Risk Factors Comparison 2024-02-28 to 2023-03-01 Form: 10-K

Legend: **New Text** ~~Removed Text~~ Unchanged Text Moved Text Section

In the ordinary course of operating our business, we are exposed to a variety of risks inherent to the financial services industry. The following discusses the significant risk factors that could affect our business and operations. If any of the following conditions or events actually occur, our business, financial condition or results of operations could be negatively affected, the market price of your investment in the Company' s common stock could decline, and you could lose all or a part of your investment in the Company' s common stock. The Company' s risk factors are categorized as follows: • Risks Related to the Pending Merger with Lakeland ~~Bancorp, Inc.~~ • Risks Related to the Economy, Financial Markets, and Interest Rates • Risks Related to Regulatory, Compliance, Environmental and Legal Matters • Risks Related to the Business Environment and Operations. • Risks Related to Technology and Security **Receipt of** ~~Regulatory~~ **regulatory** approvals **has taken longer than expected and** may not be received **in the future** ~~, may take longer than expected~~, or may impose conditions that are not presently anticipated or that could have an adverse effect on the combined company that results from the merger of the Company and Lakeland. Before the merger ~~of the Company~~ and ~~Lakeland (the " merger ") and the subsequent merger of Lakeland Bank with and into Provident Bank (the "~~ bank merger ~~")~~ may be completed, various approvals, consents and non- objections must be obtained from the Board of Governors of the Federal Reserve System (the " Federal Reserve Board "), the FDIC, the New Jersey Department of Banking and Insurance (the " NJDOBI ") and other regulatory authorities in the United States. In determining whether to grant these approvals, such regulatory authorities consider a variety of factors, including the regulatory standing of each company. **Receipt of these approvals has taken longer than expected and, as a result, the Company and Lakeland have extended the merger deadline to March 31, 2024 to allow additional time to obtain the necessary regulatory approvals.** These approvals could **continue to** be delayed or not obtained at all, including due to an adverse development in either company' s regulatory standing or in any other factors considered by regulators when granting such approvals; governmental, political or community group inquiries, investigations or opposition; or changes in legislation or the political environment generally. The approvals that are granted may impose terms and conditions, limitations, obligations or costs, or place restrictions on the conduct of the combined company' s business or require changes to the terms of the transactions contemplated by the merger agreement between the Company and Lakeland. There can be no assurance that regulators will not impose any such conditions, limitations, obligations or restrictions and that such conditions, limitations, obligations or restrictions will not have the effect of delaying the completion of any of the transactions contemplated by the merger agreement, imposing additional material costs on or materially limiting the revenues of the combined company following the merger or otherwise reducing the anticipated benefits of the merger if the merger were consummated successfully within the expected timeframe. In addition, there can be no assurance that any such conditions, terms, obligations or restrictions will not result in the delay or abandonment of the merger. Additionally, the completion of the merger is conditioned on the absence of certain orders, injunctions or decrees by any court or regulatory agency of competent jurisdiction that would prohibit or make illegal the completion of any of the transactions contemplated by the merger agreement. In addition, despite the companies' commitments to using their reasonable best efforts to comply with conditions imposed by regulators, under the terms of the merger agreement, neither the Company nor Lakeland, nor any of their respective subsidiaries, is permitted (without the written consent of the other party), to take any action, or commit to take any action, or agree to any condition or restriction, in connection with obtaining the required permits, consents, approvals and authorizations of governmental entities that would reasonably be expected to have a material adverse effect on the combined company and its subsidiaries, taken as a whole, after giving effect to the merger and the bank merger. **The** ~~Failure to complete the merger could negatively impact the~~ Company ~~.~~ **If will be subject to business uncertainties and contractual restrictions while** the merger is ~~not completed for~~ **pending. Uncertainty about the effect of the merger on employees and customers may have** ~~any~~ **an** reason, there may be various ~~adverse~~ consequences and **effect on** the Company ~~may experience negative reactions from the financial markets and from its customers and employees~~. For example, **These uncertainties may impair** the Company' s **ability to attract, retain and motivate key** personnel until the merger is completed, and could cause customers and others that deal with the Company to seek to change existing business **relationships with the Company. In addition, subject to certain exceptions, the Company has agreed to operate its business in the ordinary course in all material respects and to refrain from taking certain actions that** may ~~have been impacted~~ adversely **affect its ability to consummate the transactions contemplated** by the ~~failure to pursue~~ **merger agreement on a timely basis without** other ~~--~~ **the** beneficial ~~consent of Lakeland. These restrictions may prevent the Company from pursuing attractive business** opportunities ~~due~~ **that may arise prior** to the ~~focus~~ **completion** of ~~management on~~ the merger **. The** ~~, without realizing any of the anticipated benefits of completing the~~ merger ~~.~~ **Additionally, if** **agreement may be terminated in accordance with its terms and** the **merger may not be completed. The** merger agreement is ~~terminated~~ **subject to a number of conditions which must be fulfilled in order to complete the merger. Those conditions include** ~~.~~ **among the** ~~other~~ market price **things: (i) authorization for listing on the New York Stock Exchange of the shares** of the Company' s common stock ~~could decline~~ to **be issued in** ~~the extent that current market prices reflect a market assumption that~~ the merger **, will be beneficial and will be completed. The Company also could be** subject to ~~litigation related to~~ **official notice of issuance; (ii) the receipt of required regulatory approvals, including the approval of the Federal Reserve Board, the FDIC and the NJDOBI, and (iii) the absence of** any ~~failure to~~ **order, injunction, decree or other legal restraint preventing the** ~~complete~~ **completion of** merger **, or** to proceedings commenced against ~~the~~ **bank** ~~Company to perform its obligations under the~~ merger agreement. If the merger agreement is...... Lakeland may be more difficult, costly or **any** ~~time- consuming than expected, and the Company may fail to realize the anticipated benefits~~ of the merger. The success of the...... **the anticipated benefits of the merger and** the other transactions contemplated by the merger agreement **or making the completion of the merger** , as well as **the bank merger or** any **of the** ~~delays encountered in the~~ **other transactions contemplated by** integration process, could have an adverse effect upon the revenues, levels of expenses and operating results of the combined company following the completion of the merger **agreement illegal** , which may adversely affect the value of the common stock of the combined company following the completion of the merger. The Company and Lakeland have operated and, until the completion of the merger, must continue to operate, independently. It is possible that the integration process could result in the loss of key employees, the disruption of each **Each** company ~~party~~ ' s ongoing businesses or inconsistencies in **obligation to complete the merger is also subject to certain additional customary conditions, including (a)** subject to applicable materiality standards, ~~controls, procedures~~ **the accuracy of the representations and warranties of the other party; (b) the performance in all material respects by the other party of its obligations under the merger agreement; (c) the receipt by each party of** ~~and~~ **an** policies ~~opinion from its counsel to the effect~~ that ~~adversely affect~~ the ~~companies~~ **merger will qualify as a reorganization within the meaning of Section 368 (a) of the Internal Revenue Code of 1986 and (d) the execution and delivery of the bank merger agreement in respect of the bank merger. On December 20, 2023, the Company and Lakeland agreed to extend the merger agreement** ' ~~ability~~ **s** termination date to **March 31** maintain relationships with clients ~~.~~ **2024** customers, depositors and employees or to **provide additional time to fulfill** achieve the anticipated benefits and cost savings of the merger **conditions, especially** ~~.~~ Integration efforts between the **those related to regulatory approvals** companies may also divert management attention and resources **Regardless of the extension,** These **these conditions to** integration matters could have an adverse effect on the Company during this transition period and **closing may not be fulfilled in a timely manner** ~~for~~ **or at all, the parties may not agree to additional extensions, an** and , **accordingly,** undetermined period after completion of the merger **may not be completed** on the combined company. Furthermore, the board of directors and executive leadership of the combined company will consist of former directors and executive officers from each of the Company and Lakeland. Combining the boards of directors and management teams of each company into a single board and a single management team could require the reconciliation of differing priorities and philosophies. As a result of the mergers, the combined company will become subject to additional requirements and restrictions imposed by **updated termination date** DOJ. On September 28, 2022...... and one in the Newark Lending Area . In addition, **the parties can mutually decide to terminate the merger agreement at any time, even after the requisite stockholder and shareholder approvals. Also, the Company or** Lakeland **may elect** ~~Bank must continue~~ to maintain **terminate the merger agreement in certain other circumstances, including by either Lakeland or the Company if the merger has not completed on or before March 31, 2024, unless the failure of the merger to be completed by such date is due to the failure of the party seeking to terminate the merger agreement to perform or observe** its **obligations, covenants and agreements under** full- time Community Development Officer position to oversee these ~~--~~ **the** efforts throughout the term of the consent order. As required by the terms of the DOJ Consent Order, Provident Bank, as the resulting institution in the bank merger **agreement** , has agreed to and will assume...... violations resolved by the DOJ Consent Order . In connection with the merger, ~~Provident~~ **the Company** will assume Lakeland' s outstanding debt obligations **and may need to issue additional debt in order to comply with capital requirements** , and the combined company' s level of indebtedness following the completion of the merger could adversely affect the combined company' s ability to raise additional capital and to meet its obligations under its existing indebtedness. In connection with the merger, ~~Provident~~ **the Company** will assume Lakeland' s outstanding indebtedness **and may need to issue additional debt in order to raise capital** . ~~Provident~~ **The Company** ' s existing debt, together with any future incurrence of additional indebtedness, and the assumption of Lakeland' s outstanding indebtedness, could have important consequences for the combined company' s creditors and the combined company' s stockholders. For example, it could: • limit the combined company' s ability to obtain additional financing for working capital, capital expenditures, debt service requirements, acquisitions and general corporate or other purposes; • restrict the combined company from making strategic acquisitions or cause the combined company to make non- strategic divestitures; • restrict the combined company from paying dividends to its stockholders; • increase the combined company' s vulnerability to general economic and industry conditions; and • require a substantial portion of cash flow from operations to be dedicated to the payment of principal and interest on the combined company' s indebtedness, thereby reducing the combined company' s ability to use cash flows to fund its operations, capital expenditures and future business opportunities. The ~~combined company may be unable to retain personnel of the Company and / or Lakeland successfully after the merger is completed. The success of the merger will depend in part on the combined company' s ability to retain the talent and dedication of key employees currently employed by the Company and Lakeland. It is possible that these employees may decide not to remain with the Company or Lakeland, as applicable, while the merger is pending or with the combined company after the merger is consummated. If the Company and Lakeland are unable to retain key employees, including management, who are critical to the successful integration and future operations of the companies, the Company and Lakeland could face disruptions in their operations, loss of existing customers, loss of key information, expertise or know- how and unanticipated additional recruitment costs. In addition, following the merger, if key employees terminate their employment, the combined company' s business activities may be adversely affected, and management' s attention may be diverted from successfully hiring suitable replacements, all of which may cause the combined company' s business to suffer. The Company and Lakeland also may not be able to locate or retain suitable replacements for any key employees who leave either company. The Company will be subject to business uncertainties and contractual restrictions while the merger is pending. Uncertainty about the effect of the merger on employees and customers may have an adverse effect on the Company. These uncertainties may impair the Company' s ability to attract, retain and motivate key personnel until the merger is completed, and could cause customers and others that deal with the Company to seek to change existing business relationships with the Company. In addition, subject to certain exceptions, the Company has agreed to operate its business in the ordinary course in all material respects and to refrain from taking certain actions that may adversely affect its ability to consummate the transactions contemplated by the merger agreement on a timely basis without the consent of Lakeland. These restrictions may prevent the Company from pursuing attractive business opportunities that may arise prior to the completion of the merger. The~~ Company has incurred and is expected to incur substantial costs related to the merger and integration. The Company has incurred and expects to incur a number of non- recurring costs associated with the merger. These costs include legal, financial advisory, accounting, consulting and other advisory fees, retention, severance and employee benefit- related costs, public company filing fees and other regulatory fees, financial printing and other printing costs, **and** closing, integration and other related costs. Some of these costs are payable by the Company regardless of whether or not the merger is completed ~~. Stockholder litigation related to the merger could prevent or delay the completion of the merger, result in the payment of damages or otherwise negatively impact the business and operations of the Company. Stockholders of the Company and shareholders of Lakeland have commenced litigation in connection with the proposed merger and, among other remedies, such litigation seeks damages or an injunction preventing the merger from closing. If any plaintiff were successful in obtaining an injunction prohibiting the Company or Lakeland from completing the merger or any other transactions contemplated by the merger agreement, then such injunction may delay or prevent the effectiveness of the merger and could result in costs to the Company, including costs in connection with the defense or settlement of any stockholder lawsuits filed in connection with the merger. Further, such lawsuits and the defense or settlement of any such lawsuits may have an adverse effect on the financial condition and results of operations of the Company~~. The Company may have to rely on Lakeland' s models post- closing until Lakeland' s data can be integrated into the Company' s models. Lakeland depends on models for ~~,~~ the allowance for credit losses, among other things, and we may have to rely on Lakeland' s models post- closing prior to integrating Lakeland' s data into our models. These models may be designed or implemented in a manner different than the models used by the Company. As a result, incorporation of Lakeland' s data into our models could materially impact our results of operations or financial position to the extent that our estimates based on Lakeland' ~~s~~ models prove to be inaccurate. The ~~Failure to complete the~~ merger ~~agreement~~ **could negatively impact the Company. If the merger is not completed for any reason, there** may be ~~terminated in accordance~~ **various adverse consequences and the Company may experience negative reactions from the financial markets and from its customers and employees. For example, the Company' s business may have been impacted adversely by the failure to pursue other beneficial opportunities due to the focus of management on the merger or the financial impact of complying** with its terms and **requirements imposed by regulatory agencies, without realizing any of the anticipated benefits of completing** the merger ~~may not be completed~~. The **Additionally, if the** merger agreement is **terminated** subject to a number of conditions which must be fulfilled in order to complete the merger. Those conditions include ~~, among other~~ ~~--~~ **the market price** things: (i) authorization for listing on the New York Stock Exchange of the shares of the Company' s common stock **could decline** to **the extent that current market prices reflect a market assumption that the merger would have been beneficial and should have been completed. The Company also could** be ~~may fail to realize the anticipated benefits~~ of the merger.The success of the merger will depend,in part,on the ability to realize the anticipated cost savings from combining the businesses of the Company and Lakeland.To realize the anticipated benefits and cost savings from the merger,the Company and Lakeland must successfully integrate and combine their businesses in a manner that permits those cost savings to be realized without

adversely affecting current revenues and future growth. If the Company and Lakeland are not able to successfully achieve these objectives, the anticipated benefits of the merger may not be realized fully or at all, or may take longer to realize than expected. In addition, the actual cost savings of the merger could be less than anticipated, and integration may result in additional and unforeseen expenses. An inability to realize the full extent of the anticipated benefits of the merger and the other transactions contemplated by the merger agreement, as well as any delays encountered in the integration process, could have an adverse effect upon the revenues, levels of expenses and operating results of the combined company following the completion of the merger, which may adversely affect the value of the common stock of the combined company following the completion of the merger. The Company and Lakeland have operated and, until the completion of the merger, must continue to operate, independently. It is possible that the integration process could result in the loss of key employees, the disruption of each company's ongoing businesses or inconsistencies in standards, controls, procedures and policies that adversely affect the companies' ability to maintain relationships with clients, customers, depositors and employees or to achieve the anticipated benefits and cost savings of the merger. Integration efforts between the companies may also divert management attention and resources. These integration matters could have an adverse effect on the Company during this transition period and for an undetermined period after completion of the merger on the combined company. Furthermore, the board of directors and executive leadership of the combined company will consist of former directors and executive officers from each of the Company and Lakeland. Combining the boards of directors and management teams of each company into a single board and a single management team could require the reconciliation of differing priorities and philosophies. As a result of the mergers, the combined company will become subject to additional requirements and restrictions imposed by the DOJ. On September 28, 2022, Lakeland Bank entered into a consent order with the DOJ to resolve allegations of violations of the Fair Housing Act and Equal Credit Opportunity Act within the Newark, NJ- PA Metro Division, as constituted in 2015 (the "DOJ Consent Order"). The DOJ Consent Order was approved by the U.S. District Court for the District of New Jersey on September 29, 2022. The DOJ Consent Order requires Lakeland Bank to, among other things, invest $12 million over five years in a loan subsidy fund to increase credit opportunities to residents of majority- Black and Hispanic census tracts in Essex, Morris, Somerset, Sussex and Union Counties, New Jersey (the "Newark Lending Area"), and devote a minimum of $400,000 over five years toward community development partnership contributions in the Newark Lending Area, and $150,000 per year over five years toward advertising, community outreach, and credit repair and education in the Newark Lending Area. Pursuant to the terms of the consent order, Lakeland Bank will also establish two new full- service branches in majority- Black and Hispanic census tracts: one in Newark, New Jersey and one in the Newark Lending Area. In addition, Lakeland Bank must continue to maintain its full- time Community Development Officer position to oversee these efforts throughout the term of the consent order. As required, has agreed to and will assume all obligations under the DOJ Consent Order in connection with the bank merger. Although both Provident Bank and Lakeland Bank are committed to full compliance with the DOJ Consent Order, achieving such compliance will require significant management attention from Lakeland Bank and, following the mergers, the combined bank and may cause Lakeland Bank and, following the mergers, the combined bank to incur unanticipated costs and expenses. Actions taken to achieve compliance with the DOJ Consent Order may affect Lakeland Bank's and the combined bank's business or financial performance and may require Lakeland Bank or the combined bank to reallocate resources away from existing businesses or to undertake significant changes to their respective businesses, operations, products and services and risk management practices. In addition, although the DOJ Consent Order resolved all claims by the DOJ against Lakeland Bank, Lakeland and its subsidiaries or, following the mergers, the combined company and its subsidiaries could be subject to other enforcement actions relating to the alleged violations resolved by the DOJ Consent Order, including management, who are critical to the successful integration and future operations of the companies, the Company and Lakeland could face disruptions in their operations, loss of existing customers, loss of key information, expertise or know- how and unanticipated additional recruitment costs. In addition, following the merger, if key employees terminate their employment, the combined company's human capital business activities may be adversely affected, and management's attention may be diverted from successfully hiring suitable replacements, all of which may cause the combined company's business to suffer. The Company and Lakeland also may not be able to locate or retain suitable replacements for key employees who leave either company. Although previously filed litigation related to the merger against the Company, the Company's board of directors, the Bank, and the Bank's board of directors has been settled, additional litigation may be filed against the Company, the Company's board of directors, the Bank, and the Bank's board of directors in the future, which could prevent or delay the completion of the merger, result in the payment of damages, or otherwise negatively impact the business and operations of the Company and the Bank. Although litigation related to the merger was previously filed against the Company, the Company's board of directors, the Bank, and the Bank's board of directors and subsequently dismissed or settled, additional litigation may be filed against the Company, the Company's board of directors, the Bank, and the Bank's board of directors in the future. The outcome of any litigation is uncertain. One of the conditions to the closing is that there must be no order, injunction, or decree issued by any court or governmental entity of competent jurisdiction or other legal restraint preventing the consummation of the merger or any of the other transactions contemplated by the merger agreement. If any plaintiff were successful in obtaining an injunction prohibiting the Company or the Bank from completing any of the other transactions contemplated by the merger agreement, then such injunction may delay or prevent the effectiveness of the merger and could result in significant costs the Company and / or the Bank, including costs associated with the indemnification of directors and officers of each entity. The Company and party, (b) the party Bank may incur costs in connection with the defense or settlement of any stockholder or shareholder lawsuits filed in connection with the merger. Further, such lawsuits and the defense or settlement of any such lawsuits may have an adverse effect on the financial condition and results of operations of the Company and the Bank and could prevent or delay the completion of the merger. Changes to the underlying drivers of our net interest income could adversely affect our results of operations and financial condition. Our financial condition and results of operations are significantly affected by changes in market interest rates, and the degree to which these changes disparately impact short- term and long- term interest rates and influence the behavior of our customer base. Our results of operations substantially depend on our net interest income, which is the difference between the interest income we earn on our interest earning assets and the interest expense we pay on our interest- bearing liabilities. An inverted yield curve, which has persisted throughout 2023, has and may continue to negatively impact our net interest margin and earnings. As the Federal Reserve raised and has maintained higher interest rates, our interest- bearing liabilities may continue to be subject to repricing or maturing more quickly than our interest- earning assets. Persistent elevated short- term rates continue to require us to increase the rates we pay on our deposits and borrowed funds more quickly than we can increase the interest rates we earn on our loans and investments, resulting in a negative effect on interest spreads and net interest income. In addition, the effect of high rates continue to be compounded as deposit customers move funds into higher yielding accounts or are lost to competitors offering higher rates on their deposit products. As the Federal Reserve has maintained steady interest rates since August 2023, we are unable to predict whether current rates will persist or if the Federal Reserve will cut interest rates going forward. Should market interest rates fall below current levels, our net interest income could also be negatively affected if competitive pressures prevent us from reducing rates on our deposits, while the yields on our assets decrease through loan prepayments and interest rate adjustments. Changes in interest rates also affect the value of our interest- earning assets, and in particular particularly our securities portfolio. Generally, the value of securities fluctuates inversely with changes in interest rates. As of December 31, 2023, our available for sale debt securities portfolio totaled $1.69 billion. Unrealized gains and losses on securities available for sale are reported as a separate component of stockholders' equity. Therefore, decreases in the fair value of securities available for sale resulting from increases in interest rates could have an adverse effect on our stockholders' equity. Volatility and uncertainty related to inflation and the effects of inflation, which may lead to increased costs for businesses and consumers and potentially contribute to poor business and economic conditions generally, may also enhance or contribute to some of the risks discussed herein. For example, higher inflation, or volatility and uncertainty related to inflation, could reduce demand for the Company's products, adversely affect the creditworthiness of the Company's borrowers or result in lower values for the Company's investment securities and other interest- earning assets. A general economic slowdown or uncertainty that produces either reduced returns or excessive market volatility could adversely impact our overall profitability, including our wealth management fee income and our access to capital and liquidity. A general economic slowdown could affect our core banking business. During 2023, headwinds facing the U.S. economy continued despite improvements relative to 2022, as the Federal Reserve continued tightening monetary policy through a series of interest rate hikes through the first half of the year and maintained high levels thereafter. The economy as a whole grew in 2023 and the consensus forecast has the economy maintaining growth and avoiding recession in 2024. Certain sectors of the economy, notably residential housing, have already been impacted by high interest rates, although conditions have improved as interest rates declined slightly. Despite improved projections, unforeseen adverse changes in the economy and a possible recession could negatively affect the ability of our borrowers to repay their loans or force us to offer lower interest rates to encourage new borrowing activity. Uncertainty and market volatility could affect the value of the assets under management in our wealth management business resulting in lower fee income. Conditions that produce extended market volatility could affect our ability to provide our clients with an adequate return, thereby impacting our ability to attract new clients or causing existing clients to seek more stable investment opportunities with alternative wealth advisors. Furthermore, market volatility could adversely impact our access to capital and liquidity. If our allowance for credit losses is not sufficient to cover actual loan losses, our earnings could decrease. We make various assumptions and judgments about the collectability of our loan portfolio, including the creditworthiness of our borrowers and the value of the real estate and other assets serving as collateral for the repayment of many of our loans. In determining the amount of the allowance for credit losses, we rely on our loan monitoring program, our loan quality reviews, our credit risk rating process, loan portfolio trends, our experience, our evaluation of economic conditions and our selection of a reasonable and supportable forecast, among other factors. The Company measures projected credit losses over the estimated life of the asset by applying quantitative and qualitative loss factors we derive using a macroeconomic forecast that we deem most likely to occur. If our assumptions prove to be incorrect, or if delinquencies or non- accrual and non- performing loans increase, the allowance for credit losses may not be sufficient to cover losses inherent in our loan portfolio, resulting in additions to our allowance. Material additions to the allowance would materially decrease our net income. In addition, bank regulators periodically review our allowance for credit losses and may require us to increase our provision for credit losses or recognize further loan charge- offs. Commercial real estate, commercial and industrial and construction loans expose us to increased risk and earnings volatility. We consider our commercial real estate loans, commercial and industrial loans and construction loans to be higher risk categories in our loan portfolio. These loans are particularly sensitive to economic conditions. As of December 31, 2023, our portfolio of commercial real estate loans, including multi- family loans, totaled $6.32 billion, or 58 % of total loans, our commercial and industrial loans totaled $2.44 billion, or 22.7 % of portfolio loans, and our construction loans totaled $653.2 million, or 6.1 % of total loans. Commercial real estate loans generally involve a higher degree of credit risk because they typically have larger balances and are more affected by adverse conditions in the economy, such as vacancy rates and changes in rental rates. Payments on loans secured by commercial real estate also often depend on the successful operation and management of the businesses that occupy these properties or the financial stability of tenants occupying the properties. Furthermore, these loans may be affected by factors outside the borrower's control, such as adverse conditions in the real estate market or the economy, declining rents, tenant defaults, or changes in government regulation. As of December 31, 2023, our CRE office portfolio totaled $483.1 million dollars, with approximately 16 % being loans in New York. In our CRE Multi- family portfolio, we hold loans collateralized by rent stabilized properties that totaled $117.4 million as of December 31, 2023. In the case of commercial and industrial loans, although we strive to maintain high credit standards and limit exposure to any one borrower, the collateral for these loans often consists of accounts receivable, inventory and equipment. This type of collateral typically does not yield substantial recovery in the event we need to foreclose on it and may rapidly deteriorate, disappear, or be misdirected in advance of foreclosure. This adds to the potential that our charge- offs will be volatile, which could significantly negatively affect our earnings in any quarter. In addition, some of our construction loans may pose higher risk than the levels expected at origination, as projects may stall, interest reserves may be inadequate, absorption may be slower than projected or sales prices or rents may be lower than forecasted. In addition, many of our borrowers have more than one commercial real estate or construction loan outstanding with us. Consequently, an adverse development with respect to one loan or one credit relationship may expose the Company to significantly greater risk of loss. The failure to address the federal debt ceiling in a timely manner, downgrades of the U.S. credit rating and uncertain credit and financial market conditions may affect the stability of securities issued or guaranteed by the federal government, which may affect the valuation or liquidity of our investment securities portfolio and increase future borrowing costs. As a result of uncertain political, credit and financial market conditions, including the potential consequences of the federal government defaulting on its obligations for a period of time due to federal debt ceiling limitations or other unresolved political issues, investments in financial instruments issued or guaranteed by the federal government pose credit default and liquidity risks. Given that future deterioration in the U.S. credit and financial markets is a possibility, no assurance can be made that losses or significant deterioration in the fair value of our U.S. government issued or guaranteed investments will not occur. As of December 31, 2023, we had approximately $259.0 million, $70.8 million and $1.29 billion invested in U.S. Treasury securities, U.S. government agency securities, and residential mortgage- backed securities issued or guaranteed by government- sponsored enterprises and programs, respectively. Downgrades to the U.S. credit rating could affect the stability of securities issued or guaranteed by the federal government and the valuation or liquidity of our portfolio of such investment securities and could result in our counterparties requiring additional

