are not significant to our overall results of operations. Further, our unrealized mark- to- market gains and losses on economic hedging activities and our amortization of certain intangible assets and liabilities relating to commodity contracts recorded at fair value from mergers and acquisitions are also excluded from the regional reportable segment amounts. The CODM does not use a measure of total assets in making decisions regarding allocating resources to or assessing the performance of these reportable segments. & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; The following tables disaggregate the revenue recognized from contracts with customers into categories that depict how the nature, amount, timing, and uncertainty of revenue and cash flows are affected by economic factors. The disaggregation of revenues reflects our two primary products of power sales and natural gas sales, with further disaggregation of power sales provided by geographic region. & lt; / span & gt; & lt; & gt; On April 8, 2020, NER, a bankruptcy remote, special purpose entity, which is wholly owned by us, entered into a revolving accounts receivable financing arrangement with a number of financial institutions and a commercial paper conduit (Purchasers) to sell certain customer accounts receivable (Facility). On August 16, 2022, we entered into an amendment on the Facility, which increased the maximum funding limit of the Facility from $ 900 million to $ 1. 1 billion and extended the term of the Facility through August 15, 2025, unless renewed by the mutual consent of the parties in accordance with its terms. Under the Facility, NER may sell eligible short- term customer accounts receivable to the Purchasers in exchange for cash and subordinated interest. The transfers are reported as sales of receivables in the consolidated financial statements. The subordinated interest in collections upon the receivables sold to the Purchasers is referred to as the DPP, which is reflected in Other current assets in the Consolidated Balance Sheets. & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; The Facility requires the balance of eligible receivables to be maintained at or above the balance of cash proceeds received from the Purchasers. To the extent the eligible receivables decrease below such balance, we are required to repay cash to the Purchasers. When eligible receivables exceed cash proceeds, we have the ability to increase the cash received up to the maximum funding limit. These cash inflows and outflows impact the DPP. & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; We remain committed to continued operations for our nuclear plants receiving state- supported payments under the Illinois CMC (Byron, Dresden, and Braidwood), Illinois ZES (Clinton and Quad Cities), New Jersey ZEC program (Salem), and the New York CES (FitzPatrick, Ginna, and Nine Mile Point), assuming the continued effectiveness of each program. While the current ZEC & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 0pt; margin- top: 0pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; program in New York ends in 2029, the state has acknowledged our nuclear assets are vital to achieving its clean energy goals and we believe New York will continue to promote policies that support nuclear in the state beyond 2029. With the passage of the IRA, we expect that many of our nuclear assets will operate at least through the end of the nuclear PTC period, concluding at the end of 2032. To enable long term operations, we plan to file applications to extend the licenses of our nuclear fleet to 80 years for the units that receive continued support under federal or state policies or a combination of both. On September 15, 2021, we announced that we had reversed our previous decision to retire Byron and Dresden given the opportunity for additional revenue under the Illinois Clean Energy Law. In addition, we updated the expected economic useful life for both facilities to 2044 and 2046, for Byron Units 1 and 2, respectively, and to 2029 and 2031 for Dresden Units 2 and 3, respectively, the end of the respective NRC operating license for each unit. Depreciation was therefore adjusted beginning September 15, 2021, to reflect these extended useful life estimates. ARO accretion, ARC depreciation, ARO remeasurement, and excludes any changes in earnings in the NDT funds. Decommissioning- related impacts were not offset for the Byron units starting in the second quarter of 2021 due to the inability to recognize a regulatory asset at ComEd. With our September 15, 2021 reversal of the previous decision to retire Byron, we resumed contractual offset for Byron as of that date. Based on the regulatory agreement with the ICC, decommissioning- related activities are offset in the Consolidated Statements of Operations and Comprehensive Income as long as the net cumulative decommissioning- related activity result in a regulatory liability at ComEd. The offset resulted in an equal adjustment