The following discussion identifies material factors that could (i) materially and adversely affect our business, financial condition, results of operations or prospects or (ii) cause our actual results to differ materially from our anticipated results, projections or other expectations. The following information should be read in conjunction with the other portions of this annual report, including "Special Note Regarding Forward- Looking Statements", "Management's Discussion and Analysis of Financial Condition and Results of Operations" in Item 7 and our consolidated financial statements and related notes in Item 8. All references to" Notes" in this Item 1A of Part I refer to the Notes to Consolidated Financial Statements included in Item 8 of Part II of this report. Please note the following discussion is not intended to comprehensively list all risks or uncertainties faced by us. Our operations or actual results could also be similarly impacted by additional risks and uncertainties that are not currently known to us, that we currently deem to be immaterial, that arise in the future or that are not specific to us. In addition, certain of the risks described below apply only to a part or segment of our business. Business Risks Challenges with integrating or modernizing our existing applications and systems could harm our performance. To succeed, we need to integrate, update and upgrade our existing applications and systems, including many legacy systems from past acquisitions. We cannot assure you we will be able to integrate our legacy IT systems, modernize our infrastructure, timely retire aging or obsolete systems or deploy a master data management platform. These modernization efforts will require efficient allocation of resources, development capacity, greater use of artificial intelligence ("AI") and other emerging technologies, access to subject-matter experts, development of a sustainable operating model and successful collaboration between legal, privacy and security personnel. Any failure to timely accomplish these initiatives may negatively affect our (i) customer and employee experiences, (ii) ability to meet regulatory, legal or contractual obligations, (iii) network stability, (iv) ability to realize anticipated efficiencies, (v) ability to timely repair infrastructure and respond to service outages or (vi) ability to deliver services to our customers at required speed and scale. We may not be able to create the global digital experience expected by customers. Our customers expect us to create and maintain a global digital experience, including: (i) automation and simplification of our offerings, and (ii) digital self- service access to our products, services and customer support. To do so, we must timely and successfully complete the digital transformation of our operations that is currently underway. Effective digital transformation is a complex, dynamic process requiring efficient allocation and prioritization of resources, simplification of our product portfolio, faster product deployments, retirement of obsolete systems, migration of data and corresponding workforce and system development. We cannot assure you we will be able to timely effect the successful digital transformation necessary to develop or deliver a global digital experience expected by our customers. If we are unable to do so, we could lose existing customers or fail to attract new ones, either of which could prevent us from attaining our financial goals. Challenges with integrating or modernizing our existing..... customers at required speed and scale. We operate in an intensely competitive industry and existing and future competitive pressures could harm our performance. Each of our business and mass market offerings faces increasingly intense competition, with increased pressure to timely offer digitally integrated services, from a wide range of sources under evolving market conditions that have increased the number and variety of companies that compete with us. Some of our current and potential competitors: (i) offer products or services that are substitutes for our traditional wireline services, including wireless broadband, wireless voice and non-voice communication services, (ii) offer a more comprehensive range of communications products and services, (iii) operate systems that enable them to provision services easier and faster, (iv) have greater financial, provisioning, technical, engineering, research, development, marketing, customer relations or other resources, (iv-v) conduct operations or raise capital at a lower cost than we do, (v-vi) are subject to less regulation than we are, (vi-vii) have stronger brand names, (vii-viii) have deeper or more long-standing relationships with key customers, (viii) might be perceived as having an ESG profile more attractive to customers or employees, or (ix) have larger operations than ours, any of which may enable them to compete more successfully for customers, strategic partners and acquisitions. In recent years, competitive pressures have commoditized pricing for some of our products and services and lowered market prices for many of our other products and services. Continued competitive pressures will likely place further downward pressure on market pricing. Our ability to successfully compete could be hampered if we fail to timely develop and market innovative technology solutions that address changing customer demands. The technology and communications industry has been and continues to be impacted by significant technological changes, which are enabling an increasing variety of companies to compete with us. Many of these technological changes are (i) displacing or reducing demand for certain of our services, (ii) enabling the development of competitive products or services, (iii) enabling customers to reduce or bypass use of our networks or (iv) reducing our profit margins. For example, as service providers continue to invest in 5G and low earth orbit satellite networks and services, their services could reduce demand for our network services. Increasingly, customers are demanding more technologically advanced products that suit their evolving needs, including traditional and generative AI services. As we note below, several of our competitors have dedicated substantially more resources to their development. If we fail to develop competitive AI services, our business and financial performance could be adversely impacted. To remain competitive, we will need to accurately predict and respond to changes in technology, to continue developing products and services attractive to our customers, to timely provision our products and services, to maintain and expand our network to enable it to support customer demands for greater transmission capacity and speeds, and to discontinue outdated products and services on a cost-effective basis. Our ability to do so could be restricted by various factors, including limitations of our existing network, technology, capital or personnel. If we fail at that, we could lose customers or fail to attract new ones. We may be unable to attract, develop

```
and retain leaders and employees with the right skillsets and technical expertise. We may be unable to attract and retain skilled
and motivated leaders and employees who possess the right skillsets and technical, managerial and development expertise to
execute on our plans for transformation, innovation and strategic growth. We operate in a highly competitive and expanding
industry, where competition for highly skilled employees has grown increasingly intense, and we competitors have targeted
hiring our employees. We have experienced, and may continue to experience, higher than anticipated levels of employee
attrition. Our competitors periodically target our employees with highly sought-after skills and will likely continue to do so in
the future. Further, the increased availability of remote working arrangements, largely driven by the COVID-19 pandemic, has
expanded the pool of companies that can compete for our employees and employee candidates. We believe some of our
competitors with greater resources and fewer cost constraints than us have from time to time been able to offer compensation,
benefits or accommodations in excess of what we are able to offer. These risks to attracting and retaining key personnel the
necessary talent may be have been exacerbated by inflationary pressures on the impacts of the low trading price of Lumen's
common stock, which, as discussed below, restricted Lumen's ability in 2023 to offer competitive equity incentive
compensation to our key employee employees wages and benefits. Our failure As a result, we may be unable to successfully
attract cost- effectively hire and retain key employees with market- leading skills. There is no assurance our efforts to recruit
and retain qualified personnel will be successful. If we are unable to do so, such failure could have a material materially
adverse adversely effect on impact our business our or operations and financial condition performance. Under The
COVID-19 pandemic caused us to modify our workforce practices current work guidelines implemented in 2022, nearly
half including having the majority of our employees work fully from home on, and a fully remote or substantial portion of
the remainder work partly from home under" hybrid " basis. We reopened our offices in 2022 under a " hybrid " working
environment, meaning that some of our employees have the flexibility to work schedules remotely at least some of the time, for
the foreseeable future. The These work arrangements hybrid working environment-may impair our ability to maintain our
collaborative and innovative culture, and may cause disruptions among our employees, including decreases in productivity,
challenges in collaboration between on- site and off- site employees and, potentially, employee dissatisfaction and attrition. If
our attempts to operate under a hybrid working environment are not successful, our business could be adversely impacted. The
pandemic, inflation and other events over the past couple years have increased employees' expectations regarding
compensation, workplace flexibility and work-home balance. These developments have intensified certain of our above-
described challenges and made it relatively more difficult for us to attract and retain top talent. We do Uncertainty regarding
our future prospects could adversely impact our ability to maintain satisfactory relations with our employees, customers,
vendors and others. Developments related to our negotiations with creditors, coupled with concerns regarding continued
declines in our revenues and increased leverage, have created uncertainties about our future ability to improve our
financial performance and refinance or extend our upcoming debt maturities. These uncertainties could adversely
impact our ability to attract, retain and motivate our employees. These uncertainties coupled with Lumen's low stock
trading price could adversely impact our ability to attract, retain and motivate our employees. Lumen grants equity-
based incentive awards to key personnel, the value of which is tied to its stock price, its financial performance or both.