collateral for our borrowings. Further, unless and until U. S. political, credit and financial market conditions have been sufficiently resolved or stabilized, it may increase our future borrowing costs. We operate in a highly regulated environment and may be adversely affected by changes in laws and regulations. We are subject to extensive regulation, supervision and examination ~~of~~ **by** various regulatory authorities, but primarily by the New Jersey Department of Banking and Insurance, our chartering authority, and by the FDIC, as insurer of our deposits. As a bank holding company, we are subject to regulation and oversight by the Federal Reserve Board. Such regulation and supervision governs the activities in which a bank and its holding company may engage and is intended primarily for the protection of the insurance fund and depositors **. Following the bank failures in early 2023, regulators have increasingly focused on banks' sources of liquidity, deposit mixes and concentration within certain sectors** . These regulatory authorities have extensive discretion in connection with their supervisory and enforcement activities, including the ability to require that we hold additional capital, restrict our operations, modify the classification of our assets, increase our allowance for credit losses, and strengthen the management of risks posed by our reliance on third party vendors. Any change in such regulation and oversight, whether in the form of regulatory policy, regulations, or legislation, could have a material impact on the Company ~~'~~ **'** s operations. The potential exists for additional federal or state laws and regulations regarding capital requirements, lending and funding practices and, liquidity standards, and bank regulatory agencies are expected to remain active in responding to concerns and trends that may be identified in our examinations, which may include the potential for the issuance of formal enforcement orders. Further, actions taken to date, as well as potential actions, may not provide the level of beneficial effects necessary to offset their cost to us. In addition, new laws, regulations, and other regulatory changes could further increase our costs of regulatory compliance and of doing business, and otherwise affect our operations. New laws, regulations, and other regulatory changes, may also significantly affect the markets in which we do business, the markets for and value of our loans and investments, and our ongoing operations, costs and profitability. As a **larger** financial institution ~~with assets greater than $ 10 Billion~~ , we are subject to additional regulation and increased supervision ~~,~~ ~~including by the CFPB . Provident~~ **The Company** ' s total assets were $ ~~13~~ **14** . ~~78~~ **21** billion ~~at~~ **as of** December 31, ~~2022~~ **2023** . Banks with assets in excess of $ 10 billion are subject to requirements imposed by the Dodd- Frank Act and its implementing regulations including being subject to the examination authority of the Consumer Financial Protection Bureau to assess our compliance with federal consumer financial laws, the imposition of higher FDIC premiums, reduced debit card interchange fees, and enhanced risk management frameworks, all of which increase operating costs and reduce earnings. ~~We may be required~~ **As we continue to grow in size, we can expect greater regulatory scrutiny and expectations requiring us** to invest ~~more~~ significant management attention and **make additional investments in staff and other** resources ~~to make further changes necessary~~ to comply with ~~enhanced~~ **applicable** regulatory expectations. While we cannot predict what effect any presently contemplated or future changes in the laws or regulations or their interpretations may have on us, these changes could be material **. Bank regulators have signaled further review of regulatory requirements and the potential for changes to laws or regulations governing banks and bank holding companies. Changes resulting from these events could include increased regulatory oversight, higher capital requirements or changes in the way regulatory capital is calculated, and the impositions of additional restrictions through regulatory changes or supervisory or enforcement activities, each of which could have a material impact on our business** . We face regulatory scrutiny based on our commercial real estate lending. The FDIC, the OCC and the FRB (collectively, the " Agencies ") have issued joint guidance entitled " Concentrations in Commercial Real Estate Lending, Sound Risk Management Practices " (the " CRE Guidance "). Although the CRE Guidance ~~did~~ **does** not establish specific lending limits, it provides that a bank' s commercial real estate lending exposure may receive increased supervisory scrutiny where total non- owner occupied commercial real estate loans, including loans secured by multi-family buildings, investor commercial real estate and construction and land loans (" CRE Loans "), represent 300 % or more of an institution' s total risk- based capital and the outstanding balance of the CRE Loan portfolio has increased by 50 % or more during the preceding 36 months. Our level of CRE Loans equaled ~~490~~ **489** . ~~9~~ **6** % of total risk- based capital ~~at~~ **as of** December 31, ~~2022~~ **2023** , while our CRE Loan portfolio has increased by ~~52~~ **30** . ~~2~~ **4** % during the preceding 36 months. ~~Due to regulatory guidelines, the~~ **size of our** Company is now considered to have a significant concentration in its CRE Loan ~~Portfolio~~ **portfolio as a percentage of capital, regulatory oversight of our management of this CRE concentration is elevated** . In December 2015, the Agencies released a statement on prudent risk management for commercial real estate lending (the " 2015 Statement "). In the 2015 Statement, the Agencies express concerns about easing commercial real estate underwriting standards, direct financial institutions to maintain underwriting discipline and exercise risk management practices to identify, measure and monitor lending risks, and indicate that the Agencies will continue " to pay special attention " to commercial real estate lending activities and concentrations going forward. If our regulators were to impose restrictions on the amount of commercial real estate loans we can hold in our loan portfolio, or require higher capital ratios as a result of the level of commercial real estate loans held, our earnings or our ability to engage in certain merger and acquisition activity could be adversely affected. **On December 18, 2023, the FDIC issued an advisory entitled " Managing Commercial Real Estate Concentrations in a Challenging Economic Environment " (the " 2023 Advisory "), replacing an advisory issued in 2008 and updating previously issued guidance. The 2023 Advisory expresses concerns regarding challenges in the CRE market and identifies key risk- management actions to help institutions with market conditions, including maintaining strong capital levels, ensuring appropriate credit loss allowances, closely managing loan portfolios, maintaining updated financial and analytical information, bolstering loan workout infrastructure, and maintaining adequate liquidity and diverse funding sources. The FDIC stated that it will " expect each board of directors and management team to strive for strong capital and appropriate allowance for credit loss levels, and to implement robust credit risk- management practices. " If the FDIC were to scrutinize our board and management actions and require certain capital levels or specific practices, our earnings could be adversely affected and our cost of compliance could increase.** Future acquisitions may be delayed, impeded, or prohibited due to regulatory issues. Future acquisitions by the Company, particularly those of financial institutions, are subject to approval by a variety of federal and state regulatory agencies (collectively," regulatory approvals"). Regulatory approvals could be delayed, impeded, restrictively conditioned or denied due to existing or new issues the Company has, or may have, with regulatory agencies, including, without limitation, issues related to BSA / AML compliance, CRA compliance, fair lending laws, fair housing laws, consumer protection laws, unfair, deceptive, or abusive acts or practices regulations, and other similar laws and regulations. We may fail to pursue or complete strategic and competitively significant acquisition opportunities as a result of our inability, or perceived or anticipated inability, to obtain regulatory approvals in a timely manner, under reasonable conditions or at all. The regulatory approvals may contain conditions on the completion of a merger which would adversely affect our business following the closing, or which were not anticipated or cannot be met. Difficulties associated with potential acquisitions that may result from these factors could have a material adverse impact on our business, and, in turn, our financial condition and results of operations. We may experience impairments of goodwill or other intangible assets in the future. As of December 31, ~~2022~~ **2023** , our consolidated balance sheet included goodwill of $ 443. 6 million and other intangible assets of $ 16. 5 million. Our business acquisitions typically result in goodwill and other intangible assets, which affect the amount of future amortization expense and potential impairment expense. We make estimates and assumptions in valuing such intangible assets that affect our consolidated financial statements. In accordance with GAAP, our goodwill and indefinite- lived intangible assets are not amortized, but are tested for impairment annually, or more frequently if events or changes in circumstances indicate that an asset might be impaired. Impairment testing incorporates the current market price of our common stock, the estimated fair value of our assets and liabilities, and certain information of similar companies. Impairment testing may be based on valuation models that estimate fair value. In preparing the valuation models, we consider a number of factors, including operating results, business plans, economic conditions, future cash flows, and transactions and market data. There are inherent uncertainties related to these factors and our judgment in applying them to the impairment analyses. It is possible that future impairment testing could result in the identification of a decline in the fair value of our goodwill or other intangible assets, which may be less than the carrying value. If we determine that impairment exists at a given point in time, our earnings and the book value of goodwill or other related intangible asset will be reduced by the amount of the impairment. If we record an impairment loss related to our goodwill or other intangible assets, it could have a material adverse effect on our business, financial condition, results of operations and the trading price of our securities. Notwithstanding the foregoing, the results of impairment testing on our goodwill or other intangible assets have no impact on our tangible book value or regulatory capital levels. Climate change and related governmental action may materially affect the Company' s business and results of operations. The effects of climate change continue to create a level of concern for the state of the global environment. As a result, the global community has increased its political and social awareness surrounding the issue and have entered into international agreements in an effort to reduce global temperatures such as the Paris Agreement, which the United States re- joined as of February 19, 2021. Further, the U. S. Congress, state legislatures and federal and state regulatory agencies continue to propose numerous initiatives **, legislation, and regulations** to supplement the global effort to combat climate change. Similar and even more expansive initiatives are expected, including potentially increasing supervisory expectations with respect to banks' risk management practices, accounting for the effects of climate change in stress testing scenarios and systemic risk assessments, revising expectations for credit portfolio concentrations based on climate- related factors, and encouraging investment by banks in climate- related initiatives and lending to communities disproportionately impacted by the effects of climate change. **For instance, the SEC is expected to issue a final rule in 2024 requiring public companies to disclose the amount of greenhouse gases they generate and how climate change is expected to affect business.** The lack of empirical data surrounding the credit and other financial risks posed by climate change render it impossible to predict specifically how climate change may impact the financial condition and operations of the Company; however, the physical effects of climate change may also directly impact the Company. Specifically, unpredictable and more frequent weather disasters may adversely impact the value of real property securing certain loans in our portfolios. Further, the effects of climate change may negatively impact regional and local economic activity, which could lead to an adverse effect on our customers and impact our ability to raise and invest capital in potentially impacted communities. The effects of changing strategies, policies, and investments as the global community transitions to a lower- carbon economy will impose additional operational and compliance burdens, and may result in market trends that alter business opportunities. **Compliance with expected disclosure rules will require additional resources.** Overall, climate change, its effects, and the resulting ~~,~~ unknown impact could have a material adverse impact on our financial condition and results of operations. Risks Related to Business Environment and Operations. ~~The COVID- 19 pandemic could continue to pose risks to our business, our results of operation and the future prospects of the Company. The COVID-19 pandemic has adversely impacted the global and national economy and certain industries and geographies in which our clients operate. Given its dynamic nature, it is difficult to predict the full impact of the COVID- 19 pandemic on the business of the Company, its clients, employees and third- party service providers. The extent of such impact will depend on future developments, which are highly uncertain. Additionally, the responses of various governmental and nongovernmental authorities and consumers to the pandemic may have material long- term effects on the Company and its clients which are difficult to quantify in the near- term or long- term.~~ Our continuing concentration of business in a relatively confined region may increase our risk. Our success is significantly affected by general economic conditions in our market area. Unlike some larger banks that are more geographically diversified, we provide banking, financial, and wealth management services to customers mostly located in our primary markets. Consequently, a downturn in economic conditions in our local markets would have a significant impact on our loan portfolios, the ability of borrowers to meet their loan payment obligations and the value of the collateral securing our loans. Adverse local economic conditions caused by inflation, recession, unemployment, state or local government action, or other factors beyond our control would impact these local economic conditions and could negatively affect the financial results of our business. ~~We have a significant amount of real estate loans. Depressed real estate values and real estate sales could have a negative effect on the ability of many of our borrowers to make timely repayments of their loans, which would have an adverse impact on our earnings and overall financial condition. These changes have a disproportionate effect on taxpayers in states with high residential home prices and high state and local taxes, like New Jersey. If home ownership becomes less attractive, demand for mortgage loans could decrease. The value of the properties securing loans in our loan portfolio may be adversely impacted as a result of the changing economies of home ownership, which could require an increase in our provision for loan losses, which would reduce our profitability and could materially adversely affect our business, financial condition and results of operations. Additionally, we target our business development and marketing strategy for loans to serve primarily the banking and financial services needs of small- to medium- sized businesses in our market area. These businesses generally have fewer financial resources in terms of capital or borrowing capacity than larger entities. If general economic conditions negatively impact these businesses, our results of operations and financial condition may be adversely affected. We are required to transition from the use of LIBOR. We have material contracts that are indexed to the London Interbank Offered Rate (" LIBOR "). In 2017, the United Kingdom' s Financial Conduct Authority, a regulator of financial services firms and financial markets in the United Kingdom, announced that the publication of LIBOR would not be guaranteed after 2021. LIBOR will be discontinued after June 30, 2023 and will impact loans that have not yet matured or been refinanced by that date. This announcement, and more generally, financial benchmark reforms and changes in the interbank lending markets, have resulted in uncertainty about the interest rate benchmarks that will be used in the future. In the United States, efforts to identify a set of alternative U. S. dollar reference interest rates have been ongoing, and the Alternative Reference Rate Committee formally recommended the use of a Secured Overnight Funding Rate (" SOFR "). The March 2022 enactment of the Adjustable Interest Rate (LIBOR) Act and the Federal Reserve' s proposed implementing regulations are intended to address the discontinuation of LIBOR and establish a replacement benchmark, based on SOFR, that will automatically apply to agreements that rely on LIBOR and do not have an alternative contractual fallback benchmark. SOFR- based replacement benchmarks may also apply to contracts with fallback provisions that authorize a particular person to determine the replacement benchmark. While the LIBOR Act and implementing regulations will help to transition legacy LIBOR contracts to a new benchmark rate, the substitution of SOFR for LIBOR may have potentially significant economic impacts on parties to affected contracts. SOFR is different from LIBOR in that it is a retrospective- looking secured rate rather than a forward- looking unsecured rate. These differences could lead to a greater disconnect between our and the Bank' s costs to raise funds for SOFR as compared to LIBOR. In addition to the discontinuance of LIBOR, there may be future changes in the rules or methodologies used to calculate SOFR or other benchmarks, which may have a material adverse effect on the value of or return on our financial assets and liabilities that are based on or are linked to LIBOR and other benchmarks. Once LIBOR rates are no longer available, and we are required to implement replacement reference rates for the calculation of interest rates under our loan agreements with borrowers, we may incur significant expense in effecting the transition and we may be subject to disputes or litigation with our borrowers over the appropriateness or comparability to LIBOR of the replacement reference rates. The uncertainty related to these changes may have an unpredictable impact on the financial markets and could adversely impact our financial condition or results of operations.~~ Acts of terrorism, severe weather, natural disasters, public health issues, geopolitical and other external events could impact our ability to conduct business. Our business is subject to risk from external events that could affect the stability of our deposit base, impair the ability of borrowers to repay outstanding loans, impair the value of collateral securing loans, cause significant property damage, result in loss of revenue, and / or cause us to incur additional expenses. For example, financial institutions have been, and continue to be, targets of terrorist threats aimed at compromising their operating and communication systems. The metropolitan New York and Philadelphia areas remain central targets for potential acts of terrorism, including cyber terrorism,

which could affect not only our operations but those of our customers. Additionally, there could be sudden increases in customer transaction volume, electrical, telecommunications or other major physical infrastructure outages, natural disasters, events arising from local or larger scale geopolitical, political or social matters, including terrorist acts, and cyber- attacks **from both private and state actors** . The emergence of widespread health emergencies or pandemics, similar to the spread of COVID- 19, could lead to regional quarantines, business shutdowns, labor shortages, disruptions to supply chains, and overall economic instability. Events such as these may become more common in the future and could cause significant damage such as disruption of power and communication services, impact the stability of our facilities and result in additional expenses, impair the ability of our borrowers to repay their loans, reduce the value of collateral securing the repayment of our loans, which could result in the loss of revenue. While we have established and regularly test disaster recovery procedures, the occurrence of any such event could have a material adverse effect on our business, operations and financial condition. Additionally, financial markets may be adversely affected by any current or anticipated impact of military conflict, including continuing **war between Russia and Ukraine, conflicts and** military tension ~~between Russia~~ **in the Middle East, Africa,** and ~~Ukraine~~ **Asia** , terrorism **, cyber- attacks from nation states and non- state actors on financial institutions** or other geopolitical events. We may not be able to detect money laundering and other illegal or improper activities fully or on a timely basis, which could expose us to additional liability and could have a material adverse effect on us. We are required to comply with anti- money laundering, anti- terrorism and other laws and regulations in the United States. These laws and regulations require us, among other things, to adopt and enforce " know- your- customer " policies and procedures and to report suspicious and large transactions to applicable regulatory authorities. These laws and regulations have become increasingly complex and detailed, require improved systems and sophisticated monitoring and compliance personnel and have become the subject of enhanced government supervision. While we have adopted policies and procedures aimed at detecting and preventing the use of our banking network for money laundering and related activities, those policies and procedures may not completely eliminate instances in which we may be used by customers to engage in money laundering and other illegal or improper activities. To the extent we fail to fully comply with applicable laws and regulations, the FDIC, along with other banking agencies, has the authority to impose fines and other penalties and sanctions on us, including restricting our ability to grow through acquisition. In addition, our business and reputation could suffer if customers use our banking network for money laundering or illegal or improper purposes. **Our funding sources may prove insufficient or costly to support our future growth. A lack of liquidity could adversely affect our financial condition and results of operations and result in regulatory limits being placed on the Company.** We **must maintain sufficient funds to respond to the needs of depositors and borrowers. Deposits have traditionally been our primary source of funding for our lending and investment activities. We also receive funds from loan repayments, investment maturities and income on other interest- earning assets. While we emphasize the generation of low- cost core deposits as a source of funding, there is strong competition for such deposits in our market** ~~are~~ **area** ~~subject~~ . **Additionally, deposit balances can decrease if customers perceive alternative investments as providing a better risk / return tradeoff. Further, the demand for deposits may be reduced due** to **a variety of factors such as negative trends in the banking sector, the level of and / or composition of our uninsured deposits, demographic patterns, changes in customer preferences, reductions in consumers' disposable income, the monetary policy of the Federal Reserve or regulatory actions that decrease customer access to particular products. Accordingly, as a part of our** liquidity **management,** ~~risk. Liquidity risk is the potential that~~ we **must use several funding sources in addition to deposits and repayments and maturities of loans and investments. As we continue to grow, we may become more dependent on these sources, which may include Federal Home Loan Bank of New York and Federal Reserve Bank advances, federal funds purchased and brokered certificates of deposit. Adverse operating results or changes in industry conditions could lead to difficulty or an inability to access these additional funding sources. Our financial flexibility** will be **severely constrained if we are** unable to ~~meet~~ **maintain our access to funding** ~~our~~ **or** ~~obligations as they become due~~ **if adequate financing is not available to accommodate future growth at acceptable costs. Further** . ~~capitalize~~ **if we are required to rely more heavily** on **more** growth opportunities as they arise because of an inability to liquidate assets or obtain adequate funding on a timely basis at a reasonable cost, or meet regulatory- imposed expectations for liquidity levels. Liquidity is required to fund various obligations, including loan originations and commitments, withdrawals by depositors, repayments of borrowings, operating expenses **expensive** and capital expenditures. Liquidity is derived primarily from deposit growth and retention; principal and interest payments, sales, maturities, and prepayments of loans and investment securities; net cash provided from operations; and access to other ~~funding~~ sources **to support liquidity and future growth, our revenues may not increase proportionately to cover our increased costs** . Our ~~access~~ **net interest margin and profitability would also be adversely affected. Alternatively, we may need** to **sell a portion of our investment and / or loan portfolio to raise funds, which, depending upon market conditions, could result in us realizing a loss on the sale of such assets.** Any decline in available ~~sources in amounts adequate to finance our activities~~ could **adversely impact** ~~be impaired by factors specific to us or~~ **our** ~~the~~ **ability to originate loans, invest in securities, pay our expenses, or fulfill obligations such as repaying our borrowings or meeting deposit withdrawal demands, any of which could have a material adverse impact on our liquidity, business,** financial ~~services industry in general~~ **condition and results of operations** . **A lack of** ~~Factors detrimental to our access to~~ liquidity ~~sources include a decrease in the level of our business activity due to a market downturn, lack of competitiveness, or adverse regulatory action against us. Our ability to borrow~~ could also ~~be impaired~~ **result in increased regulatory scrutiny and potential restrictions imposed on us** by **regulators** ~~factors that are not specific to us, such as a severe disruption of the financial markets or negative views and expectations about the prospects for the financial services industry~~ . Strong competition within our market area may limit our growth and profitability. Competition in the banking and financial services industry is intense and ~~expanding~~ **increasing** with entrants into our market providing new and innovative technology- driven financial solutions. Our profitability depends upon our continued ability to successfully compete in our market area. We compete with commercial banks, savings institutions, mortgage banking firms, credit unions, finance companies, investment advisers, wealth managers, mutual funds, insurance companies, online lenders, large non- bank participants, and brokerage and investment banking firms operating both locally and elsewhere. ~~In particular, over~~ **Over** the past decade, our local markets have experienced the effects of substantial banking consolidation, and large out- of- state competitors have grown significantly. Many of these competitors have substantially greater resources and lending limits than we do, and may offer certain deposit and loan pricing, services or credit criteria that we do not or cannot provide. There are also a number of strong **,** locally- based competitors with large capital positions in our market who may deploy aggressive strategies to drive growth, ~~take~~ **acquire** our customers and win market share. Furthermore, key components of the financial services value chain have been replicated by digital innovation. As customer preferences and expectations continue to evolve, technology has lowered barriers to entry and made it possible for non- banks to offer products and services traditionally provided by banks, such as automatic transfer and automatic payment systems. In addition, some of the largest technology firms are engaging in joint ventures with the largest banks to provide and or expand financial service offerings with a technological sophistication and breadth of marketing that smaller institutions do not have. Many of our competitors have fewer regulatory constraints and may have lower cost structures. Additionally, due to their size, many competitors may be able to achieve economies of scale and, as a result, may offer a broader range of products and services as well as better pricing for those products and services than we can. The adoption of these Fintech solutions within our market area may cause greater and faster disruption to our business model if we are unable to keep pace with, or invest wisely in, these enabling technologies. The Company' s models used for business planning purposes could perform poorly or provide inadequate information. We use quantitative models to assist in measuring risks and estimating or predicting certain financial values, among other uses. These models are used throughout many of our business lines, and we rely on them, along with our business judgment, for many decision- making processes. Models generally evaluate the performance of various factors under anticipated future conditions, relying on historical data to help build the model and in part on assumptions as to the future, often with respect to macro- economic conditions, in order to generate the output. The models used may not accurately account for all variables and may fail to predict outcomes accurately and / or may overstate or understate certain effects. Poorly designed, implemented, or managed models or misused models, including in the choice of relevant historical data or future- looking assumptions, present the risk that our business decisions that consider information based on such models will be adversely affected due to inadequate or inaccurate information, which may damage the Company' s reputation and adversely affect its reported financial condition and results of operations. We rely on historical data to help build models. We seek to incorporate appropriate historical data in our models, but the range of market values and behaviors reflected in any period of historical data we incorporate into our models may turn out to be inappropriate for the future period being modeled. In such case, our ability to manage risk would be limited and our risk exposure and losses could be significantly greater than our models indicated. Even if the underlying assumptions used in our models are adequate, the models may be deficient due to errors in computer code, use of bad data during development or input into the model during model use, or the use of a model for a purpose outside the scope of the model' s design. As a result, our models may not fully capture or express the risks the Company faces. If the models fail to produce reliable results on an ongoing basis, we may not make appropriate risk management, capital planning, or other business or financial decisions. Furthermore, strategies that we employ to manage and govern the risks associated with its use of models may not be effective or fully reliable, and as a result, the Company may realize losses or other lapses. Finally, information we provide to our regulators based on poorly designed or implemented models could also be inaccurate or misleading. Some of the decisions that our regulators make, including those related to capital distributions to our stockholders, could be adversely affected due to their perception that the quality of the models used to generate the relevant information is insufficient. ~~Risks Related to Technology & Security~~ A cyber- attack, data breach, or a technology failure of ours could adversely affect our ability to conduct our business or manage our exposure to risk, result in the disclosure or misuse of confidential or proprietary information, increase our costs to maintain and update our operational and security systems and infrastructure, and adversely impact our results of operations, liquidity and financial condition, as well as cause reputational harm. Our business is highly dependent on the security and efficacy of our infrastructure, computer and data management systems to provide secure processing, transmission, storage and retrieval of confidential and proprietary information. Cyber security risks for financial institutions have significantly increased in recent years in part because of the proliferation of new technologies ~~and~~ **,** the use of ~~the Internet and telecommunications~~ technologies to conduct financial transactions **, and coordinated efforts by nation- states to use cyber- attacks to obtain information or disrupt financial institutions in rival states** . Financial institutions have been subject to, and are likely to continue to be the target of, cyber- attacks **and supply chain** ~~, including computer viruses, malicious or destructive code, phishing~~ attacks **which** , ~~denial of service or other security breaches that~~ could ~~result in the unauthorized release, gathering, monitoring, misuse, loss or destruction of confidential, proprietary and other information of the institution, its employees, customers or third parties, or otherwise~~ materially disrupt network access or business operations **or create regulatory compliance risks** . We have experienced cyber security ~~incidents~~ **events** in the past, although not material, and we anticipate that, as a larger bank, we could experience further ~~incidents~~ **events** . **We have implemented and are continuing to develop countermeasures against potential cyber- attacks, including through internal cybersecurity policies, restrictions on information sharing, attribution techniques (including research and development on forensic capabilities, digital forensics provided by our security operations center, and obtaining threat intelligence), developing cyber deterrence and security norms, and spreading education and awareness to employees, customers, and third parties. Nevertheless,** ~~There~~ **there** can be no assurance that we will not suffer material losses or other material adverse consequences relating to technology failure, cyber- attacks or other information or security breaches. In addition, there have been instances where financial institutions have been victims of fraudulent activity in which criminals pose as customers to initiate wire and automated clearinghouse transactions from customer accounts. Although we have policies and procedures in place to verify the authenticity of our customers, there can be no assurance that such policies and procedures will prevent all fraudulent transfers. Such activity could result in financial liability and harm to our reputation. Misuse of our technology by our employees could also result in fraudulent, improper or unauthorized activities on behalf of customers or improper use of confidential information. We may not be able to prevent employee errors or misconduct, and the precautions we take to detect these types of activity might not be effective in all cases. Employee errors or misconduct could subject us to civil claims for negligence or regulatory enforcement actions, including fines and restrictions on our business. As cyber threats and other fraudulent activity continues to evolve, we may be required to expend significant additional resources to continue to modify and enhance our protective measures, or to investigate and remediate any information security vulnerabilities or incidents. Any of these matters could result in our loss of customers and business opportunities, significant disruption to our operations and business, misappropriation or destruction of our confidential information and / or that of our customers, or damage to our customers' computers or systems, and could result in a violation of applicable privacy laws and other laws, litigation exposure, regulatory fines, penalties or intervention, loss of confidence in our security measures, reputational damage, reimbursement or other compensatory costs, and additional compliance costs. In addition, any of the matters described above could adversely impact our results of operations and financial condition. **For information on our cybersecurity risk management, strategy and governance, see Item 1C – Cybersecurity.** We rely on third- party providers and other suppliers for a number of services that are important to our business. A breach, failure, interruption, cessation of an important service by any third **-** party could have a material adverse effect on our business, as well as cause reputational harm. We are dependent for most of our technology, including our core operating system, on third- party providers. The Bank collects, processes and stores sensitive consumer data by utilizing computer systems and telecommunications networks operated by third- party service providers, which are integral to our business. We handle a substantial volume of customer and other financial transactions every day. Our financial, accounting, data processing, check processing, electronic funds transfer, loan processing, online and mobile banking, automated teller machines, or ATMs, backup or other operating or security systems and infrastructure may fail to operate properly or become disabled or damaged because of a number of factors including events that are wholly or partially beyond our control. We have taken measures to implement backup systems and other safeguards to support our operations, but our ability to conduct business may be adversely affected by any significant disruptions to third- parties with whom we interact. In addition, our ability to implement backup systems and other safeguards with respect to third- party systems is more limited than with our own systems. If these third- parties were to discontinue providing services to us, we may experience significant disruption to our business. In addition, each of these third- parties faces the risk of cyber- attack, information breach or loss, or technology failure. If any of our third- party service providers experience such difficulties, or if there is any other disruption in our relationships with them, we may be required to find alternative sources of such services. If any of our third- party service providers experience a breach or cyber- attack of their information systems **,** it could adversely affect our ability to process transactions, service our clients or manage our exposure to risk and could result in the disclosure of sensitive, personal customer information, which could have a material adverse impact on our business through damage to our reputation, loss of business, remedial costs, additional regulatory scrutiny or exposure to civil litigation and possible financial liability. Assurance cannot be provided that we could negotiate terms with alternative service sources that are as favorable or could obtain services with similar functionality as found in existing systems without the need to expend substantial resources, if at all, thereby resulting in a material adverse impact on our business and results of operations. We continuously update these systems to support our operations and growth. This updating entails significant costs and creates risks associated with implementing new systems and integrating them with existing ones. Operational risk exposures could adversely impact our results of operations, liquidity, and financial condition, and cause reputational harm. Insurance coverage may not be available for such losses, or