to the noncurrent payables to ComEd. Thereafter, ISO- NE identified Mystic 8 and 9 as being needed to ensure fuel security for the region and entered into a cost of service agreement with these two units for the period between June 1, 2022 to May 31, 2024. The agreement was approved by FERC in December 2018. In August 2020, we announced we will permanently cease generation operations at Mystic 8 and 9 at the expiration of the cost of service commitment in May 2024. See Note 3 & # x2014; Regulatory Matters for additional discussion of Mystic & # x2019; s cost of service agreement. The annual financial impacts stemming from shortening the expected economic useful life of Mystic 8 and 9 were not material to the periods presented. < / ceg: ImplicationsOfPotentialEarlyRetirementDisclosureTextBlock > < ceg: OperatingLicenseRenewalPeriod contextRef =" c- 274" id =" f- 1272" > P80Y < / ceg: OperatingLicenseRenewalPeriod > < us- gaap: SeveranceCosts1 contextRef =" c- 275" decimals =" - 6" id =" f- 1273" unitRef =" usd" > - 81000000 < / us- gaap: SeveranceCosts1 > < us- gaap: AssetRetirementObligationRevisionOfEstimate contextRef =" c- 275" decimals =" - 6" id =" f- 1274" unitRef =" usd" > - 13000000 < / us- gaap: AssetRetirementObligationRevisionOfEstimate > < us- gaap: ScheduleOfRestructuringAndRelatedCostsTextBlock contextRef =" c- 1" id =" f- 1275" > & lt; Based on the regulatory agreement with the ICC, decommissioning- related activities are offset in the Consolidated Statements of Operations and Comprehensive Income as long as the net cumulative decommissioning- related activity result in a regulatory liability at ComEd. The offset resulted in an equal adjustment to the noncurrent payables to ComEd. See Note 10- Asset Retirement Obligations for additional information. & lt; / span & gt; & lt; / div & gt; < / us- gaap: ScheduleOfRestructuringAndRelatedCostsTextBlock > < us- gaap: RestructuringReserveAcceleratedDepreciation contextRef =" c- 276" decimals =" - 6" id =" f- 1276" unitRef =" usd" > 1805000000 < / us- gaap: RestructuringReserveAcceleratedDepreciation > < ceg: NuclearFuelAmortization contextRef =" c- 276" decimals =" - 6" id =" f- 1277" unitRef =" usd" > 148000000 < / ceg: NuclearFuelAmortization > < ceg: OtherCostAndExpenseOperatingOneTimeChargesReversals contextRef =" c- 276" decimals =" - 6" id =" f- 1279" unitRef =" usd" > - 94000000 < / ceg: OtherCostAndExpenseOperatingOneTimeChargesReversals > < us- gaap: AssetRetirementObligationRevisionOfEstimate contextRef =" c- 276" decimals =" - 6" id =" f- 1280" unitRef =" usd" > - 9000000 < / us- gaap: AssetRetirementObligationRevisionOfEstimate > < ceg: AssetRetirementObligationContractualOffset > < us- gaap: RestructuringAndRelatedCostIncurredCost contextRef =" c- 276" decimals =" - 6" id =" f- 1281" unitRef =" usd" > 451000000 < / ceg: AssetRetirementObligationContractualOffset > < us- gaap: RestructuringAndRelatedCostIncurredCost contextRef =" c- 276" decimals =" - 6" id =" f- 1282" unitRef =" usd" > 1417000000 < / us- gaap: RestructuringAndRelatedCostIncurredCost > < us- gaap: PropertyPlantAndEquipmentDisclosureTextBlock contextRef =" c- 1" id =" f- 1283" > Property, Plant, and Equipment & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; The following table presents a summary of property, plant, and equipment by asset category as of December & # 160; 31, 2023 and 2022: & lt; / span & gt; & lt; / div & gt; & lt; div style =" text- align: justify" & gt; & lt; table style =" border- collapse: collapse; display: inline- table; margin- bottom: 5pt; vertical- align: text- bottom; width: 100. 000 %" & gt; & lt; tr & gt; & lt; td style =" width: 1. 0 %" & gt; & lt; / td & gt; & lt; td style =" width: 53. 733 %" & gt; & lt; / td & gt; & lt; td style =" width: 0. 1 %" & gt; & lt; / td & gt; & lt; td style =" width: 1. 0 %" & gt; & lt; / td & gt; & lt; td style =" width: 21. 066 %" & gt; & lt; / td & gt; & lt; td style =" width: 0. 1 %" & gt; & lt; / td & gt; & lt; td style =" width: 0. 633 %" & gt; & lt; / td & gt; & lt; td style =" width: 0. 1 %" & gt; & lt; / td & gt; & lt; td style =" width: 1. 0 %" & gt; & lt; / td & gt; & lt; td style =" width: 21. 068 %" & gt; & lt; / td & gt; & lt; td style =" width: 0. 1 %" & gt; & lt; / td & gt; & lt; / tr & gt; & lt; tr & gt; & lt; td colspan =" 3" style =" padding: 2px 1pt; text- align: left; vertical- align: bottom" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 7pt; font- weight: 700; line- height: 120 %" & gt; Asset Category & lt; / span & gt; & lt; / td & gt; & lt; td colspan =" 3" style =" padding: 2px 1pt; text- align: center; vertical- align: bottom" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 7pt; font- weight: 700; line- height: 120 %" & gt; December 31, 2023 & lt; / span & gt; & lt; / td & gt; & lt; td colspan =" 3" style =" padding: 0 1pt" & gt; & lt; / td & gt; & lt; td colspan =" 3" style =" padding: 2px 1pt; text- align: center; vertical- align: bottom" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 