During 2023, the low trading price of Lumen's stock limited its ability under its 2018 equity incentive plan to grant
equity incentive awards in aggregate amounts consistent with our prior practices. Our ability to attract, retain and
motivate our employees could be weakened if (i) the anticipated value of such equity- based incentive awards does not
expect these developments materialize, (ii) Lumen's equity-based compensation otherwise ceases to have be viewed as a
material valuable benefit, (iii) our total compensation package is not viewed as being competitive, or (iv) Lumen does not
obtain the shareholder approval needed to continue granting equity- based incentive awards in the amounts we believe
are necessary. Similarly, customers, vendors, landlords, banks or other third parties may be less willing to transact
business with us if they believe our future is uncertain, any of which could adverse adversely impact on us our business.
financial performance, financial position or future prospects but we can provide no assurances to this effect. We could be
harmed if our reputation is damaged. We believe the Lumen and Qwest brand names and our reputation are important corporate
assets that help us attract and retain customers and talented employees. However, our corporate reputation is susceptible to
material damage by events such as disputes with customers or competitors, cyber- attacks or service outages, internal control
deficiencies, delivery failures, compliance violations, government investigations or legal proceedings. Similar events impacting
one of our competitors could result in negative publicity for our entire industry that indirectly harms our business. We may also
experience reputational damage if customers, vendors, employees, advocacy groups, regulators, investors, the media, social
media influencers or others criticize our services, operations or public positions. For instance, we could be harmed if our
customer experience scores, as measured by" NPS" (Net Promoter Score) and" CHS" (Customer Health Score), for our
products and services are low or declining relative to our competitors. In addition, the reputational risk of unauthorized
disclosure of confidential company or customer data could increase to the extent our employees inappropriately use
social networking sites or other emerging technologies, such as generative AI tools. There is a risk that negative or
inaccurate information about us, even if based on rumor or misunderstanding, could adversely affect our business. Damage to
our reputation could be difficult, expensive and time- consuming to repair. Damage to our reputation could also reduce the value
and effectiveness of the Lumen brand name and could reduce investor confidence in us, having a material adverse impact on the
value of our securities. We could be harmed by cyber- attacks. Our vulnerability to cyber- attacks is heightened by several
features of our operations, including (i) our material reliance on our owned and leased networks to conduct our operations, (ii)
our transmission of large amounts of data over our systems and (iii) our processing and storage of sensitive customer data. As
further described in Item 1C of this annual report, Cyber cyber - attacks on our systems may stem from a variety of sources
, including fraud, malice or sabotage on the part of foreign nations, third parties, vendors, or employees and attempts by outside
parties to gain access to sensitive data that is stored in or transmitted across our network. Cyber- attacks can take many forms -
```

```
including computer hackings, computer viruses, ransomware, worms or other destructive or disruptive software, denial of
service attacks, or other malicious activities. Cyber- attacks can put at risk personally identifiable customer data or protected
health information, thereby implicating stringent domestic and foreign data protection laws. These threats may also arise from
failure or <del>breaches <mark>intrusions</mark> of systems owned, operated or controlled by other unaffiliated operators <del>to the extent, upon</del></del>
whom we rely on them are materially reliant to operate our business. Various other factors could intensify these risks,
including, (i) our maintenance of information in digital form stored on servers connected to the Internet, (ii) our use of open and
software- defined networks, (iii) the challenges of operating and maintaining our complexity--- complex of our multi-
continent network composed of legacy and acquired properties, which is more difficult to safeguard than newer fully-
integrated networks, (iv) growth in the size and sophistication of our customers and their service requirements, (v) increased
use of our network due to greater demand for data services and, (vi) our increased incidence of employees working from remote
locations . Like and (vii) other -- the prominent technology increased difficulty of defending against attacks that use AI-
generated social engineering, increasingly malicious code and communications companies increasingly sophisticated
phishing techniques. As a critical infrastructure service provider, we and our customers are constant targets of cyber-
attacks. The number of these attacks against us increased in 2022-2023. Despite our efforts to prevent these events, some of
these attacks have resulted in security breaches incidents. On March 27, although thus far 2023, Lumen filed with the U.S.
Securities and Exchange Commission a Current Report on Form 8- K announcing two cybersecurity incidents, including
<del>none-</del> one of that involved a sophisticated threat actor that had accessed its internal information technology systems.