where available, such losses may exceed insurance limits. This risk of loss also includes the potential legal actions that could arise because of an operational deficiency or because of noncompliance with applicable regulatory standards, adverse business decisions or their implementation, and customer attrition due to potential negative publicity. While we maintain a risk management program that is designed to minimize risk, we could suffer losses, face regulatory action, and suffer damage to our reputation because of our failure to properly anticipate and manage these risks. Failure to keep pace with technological changes could adversely affect our business. The financial services industry is continually undergoing rapid technological change with frequent introductions of new technology- driven products and services. The effective use of technology increases efficiency and enables financial institutions to better serve customers, reduce costs and create capacity. **For instance, as private and state- sponsored hackers and malicious actors increasingly leverage the power of artificial intelligence to conduct cyber- attacks and other fraudulent activity, financial institutions can adopt and learn to use the same technology in order to detect attempts and defend themselves. Adaptation to the current cybersecurity landscape requires resilience, flexibility, and collaboration in the face of increased threats enabled by technological advances.** Our future success depends, in part, upon our ability to address the needs of our customers by using technology to provide products and services that will satisfy customer demands, as well as to create additional efficiencies in our operations. Many of our competitors have substantially greater resources to invest in technological improvements. We may not be able to effectively implement new technology- driven products and services or be successful in marketing these products and services to our customers **, or attract sufficient human capital to engage in rapid implementation and marketing** . Failure to successfully keep pace with technological change affecting the financial services industry **and sustain a robust information security program through talent and human capital** could have a material adverse impact on our business and, in turn, our financial condition and results of operations Item 4. Mine Safety Disclosures Not applicable. PART II Item 5. Market For Registrant' s Common Equity and Related Stockholder Matters and Issuer Purchases of Equity Securities. The Company' s common stock trades on the New York Stock Exchange (" NYSE ") under the symbol " PFS." Trading in the Company' s common stock commenced on January 16, 2003. As of February 1, 2023, there were 83, 209, 012 shares of the Company' s common stock issued and 75, 325, 206 shares outstanding, and approximately 4, 636 stockholders of record. On January 27, 2023, the Board of Directors declared a quarterly cash dividend of $ 0. 24 per common share which was paid on February 24, 2023, to common stockholders of record as of the close of business on February 10, 2023. The Company' s Board of Directors intends to review the payment of dividends quarterly and plans to continue to maintain a regular quarterly cash dividend in the future, subject to financial condition, results of operations, tax considerations, industry standards, economic conditions, regulatory restrictions, including those that affect the payment of dividends by the Bank to the Company; and other relevant factors. Stock Performance Graph Set forth below is a stock performance graph comparing (a) the cumulative total return on the Company' s common stock for the period December 31, 2017 through December 31, 2022, (b) the cumulative total return on stocks included in the Russell 2000 Index over such period, and (c) the cumulative total return of the S & P Composite Thrift Index over such period. This Index, produced by S & P Global, contains all thrift institutions traded on the NYSE and NASDAQ stock exchange. Cumulative return assumes the reinvestment of dividends and is expressed in dollars based on an assumed investment of $ 100 on December 31, 2017. Period EndingIndex12 / 31 / 201712 / 31 / 201812 / 31 / 201912 / 31 / 202012 / 31 / 202112 / 31 / 2022Provident Financial Services, Inc. 100. 00 92. 39 98. 60 76. 38 107. 29 98. 67 Russell 2000 Index100. 00 88. 99 111. 70 134. 00 153. 85 122. 41 S & P Composite 1500 Thrifts & Mortgage Finance Index100. 00 81. 15 110. 27 104. 12 128. 42 106. 34 The following table reports information regarding purchases of the Company' s common stock during the fourth quarter of 2022 under the stock repurchase plan approved by the Company' s Board of Directors: ISSUER PURCHASES OF EQUITY SECURITIES The Company repurchased 725 shares of its common stock at a cost of $ 16, 000 during the fourth quarter of 2022 under the stock repurchase program approved by the Company' s Board of Directors. The Company repurchased 2, 054, 762 shares of its common stock at a cost of $ 47. 5 million in 2022. At December 31, 2022, 1. 1 million shares were eligible for repurchase under the board approved stock repurchase program. PeriodTotal Numberof SharesPurchased AveragePrice Paid perShareTotal Number ofSharesPurchased as Part ofPublicly Announced Programs (1) Maximum Number of Shares that May Yet Be Purchased Under the Programs (1) October 1, 2022 through October 31, 2022 — $ — — 1, 134, 706 November 1, 2022 through November 30, 2022 — — — 1, 134, 706 December 1, 2022 through December 31, 2022725 21. 72 725 1, 133, 981 Total725 $ 21. 72 725 (1) On December 28, 2020, the Company' s Board of Directors approved the purchase of up to 3, 900, 000 shares of its common stock under a ninth general repurchase program to commence upon completion of the eighth repurchase program. The repurchase program has no expiration date. Item 6. [Reserved] Item 7. Management' s Discussion and Analysis of Financial Condition and Results of Operations On January 15, 2003, the Company became the holding company for the Bank, following the completion of the conversion of the Bank to a New Jersey- chartered capital stock savings bank. The Company issued an aggregate of 59, 618, 300 shares of its common stock in a subscription offering to eligible depositors. Concurrent with the conversion, the Company contributed an additional 1, 920, 000 shares of its common stock and $ 4. 8 million in cash to The Provident Bank Foundation, a charitable foundation established by the Bank. The Company conducts business through its subsidiary, the Bank, a community- and customer- oriented bank currently operating full- service branches and loan production offices throughout northern and central New Jersey, as well as Bucks, Lehigh and Northampton counties in Pennsylvania and Queens County, New York. The Bank also provides fiduciary and wealth management services through its wholly owned subsidiary, Beacon Trust Company and insurance services through its wholly owned subsidiary, Provident Protection Plus, Inc. Strategy Established in 1839, the Bank is the oldest New Jersey- chartered bank in the state. The Bank offers a full range of commercial and retail loan and deposit products, and emphasizes personal service and convenience. The Bank' s strategy is to grow profitably through a commitment to credit quality and expanding market share by acquiring, retaining and expanding customer relationships, while carefully managing interest rate risk. The Bank continues to maintain a diversified loan portfolio with an emphasis on commercial mortgage, multi- family, construction and commercial loans in its efforts to reduce interest rate risk. These types of loans generally have adjustable rates that initially are higher than residential mortgage loans and generally have a higher rate of credit risk. The Bank' s lending policy focuses on quality underwriting standards and close monitoring of the loan portfolio. At December 31, 2022, these commercial loan types accounted for 85. 6 % of the loan portfolio and retail loans accounted for 14. 4 %. The Company intends to continue to focus on commercial mortgage, multi- family, construction and commercial lending relationships. The Company' s relationship banking strategy focuses on increasing core accounts and expanding relationships through its branch network, mobile banking, online banking and other digital services. The Company continues to evaluate opportunities to increase market share by expanding within existing and contiguous markets. Savings and demand deposit accounts, are generally a stable, relatively inexpensive source of funds. At December 31, 2022, savings and demand deposits were 92. 9 % of total deposits. The Company' s results of operations are primarily dependent upon net interest income, the difference between interest earned on interest- earning assets and the interest paid on interest- bearing liabilities. Changes in interest rates could have an adverse effect on net interest income to the extent the Company' s interest- bearing assets and interest- bearing liabilities reprice or mature at different times or relative interest rates. The Company believes based upon its current balance sheet mix that assets may reprice more quickly than liabilities. The Company generates non- interest income such as income from retail and business account fees, loan servicing fees, loan origination fees, loan level swap fees, appreciation in the cash surrender value of Bank- owned life insurance, income from loan or securities sales, fees from wealth management services, investment product sales, insurance brokerage fees and other fees. The Company' s operating expenses consist primarily of compensation and benefits expense, occupancy and equipment expense, data processing expense, the amortization of intangible assets, marketing and advertising expense and other general and administrative expenses. The Company' s results of operations are also affected by general economic conditions, changes in market interest rates, changes in asset quality, changes in asset values, actions of regulatory agencies and government policies. Acquisitions SB One Bancorp On July 31, 2020, the Company completed its acquisition of SB One Bancorp (" SB One"), which added $ 2. 20 billion to total assets, $ 1. 77 billion to total loans, which included PCD loans totaling $ 294. 2 million, and $ 1. 76 billion to total deposits, and added 18 full- service banking offices in New Jersey and New York. As part of the acquisition, the addition of Provident Protection Plus, Inc., formerly SB One Insurance Agency, Inc., allowed the Company to expand its products offerings to its customers to include an array of commercial and personal insurance products. Under the merger agreement, each share of SB One common stock was exchanged for 1. 357 shares of the Company' s common stock. The Company issued 12. 8 million shares of common stock from treasury stock, plus cash in lieu of fractional shares in the acquisition of SB One. The total consideration paid in the acquisition of SB One was $ 180. 8 million. In connection with the acquisition, SB One Bank, a wholly owned subsidiary of SB One, was merged with and into Provident Bank, a wholly owned subsidiary of the Company. The acquisition was accounted for under the acquisition method of accounting. Under this method of accounting, the purchase price has been allocated to the respective assets acquired and liabilities assumed based upon their estimated fair values, net of tax. The excess of consideration paid over the estimated fair value of the net assets acquired was recorded as goodwill. After finalizing certain estimates, goodwill totaled $ 23. 9 million. Pending Acquisitions On September 26, 2022, the Company, NL 239 Corp., a direct, wholly owned subsidiary of the Company (" Merger Sub"), and Lakeland Bancorp, Inc. entered into an Agreement and Plan of Merger (as may be amended, modified or supplemented from time to time in accordance with its terms, the " merger agreement "), pursuant to which Provident and Lakeland have agreed to combine their respective businesses in two mergers. Under the merger agreement, Merger Sub will merge with and into Lakeland, with Lakeland as the surviving entity (the " merger "), and as soon as reasonably practicable following the merger, Lakeland will merge with and into the Company, with the Company as the surviving entity (the " holdco merger "). At a date and time following the holdco merger as determined by the Company, Lakeland Bank, a New Jersey state- charted commercial bank and a wholly owned subsidiary of Lakeland (" Lakeland Bank "), will merge with and into Provident Bank, a New Jersey state- chartered savings bank and a wholly owned subsidiary of the Company (" Provident Bank "), with Provident Bank as the surviving bank (the " bank merger " and, together with the merger and the holdco merger, the " mergers "). The Company as the surviving institution will have approximately $ 25 billion in total assets and $ 20 billion in total deposits with banking locations across northern and central New Jersey and in surrounding areas of New York and Pennsylvania. In the merger, Lakeland shareholders will receive 0. 8319 of a share of the Company' s common stock for each share of Lakeland common stock they own. Based on the closing price of the Company' s common stock on the New York Stock Exchange on September 26, 2022, the last trading day before the public announcement of the merger, the exchange ratio represented approximately $ 19. 27 in value for each share of Lakeland common stock, representing a merger consideration of approximately $ 1. 3 billion on an aggregate basis. The Company has received stockholder approval to proceed with the merger at a special meeting of stockholders held on February 1, 2023. Lakeland has received shareholder approval to proceed with the merger at a special meeting of shareholders held on February 1, 2023. The completion of the merger remains subject to receipt of the requisite bank regulatory approvals and other customary closing conditions. Critical Accounting Policies The Company considers certain accounting policies to be critically important to the fair presentation of its financial condition and results of operations. These policies require management to make complex judgments on matters which by their nature have elements of uncertainty. The sensitivity of the Company' s consolidated financial statements to these critical accounting policies, and the assumptions and estimates applied, could have a significant impact on its financial condition and results of operations. These assumptions, estimates and judgments made by management can be influenced by a number of factors, including the general economic environment. The Company has identified the allowance for credit losses on loans as a critical accounting policy. On January 1, 2020, the Company adopted ASU 2016- 13," Measurement of Credit Losses on Financial Instruments, " which replaces the incurred loss methodology with the current expected credit loss (" CECL ") methodology. It also applies to off- balance sheet credit exposures, including loan commitments and lines of credit. The adoption of the new standard resulted in the Company recording a $ 7. 9 million increase to the allowance for credit losses and a $ 3. 2 million liability for off- balance sheet credit exposures. The adoption of the standard did not result in a change to the Company' s results of operations upon adoption as it was recorded as an $ 8. 3 million cumulative effect adjustment, net of income taxes, to retained earnings. The allowance for credit losses is a valuation account that reflects management' s evaluation of the current expected credit losses in the loan portfolio. The Company maintains the allowance for credit losses through provisions for credit losses that are charged to income. Charge- offs against the allowance for credit losses are taken on loans where management determines that the collection of loan principal and interest is unlikely. Recoveries made on loans that have been charged- off are credited to the allowance for credit losses. The calculation of the allowance for credit losses is a critical accounting policy of the Company. Management estimates the allowance balance using relevant available information, from internal and external sources, related to past events, current conditions, and a reasonable and supportable forecast. Historical credit loss experience for both the Company and peers provides the basis for the estimation of expected credit losses, where observed credit losses are converted to probability of default rate (" PDR ") curves through the use of segment- specific loss given default (" LGD ") risk factors that convert default rates to loss severity based on industry- level, observed relationships between the two variables for each segment, primarily due to the nature of the underlying collateral. These risk factors were assessed for reasonableness against the Company' s own loss experience and adjusted in certain cases when the relationship between the Company' s historical default and loss severity deviate from that of the wider industry. The historical PDR curves, together with corresponding economic conditions, establish a quantitative relationship between economic conditions and loan performance through an economic cycle. Using the historical relationship between economic conditions and loan performance, management' s expectation of future loan performance is incorporated using an externally developed economic forecast. This forecast is applied over a period that management has determined to be reasonable and supportable. Beyond the period over which management can develop or source a reasonable and supportable forecast, the model will revert to long- term average economic conditions using a straight- line, time- based methodology. The Company' s current forecast period is six quarters, with a four quarter reversion period to historical average macroeconomic factors. The Company' s economic forecast is approved by the Company' s Asset- Liability Committee. The allowance for credit losses is measured on a collective (pool) basis, with both a quantitative and qualitative analysis that is applied on a quarterly basis, when similar risk characteristics exist. The respective quantitative allowance for each loan segment is measured using an econometric, discounted PDR / LGD modeling methodology in which distinct, segment- specific multi- variate regression models are applied to an external economic forecast. Under the discounted cash flows methodology, expected credit losses are estimated over the effective life of the loans by measuring the difference between the net present value of modeled cash flows and amortized cost basis. Contractual cash flows over the contractual life of the loans are the basis for modeled cash flows, adjusted for modeled defaults and expected prepayments and discounted at the loan- level effective interest rate. The contractual term excludes expected extensions, renewals, and modifications unless either of the following applies: management has a reasonable expectation at the reporting date that a troubled debt restructuring (" TDR ") will be executed with an individual borrower, or the extension or renewal options are included in the original or modified contract at the reporting date and are not unconditionally cancellable by the Company. The Company considers qualitative adjustments to credit loss estimates for information not already captured in the quantitative component of the loss estimation process. Qualitative factors are based on portfolio concentration levels, model imprecision, changes in industry conditions, changes in the Company' s loan review process, changes in the Company' s loan policies and procedures, and economic forecast uncertainty. Portfolio segment is defined as the level at which an entity develops and documents a systematic methodology to determine its allowance for credit losses. Management developed segments for estimating loss based on type of borrower and collateral which is generally based upon federal call report segmentation. The

segments have been combined or sub- segmented as needed to ensure loans of similar risk profiles are appropriately pooled. As of December 31, 2022, the portfolio and class segments for the Company's loan portfolio were: • Mortgage Loans – Residential, Commercial Real Estate, Multi- Family and Construction • Commercial Loans – Commercial Owner Occupied and Commercial Non- Owner Occupied • Consumer Loans – First Lien Home Equity and Other Consumer The allowance for credit losses on loans individually evaluated for specific reserves is based upon loans that have been identified through the Company's normal loan monitoring process. This process includes the review of delinquent and problem loans at the Company's Delinquency, Credit, Credit Risk Management and Allowance Committees; or which may be identified through the Company's loan review process. Generally, the Company only evaluates loans individually for specific reserves if the loan is non- accrual, non- homogeneous and the balance is at least $ 1. 0 million, or if the loan was modified as a TDR. For all classes of loans deemed collateral- dependent, the Company estimates expected credit losses based on the fair value of the collateral less any selling costs. If the loan is not collateral dependent, the allowance for credit losses related to individually assessed loans is based on discounted expected cash flows using the loan's initial effective interest rate. A loan for which the terms have been modified resulting in a concession by the Company, and for which the borrower is experiencing financial difficulties is considered to be a TDR. The allowance for credit losses on a TDR is measured using the same method as all other impaired loans, except that the original interest rate is used to discount the expected cash flows, not the rate specified within the restructuring. For loans acquired that have experienced more- than- insignificant deterioration in credit quality since their origination are considered PCD loans. The Company evaluates acquired loans for deterioration in credit quality based on any of, but not limited to, the following: (1) non- accrual status; (2) troubled debt restructured designation; (3) risk ratings of special mention, substandard or doubtful; (4) watchlist credits; and (5) delinquency status, including loans that are current on acquisition date, but had been previously delinquent. At the acquisition date, an estimate of expected credit losses is made for groups of PCD loans with similar risk characteristics and individual PCD loans without similar risk characteristics. Subsequent to the acquisition date, the initial allowance for credit losses on PCD loans will increase or decrease based on future evaluations, with changes recognized in the provision for credit losses. Management believes the primary risks inherent in the portfolio are a general decline in the economy, a decline in real estate market values, rising unemployment or a protracted period of elevated unemployment, increasing vacancy rates in commercial investment properties and possible increases in interest rates in the absence of economic improvement. Any one or a combination of these events may adversely affect borrowers' ability to repay the loans, resulting in increased delinquencies, credit losses and higher levels of provisions. Management considers it important to maintain the ratio of the allowance for credit losses to total loans at an acceptable level given current and forecasted economic conditions, interest rates and the composition of the portfolio. Although management believes that the Company has established and maintained the allowance for credit losses at appropriate levels, additions may be necessary if future economic and other conditions differ substantially from the current operating environment and economic forecast. Management evaluates its estimates and assumptions on an ongoing basis giving consideration to forecasted economic factors, historical loss experience and other factors. Such estimates and assumptions are adjusted when facts and circumstances dictate. As future events and their effects cannot be determined with precision, actual results could differ significantly from these estimates. Changes in estimates resulting from continuing changes in the economic environment will be reflected in the financial statements in future periods. In addition, various regulatory agencies periodically review the adequacy of the Company's allowance for credit losses as an integral part of their examination process. Such agencies may require the Company to recognize additions to the allowance or additional write- downs based on their judgments about information available to them at the time of their examination. Although management uses the best information available, the level of the allowance for credit losses remains an estimate that is subject to significant judgment and short- term change. The CECL approach to calculate the allowance for credit losses on loans is significantly influenced by the composition, characteristics and quality of the Company's loan portfolio, as well as the prevailing economic conditions and forecast utilized. Material changes to these and other relevant factors creates greater volatility to the allowance for credit losses, and therefore, greater volatility to the Company's reported earnings. For the year ended December 31, 2022, the provision for credit losses on loans totaled $ 8. 4 million, compared to a negative provision of $ 24. 3 million in 2021. The increase in the year- over- year provision for credit losses was largely a function of the significant favorable impact of the post- pandemic recovery resulting in a large negative provision taken in the prior year and an increase in total loans outstanding in 2022. Analysis of Net Interest Income Net interest income represents the difference between income on interest- earning assets and expense on interest- bearing liabilities. Net interest income depends on the relative amounts of interest- earning assets and interest- bearing liabilities and the rates of interest earned on such assets and paid on such liabilities. Average Balance Sheet. The following table sets forth certain information for the years ended December 31, 2022, 2021 and 2020. For the periods indicated, the total dollar amount of interest income from average interest- earning assets and the resultant yields, as well as the interest expense on average interest- bearing liabilities and the rates of interest earned on such assets and paid on such liabilities. No tax equivalent adjustments were made. Average balances are daily averages. (2) Average outstanding balances are net of the allowance for credit losses, deferred loan fees and expenses, and loan premiums and discounts and include non- accrual loans. (3) Net interest income divided by average interest- earning assets. (4) The previously reported average balances of the interest bearing cash and non- interest bearing cash for the year ended December 31, 2020 were recalculated. These recalculations resulted in the previously reported net interest margin of 2020 changing from 3. 09 % to 3. 05 %. Rate / Volume Analysis. The following table presents the extent to which changes in interest rates and changes in the volume of interest- earning assets and interest- bearing liabilities have affected interest income and interest expense during the periods indicated. Information is provided in each category with respect to: (i) changes attributable to changes in volume (changes in volume multiplied by prior rate); (ii) changes attributable to changes in rate (changes in rate multiplied by prior volume); and (iii) the net change. The changes attributable to the combined impact of volume and rate have been allocated proportionately to the changes due to volume and the changes due to rate. Comparison of Financial Condition at December 31, 2022 and December 31, 2021 Total assets at December 31, 2022 were $ 13. 8 billion, a $ 2. 2 million increase from December 31, 2021. The increase in total assets was primarily due to a $ 667. 3 million increase in total loans and a $ 135. 0 million increase in other assets, partially offset by a $ 526. 0 million decrease in cash and cash equivalents and a $ 268. 4 million decrease in total investments. The Company's loan portfolio increased $ 667. 3 million to $ 10. 25 billion at December 31, 2022, from $ 9. 58 billion at December 31, 2021. Total PPP loans outstanding decreased $ 92. 1 million to $ 2. 8 million at December 31, 2022, from $ 94. 9 million at December 31, 2021. For the year ended December 31, 2022, loan fundings, including advances on lines of credit, totaled $ 3. 95 billion, compared with $ 3. 52 billion for 2021. For the year ended December 31, 2021, originations under PPP programs totaled $ 208. 7 million. Excluding the decrease in PPP loans, for the year ended December 31, 2022, the Company experienced net increases of $ 488. 8 million in commercial mortgage loans, $ 149. 4 million in multi- family loans, $ 136. 9 million in commercial loans and $ 32. 3 million in construction loans, partially offset by net decreases in residential mortgage and consumer loans of $ 24. 9 million and $ 22. 7 million, respectively. Commercial loans, consisting of commercial real estate, multi- family, construction and commercial loans, totaled $ 8. 78 billion, accounting for 85. 6 % of the loan portfolio at December 31, 2022, compared to $ 8. 06 billion, or 84. 1 % of the loan portfolio at December 31, 2021. Retail loans, which consist of one- to four- family residential mortgage and consumer loans, such as fixed- rate home equity loans and lines of credit, totaled $ 1. 48 billion and accounted for 14. 4 % of the loan portfolio at December 31, 2022, compared to $ 1. 53 billion, or 15. 9 %, of the loan portfolio at December 31, 2021. The Company participates in loans originated by other banks, including participations designated as Shared National Credits (" SNC "). The Company's gross commitments and outstanding balances as a participant in SNCs were $ 203. 9 million and $ 87. 3 million, respectively, at December 31, 2022. At December 31, 2022, one commercial relationship was classified as substandard with a commitment and balance totaling $ 8. 3 and $ 7. 6 respectively. At December 31, 2022, the Company's allowance for credit losses related to the loan portfolio was 0. 86 % of total loans, compared to 0. 84 % of total loans at December 31, 2021. For the year ended December 31, 2022, the Company recorded a provision of $ 8. 4 million for credit losses related to loans, compared to a $ 24. 3 million negative provision for the year ended December 31, 2021. The Company had net charge- offs of $ 1. 1 million for the year ended December 31, 2022, compared to net recoveries of $ 3. 6 million in 2021. The increase in the allowance for credit losses on loans was primarily due to the weakened economic forecast, combined with an increase in total loans outstanding. Total non- performing loans at December 31, 2022 were $ 58. 5 million, or 0. 57 % of total loans, compared with $ 48. 0 million, or 0. 50 % of total loans at December 31, 2021. At December 31, 2022, impaired loans totaled $ 68. 8 million with related specific reserves of $ 2. 4 million, compared with impaired loans totaling $ 52. 3 million with related specific reserves of $ 4. 3 million at December 31, 2021. Within total impaired loans, there were $ 40. 8 million of loans for which the present value of expected future cash flows or current collateral valuations exceeded the carrying amounts of the loans and for which no specific reserves were required in accordance with GAAP. Non- performing commercial mortgage loans increased $ 11. 3 million to $ 28. 2 million at December 31, 2022, from $ 16. 9 million at December 31, 2021. At December 31, 2022, non- performing commercial mortgage loans consisted of 10 loans at December 31, 2022. Of these 10 loans, four loans totaling $ 6. 9 million were PCD loans. The largest non- performing commercial mortgage loan was a $ 12. 3 million loan secured by a first mortgage on a property located in Collegeville, PA. Subsequent to December 31, 2022, the underlying real estate securing the loan was acquired in a negotiated settlement and recorded as a foreclosed asset. Non- performing commercial loans increased $ 3. 6 million to $ 24. 2 million at December 31, 2022, from $ 20. 6 million at December 31, 2021. Non- performing commercial loans at December 31, 2022 consisted of 34 loans, of which 15 loans were under 90 days accruing. Of these non- performing commercial loans, 11 were PCD loans totaling $ 3. 3 million. The largest non- performing commercial loan relationship consisted of two loans with total outstanding balances of $ 7. 6 million at December 31, 2022. These loans are secured by a general lien on business assets. These loans are currently not paying in accordance with their restructured terms. A new modification / forbearance agreement is currently being negotiated. Non- performing construction loans decreased $ 487, 000 to $ 1. 9 million at December 31, 2022. Non- performing construction loans at December 31, 2022 consisted of two PCD loans. There were $ 2. 4 million non- performing construction loans at December 31, 2021. Non- performing multi- family mortgage loans totaled $ 1. 6 million at December 31, 2022. There were no non- performing multi- family mortgage loans at December 31, 2021. At December 31, 2022, the Company held $ 2. 1 million of foreclosed assets, compared with $ 8. 7 million at December 31, 2021. Foreclosed assets are carried at the lower of the outstanding loan balance at the time of foreclosure or fair value, less estimated costs to sell. During the year ended December 31, 2022, there were five additions to foreclosed assets with an aggregate carrying value of $ 1. 2 million, four properties sold with an aggregate carrying value of $ 7. 6 million and a valuation charge of $ 200, 000. Non- performing assets totaled $ 60. 6 million, or 0. 44 % of total assets at December 31, 2022, compared to $ 56. 8 million, or 0. 41 % of total assets at December 31, 2021. If the non- accrual loans had performed in accordance with their original terms, interest income would have increased by $ 1. 0 million during the year ended December 31, 2022. The amount of cash basis interest income that was recognized on impaired loans during the year ended December 31, 2022 was not material. Total deposits decreased $ 671. 0 million for the year ended December 31, 2022 to $ 10. 56 billion. Total savings and demand deposit accounts decreased $ 729. 9 million to $ 9. 81 billion at December 31, 2022, while total time deposits increased $ 58. 9 million to $ 751. 4 million at December 31, 2022. The decrease in savings and demand deposits was largely attributable to a $ 535. 3 million decrease in interest bearing demand deposits, as the Company shifted $ 450. 0 million of brokered demand deposits into lower- costing Federal Home Loan Bank of New York (" FHLB") borrowings, a $ 122. 3 million decrease in non- interest bearing demand deposits, a $ 50. 4 million decrease in money market deposits and a $ 22. 0 million decrease in savings deposits. The increase in time deposits was primarily due to the inflow of brokered time deposits, partially offset by maturities of longer- term retail time deposits. Borrowed funds increased $ 710. 6 million for the year ended December 31, 2022, to $ 1. 34 billion. The increase in borrowings was largely due to the maturity and replacement of brokered demand deposits into lower- costing FHLB borrowings and asset funding requirements. Borrowed funds represented 9. 7 % of total assets at December 31, 2022, an increase from 4. 5 % at December 31, 2021. Stockholders' equity decreased $ 99. 4 million during the year ended December 31, 2022 to $ 1. 60 billion, primarily due to an increase in unrealized losses on available for sale debt securities, dividends paid to stockholders and common stock repurchases, partially offset by net income. For the year ended December 31, 2022, common stock repurchases totaled 2, 045, 762 shares at an average cost of $ 23. 23 per share, of which 18, 471 shares, at an average cost of $ 23. 45 per share, were made in connection with withholding to cover income taxes on the vesting of stock- based compensation. At December 31, 2022, approximately 1. 1 million shares remained eligible for repurchase under the current stock repurchase authorization. Comparison of Operating Results for the Years Ended December 31, 2022 and December 31, 2021 General. Net income for the year ended December 31, 2022 was $ 175. 6 million,