7pt; font- weight: 700; line- height: 120 %" & gt; December 31, 2022 & lt; / span & gt; & lt; / td & gt; & lt; / tr & gt; & lt; tr & gt; & lt; td colspan =" 3" style =" background- color: # ceeeff; padding: 2px 1pt; text- align: left; vertical- align: bottom" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; Electric & lt; / span & gt; & lt; / td & gt; & lt; td style =" background- color: # ceeeff; border- top: 1pt solid # 000; padding: 2px 0 2px 1pt; text- align: left; vertical- align: bottom" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; $ & lt; / span & gt; & lt; / td & gt; & lt; td style =" background- color: # ceeeff; border- top: 1pt solid # 000; padding: 2px 0; text- align: right; vertical- align: bottom" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; 32, 889 & # 160; & lt; / span & gt; & lt; / td & gt; & lt; td style =" background- color: # ceeeff; border- top: 1pt

Depreciation provisions for Clinton, Dresden Units 2 and 3, Ginna, NMP Unit 1, and Peach Bottom Units 2 and 3 all assume an additional 20 years beyond current license expiration. Conowingo depreciation provisions are based on an estimated useful life through 2071, in anticipation that a 50- year license will be issued. To estimate our nuclear decommissioning obligations we use a probability- weighted, discounted cash flow model which, on a unit- by- unit basis, considers multiple outcome scenarios that include significant estimates and assumptions, and are based on decommissioning cost studies, cost escalation rates, probabilistic cash flow models, and discount rates. We update our AROs annually, unless circumstances warrant more frequent updates, based on our review of updated cost studies and our annual evaluation of cost escalation factors and probabilities assigned to various scenarios. We began decommissioning the TMI nuclear plant upon permanently ceasing operations in 2019. See below for further discussion of the decommissioning of Zion Station. & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; The financial statement impact for changes in the ARO, on an individual unit basis, due to the changes in and timing of estimated cash flows generally result in a corresponding change in the unit & # x2019; s ARC in Property, plant, and equipment in the Consolidated Balance Sheets. PECO is authorized to collect funds, in revenues, through regulated rates for decommissioning the former PECO nuclear plants, and these collections are scheduled through the operating lives of these former PECO plants. The amounts collected from PECO customers are remitted to us and deposited into the NDT funds for the unit for which funds are collected. Every five years, PECO files a rate adjustment with the PAPUC that reflects PECO & # x2019; s calculations of the estimated amount needed to decommission each of the former PECO units based on updated fund balances and estimated decommissioning costs. The rate adjustment is used to determine the amount collectible from PECO customers. On March 31, 2022, PECO filed its Nuclear Decommissioning Cost Adjustment with the PAPUC proposing an annual recovery from customers of approximately $ 4 & # 160; million. On August 19, 2022, the PAPUC approved the filing, and the new rates became effective January 1, 2023. & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; Additionally, for the newly acquired STP units, we maintain decommissioning trust funds for those units proportionate to our 44 % ownership. We have recourse to collect additional amounts from the respective utility customers through the utility commissions for the former PECO units and STP in the event of a shortfall of NDT funds. Collection of additional amounts for the former PECO units are subject to certain limitations and thresholds, as prescribed by an order from the PAPUC that limits collection of amounts associated with the first $ 50 & # 160; million of any shortfall of trust funds compared to decommissioning costs, as well as 5 % of any additional shortfalls, on an aggregate basis for all former PECO units. The initial $ 50 & # 160; million and up to 5 % of any additional shortfalls would be borne by us. Aside from the former PECO units and STP, no recourse exists to collect additional amounts from utility customers for any of our other nuclear units. & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; With respect to the Regulatory Agreement Units, any funds remaining in the NDTs after all decommissioning has been completed are required to be refunded to the respective utility customers, subject to certain limitations that allow sharing of excess funds with us related to the former PECO units. With respect to our other nuclear units, we retain any funds remaining after decommissioning. However, in connection with CENG' s acquisition of the Nine Mile Point and Ginna plants and settlements with certain regulatory agencies, certain conditions pertaining to NDT funds apply that, if met, could possibly result in obligations to make