Since filing that report, Lumen has taken the measures described therein to assess, contain and remediate both incidents,
including working with outside forensic firms. Based on information known at this time, Lumen continues to believe that
these breaches has resulted in incidents have neither had nor are likely to have a material adverse effect impact on its ability
to serve its customers our or its business, operating operations or financial results. We believe the importance of or our
financial condition. You should be aware, however, network to global internet data flows will continue to make it a target
to a wide range of that threat actors, including nation state actors and other advanced persistent threat actors. Moreover,
the risk of breaches incidents is likely to continue to increase due to several factors, including (i) the increasing sophistication of
cyber- attacks and, (ii) the wider accessibility of cyber- attack tools. Known and (iii) growing threats from Chinese newly
discovered software and hardware vulnerabilities are constantly evolving, which increases Russian and the other state actors
<mark>due to heightened geopolitical tensions difficulty of detecting and successfully defending against them. You It</mark> should <mark>also</mark> be
noted further aware that defenses against cyber- attacks currently available to us and others U. S. companies are unlikely to
prevent intrusions by a highly- determined, highly- sophisticated hacker threat actor. Consequently, you should assume that
we will continue be unable to implement experience cyber incidents in the future. Thus far, none of our past security
barriers incidents have had a material adverse effect on us, and we continue to take steps designed to limit or our other
preventative measures cyber risks. Nonetheless, we cannot assure you that repel all-future cyber - attacks incidents or events
will not ultimately have a material adverse impact on our ability to serve our customers or our business, operations or
financial results. Although Lumen Technologies maintains insurance coverage that may, subject to policy terms and conditions
(including self-insured deductibles, coverage restrictions and monetary coverage caps), cover certain aspects of our cyber risks,
such insurance coverage may be unavailable or insufficient to cover our losses. Cyber- attacks could (i) disrupt the proper
functioning of our networks and systems, which could in turn disrupt the operations of our customers, (ii) result in the
destruction, loss, theft, misappropriation or release of proprietary, confidential, sensitive, classified or otherwise valuable
information of ours, our employees, our customers or our customers' end users, (iii) require us to notify customers, regulatory
agencies or the public of data breaches incidents. (iv) damage our reputation or result in a loss of business, (v) require us to
provide credits for future service to our customers or to offer expensive incentives to retain customers, (vi) subject us to claims
by our customers or regulators for damages, fines, penalties, license or permit revocations or other remedies, (vii) result in the
loss of industry certifications or (viii) require significant management attention or financial resources to remedy the resulting
damages or to change our systems. Any or all of the foregoing developments could have a material adverse impact on us. We
could be harmed by outages in our network or various platforms, or other failures of our services. From time to time in the
ordinary course of our business, we experience outages in our network, hosting, cloud or IT platforms, or failures of our products
or services (including basic and enhanced 911 emergency services) to perform in the manner anticipated. These disruptions
expose us to several of the same risks listed above for cyber- attacks, including the loss of customers, the issuance of credits or
refunds, and regulatory fines. We remain vulnerable to future disruptions due to several factors, including the challenges of
maintaining and replacing aging or obsolete network elements, human error, continuous changes in our network, the
introduction of new products or technologies, vulnerabilities in our vendors or supply chain, aberrant employees and hardware
and software limitations. The process for remediating any interruptions, outages, delays or cessations of service could be more
expensive, time- consuming, disruptive and resource intensive than planned. Delayed sales, lower margins, fines or lost
customers resulting from future disruptions could have a material adverse impact on our business, reputation, results of
operations, financial condition, cash flows and stock price. Several of our services continue to experience declining revenue, and
our efforts to offset these declines may not be successful. Primarily as a result of the competitive and technological changes
discussed above, we have experienced a prolonged systemic decline in our local voice, long- distance voice, network access and
private line revenues. Consequently, we have experienced declining consolidated revenues (excluding acquisitions) for a
prolonged period and have not been able to realize cost savings sufficient to fully offset the decline. More recently, we have
experienced declines in revenue derived from a broader array of our products and services. We have thus far been unable to
reverse our annual revenue losses (excluding acquisitions). In addition, most of our more recent product and service offerings
generate lower profit margins and may have shorter lifespans than our traditional communication services, and some can be
expected to experience slowing or no growth in the future. Some of our new product offerings have reduced or displaced our
```

sale of older product offerings. Accordingly, we may not be successful in attaining our goal of achieving future revenue growth. Our operations, financial performance and liquidity are materially reliant on key suppliers, vendors and other third parties. Our ability to conduct our operations could have a material adverse impact on us if certain of our arrangements with third parties were terminated, including those further described below. Reliance on other communications providers. To offer certain services in certain of our markets, we must either purchase services or lease network capacity from, or interconnect our network with, the infrastructure of other communications carriers or cloud companies who typically compete against us in those markets. Our reliance on these supply or interconnection arrangements limits our control over the delivery and quality of our services. In addition, we are exposed to the risk that other earriers companies may be unwilling or unable to continue or renew these arrangements in the future. Those risks are heightened when the other earrier company is a competitor who may benefit from terminating the agreement or imposing price increases. Additionally, several communications companies rely on our network to transmit their data or voice traffic. Their reliance on our network exposes us to the risk that they may transfer all or a portion of this traffic from our network to alternative networks owned, constructed or leased by them, thereby reducing our revenue. Certain of our hyperscaler customers have built infrastructure that has reduced their reliance on us. Reliance on key suppliers and vendors. We depend on a limited number of suppliers and vendors to provide us, directly or through other suppliers, with equipment and services relating to our network infrastructure, including fiber optic cable, software, optronics, transmission electronics, digital switches, routing equipment, customer premise equipment, and related components. We also rely on software and service vendors or other parties to assist us with operating, maintaining and administering our business, including billing, security, provisioning and general operations. If Our operations could be adversely affected if any of these vendors experience business interruptions, security breaches incidents, litigation or other issues that interfere with their ability to deliver their products or services on a timely basis , our operations could suffer significantly. For a description of how the COVID-19 pandemie and its aftermath have impacted our access to supplies and labor, please see Item 7 in Part II of this report. Reliance on key licensors. We rely on key technologies licensed from third parties to deliver certain of our products and services. Our agreements with these licensors may expire or be terminated, and some of the licenses may not be available to us in the future on terms acceptable to us or at all. Moreover, if we incorporate licensed technology into our network, we may have limited flexibility to deploy different technologies from alternative licensors. Reliance on key customer contracts. We have several complex high-value national and global customer contracts. These contracts are frequently impacted by a variety of factors that could reduce or eliminate the profitability of these contracts. Moreover, we would be adversely impacted if we fail to renew major contracts upon their expiration. Reliance on landowners. We rely on rights- of- way, colocation agreements, franchises and other authorizations granted by governmental bodies, railway companies, utilities, carriers and other third parties to locate a portion of our network equipment over, on or under their respective properties. A significant number of these authorizations are scheduled to lapse over the next five to ten years, unless we are able to extend or renew them. Further, some of our operations are subject to licensing and franchising requirements imposed by municipalities or other governmental