compared to $ 167. 9 million for the year ended December 31, 2021. Basic and diluted earnings per share were $ 2. 35 per share, compared to basic and diluted earnings per share of $ 2. 20 and $ 2. 19, respectively, for the year ended December 31, 2021. Earnings for the year ended December 31, 2022 were impacted by $ 4. 1 million of non- tax deductible transaction costs related to the pending merger with Lakeland Bancorp, Inc. (" Lakeland ") that was announced on September 27, 2022. The Company recorded an $ 8. 4 million provision for the year ended December 31, 2022, compared to a $ 24. 3 million negative provision for credit losses for 2021. Net Interest Income. Net interest income increased $ 51. 5 million to $ 417. 6 million for 2022, from $ 366. 0 million for 2021. The interest rate spread increased 33 basis points to 3. 22 % for 2022, from 2. 89 % for 2021. The net interest margin increased 37 basis points to 3. 37 % for 2022, compared to 3. 00 % for 2021. The increase in net interest income for the year ended December 31, 2022, was primarily driven by the favorable repricing of adjustable rate loans and an increase in rates on new loan originations. Net interest income was further enhanced by increases in available for sale debt securities and total loans outstanding, along with growth in lower- costing core and non- interest bearing deposits. This was partially offset by a reduction in fees related to the forgiveness of PPP loans. For the year ended December 31, 2022, fees related to the forgiveness of PPP loans decreased $ 9. 9 million to $ 1. 4 million, compared to $ 11. 3 million for the year ended December 31, 2021. Interest income increased $ 63. 8 million to $ 466. 2 million for 2022, compared to $ 402. 3 million for 2021. The increase in interest income was primarily driven by the favorable repricing of adjustable rate loans and an increase in rates on new loan originations. Average interest- earning assets increased $ 231. 8 million to $ 12. 41 billion for 2022, compared to $ 12. 18 billion for 2021. The increase in average earning assets was primarily due to a $ 242. 1 million increase in average outstanding loan balances to $ 9. 80 billion for 2022, which was largely attributable to commercial loan originations. The yield on interest- earning assets increased 46 basis points to 3. 76 % for 2022, from 3. 30 % for 2021. The weighted average yield on total loans increased 44 basis points to 4. 26 % for 2022 and the weighted average yield on available for sale debt securities increased 35 basis points to 1. 75 % for 2022, from 1. 40 % for 2021. The weighted average yield on FHLBNY stock decreased to 4. 71 % for 2022, compared to 5. 48 % for 2021. Interest expense increased $ 12. 3 million to $ 48. 6 million for 2022, from $ 36. 3 million for 2021. The increase in interest expense was primarily attributable to an increase in the cost of interest- bearing liabilities, along with an increase in average interest- bearing liabilities. The average rate paid on interest- bearing liabilities increased 13 basis points to 0. 54 % for 2022, compared to 2021. The average rate paid on interest- bearing deposits increased 14 basis points to 0. 47 % for 2022, from 0. 33 % for 2021. The average rate paid on borrowings increased 14 basis points to 1. 23 % for 2022, from 1. 09 % for 2021. The average balance of interest- bearing liabilities increased $ 133. 7 million to $ 9. 03 billion for 2022, compared to $ 8. 89 billion for 2021. Average interest- bearing deposits increased $ 181. 7 million to $ 8. 26 billion for 2022, from $ 8. 08 billion for 2021. Within average interest- bearing deposits, average interest- bearing core deposits increased $ 359. 7 million to $ 7. 57 billion for 2022, compared with 2021. Average non- interest bearing demand deposits increased $ 206. 3 million to $ 2. 75 billion for 2022, from $ 2. 54 billion for 2021. Average outstanding borrowings decreased $ 33. 6 million to $ 756. 3 million for 2022, compared to 2021. Average outstanding subordinated debentures decreased $ 14. 4 million to $ 10. 4 million for 2022, compared to 2021. Provision for Credit Losses. Provisions for credit losses are charged to operations in order to maintain the allowance for credit losses at a level management considers necessary to absorb projected credit losses that may arise over the expected term of each loan in the portfolio. In determining the level of the allowance for credit losses, management estimates the allowance balance using relevant available information from internal and external sources relating to past events, current conditions and a reasonable and supportable forecast. The amount of the allowance is based on estimates, and the ultimate losses may vary from such estimates as more information becomes available or later events change. Management assesses the adequacy of the allowance for credit losses on a quarterly basis and makes provisions for credit losses, if necessary, in order to maintain the valuation of the allowance. For the year ended December 31, 2022, the Company recorded an $ 8. 4 million provision for credit losses on loans, compared to a $ 24. 3 million negative provision for 2021. The Company, for the year ended December 31, 2022, had net loan charge- offs of $ 1. 1 million, compared to net recoveries of $ 3. 6 million for 2021. Total charge- offs for the year ended December 31, 2022 were $ 6. 5 million, compared to $ 5. 5 million for the year ended December 31, 2021. Recoveries for the year ended December 31, 2022, were $ 5. 4 million, compared to $ 9. 0 million for the year ended December 31, 2021. The increase in the year- over- year provision for credit losses was largely a function of the significant favorable impact of the post- pandemic recovery resulting in a large negative provision taken in the prior year and an increase in total loans outstanding. Non- Interest Income. For the year ended December 31, 2022, non- interest income totaled $ 87. 8 million, an increase of $ 980, 000, compared to the same period in 2021. Other interest income decreased $ 6. 5 million to $ 14. 2 million for the year ended December 31, 2022, compared to $ 7. 7 million for the same period in 2021, primarily due to an $ 8. 6 million gain realized on the sale of a foreclosed commercial office property and an increase in fees on loan- level interest rate swap transactions, partially offset by income recognized from a $ 3. 4 million reduction in the contingent consideration related to the earn- out provisions of the 2019 purchase of Tirschwell & Loewy, Inc. by Beacon Trust Company, recorded in the prior year. Insurance agency income increased $ 1. 2 million to $ 11. 4 million for the year ended December 31, 2022, compared to $ 10. 2 million for the same period in 2021, largely due to increases in contingent commissions, retention revenue and new business activity. Partially offsetting these increases in non- interest income, wealth management income decreased $ 2. 9 million to $ 27. 9 million for the year ended December 31, 2022, compared to the same period in 2021, primarily due to a decrease in the market value of assets under management, partially offset by new business generation. BOLI income decreased $ 1. 9 million to $ 6. 0 million for the year ended December 31, 2022, compared to the same period in 2021, largely due to a decrease in benefit claims recognized and lower equity valuations. Additionally, fee income decreased $ 1. 8 million to $ 28. 1 million for the year ended December 31, 2022, compared to the same period in 2021, primarily due to a decrease in debit card revenue, which was curtailed by the application of the Durbin amendment to the Company' s operations beginning July 1, 2021 and a decrease in commercial loan prepayment fees, partially offset by an increase in deposit related fees. Non- Interest Expense. Non- interest expense totaled $ 256. 8 million for the year ended December 31, 2022, an increase of $ 6. 8 million, compared to $ 250. 1 million for the year ended December 31, 2021. Other operating expense increased $ 4. 4 million to $ 43. 0 million for the year ended December 31, 2022, compared to $ 38. 6 million for the year ended December 31, 2021, primarily due to $ 4. 1 million of transaction costs related to the pending merger with Lakeland. Compensation and benefits expense increased $ 3. 8 million to $ 147. 2 million for the year ended December 31, 2022, compared to $ 143. 4 million for the year ended December 31, 2021, primarily due to increases in stock- based compensation and salary expense, partially offset by a decrease in the accrual for incentive compensation. Data processing expense increased $ 2. 0 million to $ 21. 8 million for the year ended December 31, 2022, mainly due to an increase in software subscription and maintenance expenses. Additionally, net occupancy expense increased $ 1. 6 million to $ 34. 6 million for the year ended December 31, 2022, compared to the same period in 2021, mainly due to increases in rent, depreciation and maintenance expenses, a portion of which were attributable to the Company' s new administrative offices. Partially offsetting these increases, the Company recorded a $ 3. 4 million negative provision for credit losses for off- balance sheet credit exposures, compared to a $ 1. 5 million provision last year. The $ 4. 9 million decrease in the provision for credit losses for off- balance sheet credit exposures for the year was primarily due to an increase in line of credit utilization, combined with a decrease in loans approved and awaiting closing. Income Tax Expense. For the year ended December 31, 2022, the Company' s income tax expense was $ 64. 5 million with an effective tax rate of 26. 8 %, compared with $ 59. 2 million with an effective tax rate of 26. 1 % for the year ended December 31, 2021. The increase in tax expense for the year ended December 31, 2022, compared with the same period last year was largely the result of an increase in taxable income, while the increase in the effective tax rate for the year ended December 31, 2022, compared with the prior year was largely due to non- deductible merger related transaction costs of $ 4. 1 million in the current year. Comparison of Operating Results for the Years Ended December 31, 2021 and December 31, 2020 General. Net income for the year ended December 31, 2021 was $ 167. 9 million, compared to $ 97. 0 million for the year ended December 31, 2020. Basic and diluted earnings per share were $ 2. 20 and $ 2. 19 per share, respectively, compared to basic and diluted earnings per share of $ 1. 39 for the year ended December 31, 2020. Earnings for the year ended December 31, 2021 were favorably impacted by growth in average interest earning assets, including assets acquired in the July 31, 2020 merger with SB One Bancorp (" SB One") and the deployment of liquidity arising from increased deposits, into earning assets. Earnings for the year ended December 31, 2021 further benefited from a negative provision for credit losses attributable to an improved economic forecast and improved asset quality. The Company recorded a $ 24. 3 million negative provision for the year ended December 31, 2021, compared to a $ 29. 7 million provision for credit losses for 2020. Net Interest Income. Net interest income increased $ 53. 5 million to $ 366. 0 million for 2021, from $ 312. 6 million for 2020. The interest rate spread increased one basis point to 2. 89 % for 2021, from 2. 88 % for 2020. The net interest margin decreased five basis points to 3. 00 % for 2021, compared to 3. 05 % for 2020. For the year ended December 31, 2021, the decrease in net interest margin was primarily attributable to increases in the average balance of both lower- yielding cash and available for sale debt securities portfolios, combined with the downward repricing of certain adjustable rate loans. This decrease was partially offset by the inflow of lower- costing core deposits, along with an increase in the accelerated recognition of fees related to the forgiveness of PPP loans in 2021. For the year ended December 31, 2021, fees related to the forgiveness of PPP loans totaled $ 11. 3 million, which was recognized in interest income, compared to $ 3. 8 million for the year ended December 31, 2020. Interest income increased $ 39. 0 million to $ 402. 3 million for 2021, compared to $ 363. 3 million for 2020. The increase in interest income was attributable to interest income from the SB One loan portfolio, partially offset by the downward repricing of certain adjustable rate assets and lower rates on newly originated loans. Average interest- earning assets increased $ 1. 94 billion to $ 12. 18 billion for 2021, compared to $ 10. 24 billion for 2020. The increase in average earning assets was largely due to a $ 1. 19 billion increase in average outstanding loan balances to $ 9. 56 billion for 2021, attributable to the loan portfolios acquired from SB One and PPP loan originations. The yield on interest- earning assets decreased 25 basis points to 3. 30 % for 2021, from 3. 55 % for 2020. The weighted average yield on total loans decreased five basis points to 3. 82 % for 2021 and the weighted average yield on available for sale debt securities decreased 68 basis points to 1. 40 % for 2021, from 2. 08 % for 2020. The weighted average yield on FHLBNY stock decreased to 5. 48 % for 2021, compared to 6. 00 % for 2020. Interest expense decreased $ 14. 4 million to $ 36. 3 million for 2021, from $ 50. 7 million for 2020. The decrease in interest expense was primarily attributable to a decrease in the cost of interest- bearing liabilities, partially offset by an increase in average interest- bearing deposits. The average rate paid on interest- bearing liabilities decreased 26 basis points to 0. 41 % for 2021, compared to 2020. The average rate paid on interest- bearing deposits decreased 20 basis points to 0. 33 % for 2021, from 0. 53 % for 2020. The average rate paid on borrowings decreased 27 basis points to 1. 09 % for 2021, from 1. 36 % for 2020. The average rate paid on subordinated debentures assumed in the SB One acquisition was 4. 79 % for 2021. Average interest- bearing deposits increased $ 1. 70 billion to $ 8. 08 billion for 2021, from $ 6. 38 billion for 2020. The average balance of interest- bearing liabilities increased $ 1. 28 billion to $ 8. 89 billion for 2021, compared to $ 7. 61 billion for 2020. Within average interest- bearing deposits, average interest- bearing core deposits increased $ 1. 70 billion to $ 7. 21 billion for 2021, compared with 2020. Average non- interest bearing demand deposits increased $ 558. 9 million to $ 2. 54 billion for 2021, from $ 1. 98 billion for 2020. Average outstanding borrowings decreased $ 438. 1 million to $ 789. 8 million for 2021, compared to 2020. Average outstanding subordinated debentures for 2021 was $ 24. 8 million. Provision for Credit Losses. For the year ended December 31, 2021, the Company recorded a $ 24. 3 million negative provision for credit losses on loans, compared to a $ 29. 7 million provision for 2020. The Company, for the year ended December 31, 2021, had net loan recoveries of $ 3. 6 million, compared to net charge- offs of $ 5. 3 million for 2020. Total charge- offs for the year ended December 31, 2021 were $ 5. 5 million, compared to $ 7. 9 million for the year ended December 31, 2020. Recoveries for the year ended December 31, 2021, were $ 9. 0 million, compared to $ 2. 6 million for the year ended December 31, 2020. The reduction in provision for credit losses for the year ended December 31, 2021, compared to the prior year, was primarily the result of an improved economic forecast and improved asset quality. The net recoveries realized for the year ended December 31, 2021 further contributed to the negative provision for credit losses in the year. Non- Interest Income. For the year ended December 31, 2021, non- interest income totaled $ 86. 8 million, an increase of $ 14. 4 million from 2020. Insurance agency income totaled $ 10. 2 million, an increase of $ 6. 3 million for the year ended December 31, 2021, compared to the same period in 2020, resulting from the prior year acquisition of SB One. Fee income increased $ 6. 1 million to $ 30. 0 million, compared to the same period in 2020, largely due to a $ 3. 0 million increase in prepayment fees on commercial loans, a $ 973, 000 increase in loan- related fee income, a $ 743, 000 increase in non- deposit investment fee income and a $ 601, 000 increase in deposit related fee income. These increases were partially offset by a $ 362, 000 decrease in debit card revenues. The increases in fee income are partially attributable to the addition of the SB One customer base as well as a recovering economy compared to the severe negative effects that COVID- 19 had on consumer and business activities in the prior year. The decrease in debit card revenue was largely due to interchange transaction fee limitations imposed by the Durbin amendment, which became effective for the Company on July 1, 2021, mitigated by an increase in transaction fees related to the SB One customer base. Wealth management income increased $ 5. 0 million to $ 30. 8 million for the year ended December 31, 2021, compared to $ 25. 7 million for the same period in 2020, primarily due to an increase in the market value of assets under management as a result of strong equity market performance and new business generation. Additionally, BOLI income increased $ 1. 7 million to $ 7. 9 million for the year ended December 31, 2021, compared to the same period in 2020, primarily due to an increase in benefit claims, additional income related to the BOLI assets acquired from SB One and higher equity valuations. Partially offsetting these increases, other income decreased $ 5. 1 million to $ 7. 7 million for the year ended December 31, 2021, primarily due to an $ 8. 2 million decrease in net fees on loan- level interest rate swap transactions, an $ 884, 000 decrease in net gains on the sale of fixed assets and a $ 334, 000 decrease in net gains on the sale of foreclosed real estate, partially offset by income recognized from a $ 3. 4 million reduction in the contingent consideration related to the earn- out provisions of the 2019 purchase of Tirschwell & Loewy, Inc. by Beacon Trust Company. Non- Interest Expense. Non- interest expense for the year ended December 31, 2021 was $ 250. 1 million, an increase of $ 22. 3 million from 2020. Compensation and benefits expense increased $ 12. 5 million to $ 143. 4 million for the year ended December 31, 2021, compared to $ 130. 9 million for the year ended December 31, 2020. This increase was primarily due to increases in salary expense and employee medical benefits associated with the addition of former SB One employees, combined with an increase in the accrual for incentive compensation, company- wide annual merit increases and an increase in stock- based compensation, partially offset by a decrease in severance expense. Net occupancy costs increased $ 5. 8 million to $ 32. 9 million for the year ended December 31, 2021, compared to 2020, mainly due to increases in rent, depreciation, utilities and maintenance expenses related to the facilities acquired from SB One, along with an increase in snow removal costs incurred earlier in the year. FDIC insurance expense increased $ 3. 1 million to $ 6. 3 million for year ended December 31, 2021, compared to $ 3. 1 million for 2020, primarily due to an increase in the insurance assessment rate and an increase in total assets subject to assessment, including assets acquired from SB One, along with the receipt of the small bank assessment credit in the prior year that was not available in 2021. Other operating expenses increased $ 2. 4 million to $ 38. 6 million for the year ended December 31, 2021, compared to $ 36. 2 million for the year ended December 31, 2020, largely due to a valuation adjustment on foreclosed assets and increases in debit card maintenance, insurance and business development expenses, as a result of the addition of SB One, partially offset by non- recurring merger related expenses incurred in the prior year. Partially offsetting these increases in non- interest expense, data processing costs decreased $ 1. 0 million to $ 19. 8 million, compared with 2020, primarily due to non- recurring core system conversion costs related to the SB One acquisition in the prior year, partially offset by increases in software subscription service expense and online banking costs. Additionally, advertising expense decreased $ 449, 000 for the year

ended December 31, 2021, compared with 2020, mainly due to the curtailment of certain product marketing campaigns in the current year. Income Tax Expense. For the year ended December 31, 2021, the Company's income tax expense was $ 59. 2 million, compared with $ 30. 6 million for 2020. The Company's effective tax rate was 26. 1 % for the year ended December 31, 2021, compared with 24. 0 % for the year ended December 31, 2020. The increase in tax expense and the effective tax rate for the year ended December 31, 2021, compared with the same period in 2020, was partially attributable to increases in taxable income and the reduced proportion of income derived from tax exempt sources to total pre- tax income. Further, upon the filing of the 2020 state income tax returns in the fourth quarter of 2021, a discrete item resulting in additional tax expense was recorded related to the apportionment of income subject to state income taxes. Liquidity and Capital Resources Liquidity refers to the Company's ability to generate adequate amounts of cash to meet financial obligations to its depositors, to fund loans and securities purchases and operating expenses. Sources of funds include scheduled amortization of loans, loan prepayments, scheduled maturities of unpledged investments, cash flows from mortgage- backed securities and the ability to borrow funds from the FHLBNY and approved broker- dealers. Cash flows from loan payments and maturing investment securities are fairly predictable sources of funds. Changes in interest rates, local economic conditions and the competitive marketplace can influence loan prepayments, prepayments on mortgage- backed securities and deposit flows. For each of the years ended December 31, 2022 and 2021, loan repayments totaled $ 3. 24 billion and $ 3. 69 billion, respectively. As deposit growth has slowed, the Company has continued to monitor and focus on deposit behavior and borrowing capacity with the FHLBNY and FRBNY. Commercial real estate loans, multi- family loans, commercial loans, one- to four- family residential loans and consumer loans are the primary investments of the Company. Purchasing securities for the investment portfolio is a secondary use of funds and the investment portfolio is structured to complement and facilitate the Company's lending activities and ensure adequate liquidity. Loan originations and purchases totaled $ 3. 95 billion for the year ended December 31, 2022, compared to $ 3. 52 billion for the year ended December 31, 2021. Purchases for the investment portfolio totaled $ 317. 5 million for the year ended December 31, 2022, compared to $ 1. 44 billion for the year ended December 31, 2021. At December 31, 2022, the Bank had outstanding loan commitments to borrowers of $ 2. 06 billion, including undisbursed home equity lines and personal credit lines of $ 279. 2 million. Total deposits decreased $ 671. 0 million for the year ended December 31, 2022. Deposit activity is affected by changes in interest rates, competitive pricing and product offerings in the marketplace, local economic conditions, customer confidence and other factors such as stock market volatility. Certificate of deposit accounts that are scheduled to mature within one year totaled $ 584. 2 million at December 31, 2022. Based on its current pricing strategy and customer retention experience, the Bank expects to retain a significant share of these accounts. The Bank manages liquidity on a daily basis and expects to have sufficient cash to meet all of its funding requirements. As of December 31, 2022, the Bank exceeded all minimum regulatory capital requirements. At December 31, 2022, the Bank's leverage (Tier 1) capital ratio was 9. 51 %. FDIC regulations require banks to maintain a minimum leverage ratio of Tier 1 capital to adjusted total assets of 4. 00 %. At December 31, 2022, the Bank's total risk- based capital ratio was 11. 58 %. Under current regulations, the minimum required ratio of total capital to risk- weighted assets is 10. 50 %. A bank is considered to be well- capitalized if it has a leverage (Tier 1) capital ratio of at least 5. 00 % and a total risk- based capital ratio of at least 10. 00 %. Off- balance sheet commitments consist of unused commitments to borrowers for term loans, unused lines of credit and outstanding letters of credit. Total off- balance sheet obligations were $ 2. 06 billion at December 31, 2022, an increase of $ 1. 6 million, from $ 2. 05 billion at December 31, 2021. Contractual obligations consist of certificate of deposit liabilities. Total certificate of deposits at December 31, 2022 were $ 751. 4 million, an increase of $ 58. 9 million, compared to $ 692. 52 million at December 31, 2021. There were no security purchases in 2022 and 2021, which settled in January 2023 or January 2022, respectively. Item 7A. Quantitative and Qualitative Disclosures About Market Risk Qualitative Analysis. Interest rate risk is the exposure of a bank's current and future earnings and capital arising from adverse movements in interest rates. The guidelines of the Company's interest rate risk policy seek to limit the exposure to changes in interest rates that affect the underlying economic value of assets and liabilities, earnings and capital. To minimize interest rate risk, the Company generally sells all 20- and 30- year fixed- rate residential mortgage loans at origination. The Company retains residential fixed rate mortgages with terms of 15 years or less and biweekly payment residential mortgages with a term of 30 years or less. Commercial real estate loans generally have interest rates that reset in five years, and other commercial loans such as construction loans and commercial lines of credit reset with changes in the Prime rate, the Federal Funds rate, LIBOR or SOFR. Investment securities purchases generally have maturities of five years or less, and mortgage- backed securities have weighted average lives between three and five years. The Asset / Liability Committee meets at least monthly, or as needed, to review the impact of interest rate changes on net interest income, net interest margin, net income and the economic value of equity. The Asset / Liability Committee reviews a variety of strategies that project changes in asset or liability mix and the impact of those changes on projected net interest income and net income. The Company's strategy for liabilities has been to maintain a stable core- funding base by focusing on core deposit account acquisition and increasing products and services per household. Certificate of deposit accounts as a percentage of total deposits were 7. 1 % at December 31, 2022, compared to 6. 2 % at December 31, 2021. Certificate of deposit accounts are generally short- term. As of December 31, 2022, 77. 7 % of all certificates of deposit had maturities of one year or less compared to 77. 2 % at December 31, 2021. The Company's ability to retain maturing time deposit accounts is the result of its strategy to remain competitively priced within its marketplace. The Company's pricing strategy may vary depending upon current funding needs and the ability of the Company to fund operations through alternative sources, primarily by accessing short- term lines of credit with the FHLBNY during periods of pricing dislocation. Quantitative Analysis. Current and future sensitivity to changes in interest rates are measured through the use of balance sheet and income simulation models. The analysis captures changes in net interest income using flat rates as a base, a most likely rate forecast and rising and declining interest rate forecasts. Changes in net interest income and net income for the forecast period, generally twelve to twenty- four months, are measured and compared to policy limits for acceptable change. The Company periodically reviews historical deposit re- pricing activity and makes modifications to certain assumptions used in its income simulation model regarding the interest rate sensitivity of deposits without maturity dates. These modifications are made to more closely reflect the most likely results under the various interest rate change scenarios. Since it is inherently difficult to predict the sensitivity of interest bearing deposits to changes in interest rates, the changes in net interest income due to changes in interest rates cannot be precisely predicted. There are a variety of reasons that may cause actual results to vary considerably from the predictions presented below which include, but are not limited to, the timing, magnitude, and frequency of changes in interest rates, interest rate spreads, prepayments, and actions taken in response to such changes. Specific assumptions used in the simulation model include: • Parallel yield curve shifts for market rates; • Current asset and liability spreads to market interest rates are fixed; • Traditional savings and interest bearing demand accounts move at 10 % of the rate ramp in either direction; • Retail Money Market and Business Money Market accounts move at 25 % and 75 % of the rate ramp in either direction, respectively; and • Higher- balance demand deposit tiers and promotional demand accounts move at 50 % to 75 % of the rate ramp in either direction. The following table sets forth the results of the twelve month projected net interest income model as of December 31, 2022. Change in Interest Rates in Basis Points (Rate Ramp) Net Interest IncomeAmount Change Percent Change (Dollars in thousands)- 100 $ 451, 756 $ (3, 602) (0. 8) % Static455, 358 — — 100458, 572 3, 214 0. 7 200461, 391 6, 033 1. 3 300464, 125 8, 767 1. 9 The interest rate risk position of the Company remains moderately asset- sensitive notwithstanding the deployment of excess cash into fixed rate longer duration assets, including investment securities and loans. As a result, the preceding table indicates that, as of December 31, 2022, in the event of a 300 basis point increase in interest rates, whereby rates ramp up evenly over a twelve- month period, there would be a 1. 9 % or $ 8. 8 million increase to net interest income. In the event of a 100 basis point decrease in interest rates, whereby rates ramp down evenly over a twelve- month period, the Company would experience a 0. 8 %, or $ 3. 6 million decrease in net interest income. In this downward rate scenario, rates on deposits have a repricing floor of zero. Another measure of interest rate sensitivity is to model changes in economic value of equity through the use of immediate and sustained interest rate shocks. The following table illustrates the economic value of equity model results as of December 31, 2022. Change in Interest Rates in Basis PointsPresent Value of EquityPresent Value of Equityas Percent of PresentValue of AssetsAmountChangePercentChangePresent ValueRatioPercentChange (Dollars in thousands)- 100 $ 2, 256, 492 $ (925) — % 16. 4 % (2. 8) % Flat2, 257, 417 — — 16. 9 — 1002, 306, 571 49, 154 2. 2 17. 7 4. 5 2002, 325, 061 67, 644 3. 0 18. 2 7. 9 3002, 341, 275 83, 858 3. 7 18. 8 11. 2 The preceding table indicates that as of December 31, 2022, in the event of an immediate and sustained 300 basis point increase in interest rates, the Company would experience an 3. 7 %, or $ 83. 9 million increase in the present value of equity. If rates were to decrease 100 basis points, the Company would experience a $ 925, 000 decrease in the present value of equity. Certain shortcomings are inherent in the methodologies used in the above interest rate risk measurements. Modeling changes in net interest income requires the use of certain assumptions regarding prepayment and deposit decay rates, which may or may not reflect the manner in which actual yields and costs respond to changes in market interest rates. While management believes such assumptions are reasonable, there can be no assurance that assumed prepayment rates and decay rates will approximate actual future loan prepayment and deposit withdrawal activity. Moreover, the net interest income table presented assumes that the composition of interest sensitive assets and liabilities existing at the beginning of a period remains constant over the period being measured and also assumes that a particular change in interest rates is reflected uniformly across the yield curve regardless of the duration to maturity or repricing of specific assets and liabilities. Accordingly, although the net interest income table provides an indication of the Company's interest rate risk exposure at a particular point in time, such measurement is not intended to and does not provide a precise forecast of the effect of changes in market interest rates on the Company's net interest income and will differ from actual results. Item 8. Financial Statements and Supplementary Data The following are included in this item: A. Report of Independent Registered Public Accounting Firm B. Report of Independent Registered Public Accounting Firm on Internal Control Over Financial Reporting C. Consolidated Financial Statements: (1) Consolidated Statements of Financial Condition as of December 31, 2022 and 2021 (2) Consolidated Statements of Income for the years ended December 31, 2022, 2021 and 2020 (3) Consolidated Statements of Comprehensive Income for the years ended December 31, 2022, 2021 and 2020 (4) Consolidated Statements of Changes in Stockholders' Equity for the years ended December 31, 2022, 2021 and 2020 (5) Consolidated Statements of Cash Flows for the years ended December 31, 2022, 2021 and 2020 (6) Notes to Consolidated Financial Statements D. Provident Financial Services, Inc., Condensed Financial Statements: (1) Condensed Statement of Financial Condition as of December 31, 2022 and 2021 (2) Condensed Statement of Income for the years ended December 31, 2022, 2021 and 2020 (3) Condensed Statement of Cash Flows for the years ended December 31, 2022, 2021 and 2020 The supplementary data required by this Item is provided in Note 20 of the Notes to Consolidated Financial Statements. To the Stockholders and Board of Directors Provident Financial Services, Inc.: Opinion on the Consolidated Financial Statements We have audited the accompanying consolidated statements of financial condition of Provident Financial Services, Inc. and subsidiary (the Company) as of December 31, 2022 and 2021, the related consolidated statements of income, comprehensive income, changes in stockholders' equity, and cash flows for each of the years in the three- year period ended December 31, 2022, and the related notes (collectively, the consolidated financial statements). In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2022 and 2021, and the results of its operations and its cash flows for each of the years in the three- year period ended December 31, 2022, in conformity with U. S. generally accepted accounting principles. We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the Company's internal control over financial reporting as of December 31, 2022, based on criteria established in Internal Control – Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission, and our report dated March 1, 2023 expressed an unqualified opinion on the effectiveness of the Company's internal control over financial reporting. Basis for Opinion These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U. S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB. We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. We believe that our audits provide a reasonable basis for our opinion. Critical Audit Matter The critical audit matter communicated below is a matter arising from the current period audit of the consolidated financial statements that was communicated or was required to be communicated to the audit committee and that: (1) relates to accounts or disclosures that are material to the consolidated financial statements and (2) involved our especially challenging, subjective, or complex judgments. The communication of a critical audit matter does not alter in any way our opinion on the consolidated financial statements, taken as a whole, and we are not, by communicating the critical audit matter below, providing a separate opinion on the critical audit matter or on the accounts or disclosures to which it relates. Assessment of the allowance for credit losses on loans evaluated on a collective basis As discussed in Notes 1 and 7 to the consolidated financial statements, the Company's allowance for credit losses on loans evaluated on a collective basis (the collective ACL on loans) was $ 83. 9 million of a total allowance for credit losses of $ 88. 0 million as of December 31, 2022. The collective ACL on loans includes the measure of expected credit losses on a collective basis for loans that share similar risk characteristics. The Company uses a discounted cash flow methodology where the respective quantitative allowance for each segment is measured by comparing the present value of expected principal and interest cash flows projected using an econometric, probability of default (PD) and loss given default (LGD) modeling methodology to the amortized cost. Historical credit loss experience for both the Company and peers provides the basis for the estimation of expected credit losses, where observed credit losses are converted to probability of default rate curves through the use of segment- specific loss given default risk factors that convert default rates to loss severity based on industry- level, observed relationships between the two variables for each segment. Using the historical relationship between the economic conditions and loan performance, management's expectation of future loan performance is incorporated using an externally developed economic forecast that is applied over a period that has been determined to be reasonable and supportable. After the reasonable and supportable forecast period, the Company reverts to the long- term average of selected economic factors on a straight- line basis over a reversion period. Contractual cash flows over the contractual life of the loans are the basis for modeled cash flows, adjusted for modeled defaults and expected prepayments and discounted at the loan- level effective interest rate. The Company considers qualitative adjustments to credit loss estimates for information not already captured in the quantitative component of the loss estimation process. We identified the assessment of the collective ACL on loans as a critical audit matter. A high degree of audit effort, including specialized skills and knowledge, and subjective and complex auditor judgment was involved in the assessment of the collective ACL on loans due to significant measurement uncertainty. Specifically, the assessment encompassed the evaluation of the collective ACL on loans methodology, including the methods and models used to estimate (1) the PD and LGD and their significant assumptions, including the relationship between PD and LGD and the selected external economic forecast, and (2) certain qualitative adjustments and their significant assumptions. The assessment also

