Additionally, various aspects of the ISP are subject to periodic audit by the Company & # x2019; s Internal Audit department or third- party professionals engaged by the Internal Audit department. Such audits vary from year- to- year but are generally focused on compliance with stated control activities, standards, and internal policies, as well as maintaining the integrity and independence of the audit process. Cybersecurity risk reviews such as SOC2, SOX controls, penetration tests, and regulatory controls are conducted by independent third parties. & lt; / span & gt; & lt; / div & gt; & lt; div style =" text- align: justify" & gt; & lt; span & gt; & lt; br / & gt; & lt; / span & gt; & lt; / div & gt; & lt; div style =" text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Roboto', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; The ISP also incorporates a vendor due diligence process that is designed to assess vendor control environments and evaluate risks associated with vendor access to the Company' s confidential data and systems. The CIRT is overseen by the CISO. If necessary, the CIRT may engage third- party cybersecurity experts to evaluate and / or remediate the incident. If and when the CIRT is activated, the CISO will inform the Company' s Chief Information Officer (CIO). In the event that the CIRT confirms that the incident relates to a cybersecurity incident or compromise of MGIC & # x2019; s computer systems, the CISO will notify the General Counsel, who will advise the Chief Executive Officer (" CEO"), who is a member of the Board of Directors. In addition to advising the CEO, the General Counsel will also convene an established committee whose members include the General Counsel, Chief Financial and Risk Officer, Senior Vice President of Investor Relations, and Chief Accounting Officer in order to determine if the event is a material cybersecurity incident so as to trigger an Item 1. 05 filing on Form 8- K. Mortgage Guaranty Insurance Corporation (" MGIC"), is principally engaged in the mortgage insurance business. We provide mortgage insurance to lenders throughout the United States and to government sponsored entities to protect against loss from defaults on low down payment residential mortgage loans. Primary mortgage insurance provides mortgage default protection on individual loans and covers a percentage of the unpaid loan principal, delinquent interest and certain expenses associated with the default and subsequent foreclosure or sale approved by us, of the underlying property. MGIC Assurance Corporation (" MAC") and MGIC Indemnity Corporation (" MIC"), insurance subsidiaries of MGIC, provide insurance for certain mortgages under Fannie Mae and Freddie Mac (the" GSEs") credit risk transfer programs. We operate as a single segment for the purposes of evaluating financial performance and allocating resources. & lt; / span & gt; & lt; / div & gt; & lt; div style =" text- align: justify" & gt; & lt; span & gt; & lt; br / & gt; & lt; / span & gt; & lt; / div & gt; & lt; div style =" text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Roboto', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; At December & # 160; 31, 2024, our direct primary insurance in force (" IIF") was $ 295. 4 billion, which represents the unpaid principal balance, either estimated by us or reported to us by mortgage servicers, for the loans we insure, and our direct primary risk in force (" RIF") was $ 78. 8 billion, which represents the IIF multiplied by the insurance coverage percentage. & lt; / span & gt; & lt; / div & gt; & lt; div style =" text- align: justify" & gt; & lt; span & gt; & lt; br / & gt; & lt; / span & gt; & lt; / div & gt; & lt; div style =" text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Roboto', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; The substantial majority of our new insurance written (" NIW") is for loans purchased by the GSEs. The current private mortgage insurer eligibility requirements (" PMIERs") of the GSEs include financial requirements, as well as business, quality control and certain transactional approval requirements. The financial requirements of the PMIERs require a mortgage insurer & # x2019; s" Available Assets" (generally only the most liquid assets of an insurer) to equal or exceed its" Minimum Required Assets" (which are based on an insurer' s book of risk in force, calculated from tables of factors with several risk dimensions). Based on our application of the PMIERs, as of December & # 160; 31, 2024, MGIC & # x2019; s Available Assets are in excess of its Minimum Required Assets, and MGIC is in compliance with the PMIERs and eligible to insure loans purchased by the GSEs. & lt; / span & gt; & lt; / div & gt; < / us- gaap: NatureOfOperations > < mtg: DirectDomesticPrimaryInsuranceInForce contextRef =" c- 10" decimals ="- 8" id =" f- 375" unitRef =" usd" > 295400000000 < / mtg: DirectDomesticPrimaryInsuranceInForce > < mtg: DirectDomesticPrimaryRiskInForce contextRef =" c- 10" decimals ="- 8" id =" f- 376" unitRef =" usd" > 78800000000 < / mtg: DirectDomesticPrimaryRiskInForce > < us- gaap: OrganizationConsolidationAndPresentationOfFinancialStatementsDisclosureTextBlock contextRef =" c- 1" id =" f- 377" > Basis of Presentation & lt; div style =" margin- bottom: 3pt; text- align: justify" & gt; & lt; span style =" color: # 003b5c; font- family:' Roboto', sans- serif; font- size: 9pt; font- weight: 700; line- height: 120 %" & gt; BASIS OF PRESENTATION & lt; / span & gt; & lt; / div & gt; & lt; div style =" text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Roboto', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; The accompanying consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America (" GAAP"), as codified in the Accounting Standards Codification (" ASC"). Fair value is based on quoted market prices or inputs, where available. If prices or quotes are not available, fair value is based on valuation models or other valuation techniques that

consider relevant transaction characteristics (such as maturity) and use as inputs observable or unobservable market parameters including yield curves, interest rates, volatilities, equity or debt prices, and credit curves. The valuation hierarchy is based on the transparency of inputs to the valuation of a financial instrument as of the measurement date. To determine the fair value of securities available- for- sale in Level 1 and Level 2 of the fair value hierarchy, independent pricing sources, as described below, have been utilized. One price is provided per security based on observable market data. To ensure securities are appropriately classified in the fair value hierarchy, we review the pricing techniques and methodologies of the independent pricing sources and believe that their policies adequately consider market activity, either based on specific transactions for the issue valued or based on modeling of securities with similar credit quality, duration, yield and structure that were recently traded. & lt; / span & gt; & lt; / div & gt; & lt; div style =" text- align: justify" & gt; & lt; span & gt; & lt; br / & gt; & lt; / span & gt; & lt; / div & gt; & lt; div style =" text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Roboto', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; The three levels are defined as follows: & lt; / span & gt; & lt; / div & gt; & lt; div style =" text- align: justify" & gt; & lt; table style =" border- collapse: collapse; display: inline- table; margin- bottom: 5pt; vertical- align: text- bottom; width: 100. 000 %" & gt; & lt; tr & gt; & lt; td style =" width: 0. 1 %" & gt; & lt; / td & gt; & lt; td style =" width: 2. 438 %" & gt; & lt; / td & gt; & lt; td style =" width: 0. 1 %" & gt; & lt; / td & gt; & lt; td style =" width: 1. 0 %" & gt; & lt; / td & gt; & lt; td style =" width: 4. 872 %" & gt; & lt; / td & gt; & lt; td style =" width: 0. 1 %" & gt; & lt; / td & gt; & lt; td style =" width: 1. 0 %" & gt; & lt; / td & gt; & lt; td style =" width: 90. 290 %" & gt; & lt; / td & gt; & lt; td style =" width: 0. 1 %" & gt; & lt; / td & gt; & lt; / tr & gt; & lt; tr & gt; & lt; td colspan =" 3" style =" border- bottom: 0. 25pt solid # d0d0ce; border- top: 0. 25pt solid # d0d0ce; padding: 2px 1pt; text- align: left; vertical- align: top" & gt; & lt; span style =" color: # 0084ce; font- family:' Wingdings', sans- serif; font- size: 8pt; font- weight: 400; line- height: 100 %" & gt; & # xe8; & lt; / span & gt; & lt; / td & gt; & lt; td colspan =" 3" style =" border- bottom: 0. 25pt solid # d0d0ce; border- top: 0. 25pt solid # d0d0ce; padding: 2px 1pt; text- align: left; vertical- align: top" & gt; & lt; span style =" color: # 000000; font- family:' Roboto', sans- serif; font- size: 8. 5pt; font- weight: 400; line- height: 100 %" & gt; Level 1 & lt; / span & gt; & lt; / td & gt; & lt; td colspan =" 3" style =" border- bottom: 0. 25pt solid # d0d0ce; border- top: 0. 25pt solid # d0d0ce; padding: 2px 1pt; text- align: justify; vertical- align: top" & gt; & lt; span style =" color: # 000000; font- family:' Roboto', sans- serif; font- size: 8. 5pt; font- weight: 400; line- height: 100 %" & gt; Quoted prices for identical instruments in active markets that we can access. The inputs used to derive the fair value of Level 3 securities reflect our own assumptions about the assumptions a market participant would use in pricing an asset or liability. Our non- financial assets that are classified as Level 3 securities consist of real estate acquired through claim settlement and embedded derivatives related to our Home Re Transactions. The fair value of real estate acquired is the lower of our acquisition cost or a percentage of the appraised value. The percentage applied to the appraised value is based upon our historical sales experience adjusted for current trends. The fair value of our embedded derivatives reflects the