authorities. Our operations could be adversely affected if any of these authorizations are cancelled, or otherwise terminate or lapse, or if the landowner requests price increases. Similarly, our buildout plans can be delayed if we cannot receive necessary landowner authorizations or governmental permits. We cannot assure you we will be able to successfully extend these arrangements when their terms expire, or to enter into new arrangements that may be necessary to implement our network expansion opportunities. Climate change could disrupt our operations, cause us to incur substantial additional capital and operating costs or negatively affect our business. A substantial number of our facilities are located in areas **that** subject **them** to the risk of earthquakes, floods, wildfires fires, tornadoes or other similar casualty events. From time to time these events have disrupted our the operations **of us or our affiliates**, and similar future events could cause substantial damages, including downed transmission lines, flooded facilities, power outages, fuel shortages, network congestion, delay delays or failure failures, damaged or destroyed property and equipment, and work interruptions. Due to substantial deductibles, coverage limits and exclusions, and limited availability, we have typically recovered only a portion of our losses through insurance. Our system redundancy and other measures we take to protect our infrastructure and operations from the impacts of such events may be ineffective or inadequate to sustain our operations following such events. Any of these occurrences could result in lost revenues from business interruption, damage to our reputation and reduced profits. Climate change may increase the frequency or severity of natural disasters and other extreme weather events in the future, which would increase our exposure to the abovecited risks and could disrupt our supply chain from our key suppliers and vendors. Our environmental, social and governance **(ESG)** commitments , programs and disclosures may expose us to reputational and , legal and business risks. Our brand and reputation and brands could be impacted by our public commitments to various corporate environmental, social and governance ("ESG") initiatives, including our political contributions, our advocacy positions, and our goals for sustainability, inclusion and diversity. These initiatives, goals, Positions we take or do not take on ESG issues could negatively impact ouror commitments ability to attract or retain customers and employees. In addition, we could be difficult criticized for the timing, scope or nature of these initiatives, goals, or commitments, or for any revisions to them achieve and costly to implement. To the extent that our required and voluntary disclosures about ESG matters increase, we could be criticized for the their accuracy, adequacy, or completeness of such disclosures. Our actual We could fail to achieve, or be perceived failure to fail to achieve, our ESG- related initiatives, goals, or commitments or mandates could negatively impact our reputation or otherwise materially harm our business. Increasing focus on ESG matters has resulted in, and is expected to continue to result in, the adoption of legal and regulatory requirements designed to mitigate the effects of climate change on the environment, as well as legal and regulatory requirements requiring additional related disclosures. If new laws or regulations are more stringent than current legal or regulatory requirements, we may experience increased compliance burdens and costs to meet such obligations. In addition, we could be criticized for the timing, scope our- or selection-nature of these initiatives voluntary disclosure frameworks and standards, and goals, commitments, or for any revisions to the them interpretation or application of those frameworks and

standards, may change from time to time or may not meet the expectations of investors or other stakeholders. Our ability-actual or perceived failure to achieve our ESG commitments is subject to numerous risks, many of which are outside of our control, including (i) evolving and potentially inconsistent regulatory requirements affecting ESG standards, measurements, methodologies and disclosures; (ii) the availability of suppliers that can meet our sustainability, diversity and other standards; and (iii) our ability to recruit, develop, and retain diverse talent. Our processes and controls for reporting ESG matters across our operations and supply chain are evolving along with multiple disparate standards for identifying, measuring, and reporting ESG metries, including enhanced ESG- related disclosures that may be required initiatives, goals, commitments, or to meet <mark>evolving stakeholder expectations or standards could adversely impact us</mark> by the SEC <mark>resulting in legal or regulatory</mark> proceedings against us, and customer or employee attrition, reputational damage, or other negative regulators. Such standards may change over time, which could result in significant revisions to our current goals, reported progress in achieving such goals, or ability to achieve such goals in the future. Future acquisitions or strategic investments and asset dispositions could have a detrimental impact impacts on us or our the holders of our securities. In an effort to implement our and Lumen's business strategies, Lumen from time to time in the future may attempt to pursue other acquisition or expansion opportunities, including strategic investments. To the extent we can identify attractive opportunities, these transactions could involve acquisitions of entire businesses or investments in start- up or established companies and could take several forms. These types of transactions may present significant risks and uncertainties, including the difficulty of identifying appropriate companies to acquire or invest in on acceptable terms, potential violations of covenants in our and our affiliates' debt instruments, insufficient revenue acquired to offset liabilities assumed, unexpected expenses, inadequate return of capital, regulatory or compliance issues, potential infringements, difficulties integrating the new properties into our and our affiliates' operations, and other unidentified issues not discovered in due diligence. In addition, in the past, Lumen Technologies or its affiliates have disposed of assets or asset groups for a variety of reasons, and we may dispose of other assets or asset groups from time to time in the future. If we agree to proceed with any such divestitures of assets, we may experience operational difficulties segregating them from our retained assets and operations, which could result in disruptions to our operations or claims for damages, among other things. Moreover, such dispositions could reduce our eash flows available to support our payment of distributions, capital expenditures, debt maturities or other commitments. Adverse developments impacting our non-consolidated affiliates could indirectly impact us. Our consolidated operations constitute only a portion of the consolidated operations of our corporate parent, Lumen. We engage in various intercompany transactions with affiliates of Lumen that are not members of our consolidated group of companies. Events or developments that adversely impact these non- consolidated affiliates will not directly impact our consolidated financial position or performance as reported under U. S. generally accepted accounting principles ("GAAP"), but could nonetheless indirectly adversely impact us to the extent such developments interfere with the ability of such non-consolidated affiliates to provide services or pay amounts to which we or our subsidiaries are entitled. For these reasons, you are urged to review the risk factor disclosures contained in Item 1A of Lumen's Annual Report on Form 10-K for the year ended December 31, 2022-2023. We face other business risks. We face other business risks, including among others: • the difficulties of managing and administering an organization that offers a complex set of products to a diverse range of customers across several states, and • the adverse effects of terrorism, rioting, vandalism or social unrest. Legal and Regulatory Risks We are subject to an extensive, evolving regulatory framework that could create operational or compliance costs. As explained in greater detail elsewhere in this annual report, our domestic operations are regulated by the FCC and other federal, state and local agencies are regulated by a wide range of various foreign and international bodies. We cannot assure you we will be successful in obtaining or retaining all regulatory licenses necessary to carry out our business in our various markets. Even if we are, the prescribed service standards and conditions imposed on us under these licenses and related laws may increase our costs, limit our operational flexibility or result in third-party claims. We are subject to numerous requirements and interpretations under various international, federal, state and local laws, rules and regulations, which are often quite detailed and occasionally in conflict with each other. Accordingly, we cannot ensure we will always be considered to be in compliance with all these requirements at any single point in time. Various governmental agencies, including state attorneys general with jurisdiction over our operations, have routinely in the past investigated our business practices either in response to customer complaints or on their own initiative, and are expected to continue to do the same in the future. Certain of these investigations have resulted in substantial fines in the past. On occasion, we have resolved such matters by entering into consent