payments to certain third parties (clawbacks). For Nine Mile Point and Ginna, the clawback provisions are triggered only in the event that the required decommissioning activities are discontinued or not started or completed in a timely manner. In the event that the clawback provisions are triggered for Nine Mile Point, then, depending upon the triggering event, an amount equal to 50 % of the total amount withdrawn from the funds for non- decommissioning activities as defined in the agreement or 50 % of any excess funds in the trust funds above the amounts required for decommissioning (including SNF management and site restoration) is to be paid to the Nine Mile Point sellers. In the event that the clawback provisions are triggered for Ginna, then an amount equal to any estimated cost savings realized by not completing any of the required decommissioning activities is to be paid to the Ginna sellers. We expect to comply with applicable regulations and timely commence and complete all required decommissioning activities. & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; We had NDT funds totali & lt; / span & gt; & lt; span style =" background- color: # ffffff; color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; ng $ 16, 398 & # 160; million & lt; / span & gt; & lt; span style =" background- color: # ffffff; color: # 000000; font- family:' Arial', sans- serif; font- size: 8pt; font- weight: 400; line- height: 120 %" & gt; & lt; / span & gt; & lt; span style =" background- color: # ffffff; color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; and $ 14, 127 & # 160; million as of December & # 160; 31, 2023 and 2022, respectively. The offset of decommissioning- related activities in the Consolidated

Statements of Operations and Comprehensive Income results in an equal adjustment to noncurrent payables or noncurrent receivables. Any changes to the existing PECO or STP regulatory agreements could impact our ability to offset decommissioning- related activities in the Consolidated Statements of Operations and Comprehensive Income, and the potential impact to our consolidated financial statements could be material. & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; For the former ComEd units, given no further recovery from ComEd customers is permitted and we retain an obligation to ultimately return any unused NDTs to ComEd customers (on a unit- by- unit basis), to the extent the related NDT investment balances are expected to exceed the total estimated decommissioning obligation for each unit, decommissioning- related activities are offset in the Consolidated Statements of Operations and Comprehensive Income which results in us recognizing a noncurrent payable. However, given the asymmetric settlement provision that does not allow for continued recovery from ComEd customers in the event of a shortfall, recognition of a receivable related to former ComEd Units is not permissible and accounting for decommissioning- related activities for that unit would not be offset, and the impact to the Consolidated Statements of Operations and Comprehensive Income could be material during such periods. For the year ended December & # 160; 31, 2021, a pre- tax charge of $ 193 & # 160; million was recorded in the Consolidated Statement of Operations and Comprehensive Income for decommissioning- related activities that were not offset for the Byron units due to contractual offset being temporarily suspended. With our September 15, 2021 reversal of the previous decision to retire Byron and the corresponding adjustment to the ARO for Byron discussed previously, we resumed contractual offset for Byron as of that date. & lt; The estimated decommissioning obligations are calculated using an NRC methodology that is different from the ARO recorded in the Consolidated Balance Sheets primarily due to differences in the type of costs included in the estimates, the basis for estimating such costs, and assumptions regarding the decommissioning alternatives to be used, potential license renewals, decommissioning cost escalation, and the growth rate in the NDT funds. Under NRC regulations, if the minimum funding requirements for radiological decommissioning calculated under the NRC methodology are greater than the future value of the NDT funds, also calculated under the NRC methodology, then the NRC requires resolution of the shortfalls which could include further funding or other financial guarantees. & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; Key assumptions used in the minimum funding calculation for radiological decommissioning costs using the NRC methodology at December & # 160; 31, 2023 include: (1) & # 160; consideration of costs only for the removal of radiological contamination at each unit; (2) the option on a unit- by- unit basis to use generic, non- site specific cost estimates; (3) & # 160; consideration of only one decommissioning scenario for each unit; (4) the plants cease operation at the end of their current