included an evaluation of the conceptual soundness of the PD and LGD models. In addition, auditor judgment was required to evaluate the sufficiency of audit evidence obtained. The following are the primary procedures we performed to address this critical audit matter. We evaluated the design and tested the operating effectiveness of certain internal controls related to the Company's measurement of the collective ACL on loans estimate, including controls over the: • evaluation of the collective ACL on loans methodology • performance monitoring of the PD and LGD models • identification and determination of the significant assumptions used in the PD and LGD models • development of the qualitative adjustments, including the significant assumptions used in the measurement of the qualitative adjustments • analysis of the collective ACL on loan results, trends and ratios. We evaluated the Company's process to develop the collective ACL on loans estimate by testing certain sources of data and assumptions that the Company used, and considered the relevance and reliability of such data and assumptions. In addition, we involved credit risk professionals with specialized skills and knowledge, who assisted in: • evaluating the Company's collective ACL on loans methodology for compliance with U. S. generally accepted accounting principles • evaluating judgments made by the Company relative to the development and performance monitoring of the PD and LGD models by comparing them to relevant Company- specific metrics and trends and the applicable industry and regulatory practices • assessing the conceptual soundness and design of the PD and LGD models by inspecting the Company's model documentation to determine whether the models are suitable for their intended use • assessing the selected economic forecast used by comparing it to the Company's business environment and relevant industry practices • evaluating the methodology used to develop the qualitative adjustments and the effect of those adjustments on the collective ACL on loans compared with relevant credit risk factors and consistency with credit trends and identified limitations of the underlying quantitative model. We also evaluated the cumulative results of the procedures performed to assess the sufficiency of the audit evidence obtained related to the collective ACL on loans by evaluating the: • cumulative results of the audit procedures • qualitative aspects of the Company's accounting practices • potential bias in the accounting estimate. / s / KPMG LLP We have not been able to determine the specific year that we began serving as the Company's auditor; however, we are aware that we have served as the Company's auditor since at least 1997. Short Hills, New Jersey March 1, 2023 Opinion on Internal Control Over Financial Reporting We have audited Provident Financial Services, Inc. and subsidiary's (the Company) internal control over financial reporting as of December 31, 2022, based on criteria established in Internal Control – Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission. In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2022, based on criteria established in Internal Control – Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission. We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the consolidated statements of financial condition of the Company as of December 31, 2022 and 2021, the related consolidated statements of income, comprehensive income, changes in stockholders' equity, and cash flows for each of the years in the three- year period ended December 31, 2022, and the related notes (collectively, the consolidated financial statements), and our report dated March 1, 2023 expressed an unqualified opinion on those consolidated financial statements. The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U. S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB. We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion. Definition and Limitations of Internal Control Over Financial Reporting A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate. (the " Company "), Provident Bank (the " Bank ") and their wholly owned subsidiaries. All intercompany balances and transactions have been eliminated in consolidation. Certain reclassifications have been made in the consolidated financial statements to conform with current year classifications. The Company, through the Bank, provides a full range of banking services to individual and business customers through branch offices in New Jersey, Queens and Nassau Counties, New York and eastern Pennsylvania. The Bank is subject to competition from other financial institutions and to the regulations of certain federal and state agencies, and undergoes periodic examinations by those regulatory authorities. Basis of Financial Statement Presentation The consolidated financial statements of the Company have been prepared in conformity with U. S. generally accepted accounting principles (" GAAP "). In preparing the consolidated financial statements, management is required to make estimates and assumptions about future events. These estimates and the underlying assumptions affect the reported amounts of assets and liabilities and disclosures about contingent assets and liabilities as of the dates of the consolidated statements of financial condition, and revenues and expenses for the periods then ended. Such estimates are used in connection with the determination of the allowance for credit losses, evaluation of goodwill for impairment, evaluation of the need for valuation allowances on deferred tax assets, and determination of liabilities related to retirement and other post- retirement benefits, among others. These estimates and assumptions are based on management' s best estimates and judgment. Management evaluates its estimates and assumptions on an ongoing basis using historical experience and other factors, including the currently forecasted economic environment, which management believes to be reasonable under the circumstances. Such estimates and assumptions are adjusted when facts and circumstances dictate. As future events and their effects cannot be determined with precision, actual results could differ significantly from these estimates. Changes in estimates will be reflected in the financial statements in future periods. Cash and Cash Equivalents For purposes of reporting cash flows, cash and cash equivalents include cash and due from banks, Federal funds sold and commercial paper with original maturity dates less than 90 days. Securities include held to maturity debt securities and available for sale debt securities. The available for sale debt securities portfolio is carried at estimated fair value, with any unrealized gains or losses, net of taxes, reported as accumulated other comprehensive income or loss in Stockholders' Equity. Estimated fair values are provided by reputable and widely used pricing services who maintain pricing methodologies appropriate for varying security classes using valuation techniques that are in accordance with U. S. GAAP. Securities which the Company has the positive intent and ability to hold to maturity are classified as held to maturity debt securities and carried at amortized cost. On January 1, 2020, the Company adopted CECL which replaces the incurred loss methodology with an expected loss methodology. Management measures expected credit losses on held to maturity debt securities on a collective basis by security type. Management classifies the held to maturity debt securities portfolio into the following security types: • Agency obligations; • Mortgage- backed securities; • State and municipal obligations; and • Corporate obligations. All of the agency obligations held by the Company are issued by U. S. government entities and agencies. These securities are either explicitly or implicitly guaranteed by the U. S. government, are highly rated by major rating agencies and have a long history of no credit losses. The majority of the state and municipal, and corporate obligations carry no lower than A ratings from the rating agencies at December 31, 2022 and the Company had one security rated with a triple- B by Moody' s Investors Service. Premiums on securities are amortized into income using a method that approximates the interest method over the remaining period to the earliest call date or contractual maturity, adjusted for anticipated prepayments. Discounts on securities are accreted into income over the remaining period to the contractual maturity, adjusted for anticipated prepayments. Interest income is recognized on an accrual basis, while dividend income is recognized when earned. Realized gains and losses are recognized when securities are sold or called based on the specific identification method. The Company holds equity securities that are traded in active markets with readily determinable fair value using quoted market prices. Fair Value of Financial Instruments GAAP establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements). A financial instrument' s level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. Federal Home Loan Bank of New York Stock The Bank, as a member of the Federal Home Loan Bank of New York (" FHLBNY "), is required to hold shares of capital stock of the FHLBNY at cost based on a specified formula. The Bank carries this investment at cost, which approximates fair value. Loans receivable are carried at unpaid principal balances plus unamortized premiums, purchase accounting mark- to- market adjustments, certain deferred direct loan origination costs and deferred loan origination fees and discounts, less the allowance for credit losses. The Bank defers loan origination fees and certain direct loan origination costs and accretes or amortizes such amounts as an adjustment to the yield over the contractual lives of the related loans using the interest method. Premiums and discounts on loans purchased are amortized or accreted as an adjustment of yield over the contractual lives of the related loans, adjusted for prepayments when applicable, using methodologies using the effective interest method. Loans are generally placed on non- accrual status when they are past due 90 days or more as to contractual obligations or when other circumstances indicate that collection is questionable. When a loan is placed on non- accrual status, any interest accrued but not received is reversed against interest income. Payments received on a non- accrual loan are either applied to the outstanding principal balance or recorded as interest income, depending on an assessment of the ability to collect the loan. A non- accrual loan is restored to accrual status when principal and interest payments become less than 90 days past due and its future collectability is reasonably assured. An impaired loan is defined as a loan for which it is probable, based on current information, that the Bank will not collect all amounts due under the contractual terms of the loan agreement. Impaired loans are individually assessed to determine that each loan' s carrying value is not in excess of the fair value of the related collateral or the present value of the expected future cash flows. Residential mortgage and consumer loans are deemed smaller balance homogeneous loans which are evaluated collectively for impairment and are therefore excluded from the population of impaired loans. Purchased credit deteriorated (" PCD ") loans are loans acquired that have experienced more- than- insignificant deterioration in credit quality since origination. Allowance for Credit Losses on Loans which replaced the incurred loss methodology with the current expected credit loss (" CECL ") methodology. The allowance for credit losses is a valuation account that reflects management' s evaluation of the current expected credit losses in the loan portfolio. The Company maintains the allowance for credit losses through provisions for credit losses that are charged to income. Charge- offs against the allowance for credit losses are taken on loans where management determines that the collection of loan principal and interest is unlikely. Recoveries made on loans that have been charged- off are credited to the allowance for credit losses. The calculation of the allowance for credit losses is a critical accounting policy of the Company. Management estimates the allowance balance using relevant available information, from internal and external sources, related to past events, current conditions, and a reasonable and supportable forecast. Historical credit loss experience for both the Company and peers provides the basis for the estimation of expected credit losses, where observed credit losses are converted to probability of default rate (" PDR ") curves through the use of segment- specific loss given default (" LGD ") risk factors that convert default rates to loss severity based on industry- level, observed relationships between the two variables for each segment, primarily due to the nature of the underlying collateral. These risk factors were assessed for reasonableness against the Company' s own loss experience and adjusted in certain cases when the relationship between the Company' s historical default and loss severity deviates from that of the wider industry. The historical PDR curves, together with corresponding economic conditions, establish a quantitative relationship between economic conditions and loan performance through an economic cycle. The allowance for credit losses is measured on a collective (pool) basis, with both a quantitative and qualitative analysis that is applied on a quarterly basis, when similar risk characteristics exist. The respective quantitative allowance for each loan segment is measured using an econometric, discounted PDR / LGD modeling methodology in which distinct, segment- specific multi- variate regression models are applied to an approved economic forecast. Under the discounted cash flows methodology, expected credit losses are estimated over the effective life of the loans by measuring the difference between the net present value of modeled cash flows and amortized cost basis. Contractual cash flows over the contractual life of the loans are the basis for modeled cash flows, adjusted for modeled defaults and expected prepayments and discounted at the loan- level effective interest rate. The contractual term excludes expected extensions, renewals and modifications unless either of the following applies at the reporting date: management has a reasonable expectation that a troubled debt restructuring (" TDR ") will be executed with an individual borrower; or when an extension or renewal option is included in the original contract and is not unconditionally cancellable by the Company. Management will assess the likelihood of an option being exercised by any given borrower and appropriately extend the maturity of the portfolio for modeling purposes. The Company considers qualitative adjustments to credit loss estimates for information not already captured in the quantitative component of the loss estimation process. Qualitative factors are based on portfolio concentration levels, model imprecision, changes in industry conditions, changes in the Company' s loan review process, changes in the Company' s loan policies and procedures, and economic forecast uncertainty. Portfolio segment is defined as the level at which an entity develops and documents a systematic methodology to determine its allowance for credit losses. Management developed segments for estimating loss based on type of borrower and collateral which is generally based upon federal call report segmentation. The segments have been combined or sub- segmented as needed to ensure loans of similar risk profiles are appropriately pooled. As of December 31, 2022, the portfolio and class segments for the Company' s loan portfolio were: The allowance for credit losses on loans individually evaluated are identified through the Company' s normal loan monitoring process. This process includes the review of delinquent and problem loans at the Company' s Delinquency, Credit, Credit Risk Management and Allowance Committees; or which may be identified through the Company' s loan review process. For loans acquired that have experienced more- than- insignificant deterioration in credit quality since their origination are considered Purchased Credit Deteriorated (" PCD") loans. The Company evaluates acquired loans for deterioration in credit quality based on any of, but not limited to, the following: (1) non- accrual status; (2) troubled debt restructured designation; (3) risk ratings of special mention, substandard or doubtful; (4) watchlist credits; and (5) delinquency status, including loans that are current on acquisition date, but had been previously delinquent. At the acquisition date, an estimate of expected credit losses is made for groups of PCD loans with similar risk characteristics and individual PCD loans without similar risk characteristics. Subsequent to the acquisition date, the initial allowance for credit losses on PCD loans will increase or decrease based on future evaluations, with changes recognized in the provision for credit losses. The CECL approach to calculate the allowance for credit losses on loans is significantly influenced by the composition, characteristics and quality of the Company' s loan portfolio, as well as the prevailing economic conditions and forecast utilized. Material changes to these and other relevant factors creates greater volatility to the allowance for credit losses, and therefore, greater volatility to the Company' s reported earnings. Management considers different economic scenarios that may impact the allowance for credit losses on loans. Among other balance sheet and income statement changes, these scenarios could result in a significant increase to the allowance for credit losses on loans. These scenarios include both the quantitative and qualitative components of the model and demonstrate how sensitive the allowance can be to key assumptions underlying the overall calculation. To the extent actual losses are higher than management estimates, additional provision for credit losses on loans could be required and could adversely affect our earnings or financial position in future periods. See Note 7 to the Consolidated Financial Statements for more information on the allowance for credit losses on loans. Foreclosed Assets Assets acquired through foreclosure or deed in lieu of foreclosure are carried at the lower of the outstanding loan balance at the time of foreclosure or fair value, less estimated costs to sell. Fair value is generally based on recent appraisals. When an asset is acquired, the excess of the loan balance over fair value, less estimated costs to sell, is charged to the allowance for credit losses. A reserve for foreclosed assets may be established to provide for possible write- downs and selling costs that occur subsequent to foreclosure. Foreclosed assets are carried net of the related reserve. Operating results from real estate owned, including rental income, operating expenses, and gains and losses realized from the sales of real estate owned, are recorded as incurred. Banking Premises and Equipment Land is carried at cost. Banking premises, furniture, fixtures and equipment are carried at cost, less accumulated depreciation, computed using the straight- line method based on their estimated useful lives. Leasehold improvements, carried at cost, net of accumulated depreciation, are amortized over the terms of the leases or the estimated useful lives of the assets, whichever are shorter, using the straight- line method. Maintenance and repairs are charged to expense as incurred. Income Taxes The Company uses the asset and liability method of accounting for income taxes. Under this method, deferred tax assets and liabilities are recognized for the estimated future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates in effect for the year in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in tax expense in the period that includes the enactment date. Deferred tax assets and liabilities are reported as a component of Other Assets on the Consolidated Statements of Financial Condition. The determination of whether deferred tax assets will be realizable is predicated on estimates of future taxable income. Such estimates are subject to management' s judgment. A valuation reserve is established when management is unable to conclude that it is more likely than not that it will realize deferred tax assets based on the nature and timing of these items. The Company recognizes, when applicable, interest and penalties related to unrecognized tax benefits in the provision for income taxes. Trust Assets Trust assets consisting of securities and other property (other than cash on deposit held by the Bank in fiduciary or agency capacities for customers of the Bank' s wholly owned subsidiary, Beacon) are not included in the accompanying consolidated statements of financial condition because such properties are not assets of the Bank. Intangible Assets Intangible assets of the Bank consist of goodwill, core deposit premiums, customer relationship premium and mortgage servicing rights. Goodwill represents the excess of the purchase price over the estimated fair value of identifiable net assets acquired through purchase acquisitions. In accordance with GAAP, goodwill with an indefinite useful life is not amortized, but is evaluated for impairment on an annual basis, or more frequently if events or changes in circumstances indicate potential impairment between annual measurement dates. As permitted by GAAP, the Company prepares a qualitative assessment in determining whether goodwill may be impaired. The factors considered in the assessment include macroeconomic conditions, industry and market conditions and overall financial performance of the Company, among others. The Company completed its annual qualitative assessment of goodwill as of July 1, 2022. Based upon its assessment of goodwill, the Company concluded that no further quantitative analysis was warranted. Core deposit premiums represent the intangible value of depositor relationships assumed in previous purchase acquisitions and are amortized on an accelerated basis over 8. 8 years, while the core deposit premium related to SB One is amortized

over its estimated useful life of 10. 0 years. Customer relationship premiums represent the intangible value of customer relationships assumed in the purchase acquisitions of Beacon Trust Company (" Beacon"), The MDE Group, Inc. (" MDE"), Tirschwell & Loewy, Inc. (" T & L"), and SB One Bank and are amortized on an accelerated basis over 12. 0 years, 10. 4 years, 10. 0 years, and 13. 0 years, respectively. Mortgage servicing rights are recorded when purchased or when originated mortgage loans are sold, with servicing rights retained. Mortgage servicing rights are amortized on an accelerated method based upon the estimated lives of the related loans, adjusted for prepayments. Mortgage servicing rights are carried at the lower of amortized cost or fair value. Bank- owned Life Insurance Bank- owned life insurance is accounted for using the cash surrender value method and is recorded at its realizable value. Employee Benefit Plans The Bank maintains a pension plan which covers full- time employees hired prior to April 1, 2003, the date on which the pension plan was frozen. The Bank's policy is to fund at least the minimum contribution required by the Employee Retirement Income Security Act of 1974. GAAP requires an employer to: (a) recognize in its statement of financial condition the over- funded or under- funded status of a defined benefit postretirement plan measured as the difference between the fair value of plan assets and the benefit obligation; (b) measure a plan's assets and its obligations that determine its funded status at the end of the employer's fiscal year (with limited exceptions); and (c) recognize as a component of other comprehensive income, net of tax, the actuarial gains and losses and the prior service costs and credits that arise during the period. The Bank has a 401 (k) plan covering substantially all employees of the Bank. The Bank may match a percentage of the first 6 % contributed by participants. The Bank's matching contribution, if any, is determined by the Board of Directors in its sole discretion. The Bank has an Employee Stock Ownership Plan (" ESOP "). The funds borrowed by the ESOP from the Company to purchase the Company's common stock are being repaid from the Bank's contributions and dividends paid on unallocated ESOP shares over a period of up to 30 years. The Company's common stock not allocated to participants is recorded as a reduction of stockholders' equity at cost. Compensation expense for the ESOP is based on the average price of the Company's stock during each quarter and the amount of shares allocated during the quarter. The Bank has an Equity Plan designed to provide competitive compensation for demonstrated performance and to align the interests of participants directly to increases in shareholder value. The Equity Plan provides for performance- vesting grants as well as time- vesting grants. Time- vesting stock awards, stock options and performance vesting stock awards that are based on a performance condition, such as return on average assets, are valued on the closing stock price on the date of grant. Performance- vesting stock awards and options that are based on a market condition, such as total shareholder return, would be valued using a generally accepted statistical technique to simulate future stock prices for Provident and the components of the peer group which Provident would be measured against. Expense related to time- vesting stock awards and stock options is based on the fair value of the common stock on the date of the grant and on the fair value of the stock options on the date of the grant, respectively, and is recognized ratably over the vesting period of the awards. Performance vesting stock awards and stock options are either dependent upon a market condition or a performance condition. A market condition performance metric is tied to a stock price, either on an absolute basis, or a relative basis against peers, while a performance- condition is based on internal operations, such as earnings per share. The expense related to a market condition performance- vesting stock award or stock option requires an initial Monte Carlo simulation to determine grant date fair value, which will be recognized as a compensation expense regardless of actual payout, assuming that the executive is still employed at the end of the requisite service period. If pre- vesting termination (forfeiture) occurs, then any expense recognized to date can be reversed. The grant date fair value is recognized ratably over the performance period. The expense related to a performance condition stock award or stock option is based on the fair value of the award on the date of grant, adjusted periodically based upon the number of awards or options expected to be earned, recognized over the performance period. In connection with the First Sentinel acquisition in July 2004, the Company assumed the First Savings Bank Directors' Deferred Fee Plan (the " DDFP "). The DDFP was frozen prior to the acquisition. The Company recorded a deferred compensation equity instrument and corresponding contra- equity account for the value of the shares held by the DDFP at the July 14, 2004 acquisition date. These accounts will be liquidated as shares are distributed from the DDFP in accordance with the plan document. At December 31, 2022, there were 104, 129 shares held by the DDFP. The Bank maintains a non- qualified plan that provides supplemental benefits to certain executives who are prevented from receiving the full benefits contemplated by the 401 (k) Plan's and the ESOP's benefit formulas under tax law limits for tax- qualified plans. Post- retirement Benefits Other Than Pensions The Bank provides post- retirement health care and life insurance plans to certain of its employees. The life insurance coverage is noncontributory to the participant. Participants contribute to the cost of medical coverage based on the employee's length of service with the Bank. The costs of such benefits are accrued based on actuarial assumptions from the date of hire to the date the employee is fully eligible to receive the benefits. On December 31, 2002, the Bank eliminated postretirement healthcare benefits for employees with less than 10 years of service. GAAP requires an employer to: (a) recognize in its statement of financial condition the over- funded or under- funded status of a defined benefit post- retirement plan measured as the difference between the fair value of plan assets and the benefit obligation; (b) measure a plan's assets and its obligations that determine its funded status as of the end of the employer's fiscal year (with limited exceptions); and (c) recognize as a component of other comprehensive income, net of tax, the actuarial gains and losses and the prior service costs and credits that arise during the period. Derivatives The Company records all derivatives on the statements of financial condition at fair value. The accounting for changes in the fair value of derivatives depends on the intended use of the derivative, whether the Company has elected to designate a derivative in a hedging relationship and apply hedge accounting and whether the hedging relationship has satisfied the criteria necessary to apply hedge accounting. The Company has interest rate derivatives resulting from a service provided to certain qualified borrowers in a loan related transaction which, therefore, are not used to manage interest rate risk in the Company's assets or liabilities. As such, all changes in fair value of the Company's derivatives are recognized directly in earnings. The Company also uses interest rate swaps as part of its interest rate risk management strategy. Interest rate swaps designated as cash flow hedges, and which satisfy hedge accounting requirements, involve the receipt of variable amounts from a counterparty in exchange for the Company making fixed- rate payments over the life of the agreements without the exchange of the underlying notional amount. These derivatives were used to hedge the variable cash outflows associated with FHLBNY borrowings and brokered demand deposits. The change in the fair value of these derivatives is recorded in accumulated other comprehensive income, and is subsequently reclassified into earnings in the period that the hedged forecasted transaction affects earnings. Comprehensive income is divided into net income and other comprehensive income (loss). Other comprehensive income (loss) includes items previously recorded directly to equity, such as unrealized gains and losses on available for sale debt securities, unrealized gains and losses on derivatives that are designated as cash flow hedges and amortization related to post- retirement obligations. Comprehensive income is presented in a separate Consolidated Statement of Comprehensive Income. Segment Reporting The Company's operations are solely in the financial services industry and include providing traditional banking and other financial services to its customers. The Company operates primarily in the geographical regions of northern and central New Jersey, Queens County, New York and eastern Pennsylvania. The Company has a single reporting segment for financial reporting purposes. Earnings Per Share Basic earnings per share is computed by dividing income available to common stockholders by the weighted average number of shares outstanding for the period. Diluted earnings per share reflects the potential dilution that could occur if securities or other contracts to issue common stock (such as stock options) were exercised or resulted in the issuance of common stock. These potentially dilutive shares would then be included in the weighted average number of shares outstanding for the period using the treasury stock method. Shares issued and shares reacquired during the period are weighted for the portion of the period that they were outstanding. Impact of Recent Accounting Pronouncements Accounting Pronouncements Not Yet Adopted In March 2022, the Financial Accounting Standards Board (" FASB") issued Accounting Standards Update (" ASU") 2022- 02," Financial Instruments- Credit Losses (Topic 326): Troubled Debt Restructurings and Vintage Disclosures," which addresses areas identified by the FASB as part of its post- implementation review of the credit losses standard (ASU 2016- 13) that introduced the CECL model. The amendments eliminate the accounting guidance for troubled debt restructurings by creditors that have adopted the CECL model and enhance the disclosure requirements for loan refinancing and restructurings made with borrowers experiencing financial difficulty. In addition, the amendments require a public business entity to disclose current- period gross write- offs for financing receivables and net investment in leases by year of origination in the vintage disclosures. For entities that have adopted ASU 2016- 13, ASU 2022- 02 is effective for fiscal years beginning after December 15, 2022, including interim periods within those fiscal years. Early adoption is permitted if an entity has adopted ASU 2016- 13. This standard is not expected to have a material financial impact on the Company's consolidated financial statements, but is expected to have a meaningful impact on our required disclosures in the Notes to our Consolidated Financial Statements. In March 2022, the FASB issued Accounting Standards Update (ASU) 2022- 01, Derivatives and Hedging (Topic 815): Fair Value Hedging – Portfolio Layer Method. The purpose of this updated guidance is to further align risk management objectives with hedge accounting results on the application of the last- of- layer method, which was first introduced in ASU 2017- 12, Derivatives and Hedging (Topic 815): Targeted Improvements to Accounting for Hedging Activities. ASU 2022- 01 is effective for public business entities for fiscal years beginning after December 15, 2022, with early adoption in the interim period, permitted. The Company adopted this standard on January 1, 2023 on a prospective basis; with no impact to the consolidated financial statements. In March 2020, the FASB issued ASU 2020- 04," Reference Rate Reform (Topic 848)," which provides optional expedients and exceptions for applying GAAP to loan and lease agreements, derivative contracts, and other transactions affected by the anticipated transition away from LIBOR toward new interest rate benchmarks. For transactions that are modified because of reference rate reform and that meet certain scope guidance (i) modifications of loan agreements should be accounted for by prospectively adjusting the effective interest rate and the modification will be considered" minor" so that any existing unamortized origination fees / costs would carry forward and continue to be amortized and (ii) modifications of lease agreements should be accounted for as a continuation of the existing agreement with no reassessments of the lease classification and the discount rate or re- measurements of lease payments that otherwise would be required for modifications not accounted for as separate contracts. ASU 2020- 04 also provides numerous optional expedients for derivative accounting. ASU 2020- 04 is effective March 12, 2020 through December 31, 2022. An entity may elect to apply ASU 2020- 04 for contract modifications as of January 1, 2020, or prospectively from a date within an interim period that includes or is subsequent to March 12, 2020, up to the date that the financial statements are available to be issued. Once elected for a Topic or an Industry Subtopic within the Codification, the amendments in this ASU must be applied prospectively for all eligible contract modifications for that Topic or Industry Subtopic. The Company anticipates this ASU will simplify any modifications we execute between the selected start date (yet to be determined) and December 31, 2022 that are directly related to LIBOR transition by allowing prospective recognition of the continuation of the contract, rather than the extinguishment of the old contract resulting in writing off unamortized fees / costs. In addition, in January 2021 the FASB issued ASU No. 2021- 01 " Reference Rate Reform — Scope, " which clarified the scope of ASC 848 relating to contract modifications. In the fourth quarter of 2019 the Company formed, a cross- functional team to develop transition plans for the LIBOR transition to address potential revisions to documentation, as well as customer management and communication, internal training, financial, operational and risk management implications, and legal and contract management. The working group is comprised of individuals from various functional areas including lending, risk management, finance and credit, among others. In addition, the Company has engaged with its regulators and with industry working groups and trade associations to develop strategies for transitioning away from LIBOR. In 2023, we expect LIBOR to be phased out as an interest rate benchmark in pricing assets or liabilities. We are not entering into any new agreements that reference LIBOR. Additionally, the Company is in the process of amending existing asset and liability contracts that reference LIBOR to reference a new benchmark rate. The Company is currently in the process of transitioning from LIBOR and plans to move to the Secured Overnight Financing Rate (" SOFR") for most type of transactions. This standard is not expected to have a material impact on the Company's consolidated financial statements. In addition, in December 2022 the FASB issued ASU 2022- 06, " Reference Rate Reform (Topic 848,) " which provides optional guidance to ease the potential burden in account for (or recognizing the effects of) reference rate reform on financial reporting. The objective of the guidance is to provide temporary relief during the transition period away from LIBOR toward new interest rate benchmarks. The amendments in ASU 2022- 06 defer the sunset date provision from December 31, 2022 to December 31, 2024. ASU 2022- 06 was effective immediately upon issuance and is not expected to have an impact on the Company's financial statements or disclosures. (2) Stockholders' Equity On January 15, 2003, the Bank completed its plan of conversion, and the Bank became a wholly owned subsidiary of the Company. The Company sold 59. 6 million shares of common stock (par value $ 0. 01 per share) at $ 10. 00 per share. The Company received net proceeds in the amount of $ 567. 2 million. In connection with the Bank's commitment to its community, the plan of conversion provided for the establishment of a charitable foundation. Provident donated $ 4. 8 million in cash and 1. 92 million of authorized but unissued shares of common stock to the foundation, which amounted to $ 24. 0 million in aggregate. The Company recognized an expense, net of income tax benefit, equal to the cash and fair value of the stock during 2003. Conversion costs were deferred and deducted from the proceeds of the shares sold in the offering. Upon completion of the plan of conversion, a " liquidation account " was established in an amount equal to the total equity of the Bank as of the latest practicable date prior to the conversion. The liquidation account was established to provide a limited priority claim to the assets of the Bank to " eligible account holders " and " supplemental eligible account holders " as defined in the Plan, who continue to maintain deposits in the Bank after the conversion. In the unlikely event of a complete liquidation of the Bank, and only in such event, each eligible account holder and supplemental eligible account holder would receive a liquidation distribution, prior to any payment to the holder of the Bank's common stock. This distribution would be based upon each eligible account holder's and supplemental eligible account holder's proportionate share of the then total remaining qualifying deposits. At December 31, 2022, the liquidation account, which is an off- balance sheet memorandum account, amounted to $ 7. 7 million. (3) Business Combinations Lakeland Bancorp, Inc. Merger Agreement On September 26, 2022, the Company, NL 239 Corp., a direct, wholly owned subsidiary of the Company (" Merger Sub "), and Lakeland Bancorp, Inc. entered into an Agreement and Plan of Merger (as may be amended, modified or supplemented from time to time in accordance with its terms, the " merger agreement "), pursuant to which Provident and Lakeland have agreed to combine their respective businesses. Under the merger agreement, Merger Sub will merge with and into Lakeland, with Lakeland as the surviving entity (the " merger "), and as soon as reasonably practicable following the merger, Lakeland will merge with and into the Company, with the Company as the surviving entity (the " holdco merger "). At a date and time following the holdco merger as determined by the Company, Lakeland Bank, a New Jersey state- chartered commercial bank and a wholly owned subsidiary of Lakeland (" Lakeland Bank "), will merge with and into Provident Bank, a New Jersey state- chartered savings bank and a wholly owned subsidiary of the Company (" Provident Bank "), with Provident Bank as the surviving bank (the " bank merger " and, together with the merger and the holdco merger, the " mergers "). The Company as the surviving institution will have approximately $ 25 billion in total assets and $ 20 billion in total deposits with banking locations across northern and central New Jersey and in surrounding areas of New York and Pennsylvania. In the merger, Lakeland shareholders will receive 0. 8319 of a share of the Company's common stock for each share of Lakeland common stock they own. Based on the closing price of the Company's common stock on the New York Stock Exchange on September 26, 2022, the last trading day before the public announcement of the merger, the exchange ratio represented approximately $ 19. 27 in value for each share of Lakeland common stock, representing a merger consideration of approximately $ 1. 3 billion on an aggregate basis. SB One Bancorp Acquisition On July 31, 2020, the Company completed its acquisition of SB One Bancorp (" SB One"), which added $ 2. 20 billion to total assets, $ 1. 77 billion to total loans, which included PCD loans totaling $ 294. 2 million, and $ 1. 76 billion to total deposits,