decrees, which are court orders that frequently **restrict our future bind us to specific-**conduct going forward. If breached by us, these consent decrees expose us not only to contractual remedies, but also to judicial enforcement via contempt of court proceedings, any of which could have material adverse consequences. Additionally, future investigations can potentially result in enforcement actions, litigation, fines, settlements or reputational harm, or could cause us to change our sales practices or operations. Our prior participation in the FCC's CAF II program and current participation in the FCC's RDOF program subjects us to certain financial risks. If we are not in compliance with FCC measures by the end of the CAF II and RDOF programs, we could incur substantial penalties or forfeitures, including but not limited to being suspended or disbarred from future governmental programs or contracts for a significant period of time, which could have a material adverse impact on our financial condition. We provide products or services to various federal, state and local agencies. Our failure to comply with complex governmental regulations and laws applicable to these programs, or the terms of our governmental contracts, could result in our us suffering substantial negative publicity or penalties, being suspended or debarred from future governmental programs or contracts for a significant period of time and in certain instances could lead to the revocation of our FCC licenses. Moreover, certain governmental agencies frequently reserve the right to terminate their contracts for convenience or if funding is unavailable. If our governmental contracts are terminated for any reason, or if we are suspended or debarred from governmental programs or contracts, it could have result in a material adverse impact on our results of operations and financial condition. A variety of state, national, foreign and international laws and regulations apply to the collection, use, retention, protection, security,

```
disclosure, transfer and other processing of personal and other data. The European Union and other international regulators, as
well as some state governments, have recently enacted or enhanced data privacy <del>regulations <mark>legal requirements</mark> ,</del> and other
governments are considering establishing similar or stronger protections. Many of these laws are complex and change frequently
and often conflict with the laws in other jurisdictions. Some of our customers impose similar requirements on us that are equally
or more demanding. If we fail Despite our best efforts to comply with any of these governmental or contractual requirements,
we any noncompliance could incur result in incurring potential substantial penalties and reputational damage. Adapting and
responding to changing regulatory requirements has historically materially impacted our operations. We believe evolving
regulatory developments and regulatory uncertainty could continue to have a material impact on our business. In particular, our
business could be materially impacted if the U. S. Congress amends or eliminates current federal law limitations on the liability
of private network providers, such as us, against claims related to third party content stored or transmitted on private networks,
as currently proposed by certain governmental officials, legislative leaders and consumer interest groups. We could also be
materially affected if currently pending proposals to increase the regulation of internet service providers or to further strengthen
data privacy laws are implemented. In addition, federal and state agencies that regulate the support program payments we
receive or the fees that we charge for certain of our regulated services can, and from time to time do, reduce the amounts we
receive or can charge. The variability of these laws could also hamper the ability of us and our customers to plan for the future
or establish long- term strategies. Third- party content stored or transmitted on our networks could result in liability or otherwise
damage our reputation. While we disclaim liability for third- party content in most of our service contracts, as a private network
provider we potentially could be exposed to legal claims relating to third- party content stored or transmitted on our networks.
Such claims could involve, among others, allegations of defamation, invasion of privacy, copyright infringement, or aiding and
abetting restricted activities such as online gambling or pornography. Although we believe our liability for these types of claims
is limited under current law, suits against other carriers have been successful and we cannot assure you that our defenses will
prevail. Such third- party content could also result in adverse publicity and damage our reputation. Moreover, as noted above,
pending proposals to change the law could materially heighten our legal exposure. Pending legal proceedings <mark>against us or our</mark>
affiliates could have a material adverse impact on us. There are several potentially material proceedings pending against us and
our affiliates. Results of these legal proceedings cannot be predicted with certainty. As of any given date we could have
exposure to losses under proceedings in excess of our accrued liability. For each of these reasons, any of the proceedings
described in Note 14 — Commitments, Contingencies and Other Items, as well as current litigation not described therein or
future litigation, could have a material adverse effect on our business, reputation, financial position, operating results, the
trading price of our securities and our ability to access the capital markets. We can give you no assurances as to the ultimate
impact of these matters on us. We may not be successful in protecting and enforcing our intellectual property rights. We rely on
various patents, copyrights, trade names, trademarks, service marks, trade secrets and other similar intellectual property rights,
as well as confidentiality agreements and procedures, to establish and protect our proprietary rights. For a variety of reasons,
however, these steps may not fully protect us, including due to inherent limitations on the ability to enforce these rights. If we
are unsuccessful in protecting or enforcing our intellectual property rights, then our business, competitive position, results of
operations and financial condition could be adversely affected. Issues related to the development and use of artificial
intelligence (AI) could give rise to legal or regulatory actions, damage our reputation or otherwise materially harm our
business. We currently incorporate AI technology in certain of our products and services and in our business operations.
AI is currently being developed in a highly competitive and rapidly evolving environment by a wide variety of
technology companies, many of which are dedicating substantially more resources than we are to research and
development initiatives. Due to the complexity of its design and algorithms, AI presents various risks and challenges.
and its use could have unintended adverse consequences. While we aim to develop and use AI responsibly and attempt to
identify and mitigate ethical and legal issues presented by its use, we may be unsuccessful in identifying or resolving
issues before they arise. The Company's use of AI may give rise to risks related to harmful content, inaccurate output,
bias, intellectual property infringement or misappropriation, defamation, privacy incidents, and cybersecurity
vulnerabilities, among others. The United States, the European Union and other governmental bodies have taken initial
steps to regulate AI, which could ultimately increase AI's legal risks or decrease its usefulness. For all these reasons, we
cannot assure you that our use of AI will not harm our business, operations or reputation . We have been accused of
infringing the intellectual property rights of others and will likely face similar accusations in the future. We routinely receive
notices from third parties or are named in lawsuits filed by third parties claiming we have infringed or are infringing their
intellectual property rights. We are currently responding to several of these notices and claims and expect this industry-wide
trend will continue. If these claims succeed, we could be required to pay significant monetary damages, to cease using the
applicable technology or to make royalty payments to continue using the applicable technology. If we are required to take one or
more of these actions, our revenues or profit margins may decline, our operations could be materially impaired or we may be
required to stop selling or redesign one or more of our products or services, any of which could have a material adverse impact
on our business. Similarly, from time to time, we may need to obtain the right to use certain patents or other intellectual property
from third parties to be able to offer new products and services. If we cannot obtain rights to use any required technology from a
third party on reasonable terms, our ability to offer new products and services may be prohibited, restricted, made more costly or
delayed. Failure to extend or renegotiate our collective bargaining agreements or work stoppages could have a material impact
on us. As of December 31, 2022-2023, approximately 43 % of our employees were members of various bargaining units
represented by labor unions. Although we have agreements with these labor unions, we cannot predict the outcome of our future
negotiations of these agreements. We may be unable to reach new agreements, and union employees may engage in strikes,
work slowdowns or other labor actions, which could materially disrupt our ability to provide services and increase our costs.
