The conditions that affect the claim rate and claim severity include the current and future state of the domestic economy, including unemployment and the current and future strength of local housing markets; exposure on insured loans; the amount of time between delinquency and claim filing (all else being equal, the longer the period between delinquency and claim filing, the greater the severity); and curtailments and rescissions. The actual amount of the claim payments may be substantially different than our loss reserve estimates. Our estimates could be adversely affected by several factors, including a deterioration of regional or national economic conditions, including unemployment, leading to a reduction in borrowers & # 8217; income and thus their ability to make mortgage payments, the impact of past and future government initiatives and actions taken by the GSEs (including mortgage forbearance programs and foreclosure moratoriums), and a drop in housing values which may affect borrower willingness to continue to make mortgage payments when the value of the home is below the mortgage balance. Assumed reinsurance refers to the acceptance of certain insurance risks that other insurance companies have underwritten. Ceded reinsurance involves transferring certain insurance risks we have underwritten to other insurance companies who agree to share these risks. The purpose of ceded reinsurance is to protect us, at a cost, against losses arising from our mortgage guaranty policies covered by the agreement and to manage our capital requirements under PMIERs. Reinsurance is currently placed on a quota share and excess of loss basis. < / span > < / div > < div style =" text- align: justify" > < span > < br / > < / span > < / div > < div style =" text- align: justify" > < span style =" color: # 000000; We receive the benefit of a ceding commission equal to 20 % of premiums ceded before profit commission. We also receive the benefit of a profit commission through a reduction of premiums we cede. The profit commission varies inversely with the level of losses on a & # 8220; dollar for dollar & # 8221; basis and can be eliminated at annual loss ratios higher than we have experienced on our QSR transactions. Ceded losses incurred are impacted by the delinquencies covered by our QSR Transactions, our estimates of payments that will be ultimately made on those delinquencies, and claim payments covered by our QSR Transactions. < / span > < / div > < div style =" text- align: justify" > < span > < br / > < / span > < / div > < div style =" text- align: justify" > < span style =" color: # 000000; The reinsured coverage levels are secured by funds on deposit from reinsurers (which does not include letters of credit), the minimum amount of which is based on the greater of 1) a reinsurer' s funding requirements under PMIERs or 2) ceded reserves and unpaid losses. Each of the reinsurers under our Traditional XOL Transactions has an insurer financial strength rating of A- or better (or a comparable rating) by Standard and Poor & # 8217; s Rating Services, A. M. Best, Moody & # 8217; s, or a combination of the three. < / span > < / div > < div style =" text- align: justify" > < span > < br / > < / span > < / div > < div style =" text- align: justify" > < span style =" color: # 000000; font- family:' Roboto', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" > The Home Re Transactions are executed with unaffiliated special purpose insurers (& # 8220; Home Re Entities & # 8221;). For the reinsurance coverage periods, we retain the first layer of the respective aggregate losses paid, and a Home Re Entity will then provide second layer coverage up to the outstanding reinsurance coverage amount. The coverage premiums are generally calculated as the difference between the amount of interest payable by the Home Re Entity on the remaining reinsurance coverage levels, and the investment income collected on the collateral assets held in reinsurance trust account and used to collateralize the Home Re Entity' s reinsurance obligation to MGIC. The amount of monthly reinsurance coverage premium ceded will fluctuate due to changes in the reference rate and changes in money market rates that affect investment income collected on the assets in the reinsurance trust. As a result, we concluded that each Home Re Transaction contains an embedded derivative that is accounted for separately as a freestanding derivative. The fair values of the derivatives at & # 160; December & # 160; 31, 2024 and December & # 160; 31, 2023, were not material to our consolidated balance sheet, and the change in fair values during the years ended December & # 160; 31, 2024, December & # 160; 31, 2023 and December & # 160; 31, 2022 were not material to our consolidated statements of operations. A VIE is a legal entity