and added 18 full- service banking offices in New Jersey and New York. As part of the acquisition, the addition of Provident Protection Plus, Inc., formerly SB One Insurance Agency, Inc., resulted in expansion of commercial and personal insurance products. The acquisition was accounted for under the acquisition method of accounting. Under this method of accounting, the respective assets acquired and liabilities assumed were recorded at their estimated fair value. The excess of consideration paid over the estimated fair value of the net assets acquired totaled $ 23. 9 million and was recorded as goodwill. (4) Restrictions on Cash and Due from Banks Included in cash on hand and due from banks at December 31, 2022 and 2021 was $ 70, 000 and $ 27. 3 million, respectively, representing cash collateral pledged to secure loan level swaps and reserves required by banking regulations. (5) Held to Maturity Debt Securities The Company adopted CECL using the prospective transition approach for debt securities for which other- than- temporary impairment had been recognized prior to January 1, 2020. As a result, the amortized cost basis remains the same before and after the effective date of CECL. The following tables present the amortized cost, gross unrealized gains, gross unrealized losses and the estimated fair value for held to maturity debt securities at December 31, 2022 and 2021 (in thousands): 2022 Amortizedcost GrossunrealizedgainsGrossunrealizedlossesFairvalueAgency obligations $ 9, 997 — (1, 033) 8, 964 State and municipal obligations366, 164 268 (13, 015) 353, 417 Corporate obligations11, 789 1 (703) 11, 087 $ 387, 950 269 (14, 751) 373, 468 2021 Amortizedcost GrossunrealizedgainsGrossunrealizedlossesFairvalueAgency obligations $ 9, 996 — (175) 9, 821 Mortgage- backed securities21 — — 21 State and municipal obligations415, 724 14, 463 (635) 429, 552 Corporate obligations10, 448 19 (152) 10, 315 $ 436, 189 14, 482 (962) 449, 709 The amortized cost and fair value of held to maturity debt securities at December 31, 2022 by contractual maturity are shown below (in thousands). Expected maturities may differ from contractual maturities due to prepayment or early call privileges of the issuer. 2022 Amortizedcost FairvalueDue in one year or less $ 20, 280 20, 188 Due after one year through five years153, 915 151, 104 Due after five years through ten years173, 389 168, 040 Due after ten years40, 366 34, 136 $ 387, 950 373, 468 The allowance for credit losses on held to maturity debt securities at December 31, 2022 and 2021 were $ 27, 000 and $ 39, 000, respectively, and are excluded from amortized cost in the tables above. The Company generally purchases securities for long- term investment purposes, and differences between carrying and fair values may fluctuate during the investment period. Held to maturity debt securities having a carrying value of $ 340. 2 million and $ 414. 2 million at December 31, 2022 and 2021, respectively, were pledged to secure municipal deposits. During 2022, the Company recognized gains of $ 123, 000 and no losses related to calls on securities in the held to maturity debt securities portfolio, with total proceeds from the calls totaling $ 39. 2 million. There were no sales of securities from the held to maturity debt securities portfolio for the year ended December 31, 2022. For 2021, the Company recognized gains of $ 25, 000 and no losses related to calls on securities in the held to maturity debt securities portfolio, with total proceeds from the calls totaling $ 36. 0 million. There were no sales of securities from the held to maturity debt securities portfolio for the year ended December 31, 2021. For the 2020 period, the Company recognized gains of $ 81, 000 and no losses related to calls on certain securities in the held to maturity debt securities portfolio, with total proceeds from the calls totaling $ 49. 3 million. There were no sales of securities from the held to maturity debt securities portfolio for the year ended December 31, 2020. The number of securities in an unrealized loss position as of December 31, 2022 totaled 439, compared with 53 at December 31, 2021. The increase in the number of securities in an unrealized loss position at December 31, 2022 was due to higher current market interest rates compared to rates at December 31, 2021. Credit Quality Indicators. The following table provides the amortized cost of held to maturity debt securities by credit rating as of December 31, 2022 (in thousands): December 31, 2022Total PortfolioAAAAAABBBNot RatedTotalAgency obligations $ 9, 997 — — — — 9, 997 State and municipal obligations48, 453 171, 934 143, 829 770 1, 178 366, 164 Corporate obligations507 3, 592 7, 415 — 275 11, 789 $ 58, 957 175, 526 151, 244 770 1, 453 387, 950 December 31, 2021Total PortfolioAAAAAABBBNot RatedTotalAgency obligations $ 9, 996 — — — — 9, 996 Mortgage- backed securities21 — — — — 21 State and municipal obligations54, 583 314, 396 44, 392 945 1, 408 415, 724 Corporate obligations510 2, 634 7, 279 — 25 10, 448 $ 65, 110 317, 030 51, 671 945 1, 433 436, 189 Credit quality indicators are metrics that provide information regarding the relative credit risk of debt securities. At December 31, 2022, the held to maturity debt securities portfolio was comprised of 15 % rated AAA, 45 % rated AA, 39 % rated A, and less than 1 % either below an A rating or not rated by Moody's Investors Service or Standard and Poor's. Securities not explicitly rated, such as U. S. Government mortgage- backed securities, were grouped where possible under the credit rating of the issuer of the security. (6) Available for Sale Debt Securities The following tables present the amortized cost, gross unrealized gains, gross unrealized losses and the fair value for available for sale debt securities at December 31, 2022 and 2021 (in thousands): 2022 AmortizedcostGrossunrealizedgainsGrossunrealizedlossesFair valueU. S. Treasury obligations $ 275, 620 — (29, 804) 245, 816 Mortgage- backed securities1, 636, 913 209 (209, 983) 1, 427, 139 Asset- backed securities 37, 706 278 (363) 37, 621 State and municipal obligations67, 706 — (10, 842) 56, 864 Corporate obligations40, 540 50 (4, 482) 36, 108 $ 2, 058, 485 537 (255, 474) 1, 803, 548 2021 AmortizedcostGrossunrealizedgainsGrossunrealizedlossesFair valueU. S. Treasury obligations $ 196, 897 298 (866) 196, 329 Mortgage- backed securities1, 711, 312 14, 082 (16, 563) 1, 708, 831 Asset- backed securities45, 115 1, 687 (5) 46, 797 State and municipal obligations68, 702 1, 127 (122) 69, 707 Corporate obligations36, 109 425 (347) 36, 187 $ 2, 058, 135 17, 619 (17, 903) 2, 057, 851 Available for sale debt securities having a carrying value of $ 1. 25 billion and $ 1. 56 billion at December 31, 2022 and 2021, respectively, were pledged to secure securities sold under repurchase agreements. The amortized cost and fair value of available for sale debt securities at December 31, 2022, by contractual maturity, are shown below (in thousands). Expected maturities may differ from contractual maturities due to prepayment or early call privileges of the issuer. 2022 AmortizedcostFairvalueDue in one year or less $ — — Due after one year through five years194, 949 176, 459 Due after five years through ten years125, 582 109, 597 Due after ten years63, 335 52, 732 $ 383, 866 338, 788 Investments which pay principal on a periodic basis totaling $ 1. 67 billion at amortized cost and fair value are excluded from the table above as their expected lives are likely to be shorter than the contractual maturity date due to principal prepayments. During 2022, proceeds from calls on securities in the available for sale debt securities portfolio totaled $ 5. 4 million, with gains of $ 58, 000 and no losses recognized. For 2021, proceeds from calls on securities in the available for sale debt securities portfolio totaled $ 9. 4 million, with gains of $ 230, 000 and no losses recognized. The number of securities in an unrealized loss position as of December 31, 2022 totaled 475, compared with 113 at December 31, 2021. The increase in the number of securities in an unrealized loss position at December 31, 2022 was due to higher current market interest rates compared to rates at December 31, 2021. All securities in an unrealized loss position were investment grade at December 31, 2022. (7) Loans Receivable and Allowance for Credit Losses Loans receivable at December 31, 2022 and 2021 are summarized as follows (in thousands): 20222021Mortgage loans: Residential $ 1, 177, 698 1, 202, 638 Commercial4, 316, 185 3, 827, 370 Multi- family1, 513, 818 1, 364, 397 Construction715, 494 683, 166 Total mortgage loans7, 723, 195 7, 077, 571 Commercial loans2, 233, 670 2, 188, 866 Consumer loans304, 780 327, 442 Total gross loans10, 261, 645 9, 593, 879 Premiums on purchased loans1, 380 1, 451 Net deferred fees (14, 142) (13, 706) Total loans $ 10, 248, 883 9, 581, 624 Premiums and discounts on purchased loans are amortized over the lives of the loans as an adjustment to yield. Required reductions due to loan prepayments are charged against interest income. For the years ended December 31, 2022, 2021 and 2020, as a result of prepayments and normal amortization, interest income decreased $ 270, 000, $ 604, 000 and $ 1. 0 million, respectively. The following tables summarize the aging of loans receivable by portfolio segment and class of loans (in thousands): At December 31, 2022 30- 59 Days60- 89 DaysNon- accrual90 days or more past due and accruingTotal Past DueCurrentTotal LoansReceivableNon- accrual loans with no related allowanceMortgage loans: Residential $ 1, 411 1, 114 1, 928 — 4, 453 1, 173, 245 1, 177, 698 1, 928 Commercial2, 300 412 28, 212 — 30, 924 4, 285, 261 4, 316, 185 22, 961 Multi- family790 — 1, 565 — 2, 355 1, 511, 463 1, 513, 818 1, 565 Construction905 1, 097 1, 878 — 3, 880 711, 614 715, 494 1, 878 Total mortgage loans5, 406 2, 623 33, 583 — 41, 612 7, 681, 583 7, 723, 195 28, 332 Commercial loans964 1, 014 24, 188 — 26, 166 2, 207, 504 2, 233, 670 21, 156 Consumer loans885 147 738 — 1, 770 303, 010 304, 780 739 Total gross loans $ 7, 255 3, 784 58, 509 — 69, 548 10, 192, 097 10, 261, 645 50, 227 At December 31, 2021 30- 59 Days60- 89 DaysNon- accrual90 days or more past due and accruingTotal Past DueCurrentTotal LoansReceivableNon- accrual loans with no related allowanceMortgage loans: Residential $ 7, 229 1, 131 6, 072 — 14, 432 1, 188, 206 1, 202, 638 6, 072 Commercial720 3, 960 16, 887 — 21, 567 3, 805, 803 3, 827, 370 16, 887 Multi- family — — 439 — 439 1, 363, 958 1, 364, 397 439 Construction — — 2, 365 — 2, 365 680, 801 683, 166 2, 365 Total mortgage loans7, 949 5, 091 25, 763 — 38, 803 7, 038, 768 7, 077, 571 25, 763 Commercial loans7, 229 1, 289 20, 582 — 29, 100 2, 159, 766 2, 188, 866 14, 453 Consumer loans649 228 1, 682 — 2, 559 324, 883 327, 442 1, 682 Total gross loans $ 15, 827 6, 608 48, 027 — 70, 462 9, 523, 417 9, 593, 879 41, 898 Included in loans receivable are loans for which the accrual of interest income has been discontinued due to deterioration in the financial condition of the borrowers. Generally, accrued interest is written off by reversing interest income during the quarter the loan is moved from an accrual to a non- accrual status. The principal amount of non- accrual loans was $ 58. 5 million and $ 48. 0 million at December 31, 2022 and 2021, respectively. There were no loans 90- days or greater past due and still accruing interest at December 31, 2022 and 2021. If the non- accrual loans had performed in accordance with their original terms, interest income would have increased by $ 1. 0 million, $ 1. 2 million and $ 3. 2 million, for the years ended December 31, 2022, 2021 and 2020, respectively. The amount of cash basis interest income that was recognized on impaired loans during the years ended December 31, 2022, 2021 and 2020 was $ 947, 000, $ 1. 3 million and $ 1. 9 million, respectively. The Company defines an impaired loan as a non- homogeneous loan greater than $ 1. 0 million, for which, based on current information, it is not expected to collect all amounts due under the contractual terms of the loan agreement. Impaired loans also include all loans modified as troubled debt restructurings (" TDRs "). An allowance for collateral- dependent impaired loans that have been modified in a TDR is measured based on the present value of expected future cash flows discounted at the loan's effective interest rate, the loan's observable market price, or the estimated fair value of the collateral, less any selling costs. The Company uses third- party appraisals to determine the fair value of the underlying collateral in its analysis of collateral- dependent loans. A third- party appraisal is generally ordered as soon as a loan is designated as a collateral- dependent loan and updated annually, or more frequently if required. A financial asset is considered collateral- dependent when the debtor is experiencing financial difficulty and repayment is expected to be provided substantially through the sale or operation of the collateral. For all classes of loans deemed collateral- dependent, the Company estimates expected credit losses based on the collateral's fair value less any selling costs. A specific allocation of the allowance for credit losses is established for each collateral- dependent loan with a carrying balance greater than the collateral's fair value, less estimated selling costs. In most cases, the Company records a partial charge- off to reduce the loan's carrying value to the collateral's fair value less estimated selling costs. At each fiscal quarter end, if a loan is designated as collateral- dependent and the third- party appraisal has not yet been received, an evaluation of all available collateral is made using the best information available at the time, including rent rolls, borrower financial statements and tax returns, prior appraisals, management's knowledge of the market and collateral, and internally prepared collateral valuations based upon market assumptions regarding vacancy and capitalization rates, each as and where applicable. Once the appraisal is received and reviewed, the specific reserves are adjusted to reflect the appraised value and evaluated for charge offs. The Company believes there have been no significant time lapses resulting from this process. At December 31, 2022, there were 128 impaired loans totaling $ 48. 8 million, of which 118 loans totaling $ 26. 0 million were TDRs. Included in this total were 104 TDRs related to 101 borrowers totaling $ 19. 5 million that were performing in accordance with their restructured terms and which continued to accrue interest at December 31, 2022. At December 31, 2021, there were 155 impaired loans totaling $ 52. 3 million, of which 132 loans totaling $ 30. 6 million were TDRs. Included in this total were 115 TDRs related to 111 borrowers totaling $ 21. 9 million that were performing in accordance with their restructured terms and which continued to accrue interest at December 31, 2021. At December 31, 2022 and December 31, 2021, the Company had $ 24. 0 million and $ 18. 2 million of collateral- dependent impaired loans, respectively. The collateral- dependent impaired loans at December 31, 2022 consisted of $ 23. 2 million in commercial loans, $ 737, 000 in residential real estate loans and $ 57, 000 in consumer loans. The collateral for these impaired loans was primarily real estate. The activity in the allowance for credit losses for the years ended December 31, 2022, 2021 and 2020 is as follows (in thousands): Years Ended December 31, 202220212020Balance at beginning of period $ 80, 740 101, 466 55, 525 Provision charged to operations8, 400 (24, 300) 29, 712 Increase due to the initial adoption of CECL — — 7, 920 Initial allowance related to PCD loans — — 13, 586 Recoveries of loans previously charged off5, 431 9, 030 2, 636 Loans charged off (6, 548) (5, 456) (7, 913) Balance at end of period $ 88, 023 80, 740 101, 466 The activity in the allowance for credit losses by portfolio segment for the years ended December 31, 2022 and 2021 are as follows (in thousands): For the Year Ended December 31, 2022 MortgageloansCommercialloansConsumerloansTotalPortfolioSegmentsBalance at beginning of period $ 52, 104 26, 343 2, 293 80, 740 Provision charged to operations11, 087 (2, 489) (198) 8, 400 Recoveries of loans previously charged off585 4, 192 654 5, 431 Loans charged off (5, 558) (633) (357) (6, 548) Balance at end of period $ 58, 218 27, 413 2, 392 88, 023 For the Year Ended December 31, 2021 MortgageloansCommercialloansConsumerloansTotalPortfolioSegmentsBalance at beginning of period $ 68, 307 27, 084 6, 075 101, 466 Provision charged to operations (13, 720) (6, 313) (4267) (24, 300) Recoveries of loans previously charged off859 7, 169 1002 9, 030 Loans charged off (3, 342) (1, 597) (517) (5, 456) Balance at end of period $ 52, 104 26, 343 2, 293 80, 740 For the year ended December 31, 2022, the Company recorded an $ 8. 4 million provision for credit losses on loans, compared with a negative provision for credit losses of $ 24. 3 million for the year ended December 31, 2021. The increase in the year- over- year provision for credit losses was largely a function of the significant favorable impact of the post- pandemic recovery resulting in a large negative provision taken in the prior year and an increase in total loans outstanding. Loan modifications for borrowers experiencing financial difficulties that are considered TDRs primarily involve lowering the monthly payments on such loans through either a reduction in interest rate below a market rate, an extension of the term of the loan without a corresponding adjustment to the risk premium reflected in the interest rate, or a combination of these two methods. These modifications generally do not result in the forgiveness of principal or accrued interest. In addition, management attempts to obtain additional collateral or guarantor support when modifying such loans. If the borrower has demonstrated performance under the previous terms and our underwriting process shows the borrower has the capacity to continue to perform under the restructured terms, the loan will continue to accrue interest. Non- accruing restructured loans may be returned to accrual status when there has been a sustained period of repayment performance (generally six consecutive months of payments) and both principal and interest are deemed collectible. The following tables present the number of loans modified as TDRs during the years ended December 31, 2022 and 2021 and their balances immediately prior to the modification date and post- modification as of December 31, 2022 and 2021. Year Ended December 31, 2022Troubled Debt RestructuringsNumber ofLoansPre- ModificationOutstandingRecordedInvestmentPost- ModificationOutstandingRecordedInvestment ($ in thousands) Mortgage loans: Residential2 $ 265 198 Multi- Family1 1, 618 1, 566 Total mortgage loans3 1, 883 1, 764 Commercial loans1 209 143 Consumer loans1 108 85 Total restructured loans5 $ 2, 200 1, 992 Year Ended December 31, 2021Troubled Debt RestructuringsNumber ofLoansPre- ModificationOutstandingRecordedInvestmentPost- ModificationOutstandingRecordedInvestment ($ in thousands) Mortgage loans: Residential7 $ 1, 274 1, 142 Commercial3 3, 086 2, 902 Total mortgage loans10 4, 360 4, 044 Commercial loans4 2, 940 2, 287 Total restructured loans14 $ 7, 300 6, 331 All TDRs are impaired loans, which are individually evaluated for impairment, as previously discussed. During the years ended December 31, 2022 and 2021, there were $ 5. 5 million and $ 3. 8 million of charge- offs recorded on collateral dependent impaired loans, respectively. The TDRs presented in the preceding tables had a weighted average modified interest rate of approximately 4. 35 % and 4. 12 %, compared to a yield of 4. 29 % and 5. 74 % prior to modification for the years ended December 31, 2022 and 2021, respectively. There was one loan totaling $ 143, 000 which had a payment default (90 days or more past due) which was modified as a TDR within the 12 month periods ending December 31, 2022. There were no payment defaults for loans modified as a TDR within the 12 month periods ending December 31, 2021. For TDRs that subsequently default, the

Company determines the amount of the allowance for the respective loans in accordance with the accounting policy for the allowance for credit losses on loans individually evaluated for impairment. As allowed by CECL, loans acquired by the Company that experience more-than-insignificant deterioration in credit quality after origination, are classified as Purchased Credit Deteriorated (" PCD") loans. At December 31, 2022, the balance of PCD loans totaled $ 193. 0 million with a related allowance for credit losses of $ 1. 7 million. The balance of PCD loans at December 31, 2021 was $ 246. 9 million with a related allowance for credit losses of $ 2. 8 million. The following table presents loans individually evaluated for impairment by class and loan category (in thousands): At December 31, 2022At December 31, 2021