Even if we succeed in reaching new or replacement agreements, they may impose significant new costs on us that impair our
```

```
competitive position. Media reports concerning our legacy infrastructure could expose us to governmental actions,
removal costs, litigation, compliance costs, penalties or reputational damage. Media reports issued in mid- 2023 alleged
that certain lead- sheathed cables that are part of our copper- based network infrastructure pose public health and
environmental risks. Such allegations may subject us to legislative or regulatory actions, removal costs, litigation,
compliance costs or penalties. Accordingly, we may incur substantial expenses, which could have a material adverse
impact on our financial results or condition. We may also experience reputational harm from negative assertions about
the public health or environmental impact of our lead- sheathed cables, which could adversely affect our business, even if
such allegations ultimately prove to be inaccurate. Such damage to our reputation could be difficult, expensive and time-
consuming to repair. Damage to our reputation could reduce investor confidence in us and have a material adverse
impact on the value of our securities. Financial Risks Our significant debt levels expose us to a broad range of risks. As of
December 31, 2022-2023, we had $ 2. 2 billion of outstanding consolidated unsecured indebtedness (excluding finance lease
obligations, unamortized discounts, net and unamortized debt issuance costs, and note payable- affiliate). Our significant levels
of debt and related debt service obligations could adversely affect us in several respects, including: • requiring us to dedicate a
substantial portion of our cash flow from operations to the payment of interest and principal on our debt, thereby reducing the
funds available to us for other purposes, including acquisitions, capital expenditures, strategic initiatives and dividends to our
direct parent company; • hindering our ability to capitalize on business opportunities and to plan for or react to changing market,
industry, competitive or economic conditions; • making us more vulnerable to economic or industry downturns, including
interest rate increases (especially with respect to our variable rate debt); • placing us at a competitive disadvantage compared to
less leveraged companies; • adversely impacting other parties' perception of Lumen, including but not limited to existing or
potential customers, vendors, employees or creditors; • making it more difficult or expensive for us to obtain any necessary
future financing or refinancing, including the risk that this could force us to sell assets or take other less desirable actions to raise
capital; and • increasing the risk that we may not meet the financial or non-financial covenants contained in our debt
agreements or timely make all required debt payments, either of which could result in the acceleration of some or all of our
outstanding indebtedness. The effects of each of these factors could be intensified if we increase our borrowings or experience
any downgrade in our credit ratings or those of our affiliates. Subject to certain limitations and restrictions, the current terms of
our debt instruments and our subsidiaries' debt instruments permit us or them to incur additional indebtedness. We expect to
periodically require financing, and we cannot assure you we will be able to obtain such financing on terms that are acceptable to
us, or at all. We expect to periodically require financing in the future to refinance existing indebtedness and potentially for other
purposes. Our ability to arrange additional financing will depend on, among other factors, our financial position, performance,
credit ratings, and debt covenants. Prior allegations that our affiliates have breached covenants in their credit documents
could dissuade potential lenders from extending credit to us, as well as unless and until our affiliates satisfactorily
address these concerns through the execution of additional credit agreements, the receipt of waivers or other similar
actions. Our ability to obtain additional financing could also depend on prevailing market conditions, which and other
factors beyond our control. Prevailing market conditions could be adversely affected by (i) general market conditions, such as
disruptions in domestic or overseas sovereign or corporate debt markets, geo-political instabilities, trade restrictions, pandemics,
contractions or limited growth in the economy or other similar adverse economic developments in the U. S. or abroad, and (ii)
specific conditions in the communications industry. Instability in the domestic or global financial markets has from time to time
resulted in periodic volatility and disruptions in capital markets that have partially or severely limited the ability of leveraged
companies like us to obtain debt financing. For these and other reasons, we can give no assurance additional financing for any of
these purposes will be available on terms acceptable to us, or at all. If we are unable to make required debt payments or
refinance our debt, we would likely have to consider other options, such as selling assets, issuing additional securities, cutting or
delaying costs or otherwise reducing our cash requirements, or negotiating with our lenders to restructure our applicable debt.
The current and future debt instruments of us or our affiliates may restrict, or market or business conditions may limit, our
ability to complete some of these actions on favorable terms, or at all. For these and other reasons, we cannot assure you we
could implement these steps in a sufficient or timely manner, or at all. Nor can we assure you that these steps, even if
successfully implemented, would not be detrimental to our operations, financial performance or future prospects. We are part of
a highly complex debt structure, which could impact the rights of our investors. Lumen Technologies, Inc. and various of its
subsidiaries owe substantial sums pursuant to various debt and financing arrangements, certain of which are guaranteed by other
principal subsidiaries. Over half of the debt of Lumen Technologies, Inc. is guaranteed by certain of its principal domestic
subsidiaries, some of which have pledged substantially all of their assets (including certain of their respective subsidiaries) to
secure their guarantees. The remainder of the debt of Lumen Technologies, Inc. is neither guaranteed nor secured. Nearly-Over
half of the debt of Level 3 Financing, Inc. is (i) secured by a pledge of substantially all of its assets and (ii) guaranteed on a
secured basis by certain of its affiliates. The remainder of the debt of Level 3 Financing, Inc. is not secured by any of its assets,
but is guaranteed on an unsecured basis by certain of its affiliates. As of the date of this annual report, substantial amounts of
debt are also owed by two direct or indirect subsidiaries of Qwest Communications International Inc., including us. Most of the
nearly 300 over 200 subsidiaries of Lumen Technologies, Inc. have neither borrowed money nor guaranteed any of the debt of
Lumen Technologies, Inc. or its affiliates. As such, investors in our consolidated debt instruments should be aware that (i)
determining the priority of their rights as creditors is a complex matter which is substantially dependent upon the assets and
earning power of the entities that issued or guaranteed (if any) the applicable debt and (ii) a substantial portion of such debt is
structurally subordinated to all liabilities of the non-guarantor subsidiaries of Lumen Technologies, Inc. to the extent of the
value of those subsidiaries that are obligors. Our and our affiliates' various debt agreements include restrictions and covenants
that could (i) limit our ability to conduct operations or borrow additional funds, (ii) restrict our ability to engage in inter-
company transactions, and (iii) lead to the acceleration of our repayment obligations in certain instances. Under our and our
```

```
affiliates' consolidated debt and financing arrangements, the issuer of the debt is subject to various covenants and restrictions,
the most restrictive of which pertain to the debt of Lumen Technologies, Inc. and Level 3 Financing, Inc. Lumen Technologies,
Inc.'s senior secured credit facilities and secured notes contain several significant limitations restricting the ability of it and its
subsidiaries to, among other things, borrow additional money or issue guarantees; pay dividends or other distributions to
shareholders; make loans; create liens on assets; sell assets; transact with its affiliates and engage in mergers, consolidations or
other similar transactions. These restrictive covenants could have a material adverse impact on our and our affiliates' ability to
operate or reconfigure our respective businesses, to issue additional priority debt, to pursue acquisitions, divestitures or strategic
transactions, or to otherwise pursue our respective plans and strategies. The debt and financing arrangements of Level 3
Financing . Inc. contain substantially similar limitations that restrict their operations on a standalone basis as a separate restricted
group. Consequently, certain of these covenants may significantly restrict our ability to engage in transactions with Level 3.