that does not have sufficient equity at risk to finance its activities without additional subordinated financial support or is structured such that equity investors lack the ability to make sufficient decisions relating to the entity & # 8217; s operations through voting rights or do not substantively participate in gains and losses of the entity. Given that MGIC (1) does not have the unilateral power to direct the activities that most significantly affect each Home Re Entity & # 8217; s economic performance and (2) does not have the obligation, outside the terms of the reinsurance agreement, to absorb losses or the right to receive benefits of each Home Re Entity that could be significant to the Home Re Entity, consolidation of the Home Re Entities is not required. < / span > < / div > < div style =" text- align: justify" > < span > < br / > < / span > < / div > < div style =" text- align: justify" > < span style =" color: # 000000; font- family:' Roboto', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" > We are required to disclose our maximum exposure to loss, which we consider to be an amount that we could be required to record in our statements of operations, as a result of our involvement with the VIEs under our Home Re Transactions. As of December & # 160; 31, 2024, December & # 160; 31, 2023 and December & # 160; 31, 2022, we did not have material exposure to the VIEs as we have no investment in the VIEs and had no reinsurance claim payments due from the VIEs under our reinsurance transactions. We are unable to determine the timing or extent of claims from losses that are ceded under the reinsurance transactions. The VIE assets are deposited in reinsurance trusts for the benefit of MGIC that will be the source of reinsurance claim payments to MGIC. The purpose of the reinsurance trusts is to provide security to MGIC for the obligations of the VIEs under the reinsurance transactions. The trustee of the reinsurance trusts, a recognized provider of corporate trust services, has established segregated accounts

within the reinsurance trusts for the benefit of MGIC, pursuant to the trust agreements. The trust agreements are governed by, and construed in accordance with, the laws of the State of New York. If the trustee of the reinsurance trusts failed to distribute claim payments to us as provided in the reinsurance trusts, we would incur a loss related to our losses ceded under the reinsurance transactions and deemed unrecoverable. We are also unable to determine the impact such possible failure by the trustee to perform pursuant to the reinsurance trust agreements may have on our consolidated financial statements. As a result, we are unable to quantify our maximum exposure to loss related to our involvement with the VIEs. MGIC has certain termination rights under the reinsurance transactions should its claims not be paid. We consider our exposure to loss from our reinsurance transactions with the VIEs to be remote. < / span > < / div > < div style =" text- align: justify" > < span > < br / > < / span > < / div > < div style =" text- align: justify" > < span style =" color: # 000000; The modeling was performed using a bond portfolio of noncallable bonds with at least $ 50 million outstanding. The average yield of these hypothetical bond portfolios was used as the benchmark for determining the discount rate. In selecting the expected long- term rate of return on assets, we considered the average rate of earnings expected on the classes of funds invested or to be invested to provide for the benefits of these plans. & # 160; This included considering the trusts' targeted asset allocation for the year and the expected returns likely to be earned over the next 20 years. < / span > < / div > < div style =" text- align: justify" > < span > < br / > < / span > < / div > < div style =" text- align: justify" > < span style =" color: # 000000; font- family:' Roboto', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" > The year- end asset allocations of the plans are shown in table 11. 8 below. < / span > < / div > < div style =" margin- top: 5pt; text- align: justify" > < table style =" border- collapse: collapse; display: inline- table; margin- bottom: 5pt; vertical- align: text- bottom; width: 100. 000 %" > < tr > < td style =" width: 1. 0 %" > < / td > < td style =" width: 4. 455