At December 31, 2021, impaired loans consisted of 155 residential, commercial, commercial mortgage and consumer loans totaling $ 52. 3 million, of which 40 loans totaling $ 30. 3 million were included in non- accrual loans. Specific allocations of the allowance for credit losses attributable to impaired loans totaled $ 2. 4 million and $ 4. 3 million at December 31, 2022 and 2021, respectively. At December 31, 2022 and 2021, impaired loans for which there was no related allowance for credit losses totaled $ 40. 8 million and $ 34. 2 million, respectively. The average balances of impaired loans during the years ended December 31, 2022 and 2021 were $ 81. 0 million and $ 53. 4 million, respectively. In the normal course of conducting its business, the Bank extends credit to meet the financing needs of its customers through commitments. Commitments and contingent liabilities, such as commitments to extend credit (including loan commitments of $ 2. 06 billion and $ 2. 05 billion at December 31, 2022 and 2021, respectively, and undisbursed home equity and personal credit lines of $ 279. 2 million and $ 252. 4 million, at December 31, 2022 and 2021, respectively, are not reflected in the accompanying consolidated financial statements. These instruments involve elements of credit and interest rate risk in excess of the amount recognized in the consolidated financial statements. The Bank uses the same credit policies and collateral requirements in making commitments and conditional obligations as it does for on- balance sheet loans. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since the commitments may expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. The Bank evaluates each customer's creditworthiness on a case- by- case basis. The amount of collateral obtained, if deemed necessary by the Bank upon extension of credit, is based on management's credit evaluation of the borrower. The Bank grants residential real estate loans on single- and multi- family dwellings to borrowers primarily in New Jersey. Its borrowers' abilities to repay their obligations are dependent upon various factors, including the borrowers' income and net worth, cash flows generated by the underlying collateral, value of the underlying collateral, and priority of the Bank's lien on the property. Such factors are dependent upon various economic conditions and individual circumstances beyond the Bank's control; the Bank is therefore subject to risk of loss. The Bank believes that its lending policies and procedures adequately minimize the potential exposure to such risks and that adequate provisions for loan losses are provided for all known and inherent risks. Collateral and / or guarantees are required for virtually all loans. Management utilizes an internal nine- point risk rating system to summarize its loan portfolio into categories with similar risk characteristics. Loans deemed to be " acceptable quality " are rated 1 through 4, with a rating of 1 established for loans with minimal risk. Loans that are deemed to be of " questionable quality " are rated 5 (watch) or 6 (special mention). Loans with adverse classifications (substandard, doubtful or loss) are rated 7, 8 or 9, respectively. Commercial mortgage, commercial, multi- family and construction loans are rated individually, and each lending officer is responsible for risk rating loans in their portfolio. These risk ratings are then reviewed by the department manager and / or the Chief Lending Officer and by the Credit Department. The risk ratings are also reviewed periodically through loan review examinations which are currently performed by an independent third- party. Reports by the independent third- party are presented to the Audit Committee of the Board of Directors. In addition, the Company participated in the Paycheck Protection Program (" PPP ") through the United States Department of the Treasury and Small Business Administration (" SBA"). PPP loans are fully guaranteed by the SBA and may be eligible for forgiveness by the SBA to the extent that the proceeds are used to cover eligible payroll costs, interest costs, rent, and utility costs over a period of up to 24 weeks after the loan were made as long as certain conditions were met regarding employee retention and compensation levels. PPP loans deemed eligible for forgiveness by the SBA will be repaid by the SBA to the Company. Eligibility ended for this program on May 2021. PPP loans are included in the commercial loan portfolio. As of December 31, 2022, the Company secured 2, 067 PPP loans for its customers totaling $ 682. 0 million, which includes both the initial round and the second round of PPP. As of December 31, 2022, 2, 053 PPP loans totaling $ 679. 2 million were forgiven. The balance at December 31, 2022 for PPP loans is $ 2. 8 million. The following table summarizes the Company's gross loans held for investment by year of origination and internally assigned credit grades (in thousands): Gross Loans Held by Investment by Year of Originationat December 31, 20222022202120202019201182018Prior to 2018Revolving LoansRevolving loans to term loansTotal LoansResidential (1) Special mention $ — — 1, 114 — 1, 114 Substandard — — 264 4, 417 — 4, 681 Doubtful — — — — Loss — — — — — Gross Loans Held by Investment by Year of Originationat December 31, 20222022202120202019201182018Prior to 2018Revolving LoansRevolving loans to term loansTotal LoansTotal criticized and classified — — 264 5, 531 — 5, 795 Pass / Watch151, 077 212, 697 211, 445 95, 872 58, 226 442, 586 — 1, 171, 903 Total residential $ 151, 077 212, 697 211, 445 95, 872 58, 490 448, 117 — 1, 177, 698 Commercial MortgageSpecial mention $ — 3, 071 26, 809 52, 509 14, 740 — 97, 129 Substandard — — 18, 020 11, 774 434 — 30, 228 Doubtful — — Total criticized and classified — — 3, 071 26, 809 70, 529 26, 514 434 — 127, 357 Pass / Watch951, 367 630, 584 567, 448 546, 474 218, 620 1, 164, 854 94, 716 14, 765 4, 188, 828 Total commercial mortgage $ 951, 367 630, 584 570, 519 573, 283 289, 149 1, 191, 368 95, 150 14, 765 4, 316, 185 Multi- familySpecial mention $ — — 9, 730 — 9, 730 Substandard — — 2, 356 — 2, 356 Doubtful — — Total criticized and classified — — 12, 086 — 12, 086 Pass / Watch142, 550 150, 293 282, 228 234, 953 187, 499 502, 177 887 1, 145 1, 501, 732 Total multi- family $ 142, 550 150, 293 282, 228 234, 953 187, 499 514, 263 887 1, 145 1, 513, 818 ConstructionSpecial mention $ — 19, 728 905 — 20, 633 Substandard — 2, 197 777 — 2, 974 Doubtful — — Loss — — Total criticized and classified — 2, 197 20, 505 905 — 23, 607 Pass / Watch168, 674 362, 542 103, 067 38, 639 16, 917 62 1, 986 691, 887 Total construction $ 168, 674 362, 542 103, 067 40, 836 37, 422 967 — 1, 986 715, 494 Total MortgageSpecial mention $ — 3, 071 26, 809 72, 237 26, 489 — 128, 606 Substandard — 2, 197 19, 061 18, 547 434 — 40, 239 Doubtful — — Loss — — Total criticized and classified — 3, 071 29, 006 91, 298 45, 036 434 — 168, 845 Pass / Watch1, 413, 668 1, 356, 116 1, 164, 188 915, 938 481, 262 2, 109, 679 95, 603 17, 896 7, 554, 350 Gross Loans Held by Investment by Year of Originationat December 31, 20222022202120202019201182018Prior to 2018Revolving LoansRevolving loans to term loansTotal LoansTotal MortgageSpecial $ 1, 413, 668 1, 356, 116 1, 167, 259 944, 944 527, 560 2, 154, 715 96, 037 17, 896 7, 723, 195 CommercialSpecial mention $ 75 1, 148 444 201 10, 156 4, 379 14, 530 140 31, 073 Substandard — 7, 605 10, 230 4, 391 3, 561 13, 734 7, 604 364 47, 489 Doubtful — — Loss — — Total criticized and classified75 8, 753 10, 674 4, 592 13, 717 18, 113 22, 134 504 78, 562 Pass / Watch377, 662 320, 334 162, 175 161, 150 87, 396 522, 798 492, 717 30, 876 2, 155, 108 Total commercial $ 377, 737 329, 087 172, 849 165, 742 101, 113 540, 911 514, 851 31, 380 2, 233, 670 Consumer $ — 146 — 146 Substandard — 8 — 109 332 209 — 658 Doubtful — — Loss — — Total criticized and classified — 8 — 109 478 209 — 804 Pass / Watch30, 132 20, 671 2, 909 16, 682 16, 58, 173 115, 777 13, 476 303, 976 Total consumer $ 30, 132 20, 671 2, 917 16, 682 16, 265 88, 651 115, 986 13, 476 304, 780 Total LoansSpecial mention $ 75 1, 148 3, 515 27, 010 82, 393 31, 014 14, 530 140 159, 825 Substandard — 7, 605 10, 238 6, 588 22, 731 32, 613 8, 247 364 88, 386 Doubtful — — Loss — — Total criticized and classified75 8, 753 13, 753 33, 598 105, 124 63, 627 22, 777 504 248, 211 Pass / Watch1, 821, 462 1, 697, 121 1, 329, 272 1, 093, 770 584, 814 2, 720, 650 704, 097 62, 248 10, 013, 434 Total gross loans $ 1, 821, 537 1, 705, 874 1, 343, 025 1, 127, 368 689, 938 2, 784, 277 726, 874 62, 752 10, 261, 645 (1) For residential and consumer loans, the Company assigns internal credit grades based on the delinquency status of each loan. The Bank uses available for sale debt securities to pledge as collateral for the repurchase agreements. At December 31, 2022 and December 31, 2021, available for sale debt securities pledged as collateral for repurchase agreements totaled $ 116. 5 million and $ 136. 0 million, respectively. Interest expense on borrowings for the years ended December 31, 2022, 2021 and 2020 amounted to $ 9. 3 million, $ 8. 6 million and $ 16. 6 million, respectively. (12) Subordinated Debentures Sussex Capital Trust II, a non- consolidated subsidiary of the Company acquired as part of the SB One acquisition and a Delaware statutory business trust established on June 28, 2007, issued $ 12. 5 million of variable rate capital trust pass- through securities to investors. In accordance with FASB ASC 810, Consolidation, Sussex Capital Trust II, is not included in our consolidated financial statements. For regulatory reporting purposes, capital trust pass- through securities qualify as Tier I capital subject to specified limitations. Subordinated debentures at December 31, 2022 and 2021 totaled $ 10. 5 million and $ 10. 3 million, respectively, while interest expense on these subordinated debentures for the year ended December 31, 2022, 2021 and 2020 totaled $ 615, 000, $ 1. 2 million and $ 512, 000, respectively. (13) Benefit Plans Pension and Post- retirement Benefits The Bank has a noncontributory defined benefit pension plan covering its full- time employees who had attained age 21 with at least one year of service as of April 1, 2003. The pension plan was frozen on April 1, 2003. All participants in the pension plan are 100 % vested. The pension plan' s assets are invested in investment funds and group annuity contracts currently managed by the Principal Financial Group and Allmerica Financial. Based on the measurement date of December 31, 2022, no contributions will be made to the pension plan in 2023. In addition to pension benefits, certain health care and life insurance benefits are currently made available to certain of the Bank' s retired employees. The costs of such benefits are accrued based on actuarial assumptions from the date of hire to the date the employee is fully eligible to receive the benefits. Effective January 1, 2003, eligibility for retiree health care benefits was frozen as to new entrants and benefits were eliminated for employees with less than ten years of service as of December 31, 2002. Effective January 1, 2007, eligibility for retiree life insurance benefits was frozen as to new entrants and retiree life insurance benefits were eliminated for employees with less than ten years of service as of December 31, 2006. The following table sets forth information regarding the pension plan and post- retirement healthcare and life insurance plans (in thousands): PensionPost- retirement 202220212020202220212020Change in benefit obligation: Benefit obligation at beginning of year $ 32, 517 35, 170 33, 058 16, 748 18, 805 23, 323 Service cost — — — 28 34 78 Interest cost855 790 1, 000 443 424 712 Actuarial (gain) loss (48) (294) 381 140 (412) (169) Benefits paid (1, 658) (1, 656) (1, 630) (933) (584) (627) Change in actuarial assumptions (7, 116) (1, 493) 2, 361 (4, 331) (1, 519) (4, 512) Benefit obligation at end of year $ 24, 550 32, 517 35, 170 12, 095 16, 748 18, 805 Change in plan assets: Fair value of plan assets at beginning of year $ 58, 451 54, 617 49, 932 — — — Actual (loss) return on plan assets (8, 863) 5, 490 6, 315 — — — Employer contributions — — — 933 584 627 Benefits paid (1, 658) (1, 656) (1, 630) (933) (584) (627) Fair value of plan assets at end of year47, 930 58, 451 54, 617 — — — Funded status at end of year $ 23, 380 25, 934 19, 447 (12, 095) (16, 748) (18, 805) For the years ended December 31, 2022 and 2021, the Company, in the measurement of its pension plan and post- retirement obligations updated its mortality assumptions to the PRI 2012 mortality table with the fully generational projection scale MP 2021 issued by The Society of Actuaries (" SOA") in October 2021. The prepaid pension benefits of $ 23. 4 million and the unfunded post- retirement healthcare and life insurance benefits of $ 12. 1 million at December 31, 2022 are included in other assets and other liabilities, respectively, in the Consolidated Statements of Financial Condition. The components of accumulated other comprehensive income (loss) related to the pension plan and other post- retirement benefits, on a pre- tax basis, at December 31, 2022 and 2021 are summarized in the following table (in thousands): PensionPost- retirement 202220212022 2021Unrecognized prior service cost $ — — — — Unrecognized net actuarial loss (income) 9, 658 4, 504 (11, 802) (8, 915) Total accumulated other comprehensive loss (income) $ 9, 658 4, 504 (11, 802) (8, 915) Net periodic (benefit) increase cost for the years ending December 31, 2022, 2021 and 2020, included the following components (in thousands): PensionPost- retirement 202220212020202220212020Service cost $ — — — 28 34 78 Interest cost855 790 1, 000 443 424 712 Return on plan assets (3, 456) (3, 227) (2, 949) — — — Amortization of: Net loss (gain) — 472 696 (1, 304) (1, 070) (248) Unrecognized prior service cost — — — Net periodic (benefit) increase cost $ (2, 601) (1, 965) (1, 253) (833) (612) 542 The weighted average actuarial assumptions used in the plan determinations at December 31, 2022, 2021 and 2020 were as follows: PensionPost- retirement 202220212020202220212020Discount rate5. 10 % 2. 70 % 2. 30 % 5. 10 % 2. 70 % 2. 30 % Rate of compensation increase — — — — — — Expected return on plan assets6. 00 6. 00 6. 00 — — — Medical and life insurance benefits cost rate of increase — — — 6. 00 6. 00 6. 00 The Company provides its actuary with certain rate assumptions used in measuring the benefit obligation. The most significant of these is the discount rate used to calculate the period- end present value of the benefit obligations, and the expense to be included in the following year' s financial statements. A lower discount rate will result in a higher benefit obligation and expense, while a higher discount rate will result in a lower benefit obligation and expense. The discount rate assumption was determined based on a cash flow- yield curve model specific to the Company' s pension and post- retirement plans. The Company compares this rate to certain market indices, such as long- term treasury bonds, or the Citigroup pension liability indices, for reasonableness. A discount rate of 5. 10 % was selected for the December 31, 2022 measurement date. Assumed health care cost trend rates have a significant effect on the amounts reported for health care plans. A 1 % change in the assumed health care cost trend rate would have had the following effects on post- retirement benefits at December 31, 2022 (in thousands): 1 % increase1 % decreaseEffect on total service cost and interest cost $ 70 (60) Effect on post- retirement benefits obligation $ 1, 300 (1, 100) Estimated future benefit payments, which reflect expected future service, as appropriate for the next five years, are as follows (in thousands): PensionPost- retirement2023 $ 1, 770 733 20241, 787 755 20251, 788 795 20261, 785 795 20271, 788 814 The weighted- average asset allocation of pension plan assets at December 31, 2022 and 2021 were as follows: Asset Category20222021Domestic equities37 % 39 % Foreign equities11 % 11 % Fixed income50 % 48 % Real estate2 % 2 % Cash — — % Total100 % 100 % The Company' s expected return on pension plan assets assumption is based on historical investment return experience and evaluation of input from the Plan's Investment Consultant and the Company' s Benefits Committee which manages the pension plan' s assets. The expected return on pension plan assets is also impacted by the target allocation of assets, which is based on the Company' s goal of earning the highest rate of return while maintaining risk at acceptable levels. Management strives to have pension plan assets sufficiently diversified so that adverse or unexpected results from one security class will not have a significant detrimental impact on the entire portfolio. The target allocation of assets and acceptable ranges around the targets are as follows: Asset CategoryTargetAllowable RangeDomestic equities37 % 30- 41 % Foreign equities11 % 5- 13 % Fixed income50 % 40- 65 % Real estate2 % 0- 4 % Cash0 % 0 % Total100 % The Company anticipates that the long- term asset allocation on average will approximate the targeted allocation. Actual asset allocations are the result of investment decisions by a third- party investment manager. The following tables present the assets that are measured at fair value on a recurring basis by level within the U. S. GAAP fair value hierarchy as reported on the statements of net assets available for Plan benefits at December 31, 2022 and 2021, respectively. Financial assets and liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurement. Fair value measurements at December 31, 2022 (in thousands) Total (Level 1) (Level 2) (Level 3) Group annuity contracts $ 92 — 92 — Mutual funds: Fixed income23, 819 23, 819 — — International equity5, 362 5, 362 — — Large U. For 2022, 2021 and 2020, the Bank matched 25 % of the first 6 % contributed by the participants. The contribution percentage is determined by the Board of Directors in its sole discretion. The Bank' s aggregate contributions to the 401 (k) Plan for 2022, 2021 and 2020 were $ 1. 2 million, $ 1. 2 million and $ 1. 0 million, respectively. Supplemental Executive Retirement Plan The Bank maintains a non- qualified supplemental retirement plan for certain senior officers of the Bank. This unfunded plan, which was frozen as of April 1, 2003 provides benefits in excess of the benefits permitted to be paid by the pension plan under provisions of the tax law. Amounts expensed under this supplemental retirement plan amounted to $ 73, 000, $ 74, 000 and $ 80, 000 for the years 2022, 2021 and 2020, respectively. At December 31, 2022 and 2021, $ 1. 7 million and $ 1. 8 million, respectively, were recorded in other liabilities on the Consolidated Statements of Financial Condition for this supplemental retirement plan. In connection with this supplemental retirement plan, an increase of $ 283, 000, an increase of $ 68, 000, and an increase of $ 89, 000, net of tax, were recorded in other comprehensive income (loss) for 2022, 2021 and 2020, respectively. Retirement Plan for the Board of Directors of Provident Bank The Bank maintains a Retirement Plan for the Board of Directors of the Bank, a non- qualified plan that provides cash payments for up to 10 years to eligible retired board members based on age and length of service requirements. The maximum payment under this plan to a board member, who terminates service on or after the age of 72 with at least ten years of service on the board, is forty quarterly payments of $ 1, 250. The Bank may suspend payments under this plan if it does not meet Federal Deposit Insurance Corporation or New Jersey Department of Banking and Insurance minimum capital requirements. The Bank may terminate this plan at any time although such termination may not reduce or eliminate any benefit previously accrued to a board member without his or her consent. The plan was amended in December 2005 to terminate benefits under this plan for any directors who had less than ten years of service on the board of directors of the Bank as of December 31, 2006. The plan further provides that, in the event of a change in control (as defined in the plan), the undistributed balance of a director' s accrued benefit will be distributed to him or her within 60 days of the change in control. The Bank paid $ 5, 000, $ 6, 250, and $ 10, 000 to former board members under this plan for each of the years ended December 31, 2022, 2021 and 2020, respectively. At December 31, 2022 and 2021, $ 125, 000 and $ 123, 000, respectively, were recorded in other liabilities on the Consolidated Statements of Financial Condition for this retirement plan. Increases of $ 11, 000, $ 689 and $ 6, 334, net of tax, were recorded in other comprehensive income (loss) for 2022, 2021 and 2020, respectively, in connection with this plan. The ESOP is a tax- qualified plan designed to invest primarily in the Company' s common stock that provides employees with the opportunity to receive a funded retirement benefit from the Bank, based primarily on the value of the Company' s common stock. The ESOP purchased 4, 769, 464 shares of the Company' s common stock at an average price of $ 17. 09 per share with the proceeds of a loan from the Company to the ESOP. The outstanding loan principal at December 31, 2022, was $ 13. 2 million. Shares of the Company' s common stock pledged as collateral for the loan are released from the pledge for allocation to participants as loan payments are made. For the years ending December 31, 2022 and 2021, 299, 566 shares and 285, 107 shares from the ESOP were released, respectively. Unallocated ESOP shares held in suspense totaled 598, 507 at December 31, 2022, and had a fair value of $ 12. 8 million. ESOP compensation expense for the years ended December 31, 2022, 2021 and 2020 was $ 4. 1 million, $ 4. 3 million and $ 2. 4 million, respectively. Non- Qualified Supplemental Defined Contribution Plan (" the Supplemental Employee Stock Ownership Plan ") Effective January 1, 2004, the Bank established a deferred compensation plan for executive management and key employees of the Bank, known as Provident Bank Non- Qualified Supplemental Employee Stock Ownership Plan (the " Supplemental ESOP "). The Supplemental ESOP was amended and restated as the Non- Qualified Supplemental Defined Contribution Plan (the " Supplemental DC Plan "), effective January 1, 2010. The Supplemental DC Plan is a non- qualified plan that provides additional benefits to certain executives whose benefits under the 401 (k) Plan and ESOP are limited by tax law limitations applicable to tax- qualified plans. The Supplemental DC Plan requires a contribution by the Bank for each participant who also participates in the 401 (k) Plan and ESOP equal to the amount that would have been contributed under the terms of the 401 (k) Plan and ESOP but for the tax law limitations, less the amount actually contributed under the 401 (k) Plan and ESOP. The Supplemental DC Plan provides for a phantom stock allocation for qualified contributions that may not be accrued in the qualified ESOP and for matching contributions that may not be accrued in the qualified 401 (k) Plan due to tax law limitations. Under the Supplemental 401 (k) provision, the estimated expense for the years ending December 31, 2022, 2021 and 2020 was $ 312, 000, $ 25, 000 and $ 25, 000, respectively, and included the matching contributions plus interest credited at an annual rate equal to the ten- year bond- equivalent yield on U. S. Treasury securities. Under the Supplemental ESOP provision, the estimated expense for the years ending December 31, 2022, 2021 and 2020 was $ 144, 000, $ 180, 000 and $ 180, 000, respectively. The phantom equity is treated as equity awards (expensed at the time of allocation) and not liability awards which would require periodic adjustment to market, as participants do not have an option to take their distribution in cash. 2019 Long- Term Equity Incentive Plan Upon stockholders' approval of the 2019 Long- Term Equity Incentive Plan on April 25, 2019, shares available for stock awards and stock options under the Amended and Restated Long- Term Incentive Plan were reserved for issuance under the new 2019 Long- Term Equity Incentive Plan. No additional grants of stock awards and stock options will be made under the Amended and Restated Long- Term Incentive Plan. The new plan authorized the issuance of up to 1, 350, 000 shares of Company common stock to be issued as stock awards. At December 31, 2022, 1, 047, 756 shares remain available for grant under the new plan. Shares previously awarded under prior equity incentive plans that are subsequently forfeited or expire may also be issued under this new plan. Stock Awards As a general rule, restricted stock grants are held in escrow for the benefit of the award recipient until vested. Awards outstanding generally vest in three annual installments, commencing one year from the date of the award. Additionally, certain awards are three- year performance- vesting awards, which may or may not vest depending upon the attainment of certain corporate financial targets. Expense attributable to stock awards amounted to $ 9. 4 million, $ 5. 5 million and $ 5. 4 million for the years ended December 31, 2022, 2021 and 2020, respectively. A summary status of the granted but unvested stock awards as of December 31, and changes during the year, is presented below: Restricted Stock Awards 202220212020Outstanding at beginning of year900, 483 785, 181 668, 826 Granted447, 526 500, 882 429, 122 Forfeited (105, 556) (144, 476) (59, 938) Vested (219, 323) (241, 114) (252, 829) Outstanding at the end of year1, 023, 130 900, 483 785, 181 As of December 31, 2022, unrecognized compensation cost relating to unvested restricted stock totaled $ 9. 1 million. This amount will be recognized over a remaining weighted average period of 1. 7 years. Stock Options Each stock option granted entitles the holder to purchase one share of the Company' s common stock at an exercise price not less than the fair value of a share of the Company' s common stock at the date of grant. Options generally vest over a five- year period from the date of grant and expire no later than 10 years following the grant date. Additionally, certain options are three- year performance- vesting options, which may or may not vest depending upon the attainment of certain corporate financial targets. A summary of the