including receiving cash from Level 3 or Level 3's ability to distribute cash to us or our affiliated entities. Lumen Technologies,
Inc.'s senior secured credit facilities, as well as our term loan debt, contain financial maintenance covenants. The failure of us
or our affiliates to comply with the above- described restrictive or financial covenants could result in an event of default, which,
if not cured or waived, could accelerate our debt repayment obligations. Certain of our debt instruments have cross- default or
cross- acceleration provisions. When present, these provisions could have a wider impact on liquidity than might otherwise arise
from a default or acceleration of a single debt instrument. Certain debtholders of our affiliate, Level 3, may seek to claim
that Level 3's use of proceeds following the sale of its Latin American business resulted in potential defaults under its
credit documents. On July 25, 2023, Lumen Technologies received a letter from representatives purporting to act on
behalf of holders of approximately 37 % of Lumen Technologies' funded debt and approximately 56 % of Level 3' s
funded debt requesting a meeting to discuss the upcoming debt maturities of Lumen and its affiliates, as well as what the
letter referred to as an apparent event of default by Level 3 relating to Level 3's use of proceeds from the divestiture of
its Latin American business. If the transactions contemplated by the TSA are consummated, the participating creditors
would waive and release us from any claims or remedies arising out of any such breaches to the extent permitted under
Lumen's debt agreements and applicable law. However, there can be no assurance that these transactions will be
consummated, or that other creditors will not seek to assert claims against us. If the transactions contemplated by the
TSA are not consummated, there can be no assurance that participating creditors would not attempt to deliver
purported notices of default, or seek to declare the principal amount of their debt holdings due and payable, together
with accrued interest. Any such acceleration also could allow lenders under Lumen's senior secured credit facilities to
declare all funds borrowed to be due and payable, to terminate their commitments thereunder, and to cease making
further loans. Secured debtholders could also institute foreclosure proceedings against their collateral. Although Lumen
would vigorously dispute any and all such actions, any such actions may result in an outcome that could have a material
adverse impact on our business, operations and financial condition of us and our affiliates, and any such actions could
force us or our affiliates to seek bankruptcy protection. In addition, responding to or defending against any claims of
default, including through litigation, may require Lumen and its affiliates to expend significant funds and management
time and attention, and could adversely impact their ability to obtain financing in the future or to refinance their existing
indebtedness. Any of these developments could adversely impact us in several other ways, particularly if Lumen or Level
3 can no longer supply us with services that we currently receive from them, or if the creditors seek to assert any rights
of self- help that they purport to hold. The transactions contemplated by the TSA may not be consummated as
contemplated, on the currently expected timeline, or at all, and even if such transactions are consummated, we may not
achieve their anticipated benefits. We expect that the completion of the transactions contemplated by the TSA will
enhance our liquidity and extend the debt maturities of our affiliates. However, completion of these transactions is
subject to the satisfaction of certain conditions and the TSA permits certain specified lender groups and Lumen to
terminate the agreement under various specified circumstances. As a result, any or all of the transactions may not be
consummated as originally contemplated, on the currently expected timeline, or at all. Accordingly, we may not be able
to realize the expected benefits from these transactions on a timely basis or at all. Even if we are successful in completing
the transactions contemplated by the TSA, we may not realize some or all of the expected benefits from such
transactions. We have incurred, and will continue to incur, significant costs, expenses and fees for professional services
and other transaction costs in connection with the transactions contemplated by the TSA, and these fees and costs are
payable by us regardless of whether such transactions are consummated. If we are successful in completing the
transactions contemplated by the TSA, the Company will be subject to higher levels of interest, which could have
important consequences, including, (i) limiting our ability to obtain additional financing to fund future working capital,
capital expenditures, acquisitions or other general corporate requirements, and increasing our cost of borrowing; (ii)
requiring a substantial portion of our cash flows to be dedicated to payments on our obligations instead of for other
purposes; and (iii) each of the other factors specified above under the heading" – Our significant debt levels expose us to
a broad range of risks." In addition, the agreements that will govern the Company's indebtedness to be executed in
connection with the consummation of the transactions contemplated by the TSA will contain significant additional
restrictions that could limit the Company's ability to engage in activities that may be in our long- term best interest,
including certain restrictions on our ability to incur indebtedness, incur liens, enter into mergers or consolidations,
dispose of assets, enter into affiliate transactions, pay dividends, make acquisitions and make investments, loans and
advances. These restrictions may affect the Company's ability to execute our business strategies, limit our ability to
raise additional debt or equity financing needed to operate our business, including during economic or business
downturns, and limit our ability to compete effectively or take advantage of new business opportunities. Our failure to
comply with those covenants could result in an event of default which, if not cured or waived, could result in the
```

```
acceleration of all our debt. Our cash flows may not adequately fund all of our cash requirements. Our business is very capital
intensive. We expect to continue to require significant capital to pursue our Quantum Fiber buildout plans and to otherwise
maintain, upgrade and expand our network infrastructure and product offerings, based on several factors, including (i) changes
in customers' service requirements; (ii) our need to replace aging or obsolete infrastructure; (iii) our continuing need to
expand and improve our network to remain competitive and meet customer demand; and (iiiiv) our regulatory commitments.
