

## Risk Factors Comparison 2024-03-15 to 2023-05-25 Form: 10-K

Legend: **New Text** ~~Removed Text~~ Unchanged Text **Moved Text** Section

As a smaller reporting company, as defined in Rule 12b- 2 of the Exchange Act, we are not required to provide the information required by this Item. Factors that could cause our actual results to differ materially from those in this Annual Report are any of the risks described in our final prospectus for our Initial Public Offering filed with the SEC. Any of these factors could result in a significant or material adverse effect on our results of operations or financial condition. Additional risk factors not presently known to us or that we currently deem immaterial may also impair our business or results of operations. As of the date of this Annual Report, except as follows, there have been no material changes to the risk factors disclosed in our final prospectus dated September 19-21, 2022, filed with the SEC. We may disclose changes to such factors or disclose additional factors from time to time in our future filings with the SEC. Changes in laws or regulations, or a failure to comply with any laws and regulations, may adversely affect our business, including our ability to negotiate and complete our initial business combination, and results of operations. We are subject to laws and regulations enacted by national, regional and local governments. In particular, we are required to comply with certain SEC and other legal requirements. Compliance with, and monitoring of, applicable laws and regulations may be difficult, time consuming and costly. Those laws and regulations and their interpretation and application may also change from time to time and those changes could have a material adverse effect on our business, investments and results of operations. In addition, a failure to comply with applicable laws or regulations, as interpreted and applied, could have a material adverse effect on our business, including our ability to negotiate and complete our Business Combination, and results of operations. On March 30, 2022, the SEC issued proposed rules (the “ 2022 Proposed Rules ”) relating to, among other items, enhancing disclosures in business combination transactions involving SPACs and private operating companies; amending the financial statement requirements applicable to transactions involving shell companies; effectively limiting the use of projections in SEC filings in connection with proposed business combination transactions; increasing the potential liability of certain participants in proposed business combination transactions; and the extent to which SPACs could become subject to regulation under the Investment Company Act. The 2022 Proposed Rules, if adopted, whether in the form proposed or in revised form, and certain positions and legal conclusions expressed by the SEC in connection with the 2022 Proposed Rules, may materially adversely affect our ability to negotiate and complete our Business Combination and may increase the costs and time related thereto. We have failed to maintain adequate disclosure controls and procedures which may result in material errors in our financial statements or cause us to fail to meet our period reporting obligations. As discussed in Item 9A “ Controls and Procedures ”, under the supervision and with the participation of our management, including our principal executive officer and principal financial and accounting officer, we conducted an evaluation of the effectiveness of our disclosure controls and procedures as of the end of the year ended December 31, 2022-2023. We concluded that the Company is experiencing some difficulty in the accounting and reporting related to the existence of assets and corresponding income, as well as the accounting and reporting for the completeness and accuracy of our liabilities and the corresponding income and expenses which it experienced and reported as a material weakness in their last report of September 30, 2022-2023. **This. Additionally, the Company has not evidenced oversight of the Company’s financial statements and related disclosures as of December 31, 2023. These material weakness-weaknesses in the disclosure controls and procedures as of December 31, 2022-2023 has have not been remediated and are therefore our disclosure controls were not effective . In light of the material weakness, we have made control improvements, including enhancing the efficacy of our review processes to identify and appropriately apply applicable accounting requirements to better evaluate and understand the nuances of the accounting standards that apply to the treatment and reporting of related party transactions. in our financial statements. Our plans at this time also include providing enhanced access to accounting literature, research materials and documents and increased communication among our management and third- party professionals with whom we consult regarding related party accounting applications. Furthermore, in light of this material weakness, we performed additional analysis as deemed necessary to ensure that our financial statements were prepared in accordance with GAAP. Accordingly, management believes that the financial statements included in this Report present fairly in all material respects our financial position, results of operations and cash flows for the periods presented. We continue to evaluate steps to remediate the identified material weakness. These remediation measures may be time consuming and costly and there is no assurance that these initiatives will ultimately have the intended effects. We do not expect that our disclosure controls and procedures will prevent all errors and all instances of fraud. Disclosure controls and procedures, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the disclosure controls and procedures are met. Further, the design of disclosure controls and procedures must reflect the fact that there are resource constraints, and the benefits must be considered relative to their costs. Because of the inherent limitations in all disclosure controls and procedures, no evaluation of disclosure controls and procedures can provide absolute assurance that we have detected all our control deficiencies and instances of fraud, if any. The design of disclosure controls and procedures also is based partly on certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions .** Disclosure controls and procedures are designed to ensure that information required to be disclosed by us in our Exchange Act reports is recorded, processed, summarized, and reported within the time periods specified in the SEC’s rules and forms, and that such information is accumulated and communicated to our management, including our principal executive officer and principal financial officer or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure.

