We account for non- marketable equity investments over which we excercise significant influence, but do not have control over the investee, under the equity method. We record our estimated share of earnings or losses in the periods they are reported by the investee and record any dividends as a reduction to the carrying amount of the investment. We evaluate our equity method investments for other than- temporary declines in value. If the estimated fair value of the investment is less than the carrying amount and management considers the decline in value to be other than temporary, the excess of the carrying amount over the estimated fair value is recognized in net income in the period the impairment occurs. The difference between the purchase price and the estimated fair value of the net assets acquired or the excess of the aggregate estimated fair values of assets acquired and liabilities assumed is recorded as goodwill. Any changes in the fair value measurement will be recorded in our Consolidated Statements of Income. In evaluating the characterization of contingent and deferred payments, we analyze relevant factors, including the nature of the payment, continuing employment requirements, incremental payments to employees of the acquired business, and timing and rationale underlying the transaction, to determine whether the payments should be accounted for as additional purchase consideration or post- combination related services. < / span > < / div > < div > < span > < br / > < / span > < / div > < div > < span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 10pt; font- weight: 400; line- height: 120 %" > We expense direct costs related to the business combination, such as accounting, legal, valuation, and other professional fees, as incurred. Examples of qualitative factors that we assess include macroeconomic conditions affecting our reporting units, financial performance of our reporting units, market and competitive factors related to our reporting units, and other events specific to our reporting units. If we conclude that it is more likely than not that the fair value of a reporting unit is less than its carrying value, we perform a quantitative impairment test. The quantitative impairment test compares the estimated fair value of the reporting unit to its carrying value, and recognizes an impairment loss for the amount by which a reporting unit & # 8217; s carrying amount exceeds its fair value, without exceeding the total amount of goodwill allocated to that reporting unit. We determine the fair value of a reporting unit using a market approach. Determining the fair value of a reporting unit involves judgment and the use of significant estimates and assumptions, which include assumptions regarding the revenue growth rates and operating margins used to calculate estimated future cash flows, as well as revenue and earnings multiples of publicly traded companies whose services and markets are comparable. < / span > < / div > < div > < span > < br / > < / span > < / div > < div > < span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 10pt; font- weight: 400; line- height: 120 %" > We performed our annual impairment review in the fourth quarter and did not record any impairment losses in 2023, 2022, and 2021. < / span > < / div > < div > < span > < br / > < / span > < / div > < div > < span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 10pt; font- style: italic; font- weight: 400; line- height: 120 %" > Intangible Assets < / span > < / div > < div > < span > < br / > < / span > < / div > < div > < span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 10pt; font- weight: 400; line- height: 120 %" > We amortize intangible assets using the straight- line method over their estimated useful lives, which range from < span style ="- sec- ix- hidden: f- 497" > one < / span > to < / span > < span style =" background- color: # ffffff; color: # 000000; font- family:' Arial', sans- serif; font- size: 10pt; font- weight: 400; line- height: 120 %" > twenty years < / span > < span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 10pt; font- weight: 400; line- height: 120 %" >. We recognize revenue daily over the contract term based on the value of assets under management and a tiered fee agreed to with the customer. Asset- based arrangements typically have a term of 1 to 3 years. The fees from such arrangements represent variable consideration, and the customer does not make separate purchasing decisions that result in additional performance obligations. Significant changes in the underlying fund assets, or significant disruptions in the market, are evaluated to determine if revisions to estimates of earned asset- based fees for the current quarter are needed. An estimate of the average daily portfolio balance is a key input in determining revenue for a given period. Estimates are based on the most recently reported quarter, and, as a result, it is unlikely a significant reversal of revenue would occur. < / span > < / div > < div > < span > < br / > < / span > < / div > < div > < span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 10pt; font- weight: 400; line- height: 120 %" > Transaction- based revenue is generated through contracts with performance obligations that are satisfied when the product or service is delivered. Some of our performance obligations include the issuance of the rating and may include surveillance services for a period of time as agreed with the customer. We allocate the transaction price to the deliverables based on their relative selling price, which is generally determined by the price we charge when the same deliverable is sold separately. Our performance obligation for the issuance of the rating is satisfied when the rating is issued, which is when we recognize the related revenue. Our performance obligations for surveillance services are satisfied over time, as the customer has access to the service during the surveillance period and the level of service is consistent during the contract period. Estimates of these capitalized costs are developed by using a portfolio approach that aggregates these costs by legal entity within their geographical regions. Capitalized sales commissions are amortized using the straight- line method over a period that is consistent with the transfer of the products or services to the customer to which the sales commission relates. The period of transfer for each portfolio is the shorter of the weighted- average customer life, or the economic life of the underlying technology that delivers the products or services. As of