Any failure to make appropriate capital expenditures could adversely impact our financial performance or prospects. We will
also continue to need substantial amounts of cash to meet our fixed commitments and other business objectives, including
without limitation funding our debt repayments, operating costs, maintenance expenses, debt repayments, tax obligations,
periodic pension contributions and other benefits payments. As discussed elsewhere in this annual report, our revenues have
decreased for several years, which, coupled with other factors, has placed downward pressure on our cash flows. For all these
reasons, we cannot assure you our future cash flows from operating activities will be sufficient to fund all of our cash
requirements in the manner currently contemplated. Increases in costs for pension and healthcare benefits for our active and
retired employees may have a material impact on us. As of December 31, \frac{2022}{2023}, we had a substantial number of active
employees participating in a qualified pension plan sponsored by Lumen Technologies that has assumed the obligations under
Owest Communications International Inc.'s predecessor pension plan. As of such date, Lumen's pension plans and our other
post- retirement benefit plans were substantially underfunded from an accounting standpoint. The amounts contributed by us
through Lumen Technologies are not segregated or restricted and may be used to provide benefits to employees of Lumen's
other subsidiaries. Lumen's costs of maintaining our pension and healthcare plans, and the future funding requirements for
these plans, are affected by several factors, including investment returns on funds held by our applicable plan trusts; changes in
prevailing interest rates and discount rates or other factors used to calculate the funding status of our plans; increases in
healthcare costs generally or claims submitted under our healthcare plans specifically; the longevity and payment elections of
our plan participants; changes in plan benefits; and the impact of the continuing implementation, modification or potential
repeal of current federal healthcare and pension funding laws and regulations promulgated thereunder. Increased costs under
these plans could reduce Lumen's profitability and increase its funding commitments to its pension plans, which in turn could
affect our liquidity. See Note 9 — Employee Benefits for additional information regarding the funded status of Lumen's pension
plans and Lumen's other post- retirement benefit plans. Lapses in our disclosure controls and procedures or internal control over
financial reporting could materially and adversely affect us. We maintain (i) disclosure controls and procedures designed to
provide reasonable assurances regarding the accuracy and completeness of our SEC reports and (ii) internal control over
financial reporting designed to provide reasonable assurance regarding the reliability and compliance with U.S. generally
accepted accounting principles ("GAAP") of our financial statements. We cannot assure you these measures will be
effective. Our and Lumen's management previously identified at two material weakness weaknesses that, while related to our
accounting for revenue transactions. Although we successfully remediated this material weakness during 2019, were the
deficiency was costly to remediate and delayed the filing of Lumen's caused us to request an extension in order to timely file
<del>our</del> annual report on Form 10- K for the year ended December 31, 2018. If we are required to record additional intangible asset
impairments, we will be required to record a significant charge to earnings and reduce our stockholders' equity. As of December
31, <del>2022 2023</del>, approximately <del>50-43</del> % of our total consolidated assets reflected on the consolidated balance sheet included in
this annual report consisted of goodwill , customer relationships and other intangible assets. In the fourth quarter of 2023, we
recorded a large non- cash charge to earnings in connection with required reductions of the value of our intangible assets.
If our intangible assets are determined to be impaired in the future, we may be required to record additional significant, non-
cash charges to earnings during the period in which the impairment is determined to have occurred. Any such charges could, in
turn, have a material adverse effect on our results of operation or financial condition. We regularly transfer our cash for
centralized management by Lumen Technologies, which exposes us to certain risks. We are controlled by Lumen Technologies,
our ultimate parent company. Under our cash management arrangement with Lumen, we regularly transfer our cash to Lumen,
which we recognize on our consolidated balance sheets as advances to affiliates. Although Lumen periodically repays these
advances to fund our cash requirements throughout the year, at any given point in time Lumen may owe us a substantial sum
under this arrangement. Accordingly, developments that adversely impact Lumen could adversely impact our ability to collect
these advances. In addition, we intend to continue to distribute to our direct stockholder a substantial portion of our consolidated
cash flow, thereby reducing our capital resources for debt repayments or other purposes. These and other risks of investing in
our debt securities are more fully described in our disclosure documents distributed at the time of issuance. High inflation could
continue to adversely impact us. Although inflation appears to be has recently been declining, during 2021 and 2022 the past
three years, our operations were impacted by the highest domestic inflation rates in decades. If inflation rates remain elevated,
our operations will likely continue to be impacted. Potential impacts of high inflation include (i) lower revenue if inflationary
pressures cause customers to defer, decrease or cancel their expenditures on our products and services, (ii) lower margins if we
cannot offset the higher cost of our labor and supplies by raising our prices or reducing our other expenses, (iii) higher interest
costs to the extent inflation places upwards pressure on prevailing interest rates and (iv) as noted above, potential difficulties
retaining personnel if we do not match the salary increase expectations of our workforce. We face other financial risks. We face
other financial risks, including among others the risk that downgrades in our credit ratings or unfavorable financial analyst
reports regarding us, our affiliates, or our industry could adversely impact the liquidity or market prices of our outstanding debt
securities. General Risk Factors An outbreak of disease or similar public health threat, such as the recent COVID-19 pandemic,
eould have a material adverse impact on us. An outbreak of disease or similar public health threat, such as the recent COVID-19
pandemic and its attendant detrimental impact on the worldwide economy, could have a material adverse impact on our
operating results and financial condition. Even as efforts to contain the COVID-19 pandemic, including vaccinations, have
fostered progress and eased governmental restrictions, new variants of the virus have continued to cause outbreaks and
```

uncertainties. Variants of the virus continue to pose the risk that we or our employees, contractors, suppliers, customers and other business partners may be prevented from conducting business activities at expected levels through established processes. Future events regarding the pandemie, which are unpredictable and beyond our control, could continue impacting our operations. Accordingly, COVID- 19, or any other future major public health crisis, may have negative impacts on our business in the future, and any future adverse impacts on our business may be worse than we anticipate. Moreover, to the extent any of these risks and uncertainties adversely impact us, they may also have the effect of heightening many of the other risks described in this section "Item 1A. Risk Factors." Unfavorable general economic, societal, health or environmental conditions could negatively impact us. Unfavorable general economic, societal, health or environmental conditions, including unstable economic and credit markets, or depressed economic activity caused by trade wars, epidemics, pandemics, wars, societal unrest, rioting, civic disturbances, natural disasters, terrorist attacks, environmental disasters, political instability or other factors, could negatively affect our business or operations in . While it is difficult to predict the ultimate impact of these general economic, societal or environmental conditions, they could adversely affect demand for some of our products and services and could cause eustomers to shift to lower- priced products and services or to delay or forego purchases of our products and services for a variety of ways reasons. Any one or more of these circumstances could continue to depress our revenue. Also, our customers may encounter financial hardships which could negatively impact their ability to make timely payments to us or to continue doing business with us. Shareholder or debtholder activism efforts could cause a material disruption to our business. While we always welcome constructive input from our stakeholders, activist shareholders at the Lumen level may from time to time engage in proxy solicitations, advance shareholder proposals or otherwise attempt to effect changes or acquire control over Lumen and its affiliates, including us. Responding to these actions can be costly and time- consuming and may disrupt Lumen's and our operations and divert the attention of our board and management. These adverse impacts could be intensified if activist shareholders advocate actions that are not supported by other shareholders, Lumen's board or management. The recent increase in the activism of debt holders could increase the risk of claims being made under the debt agreements of us or our affiliates. We face other general risks. As a large national business with complex operations, we face various other general risks, including among others, the risk that one or more of our ongoing tax audits or examinations could result in tax liabilities that differ materially from those we have recognized in our consolidated financial statements.