present value impact of the variation in investment income on the assets held by the reinsurance trusts and the contractual reference rate on Home Re Transactions used to calculate the reinsurance premiums we estimate we will pay over the estimated remaining life. & lt; / span & gt; & lt; / div & gt; & lt; / td & gt; & lt; / tr & gt; & lt; / table & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 3pt; text- align: justify" & gt; & lt; span & gt; & lt; br / & gt; & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 3pt; text- align: justify" & gt; & lt; span style =" color: # 003b5c; font- family:' Roboto', sans- serif; font- size: 9pt; font- weight: 700; line- height: 120 %" & gt; INVESTMENTS & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 3pt; text- align: justify" & gt; & lt; span style =" color: # 0084ce; font- family:' Roboto', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; Fixed income securities. & lt; / span & gt; & lt; span style =" color: # 7a6855; font- family:' Roboto', sans- serif; font- size: 9pt; font- style: italic; font- weight: 400; line- height: 120 %" & gt; & lt; / span & gt; & lt; span style =" color: # 000000; font- family:' Roboto', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; Our fixed income securities are classified as available- for- sale and are reported at fair value. A credit loss is recorded, subject to reversal, in the consolidated statement of operations within" Net gains (losses) on investments and other financial instruments." The loss due to other factors is recognized in accumulated other comprehensive loss, net of taxes. A credit loss is determined to exist if the present value of the discounted cash flows, using the security & # x2019; s original yield, expected to be collected from the security is less than the cost basis of the security. & lt; / span & gt; & lt; / div & gt; & lt; div style =" text- align: justify" & gt; & lt; span & gt; & lt; br / & gt; & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 3pt; text- align: justify" & gt; & lt; span style =" color: # 003b5c; font- family:' Roboto', sans- serif; font- size: 9pt; font- weight: 700; line- height: 120 %" & gt; HOME OFFICE AND EQUIPMENT & lt; / span & gt; & lt; / div & gt; & lt; div style =" text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Roboto', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; Home office and equipment is carried at cost, net of depreciation. & # 160; For financial reporting purposes, depreciation is determined on a straight- line basis for the home office and equipment over estimated lives ranging from 3 to 45 years. & # 160; For income tax purposes, we use accelerated depreciation methods. & lt; / span & gt; & lt; / div & gt; & lt; div style =" text- align: justify" & gt; & lt; span & gt; & lt; br / & gt; & lt; / span & gt; & lt; / div & gt; & lt; div style =" text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Roboto', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; Home office and equipment is shown net of accumulated depreciation of $ 61. 2 million and $ 59. 2 million as of December & # 160; 31, 2024 and 2023, respectively. Such loans are referred to as being in our delinquency inventory. For reporting purposes, we consider a loan delinquent when it is two or more payments past due and has not become current or resulted in a claim payment. Although the accounting standard, ASC 944, regarding accounting and reporting by insurance entities specifically excludes mortgage insurance from its guidance relating to loss reserves, we establish loss reserves using the general principles contained in the insurance standard. However, consistent with industry standards for mortgage insurers, we do not establish case reserves for future claims on insured loans that are not currently delinquent. & lt; / span & gt; & lt; / div & gt; & lt; div style =" text- align: justify" & gt; & lt; span & gt; & lt; br / & gt; & lt; / span & gt; & lt; / div & gt; & lt; div style =" text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Roboto', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; Case reserves are established by estimating the number of loans in our delinquency inventory that will result in a claim payment, which is referred to as the claim rate, and further estimating the amount of the claim payment, which is referred to as claim severity. Our case reserve estimates are primarily established based upon historical experience, including rescissions of policies, curtailments of claims, and loan modification activity. Adjustments to reserve estimates are reflected in the financial statements in the years in which the adjustments are made. Loss reserves for reinsurance assumed are based on information provided by the ceding companies. & lt; / span & gt; & lt; / div & gt; & lt; div style =" text- align: justify" & gt; & lt; span & gt; & lt; br / & gt; & lt; / span & gt; & lt; / div & gt; & lt; div style =" text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Roboto', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; IBNR reserves are established for delinquencies estimated to have occurred prior to the close of an accounting period, but have not yet been reported to us. The first step applies a more- likely- than- not threshold for recognition and derecognition. The second step measures the tax position as the greatest amount of benefit that is cumulatively greater than 50 % likely to be realized. When evaluating a tax position for recognition and measurement, we presume that the tax position will be examined by the relevant taxing authority that has full knowledge of all relevant information. Our" participating securities" are composed of vested restricted stock and restricted stock units (" RSUs") with non- forfeitable rights to dividends. Diluted EPS includes the components of basic EPS and also gives effect to dilutive common stock equivalents. We calculate diluted EPS using the treasury stock method and if- converted method. Under the treasury stock method, diluted EPS reflects the potential dilution that could occur if our unvested restricted stock units result in the issuance of common stock. Prior to our redemption of the outstanding principal on our 9 % debentures in 2023, we utilized the if- converted method, to calculate the potential dilution that could occur if our 9 % Debentures were converted to common stock. The determination of potentially issuable shares did not consider the satisfaction of the conversion requirements and the shares were included in the determination of diluted EPS as of the beginning of the period, if dilutive. For purposes of calculating basic and diluted EPS, vested RSUs are considered outstanding. In 2023, under the terms of our 9 % Debentures, we exercised our option to redeem the outstanding principal. The valuation hierarchy is based on the transparency of inputs to the valuation of a financial instrument as of the measurement date. To determine the fair value of securities available- for- sale in Level 1 and Level 2 of the fair value hierarchy, independent pricing sources, as described below, have been utilized. One price is provided per security based on observable market data. To ensure securities are appropriately classified in the fair value hierarchy, we review the pricing techniques and methodologies of the independent pricing sources and believe that their policies adequately consider market activity, either based on specific transactions for the issue valued or based on modeling of securities with similar credit quality, duration, yield and structure that were recently traded. & lt; / span & gt; & lt; / div & gt; & lt; div style =" text- align: justify" & gt; & lt; span & gt; & lt; br / & gt; & lt; / span & gt; & lt; / div & gt; & lt; div style =" text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Roboto', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; The three levels are defined as follows: & lt; / span & gt; & lt; / div & gt; & lt; div style =" text- align: justify" & gt; & lt; table style =" border- collapse: collapse; display: inline- table; margin- bottom: 5pt; vertical- align: text- bottom; width: 100. 000 %" & gt; & lt; tr & gt; & lt; td style =" width: 0. 1 %" & gt; & lt; / td & gt; & lt; td style =" width: 2. 438 %" & gt; & lt; / td & gt; & lt; td style =" width: 0. 1 %" & gt; & lt; / td & gt; & lt; td style =" width: 1. 0 %" & gt; & lt; / td & gt; & lt; td style =" width: 4. 872 %" & gt; & lt; / td & gt; & lt; td style =" width: 0. 1 %" & gt; & lt; / td & gt; & lt; td style =" width: 1. 0 %" & gt; & lt; / td & gt; & lt; td style =" width: 90. 290 %" & gt; & lt; / td & gt; & lt; td style =" width: 0. 1 %" & gt; & lt; / td & gt; & lt; / tr & gt; & lt; tr & gt; & lt; td colspan =" 3" style =" border- bottom: 0. 25pt solid # d0d0ce; border- top: 0. 25pt solid # d0d0ce; padding: 2px 1pt; text- align: left; vertical- align: top" & gt; & lt; span style =" color: # 0084ce; font- family:' Wingdings', sans- serif; font- size: 8pt; font- weight: 400; line- height: 100 %" & gt; & # xe8; & lt; / span & gt; & lt; / td & gt; & lt; td colspan =" 3" style =" border- bottom: 0. 25pt solid # d0d0ce; border- top: 0. 25pt solid # d0d0ce; padding: 2px 1pt; text- align: left; vertical- align: top" & gt; & lt; span style =" color: # 000000; font- family:' Roboto', sans- serif; font- size: 8. 5pt; font- weight: 400; line- height: 100 %" & gt; Level 1 & lt; / span & gt; & lt; / td & gt; & lt; td colspan =" 3" style =" border- bottom: 0. 25pt solid # d0d0ce; border- top: 0. 25pt solid # d0d0ce; padding: 2px 1pt; text- align: justify; vertical- align: top" & gt; & lt; span style =" color: # 000000; font- family:' Roboto', sans- serif; font- size: 8. 