December & # 160; 31, 2023, the period of transfer was determined to be approximately three years. Discretionary amounts which are added to sales commission payments are expensed as incurred, as they are not considered to be directly attributable to obtaining a customer contract. < / span > < / div > < div > < span > < br / > < / span > < / div > < div > < span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 10pt; font- style: italic; font- weight: 400; line- height: 120 %" > Stock- Based Compensation Expense < / span > < / div > < div > < span > < br / > < / span > < / div > < div > < span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 10pt; font- weight: 400; line- height: 120 %" > We account for our stock- based compensation expense in accordance with FASB ASC 718, < / span > < span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 10pt; font- style: italic; font- weight: 400; line- height: 120 %" > Compensation & # 8212; Stock Compensation < / span > < span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 10pt; font- weight: 400; line- height: 120 %" > (FASB ASC 718). Our stock- based compensation expense reflects grants of restricted stock units, performance share awards, and market stock units. Asset- based arrangements typically have a term of 1 to 3 years. Asset- based fees represent variable consideration, and the customer does not make separate purchasing decisions that result in additional performance obligations. The timing of client asset reporting and the structure of certain contracts can result in a lag between market movements and the impact on earned revenue. Significant changes in the underlying fund assets and significant disruptions in the market are evaluated to determine whether estimates of earned asset- based fees need to be revised for the current quarter. An estimate of variable consideration is included in the initial transaction price only to the extent it is probable that a significant reversal in the amount of the revenue recognized will not occur. Estimates of asset- based fees are based on the most recently completed quarter and, as a result, it is unlikely a significant reversal of revenue would occur. < / span > < / div > < div > < span > < br / > < / span > < / div > < div > < span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 10pt; font- weight: 400; line- height: 120 %" > Transaction- based performance obligations are satisfied when the product or service is completed or delivered. Included in this increase, is $ 8. 1 million of foreign tax credits that will expire in 2031 through 2033. In assessing the need for a valuation allowance, many factors are considered, including the specific taxing jurisdiction, the carryforward period, income tax strategies and forecasted earnings for the entities in each jurisdiction. A valuation allowance is recognized if, based on the weight of available evidence, it is more likely than not that some portion or all of the deferred tax asset will not be realized. </ span ></ div >< div >< span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 10pt; font- weight: 400; line- height: 112 %" > The deferred tax assets and liabilities are presented in our Consolidated Balance Sheets as follows: </ span ></ div >< div style =" margin- top: 5pt; text- align: center" >< table style =" border- collapse: collapse; display: inline- table; margin- bottom: 5pt; vertical- align: text- bottom; width: 99. 269 %" >< tr >< td style =" width: 1. 0 %" ></ td >< td style =" width: 62. 081 %" ></ td >< td style =" width: 0. 1 %" ></ td >< td style =" width: 0. 1 %" ></ td >< td style =" width: 0. 536 %" ></ td >< td style =" width: 0. 1 %" ></ td >< td style =" width: 1. 0 %" ></ td >< td style =" width: 16. 573 %" ></ td >< td style =" width: 0. 1 %" ></ td >< td style =" width: 0. 1 %" ></ td >< td style =" width: 0. 536 %" ></ td >< td style =" width: 0. 1 %" ></ td >< td style =" width: 1. 0 %" ></ td >< td style =" width: 16. 574 %" ></ td >< td style =" width: 0. 1 %" ></ td ></ tr >< tr >< td colspan =" 3" style =" padding: 0 1pt" ></ td >< td

Our compliance with the terms of these licenses is reviewed internally and is also subject to audit by the third- party vendors. At any given time, we may be undergoing several such internal reviews and third- party vendor audits, and the results and findings may indicate that we may be required to make a payment for prior data usage. Due to a lack of available information and data, as well as potential variations of any audit or internal review findings, we generally are not able to reasonably estimate a possible loss, or range of losses, for these matters. In situations where more information or specific areas subject to audit are available, we may be able to estimate a potential range of losses. While we cannot predict the outcome of these processes, we do not anticipate they will have a material adverse effect on our business, operating results, or financial position. < / span > < / div > < div style =" margin- bottom: 6pt" > < span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 10pt; font- style: italic; font- weight: 400; line- height: 120 %" > Regulatory Matters < / span > < / div > < div > < span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 10pt; font- weight: 400; line- height: 120 %" > Our businesses may be, or may become subject to regulation or increased scrutiny from executive, legislative, regulatory, and private parties. The difference between the purchase price and the estimated fair value of the net assets acquired or the excess of the aggregate estimated fair values of assets acquired and liabilities assumed is recorded as goodwill. In determining the estimated fair values of assets acquired and liabilities assumed in a business combination, we use various recognized valuation methods, including discounted cash flow, Monte Carlo simulations, and relief from royalty. For a business combination achieved in stages, we remeasure our previously held equity interest immediately before the acquisition to the acquisition date fair value and recognize any gain in our Consolidated Statements of Income. < / span > < / div > < div > < span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 10pt; font- weight: 400; line- height: 120 %" > We recognize the fair value of any contingent payments at the date of acquisition as part of the consideration transferred to acquire a business. The liability associated with contingent consideration is remeasured to fair value at each reporting period subsequent to the date of acquisition considering factors that may impact the timing