We refer to these requirements as the & # 8220; State Capital Requirements & # 8221; and, together with the GSE Financial Requirements, the & # 8220; Financial Requirements. & # 8221; While they vary among jurisdictions, the most common State Capital Requirements allow for a maximum risk- to- capital ratio of 25 to 1. When the 2020 plan was adopted, no further awards could be made under our previous 2015 plan. The purpose of the 2020 plan is to motivate and incentivize performance by, and to retain the services of, key employees and non- employee directors through receipt of equity- based and other incentive awards under the plan. Awards issued under the plan that are subsequently forfeited will not count against the limit on the maximum number of shares that may be issued under the plan. The 2020 plan provides for the award of stock options, stock appreciation rights, restricted stock and restricted stock units, as well as cash incentive awards. No awards may be granted after April 23, 2030 under the 2020 plan. The vesting provisions of options, restricted stock and restricted stock units are determined at the time of grant. Reinsurance premiums ceded under our traditional reinsurance transactions are based off the remaining reinsured coverage levels. Reinsurance premiums ceded under our Home Re agreements are composed of coverage, initial expense and supplemental premiums. The coverage premiums are generally calculated as the difference between the amount of interest payable by the Home Re Entity on the remaining reinsurance coverage levels, and the investment income collected on the collateral assets held in the reinsurance trust account and used to collateralize the Home Re Entity' s reinsurance obligation to MGIC. < / span > < / div > < div style =" text- align: justify" > < span > < br / > < / span > < / div > < div style =" text- align: justify" > < span style =" color: # 000000; font- family:' Roboto', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" > Loss reserves are reported before taking credit for amounts ceded under reinsurance transactions. & # 160; Ceded loss reserves are reflected as" Reinsurance recoverable on loss reserves." & # 160; Amounts due from reinsurers on paid claims are reflected as & # 8220; Reinsurance recoverable on paid losses. & # 8221; Ceded premiums payable, net of ceding commission and profit commission are included in & # 8220; Other liabilities. & # 8221; Profit commissions are included with & # 8220; Premiums written & # 8211; Ceded & # 8221; and ceding commissions are included with & # 8220; Other underwriting and operating expenses, net. & # 8221; We remain liable for all insurance ceded. Our" participating securities" are composed of vested restricted stock and restricted stock units (" RSUs") with non- forfeitable rights to dividends. Diluted EPS includes the components of basic EPS and also gives effect to dilutive common stock equivalents. We calculate diluted EPS using the treasury stock method and if- converted method. Under the treasury stock method, diluted EPS reflects the potential dilution that could occur if our unvested restricted stock units result in the issuance of common stock. Prior to our redemption of the outstanding principal on our 9 % debentures in 2023, we utilized the if- converted method, to calculate the potential dilution that could occur if our 9 % Debentures were converted to common stock. The determination of potentially issuable shares did not consider the satisfaction of the conversion requirements and the shares were included in the determination of diluted EPS as of the beginning of the period, if dilutive. For purposes of calculating basic and diluted EPS, vested RSUs are considered outstanding. < span > < / span > < / td > < / tr > < tr class =" re" > < td class =" pl" style =" border- bottom: 0px;" valign =" top" > < a class =" a" href =" javascript: void (0);" onclick =" Show. showAR (this,' defref_us- gaap_NewAccountingPronouncementsPolicyPolicyTextBlock', window);" > Recent Accounting and Reporting Developments and Prospective Accounting and Reporting Developments < / a > < / td > < td class =" text" > < div style =" margin- bottom: 3pt; text- align: justify" > < span style =" color: # 003b5c; font- family:' Roboto', sans- serif; font- size: 9pt; font- weight: 700; line- height: 120 %" > RECENT ACCOUNTING AND REPORTING DEVELOPMENTS < / span > < / div > < div style =" text- align: justify" > < span style =" color: # 000000; font- family:' Roboto', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" > Accounting standards and laws and regulations effective in 2024 or early adopted, and relevant to our financial statements are described below: < / span > < / div > < div style =" text- align: justify" > < span > < br / > < / span > < / div > < div style =" margin- bottom: 3pt; text- align: justify" > < span style =" color: # 0084ce; font- family:' Roboto', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" > Segment Reporting & # 8212; Improvements to Reportable Segment Disclosures: ASU 2023- 07 < / span > < / div > < div style =" margin- bottom: 3pt; text- align: justify" > < span style =" color: # 000000; font- family:' Roboto', sans- serif; font- size: 9pt; font- weight: 400; line- height: 120 %" > In November 2023, the FASB issued ASU 2023- 07.