license lives (with no assumed license renewals for those units that have not already received renewals); (5) the assumption of current nominal dollar cost estimates that are neither escalated through the anticipated period of decommissioning, nor discounted using the CARFR; and (6) & # 160; assumed annual after- tax returns on the NDT funds of 2 % (3 % for the former PECO units, as specified by the PAPUC). & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; In contrast, the key criteria and assumptions used by us to determine the ARO and to forecast the target growth in the NDT funds as of December & # 160; 31, 2023 include: (1) the use of site specific cost estimates that are updated at least once every five years; (2) the inclusion in the ARO estimate of all legally unavoidable costs required to decommission the unit (e. g., radiological decommissioning and full site restoration for certain units, on- site SNF maintenance and storage subsequent to ceasing operations and until DOE acceptance,

and disposal of certain LLRW); (3) as applicable, the consideration of multiple scenarios where decommissioning and site restoration activities, as applicable, are completed under possible scenarios ranging from 10 to 70 years after the cessation of plant operations or the end of the current licensed operating life; (4) the consideration of multiple end of life scenarios; (5) the measurement of the obligation at the present value of the future estimated costs and an annual average accretion of the ARO of approximately 4 % through a period of approximately 30 years after the end of the extended lives of the units; and (6) &# 160; an estimated targeted annual pre- tax return on the NDT funds of 6. 1 % to 7. 1 % (as compared to a historical 5- year annual average pre- tax return of < / span > < span style =" background- color: # ffffff; color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" > approximately 8. 0 % < / span > < span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" >). < / span > < / div > < div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" > < span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" > We are required to provide to the NRC a biennial report by unit (annually for units that have been retired or are within five years of license expiration), based on values as of December &# 160; 31, addressing our ability to meet the NRC minimum funding levels. We evaluate the carrying value of long- lived assets or asset groups for recoverability whenever events or changes in circumstances indicate that the carrying value of those assets may not be recoverable. Indicators of & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; impairment may include a deteriorating business climate, including, but not limited to, declines in energy prices, condition of the asset, or plans to dispose of a long- lived asset significantly before the end of its useful life. We determine if long- lived assets or asset groups are potentially impaired by comparing the undiscounted expected future cash flows to the carrying value when indicators of impairment exist. When the undiscounted cash flow analysis indicates a long- lived asset or asset group may not be recoverable, the amount of the impairment loss is determined by measuring the excess of the carrying amount of the long- lived asset or asset group over its fair value. The fair value analysis is primarily based on the income approach using significant unobservable inputs (Level 3) including revenue and generation forecasts, projected capital and maintenance expenditures and discount rates. A variation in the assumptions used could lead to a different conclusion regarding the recoverability of an asset or asset group and, thus, could potentially result in material future impairments of our long- lived assets. Generally, pre- tax impairment losses on long- lived assets or asset groups are recorded in Operating and maintenance expense in the Consolidated Statements of Operations and Comprehensive Income. & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 700; line- height: 120 %" & gt; New England Asset Group & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 9pt; margin- top: 9pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; In the second quarter of 2021, an overall decline in the asset group' s portfolio value suggested that the carrying value of the New England asset group may be impaired. We completed a comprehensive review of the estimated undiscounted future cash flows of the New England asset group and concluded that the carrying value was not recoverable and that its fair value was less than its carrying value. As a result, a pre- tax impairment charge of $ 350 & # 160; million was recorded in the second quarter of 2021 in & lt; span style =" - sec- ix- hidden: f- 1511" & gt; Operating and maintenance expense & lt; / span & gt; in the Consolidated Statement of Operations and Comprehensive Income. & lt; / span & gt; & lt; / div & gt; < / us-