A material weakness is defined as a deficiency, or a combination of deficiencies, in internal disclosure controls and procedures, such that there is a reasonable possibility that the failure to maintain, collect, process, accumulate and communicate information to management could cause untimely or inadequate disclosures in our reporting under the Exchange Act. We cannot assure you that we will be able to remediate our existing material weakness in a timely manner, if at all, or that in the future additional material weaknesses will not exist, reoccur or otherwise be discovered, a risk that will increase as our business becomes more complex. If our efforts to remediate these material weaknesses, as described in Item 9A “ Controls and Procedures ”, are not successful or if other deficiencies occur, our ability to accurately and timely report our financial position, results of operations, cash flows or key operating metrics could be impaired, which could result in late filings of our annual and quarterly reports under the Exchange Act, restatements of our consolidated financial statements or other corrective disclosures. Additional impacts could include a decline in our stock price, suspension of trading or delisting of our common stock by the Nasdaq Capital Market, or other material adverse effects on our business, reputation, and results of operations, financial condition or liquidity. Furthermore, if we continue to have this existing material weakness, other material weaknesses or significant deficiencies in the future, could create a perception that our financial results do not fairly state our financial condition or results of operations. Any of the foregoing could have an adverse effect on the value of our stock. Major bank failure or sustained financial market illiquidity, could adversely affect our business, financial condition and results of operations. We face certain risks in the event of a sustained deterioration of domestic or international financial market liquidity. In particular: ● We may be unable to access funds in our deposit accounts on a timely basis. Any resulting need to access other sources of liquidity or short- term borrowing would increase our costs. ● In the event of a major bank failure, we could face major risks to the recovery of our bank deposits. A substantial portion of our cash and cash equivalents are either held at banks that are not subject to insurance protection against loss or exceed the deposit insurance limit. While we are not currently aware of any liquidity issues directly impacting the financial institutions where we hold cash deposits or securities, if financial liquidity deteriorates, there can be no assurance we will not experience an adverse effect, which may be material, on our ability to access capital and on our business, financial condition and results of operations. Unstable market and economic conditions and adverse developments with respect to financial institutions and associated liquidity risk may have serious adverse consequences on our business, financial condition and stock price. The global credit and financial markets have recently experienced extreme volatility and disruptions, including severely diminished liquidity and credit availability, declines in consumer confidence, declines in economic growth, inflationary pressure and interest rate changes, increases in unemployment rates and uncertainty about economic stability. More recently, the closures of Silicon Valley Bank and Signature Bank and their placement into receivership with the Federal Deposit Insurance Corporation (“ FDIC ”) created bank- specific and broader financial institution liquidity risk and concerns. Although the Department of the Treasury, the Federal Reserve, and the FDIC jointly confirmed that depositors at SVB and Signature Bank would continue to have access to their funds, even those in excess of the standard FDIC insurance limits, under a systemic risk exception, future adverse developments with respect to specific financial institutions or the broader financial services industry may lead to market- wide liquidity shortages, impair the ability of companies to access near- term working capital needs, and create additional market and economic uncertainty. There can be no assurance that future credit and financial market instability and a deterioration in confidence in economic conditions will not occur. Our general business strategy may be adversely affected by any such economic downturn, liquidity shortages, volatile business environment or continued unpredictable and unstable market conditions. If the equity and credit markets deteriorate, or if adverse developments are experienced by financial institutions, it may cause short- term liquidity risk and also make any necessary debt or equity financing more difficult, more costly and more dilutive. Failure to secure any necessary financing in a timely manner and on favorable terms could have a material adverse effect on our growth strategy, financial performance and stock price and could require us to delay or abandon our business plans. In addition, there is a risk that one or more of our current clients, financial institutions or other third parties with whom we do business may be adversely affected by the foregoing risks, which may have an adverse effect on our business. We have no operating history and are subject to a mandatory liquidation and a subsequent dissolution requirement if we do not complete an initial business combination **by June 22, 2024** within 12 months from the closing of the Public Offering (or up to 21 months from the closing of the Public Offering if we extend the period of time to consummate a business combination). As such, there is a risk that we will be unable to continue as a going concern if we do not consummate an initial business combination by the applicable deadline. If we are unable to **effect complete** an initial business combination by the deadline, we will be forced to liquidate. We are a blank check company, and as we have no operating history and are subject to a mandatory liquidation and subsequent dissolution requirement, there is a risk that we will be unable to continue as a going concern if we do not consummate an initial business combination **by June 22, 2024** within 12 months from the closing of the Public Offering (or up to 21 months from the closing of the Public Offering if we extend the period of time to consummate a business combination) . There can be no assurance that we will complete a business combination by this time. If we do not complete our initial business combination **by June 22** within 12 months from the closing of the Public Offering (or up to 21 months from the closing of the Public Offering if we extend the period of time to consummate a business combination), **2024, we will** (i) cease all operations except for the purpose of winding up, (ii) as promptly as reasonably possible but not more than ten business days thereafter, redeem the public shares, at a per- share price, payable in cash, equal to the aggregate amount then on deposit in the trust account including interest earned on the funds held in the trust account and not previously released to us to pay our taxes (less up to \$ 100, 000 of interest to pay dissolution expenses), divided by the number of then outstanding public shares, which redemption will completely extinguish public stockholders’ rights as stockholders (including the right to receive further liquidating distributions, if any), subject to applicable law, and (iii) as promptly as reasonably possible following such redemption, subject to the approval of our remaining stockholders and our board of directors, dissolve and liquidate, subject in the case of clauses (ii) and (iii) above to our obligations under Delaware law to provide for claims of creditors and the requirements of other applicable law. 4