and amount of contingent payments until the term of the agreement has expired or the contingency is resolved. Any changes in the fair value measurement will be recorded in our Consolidated Statements of Income. In evaluating the characterization of contingent and deferred payments, we analyze relevant factors, including the nature of the payment, continuing employment requirements, incremental payments to employees of the acquired business, and timing and rationale underlying the transaction, to determine whether the payments should be accounted for as additional purchase consideration or post- combination related services. < / span > < / div > < div > < span > < br / > < / span > < / div > < div > < span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 10pt; font- weight: 400; line- height: 120 %" > We expense direct costs related to the business combination, such as accounting, legal, valuation, and other professional fees, as incurred. Examples of qualitative factors that we assess include macroeconomic conditions affecting our reporting units, financial performance of our reporting units, market and competitive factors related to our reporting units, and other events specific to our reporting units. If we conclude that it is more likely than not that the fair value of a reporting unit is less than its carrying value, we perform a quantitative impairment test. The quantitative impairment test compares the estimated fair value of the reporting unit to its carrying value, and recognizes an impairment loss for the amount by which a reporting unit & # 8217; s carrying amount exceeds its fair value, without exceeding the total amount of goodwill allocated to that reporting unit. We determine the fair value of a reporting unit using a market approach. Determining the fair value of a reporting unit involves judgment and the use of significant estimates and assumptions, which include assumptions regarding the revenue growth rates and operating margins used to calculate estimated future cash flows, as well as revenue and earnings multiples of publicly traded companies whose services and markets are comparable. < / span > < / div > < div > < span > < br / > < / span > < / div > < div > < span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 10pt; font- weight: 400; linc- height: 120 %" > We performed our annual impairment review in the fourth quarter and did not record any impairment losses in 2023, 2022, and 2021. < / span > < / div > < span > < / span > < / td > < / tr > < tr class =" re" > < td class =" pl" style =" border- bottom: 0px;" valign =" top" > < a class =" a" href =" javascript: void (0);" onclick =" Show. showAR (this,' defref_us- gaap_GoodwillAndIntangibleAssetsIntangibleAssetsPolicy', window);" > Intangible Assets < / a > < / td > < td class =" text" > < div > < span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 10pt; font- style: italic; font- weight: 400; linc- height: 120 %" > Intangible Assets < / span > < / div > < div > < span > < br / > < / span > < / div > < div > < span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 10pt; font- weight: 400; linc- height: 120 %" > We amortize intangible assets using the straight- line method over their estimated useful lives, which range from < span style ="- sec- ix- hidden: f- 497" > one < / span > to < / span > < span style =" background- color: # ffffff; color: # 000000; font- family:' Arial', sans- serif; font- size: 10pt; font- weight: 400; linc- height: 120 %" > twenty years < / span > < span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 10pt; font- weight: 400; linc- height: 120 %" >. The period of transfer for each portfolio is the shorter of the weighted- average customer life, or the economic life of the underlying technology that delivers the products or services. As of December & # 160; 31, 2023, the period of transfer was determined to be approximately three years. Discretionary amounts which are added to sales commission payments are expensed as incurred, as they are not considered to be directly attributable to obtaining a customer contract. < span > < / span > < / td > < / tr > < tr class =" re" > < td class =" pl" style =" border- bottom: 0px;" valign =" top" > < a class =" a" href =" javascript: void (0);" onclick =" Show. showAR (this,' defref_us- gaap_ShareBasedCompensationOptionAndIncentivePlansPolicy', window);" > Stock- Based Compensation Expense < / a > < / td > < td class =" text" > < div > < span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 10pt; font- style: italic; font- weight: 400; line- height: 120 %" > Stock- Based Compensation Expense < / span > < / div > < div > < span > < br / > < / span > < / div > < div > < span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 10pt; font- weight: 400; line- height: 120 %" > We account for our stock- based compensation expense in accordance with FASB ASC 718, < / span > < span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 10pt; font- style: italic; font- weight: 400; line- height: 120 %" > Compensation & # 8212; Stock Compensation < / span > < span style =" color: # 000000; font- family:' Arial', sans- serif; font- size: 10pt; font- weight: 400; line- height: 120 %" > (FASB ASC 718). Aggregation of similar operating segments into a single reportable operating segment is permitted if the businesses have similar economic characteristics and meet established qualitative criteria. < / span > < / div > Effective as of December 31, 2023, we revised our presentation of our seven operating segments to the following five reportable segments: Morningstar Data and Analytics, PitchBook, Morningstar Wealth, Morningstar Credit, and Morningstar Retirement. The operating segments of Morningstar Sustainalytics and Morningstar Indexes do not individually meet the quantitative segment reporting thresholds and have been combined and presented as part of Corporate and All Other, which is not a reportable segment. Corporate and All Other provides a reconciliation between revenue from our reportable segments and consolidated revenue amounts. Refer to Note 6 for detailed segment information. < / span > < / span > < / td > < / tr > < / table > < div style =" display: none;" > < table border =" 0" cellpadding =" 0" cellspacing =" 0" class =" authRefData" style =" display: none;" id =" defref_us- gaap_SegmentReportingAbstract" > < tr > < td class =" hide" > < a style =" color: white;" href =" javascript: void (0);" onclick =" Show. hideAR ();" > X < / a > < / td > < / tr > < tr > < td > < div class =" body" style =" padding: 2px;" > < a href =" javascript: void