5pt; font- weight: 400; line- height: 100 %" & gt; Quoted prices for identical instruments in active markets that we can access. The inputs used to derive the fair value of Level 3 securities reflect our own assumptions about the assumptions a market participant would use in pricing an asset or liability. Our non- financial assets that are classified as Level 3 securities consist of real estate acquired through claim settlement and embedded derivatives related to our Home Re Transactions. The fair value of real estate acquired is the lower of our acquisition cost or a percentage of the appraised value. The percentage applied to the appraised value is based upon our historical sales experience adjusted for current trends. The fair value of our embedded derivatives reflects the present value impact of the variation in investment income on the assets held by the reinsurance trusts and the contractual reference rate on Home Re Transactions used to calculate the reinsurance premiums we estimate we will pay over the estimated remaining life. & lt; / span & gt; & lt; / div & gt; & lt; / td & gt; & lt; / tr & gt; & lt; / table & gt; & lt; / div & gt; < / us- gaap: FairValueOfFinancialInstrumentsPolicy > < us- gaap: InvestmentPolicyTextBlock contextRef =" c- 1" id =" f- 383" > & lt; div style =" margin- bottom: 3pt; text- align: justify" & gt; & lt; span style =" color: # 0084ce; font- family:' Roboto', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; Fixed income securities. & lt; / span & gt; & lt; span style =" color: # 7a6855; font- family:' Roboto', sans- serif; font- size: 9pt; font- style: italic; font- weight: 400; line- height: 120 %" & gt; & lt; / span & gt; & lt; span style =" color: # 000000; font- family:' Roboto', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; Our fixed income securities are classified as available- for- sale and are reported at fair value. Such loans are referred to as being in our delinquency inventory. For reporting purposes, we consider a loan delinquent when it is two or more payments past due and has not become current or resulted in a claim payment. Although the accounting standard, ASC 944, regarding accounting and reporting by insurance entities specifically excludes mortgage insurance from its guidance relating to loss reserves, we establish loss reserves using the general principles contained in the insurance standard. Income tax disclosures will require consistent categories and greater disaggregations of information in the rate reconciliation and disclosure of income taxes paid disaggregated by jurisdiction. ASU 2023- 09 is effective for annual periods beginning after December 15, 2024 on a prospective basis. We have evaluated the impacts the adoption of this guidance will have on our consolidated financial statements and determined that it will not have a material impact. & lt; / span & gt; & lt; / div & gt; & lt; div style =" text- align: justify" & gt; & lt; span & gt; & lt; br / & gt; & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 3pt; text- align: justify" & gt; & lt; span style =" color: # 0084ce; font- family:' Roboto', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; Disaggregation of Income Statement Expenses: ASU 2024- 03 & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- bottom: 3pt; text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Roboto', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; In November 2024, the FASB issued ASU 2024- 03 requiring additional disclosure of the nature of expenses included in the income statement. The new standard requires disclosures about specific expenses included in the expense captions presented on the face of the income statement as well as disclosures about selling expenses. ASU 2024- 03 is effective for annual reporting periods beginning after December 15, 2026 and interim reporting periods beginning after December 15, 2027. The requirements will be applied prospectively with the option for retrospective application. Early adoption is permitted. We are currently evaluating the impacts the adoption of this guidance will have on our disclosures, but do not expect it to have a material impact. & lt; / span & gt; & lt; / div & gt; < / us- gaap: NewAccountingPronouncementsPolicyPolicyTextBlock > < us- gaap: EarningsPerShareTextBlock contextRef =" c- 1" id =" f- 408" > Earnings Per Share & lt; div style =" text- align: justify" & gt; & lt; span style =" color: # 000000; font- family:' Roboto', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" & gt; Table 4. 1 reconciles basic and diluted EPS amounts: & lt; / span & gt; & lt; / div & gt; & lt; div style =" margin- top: 5pt; text- align: justify" & gt; & lt; table style =" border- collapse: collapse; display: inline- table; margin- bottom: 5pt; vertical- align:

Under this method, if dilutive, the common stock related to the outstanding 9 % Debentures was assumed to be issued as of the beginning of the reporting period and the related interest expense, net of tax, was added back to earnings in calculating diluted EPS. In 2023, under the terms of our 9 % Debentures, we exercised our

option to redeem the outstanding principal.