status of the granted but unexercised stock options as of December 31, 2022 2021 and 2020, and changes during the year is presented below: 202220212020 NumberofstockoptionsWeightedaverageexercisepriceNumberofstockoptionsWeightedaverageexercisepriceNumberofstockoptionsWeightedaverageexercisepriceOutstanding at beginning of year566, 453 $ 18. 73 596, 441 $ 17. 96 499, 201 $ 19. 32 Granted34, 353 23. 70 56, 605 20. 66 107, 240 20. 62 Exercised — — (86, 593) 14. 69 — — Forfeited — — — (10, 000) 14. 68 Expired — — — — — — Outstanding at the end of year600, 806 $ 19. 01 566, 453 $ 18. 73 596, 441 $ 17. 96 The total fair value of options vesting during 2022, 2021 and 2020 was $ 195, 000, $ 190, 000 and $ 185, 000, respectively. Compensation expense of approximately $ 144, 000, $ 77, 000 and $ 11, 000 is projected for 2023, 2024 and 2025, respectively, on stock options outstanding at December 31, 2022. The following table summarizes information about stock options outstanding at December 31, 2022: Options OutstandingOptions ExercisableRange of exercise pricesNumberofoptionsoutstandingAverageremainingcontractuallifeWeightedaverageexercisepriceNumberofoptionsexercisableWeightedaverageexerciseprice $ 15. 23- 18. 70274, 942 1. 7 $ 17. 28 274, 942 $ 17. 28 $ 20. 62- 27. 25325, 864 6. 8 $ 23. 20 218, 027 $ 23. 99 The stock options outstanding and stock options exercisable at December 31, 2022 both had an aggregate intrinsic value of $ 1. 2 million. The expense related to stock options is based on the fair value of the options at the date of the grant and is recognized ratably over the vesting period of the options. Compensation expense related to the Company' s stock option plan totaled $ 198, 000, $ 200, 000 and $ 190, 000 for 2022, 2021 and 2020, respectively. The estimated fair values were determined on the dates of grant using the Black- Scholes Option pricing model. The fair value of the Company' stock option awards are expensed on a straight- line basis over the vesting period of the stock option. The risk- free rate is based on the implied yield on a U. S. Treasury bond with a term approximating the expected term of the option. The expected volatility computation is based on historical volatility over a period approximating the expected term of the option. The dividend yield is based on the annual dividend payment per share, divided by the grant date stock price. The expected option term is a function of the option life and the vesting period. The fair value of the option grants was estimated on the date of grant using the Black- Scholes option- pricing model with the following weighted average assumptions: For the year ended December 31, 202220212020Expected dividend yield4. 05 % 4. 45 % 4. 46 % Expected volatility36. 33 % 30. 75 % 20. 33 % Risk- free interest rate1. 74 % 0. 73 % 0. 75 % Expected option life8 years8 years8 years The weighted average fair value of options granted during 2022, 2021 and 2020 was $ 5. 80, $ 3. 52 and $ 1. 83 per option, respectively. (14) Income Taxes The current and deferred amounts of income tax expense (benefit) for the years ended December 31, 2022, 2021 and 2020 are as follows (in thousands): Years ended December 31, 202220212020Current: Federal $ 41, 379 28, 798 27, 143 State20, 859 17, 986 11, 389 Total current62, 238 46, 784 38, 532 Deferred: Federal1, 825 10, 548 (5, 908) State395 1, 865 (2, 021) Total deferred2, 220 12, 413 (7, 929) $ 64, 458 59, 197 30, 603 The Company recorded a deferred tax (benefit) expense of ($ 68. 2) million, ($ 8. 3) million and $ 5. 2 million during 2022, 2021 and 2020, respectively, related to the unrealized gains (losses) on available for sale debt securities, which is reported in accumulated other comprehensive income (loss), net of tax. Additionally, the Company recorded a deferred tax expense (benefit) of ($ 517, 000), $ 1. 4 million and $ 1. 4 million in 2022, 2021 and 2020, respectively, related to the amortization of post- retirement benefit obligations, which is reported in accumulated other comprehensive income (loss), net of tax. A reconciliation between the amount of reported total income tax expense and the amount computed by multiplying the applicable statutory income tax rate is as follows (in thousands): Years ended December 31, 2022202120120Tax expense at statutory rates $ 50, 422 47, 695 26, 786 Increase (decrease) in taxes resulting from: State tax, net of federal income tax benefit16, 791 15, 682 7, 400 Tax- exempt interest income (2, 590) (2, 690) (2, 609) Bank- owned life insurance (1, 257) (1, 665) (1, 363) Other, net1, 092 175 389 $ 64, 458 59, 197 30, 603 The net deferred tax asset is included in other assets in the Consolidated Statements of Financial Condition. The tax effects of temporary differences that give rise to significant portions of the deferred tax assets and deferred tax liabilities at December 31, 2022 and 2021 are as follows (in thousands): 20222021Deferred tax assets: Allowance for credit losses on loans $ 23, 794 21, 640 Allowance for credit loss on off- balance sheet (" OBS") credit exposure853 1, 763 Post- retirement benefit6, 458 6, 908 Deferred compensation569 743 Purchase accounting adjustments — 1, 145 Depreciation1, 412 425 SERP1, 130 1, 013 ESOP812 1, 145 Stock- based compensation5, 818 4, 753 Payroll Protection Program fees — 411 Non- accrual interest234 232 Federal Net Operating Loss (" NOL") 197 239 Unrealized losses on available for sale debt securities68, 324 501 Lease liability17, 126 13, 464 Other — 1, 196 Total gross deferred tax assets126, 727 55, 578 Deferred tax liabilities: Pension expense8, 928 8, 158 Contingent consideration162 56 Deferred loan costs8, 533 7, 104 Investment securities, principally due to accretion of discounts95 94 Purchase accounting adjustments363 — Intangibles1, 366 2, 121 Originated mortgage servicing rights169 184 Pension liability adjustments593 1, 036 Net unrealized gain on hedging activities7, 576 788 Lease right- of- use asset16, 370 13, 082 Other361 — Total gross deferred tax liabilities44, 498 32, 623 Net deferred tax asset $ 82, 229 22, 955 Retained earnings at December 31, 2022 includes approximately $ 51. 8 million for which no provision for income tax has been made. This amount represents an allocation of income to bad debt deductions for tax purposes only. Events that would result in taxation of these reserves include the failure to qualify as a bank for tax purposes, distributions in complete or partial liquidation, stock redemptions and excess distributions to stockholders. At December 31, 2022, the Company had an unrecognized tax liability of $ 14. 0 million with respect to this reserve. As a result of the Beacon acquisition in 2011, the Company acquired federal net operating loss carryforwards. There are approximately $ 937, 000 of NOL carryforwards available to offset future taxable income as of December 31, 2022. If not utilized, these carryforwards will expire in 2031. The federal NOLs are subject to a combined annual Code Section 382 limitation in the amount of approximately $ 197, 000. Management has determined that it is more likely than not that it will realize the net deferred tax asset based upon the nature and timing of the items listed above. In order to fully realize the net deferred tax asset, the Company will need to generate future taxable income. Management has projected that the Company will generate sufficient taxable income to utilize the net deferred tax asset; however, there can be no assurance that such levels of taxable income will be generated. The Company' s policy is to report interest and penalties, if any, related to unrecognized tax benefits in income tax expense. The Company did not have any liabilities for uncertain tax positions at December 31, 2022 and 2021. The Company and its subsidiaries file a consolidated U. S. Federal income tax return. For tax periods prior to December 31, 2018, New Jersey tax law does not and has not allowed for a taxpayer to file a tax return on a combined or consolidated basis with another member of the affiliated group where there is common ownership. As a result of this enacted legislation that New Jersey effectuated on July 1, 2018, beginning in 2019, the Company and its subsidiaries is required to file a combined New Jersey state income tax return on apportioned and allocated income. Also, the Company and its subsidiaries file a combined New York State income tax return on apportioned and allocated income. The Company, through its bank subsidiary, files a Pennsylvania Mutual Thrift Institution Tax return. The Company' s Federal and Pennsylvania Mutual Thrift Institutions tax returns are open for examination from 2019. The Company' s 2017 and 2018 New York State returns are currently under audit and tax years after 2019 are still subject to examination for New York State. The Company' s 2015 through 2018 New Jersey State returns are currently under audit and tax years after 2019 are still subject to examination for New Jersey. (15) Commitments, Contingencies and Concentrations of Credit Risk In the normal course of business, various commitments and contingent liabilities are outstanding which are not reflected in the accompanying consolidated financial statements. In the opinion of management, the consolidated financial position of the Company will not be materially affected by the outcome of such commitments or contingent liabilities. The Company is involved in various legal actions and claims arising in the normal course of its business. In the opinion of management, these legal actions and claims are not expected to have a material adverse impact on the Company' s financial condition or results of operations. A substantial portion of the Bank' s loans are to borrowers operating in or, are secured by real estate located in New Jersey, our primary market area. Accordingly, the collectability of a substantial portion of the Bank' s loan portfolio may be susceptible to changes in local real estate market conditions and the regional business environment. (16) Regulatory Capital Requirements FDIC regulations require banks to maintain minimum levels of regulatory capital. Under the regulations in effect at December 31, 2022, the Bank is required to maintain: (1) a Tier 1 capital to total assets leverage ratio of 4. 0 %; (2) a common equity Tier 1 capital to risk- based assets ratio of 4. 5 %; (3) a Tier 1 capital to risk- based assets ratio of 6. 0 %; and (4) a total capital to risk- based assets ratio of 8. 0 %. In addition to establishing the minimum regulatory capital requirements, the regulations limit capital distributions and certain discretionary bonus payments to management if the institution does not hold a " capital conservation buffer" consisting of 2. 5 % of common equity Tier 1 capital to risk- weighted asset above the amount necessary to meet its minimum risk- based capital requirements. Under its prompt corrective action regulations, the FDIC is required to take certain supervisory actions (and may take additional discretionary actions) with respect to an undercapitalized institution. Such actions could have a direct material effect on an institution' s financial statements. The regulations establish a framework for the classification of savings institutions into five categories: well capitalized, adequately capitalized, undercapitalized, significantly undercapitalized, and critically undercapitalized. Generally, an institution is considered well capitalized if it has: a leverage (Tier 1) capital ratio of at least 5. 00 %; a common equity Tier 1 risk- based capital ratio of 6. 50 %; a Tier 1 risk- based capital ratio of at least 8. 00 %; and a total risk- based capital ratio of at least 10. 00 %. In the first quarter of 2020, U. S. federal regulatory authorities issued an interim final rule providing banking institutions that adopt CECL during the 2020 calendar year with the option to delay for two years the estimated impact of CECL on regulatory capital, followed by a three- year transition period to phase out the aggregate amount of the capital benefit provided during the initial two- year delay (i. e., a five year transition in total). In connection with its adoption of CECL on January 1, 2020, the Company elected to utilize the five- year CECL transition. The foregoing capital ratios are based in part on specific quantitative measures of assets, liabilities and certain off- balance sheet items as calculated under regulatory accounting practices. Capital amounts and classifications are also subject to qualitative judgments by the FDIC about capital components, risk weightings and other factors. As of December 31, 2022 and 2021, the Bank exceeded all minimum capital adequacy requirements to which it is subject. Further, the most recent FDIC notification categorized the Bank as a well- capitalized institution under the prompt corrective action regulations. There have been no conditions or events since that notification that management believes have changed the Bank' s capital classification. The Company is regulated as a bank holding company, and as such, is subject to examination, regulation and periodic reporting under the Bank Holding Company Act, as administered by the Federal Reserve Board (" FRB "). The FRB has adopted capital adequacy guidelines for bank holding companies on a consolidated basis substantially similar to those of the FDIC for the Bank. As of December 31, 2022 and 2021, the Company was " well capitalized " under FRB guidelines. Regulations of the FRB provide that a bank holding company must serve as a source of strength to any of its subsidiary banks and must not conduct its activities in an unsafe or unsound manner. Under the prompt corrective action provisions discussed above, a bank holding company parent of an undercapitalized subsidiary bank would be directed to guarantee, within limitations, the capital restoration plan that is required of such an undercapitalized bank. If the undercapitalized bank fails to file an acceptable capital restoration plan or fails to implement an accepted plan, the FRB may prohibit the bank holding company parent of the undercapitalized bank from paying any dividend or making any other form of capital distribution without the prior approval of the FRB. The following table shows the Company' s actual capital amounts and ratios as of December 31, 2022 and 2021, compared to the FRB minimum capital adequacy requirements and the FRB requirements for classification as a well- capitalized institution (dollars in thousands). For purposes of estimating the allowance for credit losses for off- balance sheet credit exposures, the exposure at default includes an estimated drawdown of unused credit based on historical credit utilization factors and current loss factors, resulting in a proportionate amount of expected credit losses. For the years ended December 31, 2022, 2021 and 2020, the Company recorded a $ 3. 4 million negative provision, a $ 1. 5 million provision and a $ 1. 8 million provision for credit losses for off- balance sheet credit exposures, respectively. The allowance for credit losses for off- balance sheet credit exposures was $ 3. 2 million and $ 6. 5 million at December 31, 2022 and 2021, respectively, and included in other liabilities on the Consolidated Statements of Financial Condition. (18) Fair Value Measurements The Company utilizes fair value measurements to record fair value adjustments to certain assets and liabilities and to determine fair value disclosures. The determination of fair values of financial instruments often requires the use of estimates. Where quoted market values in an active market are not readily available, the Company utilizes various valuation techniques to estimate fair value. Fair value is an estimate of the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. However, in many instances fair value estimates may not be substantiated by comparison to independent markets and may not be realized in an immediate sale of the financial instrument. GAAP establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted market prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of fair value hierarchy are as follows: Level 1: Unadjusted quoted market prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities; Level 2: Quoted prices in markets that are not active, or inputs that are observable either directly or indirectly, for substantially the full term of the asset or liability; andLevel 3: Prices or valuation techniques that require inputs that are both significant to the fair value measurement and unobservable (i. e., supported by little or no market activity). The valuation techniques are based upon the unpaid principal balance only, and exclude any accrued interest or dividends at the measurement

date. Interest income and expense and dividend income are recorded within the consolidated statements of income depending on the nature of the instrument using the effective interest method based on acquired discount or premium. Assets Measured at Fair Value on a Recurring Basis The valuation techniques described below were used to measure fair value of financial instruments in the table below on a recurring basis as of December 31, 2022 and December 31, 2021. Available for Sale Debt Securities, at Fair Value For available for sale debt securities, fair value was estimated using a market approach. The majority of the Company's securities are fixed income instruments that are not quoted on an exchange, but are traded in active markets. Prices for these instruments are obtained through third-party data service providers or dealer market participants with whom the Company has historically transacted both purchases and sales of securities. Prices obtained from these sources include market quotations and matrix pricing. Matrix pricing, a Level 2 input, is a mathematical technique used principally to value certain securities to benchmark to comparable securities. The Company evaluates the quality of Level 2 matrix pricing through comparison to similar assets with greater liquidity and evaluation of projected cash flows. As management is responsible for the determination of fair value, it performs quarterly analyses on the prices received from the pricing service to determine whether the prices are reasonable estimates of fair value. Specifically, management compares the prices received from the pricing service to a secondary pricing source. Additionally, management compares changes in the reported market values and returns to relevant market indices to test the reasonableness of the reported prices. The Company's internal price verification procedures and review of fair value methodology documentation provided by independent pricing services has generally not resulted in an adjustment in the prices obtained from the pricing service. Equity Securities, at Fair Value comprehensive income (loss), and is subsequently reclassified into earnings in the period that the forecasted transactions affect earnings. The fair value of the Company's derivatives is determined using discounted cash flow analysis using observable market- based inputs, which are considered Level 2 inputs. Assets Measured at Fair Value on a Non- Recurring Basis The valuation techniques described below were used to estimate fair value of financial instruments measured on a non- recurring basis as of December 31, 2022 and 2021. Collateral Dependent Impaired Loans For loans measured for impairment based on the fair value of the underlying collateral, fair value was estimated using a market approach. The Company measures the fair value of collateral underlying impaired loans primarily through obtaining independent appraisals that rely upon quoted market prices for similar assets in active markets. These appraisals include adjustments, on an individual case- by- case basis, to comparable assets based on the appraisers' market knowledge and experience, as well as adjustments for estimated costs to sell between 5 % and 10 %. Management classifies these loans as Level 3 within the fair value hierarchy. Assets acquired through foreclosure or deed in lieu of foreclosure are carried at the lower of the outstanding loan balance at the time of foreclosure or fair value, less estimated selling costs, which range between 5 % and 10 %. Fair value is generally based on independent appraisals that rely upon quoted market prices for similar assets in active markets. These appraisals include adjustments, on an individual case basis, to comparable assets based on the appraisers' market knowledge and experience, and are classified as Level 3. When an asset is acquired, the excess of the loan balance over fair value less estimated selling costs is charged to the allowance for credit losses. A reserve for foreclosed assets may be established to provide for possible write- downs and selling costs that occur subsequent to foreclosure. Foreclosed assets are carried net of the related reserve. Operating results from real estate owned, including rental income, operating expenses, and gains and losses realized from the sales of real estate owned, are recorded as incurred. There were no changes to the valuation techniques for fair value measurements during the years ended December 31, 2022 and 2021. The following tables present the assets and liabilities reported on the consolidated statements of financial condition at their fair value as of December 31, 2022 and 2021, by level within the fair value hierarchy (in thousands). Other Fair Value Disclosures The Company is required to disclose estimated fair value of financial instruments, both assets and liabilities on and off the balance sheet, for which it is practicable to estimate fair value. The following is a description of valuation methodologies used for those assets and liabilities. For cash and due from banks, federal funds sold and short- term investments, the carrying amount approximates fair value. Included in cash and cash equivalents at December 31, 2022 and December 31, 2021 was $ 70, 000 and $ 27. 3 million, respectively, representing cash collateral pledged to secure loan level swaps, risk participation agreements and reserves required by banking regulations. Held to Maturity Debt Securities, Net of Allowance for Credit Losses For held to maturity debt securities, fair value was estimated using a market approach. The majority of the Company's securities are fixed income instruments that are not quoted on an exchange, but are traded in active markets. Prices for these instruments are obtained through third party data service providers or dealer market participants with whom the Company has historically transacted both purchases and sales of securities. Prices obtained from these sources include market quotations and matrix pricing. Matrix pricing, a Level 2 input, is a mathematical technique used principally to value certain securities to benchmark to comparable securities. Management evaluates the quality of Level 2 matrix pricing through comparison to similar assets with greater liquidity and evaluation of projected cash flows. As management is responsible for the determination of fair value, it performs quarterly analyses on the prices received from the pricing service to determine whether the prices are reasonable estimates of fair value. Specifically, management compares the prices received from the pricing service to a secondary pricing source. Additionally, management compares changes in the reported market values and returns to relevant market indices to test the reasonableness of the reported prices. The Company's internal price verification procedures and review of fair value methodology documentation provided by independent pricing services has generally not resulted in adjustment in the prices obtained from the pricing service. The Company also holds debt instruments issued by the U. S. government and U. S. government agencies that are traded in active markets with readily accessible quoted market prices that are considered Level 1 within the fair value hierarchy. FHLBNY Stock The carrying value of FHLBNY stock is its cost. The fair value of FHLBNY stock is based on redemption at par value. The Company classifies the estimated fair value as Level 1 within the fair value hierarchy. Fair values are estimated for portfolios of loans with similar financial characteristics. Loans are segregated by type such as commercial mortgage, residential mortgage, commercial, construction and consumer. Each loan category is further segmented into fixed and adjustable rate interest terms and into performing and non- performing categories. The fair value of performing loans was estimated using a combination of techniques, including a discounted cash flow model that utilizes a discount rate that reflects the Company's current pricing for loans with similar characteristics and remaining maturity, adjusted by an amount for estimated credit losses inherent in the portfolio at the balance sheet date (i. e. exit pricing). The rates take into account the expected yield curve, as well as an adjustment for prepayment risk, when applicable. The Company classifies the estimated fair value of its loan portfolio as Level 3. The fair value for significant non- performing loans was based on recent external appraisals of collateral securing such loans, adjusted for the timing of anticipated cash flows. The Company classifies the estimated fair value of its non- performing loan portfolio as Level 3. The fair value of deposits with no stated maturity, such as non- interest bearing demand deposits and savings deposits, was equal to the amount payable on demand and classified as Level 1. The estimated fair value of certificates of deposit was based on the discounted value of contractual cash flows. The discount rate was estimated using the Company's current rates offered for deposits with similar remaining maturities. The Company classifies the estimated fair value of its certificates of deposit portfolio as Level 2. The fair value of borrowed funds was estimated by discounting future cash flows using rates available for debt with similar terms and maturities and is classified by the Company as Level 2 within the fair value hierarchy. Commitments to Extend Credit and Letters of Credit The fair value of commitments to extend credit and letters of credit was estimated using the fees currently charged to enter into similar agreements, taking into account the remaining terms of the agreements and the present creditworthiness of the counterparties. For fixed rate loan commitments, fair value also considers the difference between current levels of interest rates and the committed rates. The Company classifies these commitments as Level 3 within the fair value hierarchy. Fair value estimates are made at a specific point in time, based on relevant market information and information about the financial instrument. These estimates do not reflect any premium or discount that could result from offering for sale at one time the Company's entire holdings of a particular financial instrument. Because no market exists for a significant portion of the Company's financial instruments, fair value estimates are based on judgments regarding future expected loss experience, current economic conditions, risk characteristics of various financial instruments, and other factors. These estimates are subjective in nature and involve uncertainties and matters of significant judgment and, therefore, cannot be determined with precision. Changes in assumptions could significantly affect the estimates. Fair value estimates are based on existing on- and off- balance sheet financial instruments without attempting to estimate the value of anticipated future business and the value of assets and liabilities that are not considered financial instruments. Significant assets and liabilities that are not considered financial assets or liabilities include goodwill and other intangibles, deferred tax assets and premises and equipment. In addition, the tax ramifications related to the realization of the unrealized gains and losses can have a significant effect on fair value estimates and have not been considered in the estimates. The following tables present the Company's financial instruments at their carrying and fair values as of December 31, 2022 and December 31, 2021. Fair values are presented by level within the fair value hierarchy. See Note 13. Benefit Plans (22) Derivative and Hedging Activities The Company is exposed to certain risks arising from both its business operations and economic conditions. The Company principally manages its exposures to a wide variety of business and operational risks through the management of its core business activities. The Company manages economic risks, including interest rate, liquidity, and credit risk, primarily by managing the amount, sources, and duration of its assets and liabilities. Non- designated Hedges. Derivatives not designated in qualifying hedging relationships are not speculative and result from a service the Company provides to certain qualified commercial borrowers in loan related transactions which, therefore, are not used to manage interest rate risk in the Company's assets or liabilities. The Company may execute interest rate swaps with qualified commercial banking customers to facilitate their respective risk management strategies. Those interest rate swaps are simultaneously hedged by offsetting interest rate swaps that the Company executes with a third party, such that the Company minimizes its net risk exposure resulting from such transactions. The interest rate swap agreement which the Company executes with the commercial borrower is collateralized by the borrower's commercial real estate financed by the Company. As the Company has not elected to apply hedge accounting and these interest rate swaps do not meet the hedge accounting requirements, changes in the fair value of both the customer swaps and the offsetting swaps are recognized directly in earnings. At December 31, 2022 and 2021, the Company had 162 and 166 interest rate swaps with an aggregate notional amount of $ 2. 40 billion and $ 2. 38 billion, respectively. The Company periodically enters into risk participation agreements (" RPAs"), with the Company functioning as either the lead institution, or as a participant when another company is the lead institution on a commercial loan. These RPAs are entered into to manage the credit exposure on interest rate contracts associated with these loan participation agreements. Under the RPAs, the Company will either receive or make a payment in the event the borrower defaults on the related interest rate contract. The Company has minimum collateral posting thresholds with certain of its risk participation counterparties, and has posted collateral of $ 70, 000 against the potential risk of default by the borrower under these agreements. At December 31, 2022 and 2021, the Company had 14 and 13 credit derivatives, respectively, with aggregate notional amounts of $ 157. 9 million and $ 144. 8 million, respectively, from participations in interest rate swaps as part of these loan participation arrangements. At December 31, 2022, the asset and liability positions of these fair value credit derivatives totaled $ 26, 000 and $ 12, 000, respectively, compared to $ 109, 000 and $ 46, 000, respectively, at December 31, 2021. Cash Flow Hedges of Interest Rate Risk. The Company's objective in using interest rate derivatives is to add stability to interest expense and to manage its exposure to interest rate movements. To accomplish this objective, the Company primarily uses interest rate swaps as part of its interest rate risk management strategy. Interest rate swaps designated as cash flow hedges involve the receipt of variable payment amounts from a counterparty in exchange for the Company making fixed- rate payments over the life of the agreements without exchange of the underlying notional amount. Changes in the fair value of derivatives designated and that qualify as cash flow hedges of interest rate risk are recorded in accumulated other comprehensive income and are subsequently reclassified into earnings in the period that the hedged forecasted transaction affects earnings. During the years ended December 31, 2022, 2021 and 2020, such derivatives were used to hedge the variable cash outflows associated with FHLBNY borrowings and brokered demand deposits. Amounts reported in accumulated other comprehensive income related to derivatives will be reclassified to interest expense as interest payments are made on the Company's borrowings or demand deposits. During the next twelve months, the Company estimates that $ 15. 6 million will be reclassified as a reduction to interest expense. As of December 31, 2022, the Company had 11 outstanding interest rate derivatives with an aggregate notional amount of $ 460. 0 million that was designated as a cash flow hedge of interest rate risk. Assets and liabilities relating to certain financial instruments, including derivatives, may be eligible for offset in the Consolidated Statements of Financial Condition and / or subject to enforceable master netting arrangements or similar agreements. The Company does not offset asset and liabilities under such arrangements in the Consolidated Statements of Financial Condition. The tables below present a gross presentation, the effects of offsetting, and a net presentation of the Company's financial instruments that are eligible for offset in the Consolidated Statements of Condition at December 31, 2022 and December 31, 2021 (in thousands). The application of the cash collateral cannot reduce the net derivative position below zero. Therefore, excess cash collateral, if any, is not reflected above. (2) The fair values related to interest rate products in the above net derivative tables show the total value of assets and liabilities, which include accrued interest receivable and accrued interest payable for the periods ended December 31, 2022 and December 31, 2021. The table below presents the effect of the Company's derivative financial instruments on the Consolidated Statements of Income for the years ended December 31, 2022, 2021 and 2020 (in thousands). Gain (loss) recognized in Income on derivativesFor the Year Ended December 31, Consolidated Statements of Income202220212020Derivatives not designated as a hedging instruments: Interest rate productsOther income $ 722 384 (950) Credit contractsOther income (49) 29 30 Total derivatives not designated as hedging instruments $ 673 413 (920) Derivatives designated as a hedging instruments: Loss (gain) recognized in Expense on derivativesInterest rate productsInterest (income) expense $ (4, 504) 3, 878 1, 741 Total derivatives designated as a hedging instruments $ (4, 504) 3, 878 1, 741 The Company has agreements with certain of its dealer counterparties which contain a provision that if the Company defaults on any of its indebtedness, including a default where repayment of the indebtedness has not been accelerated by the lender, then the Company could also be deemed in default on its derivative obligations. In addition, the Company has agreements with certain of its dealer counterparties which contain a provision that if the Company fails to maintain its status as a well or adequately capitalized institution, then the counterparty could terminate the derivative positions and the Company would be required to settle its obligations under the agreements. As of December 31, 2022, the Company had four dealer counterparties. The Company had a net asset position with respect to all of its counterparties. (23) Revenue Recognition The Company generates revenue from several business channels. The guidance in ASU 2014- 09, Revenue from Contracts with Customers (Topic 606) does not apply to revenue associated with financial instruments, including interest income on loans and investments, which comprise the majority of the Company's revenue. For the years ended December 31, 2022, 2021 and 2020 the out- of- scope revenue related to financial instruments were 84 %, 82 % and 83 % of the Company's total revenue, respectively. Revenue- generating activities that are within the scope of Topic 606, are components of non- interest income. These revenue streams can generally be classified into wealth management revenue, insurance agency income and banking service charges and other fees. The following table presents non- interest income, segregated by revenue streams in- scope and out- of- scope of Topic 606, for the years ended December 31, 2022, 2021 and 2020: December 31, (in- thousands) 202220212020Non- interest incomeIn- scope of Topic 606: Wealth management fees $ 27, 870 $ 30, 756 25, 733 Insurance agency income11, 440 10, 216 3, 513 Banking service charges and other fees: Service charges on deposit accounts12, 553 10, 921 10, 312 Debit card and ATM fees3, 124 5, 665 5, 974 Total banking service charges and other fees15, 677 16, 586 16, 286 Total in- scope non- interest income54, 987 57, 558 45, 532 Total out- of- scope non- interest income32, 802 29, 251 26, 899 Total non- interest income $ 87, 789 $ 86, 809 72, 431 Wealth management fee income represents fees earned from customers as consideration for asset management, investment advisory and trust services. The Company's performance obligation is generally satisfied monthly and the resulting fees are recognized monthly. The fee is generally based upon the average market value of the assets under management (" AUM") for the month and the applicable fee rate. The monthly accrual of wealth management fees is recorded in other assets on the Company's Consolidated Statements of Financial Condition. Fees are received from the customer on a monthly basis. The Company does not earn performance- based incentives. To a lesser extent, optional services such as tax return preparation and estate settlement are also available to existing customers. The Company's performance obligation for these transaction- based services are generally satisfied, and related revenue recognized, at either a point in time when the service is completed, or in the case of estate settlement, over a relatively short period of time, as each service component is completed. Insurance agency income, consisting of commissions and fees, is generally recognized as of the effective date of the insurance policy. Commission revenues related to installment billings are recognized on the invoice date. Subsequent commission adjustments are recognized upon the receipt of notification from insurance companies concerning matters necessitating such adjustments. Profit- sharing contingent commissions are recognized when determinable, which is generally when such commissions are received from insurance companies, or when the Company receives formal notification of the amount of such payments. Service charges on deposit accounts include overdraft service fees, account analysis fees and other deposit related fees. These fees are generally transaction- based, or time- based services. The Company's performance obligation for these services are generally satisfied, and revenue recognized, at the time the transaction is completed, or the service rendered. Fees for these services are generally received from the customer either at the time of transaction, or monthly. Debit card and ATM fees are generally transaction- based. Debit card revenue is primarily comprised of interchange fees earned when a customer's Company card is processed through a card payment network. ATM fees are largely generated when a Company cardholder uses a non- Company ATM, or a non- Company cardholder uses a Company ATM. The Company's performance obligation for these services is satisfied when the service is rendered. Payment is generally received at time of transaction or monthly. Out- of- scope non- interest income primarily consists of Bank- owned life insurance and net fees on loan level interest rate swaps, along with gains and losses on the sale of loans and foreclosed real estate, loan prepayment fees and loan servicing fees. None of these revenue streams are subject to the requirements of Topic 606. (24) Leases The following table represents the consolidated statements of financial condition classification of the Company's right- of use- assets and lease liabilities at December 31, 2022 and December 31, 2021 (in thousands): ClassificationDecember 31, 2022December 31, 2021Lease Right- of- Use Assets: Operating lease right- of- use assetsOther assets $ 60, 577 $ 48, 808 Lease Liabilities: Operating lease liabilitiesOther liabilities $ 63, 372 $ 50, 236 The calculated amount of the right- of- use assets and lease liabilities in the table above are impacted by the length of the lease term and the discount rate used to present value the minimum lease payments. The Company's lease agreements often include one or more options to renew at the Company's discretion. If at lease inception the Company considers the exercising of a renewal option to be reasonably certain, the Company will include the extended term in the calculation of the right- of- use asset and lease liability. Regarding the discount rate, Topic 842 requires the use of the rate implicit in the lease whenever this rate is readily determinable. As this rate is rarely determinable, the Company utilizes its incremental borrowing rate at lease inception based upon the term of the lease. For operating leases existing prior to January 1, 2019, the rate for the remaining lease term as of January 1, 2019 was applied. All of the leases in which the Company is the lessee are classified as operating leases and are primarily comprised of real estate property for branches and administrative offices with terms extending through 2040. At December 31, 2022, the weighted- average remaining lease term and the weighted- average discount rate for the Company's operating leases were 8. 7 years and 2. 56 %, respectively. The following table represents lease costs and other lease information for the Company's operating leases. The variable lease cost primarily represents variable payments such as common area maintenance and utilities (in thousands): Year ended December 31, 2022Year ended December 31, 2021Lease CostsOperating lease cost $ 10, 617 10, 074 Variable lease cost2, 722 2, 899 Total Lease Cost $ 13, 339 12, 973 Cash paid for amounts included in the measurement of lease liabilities (in thousands): Year ended December 31, 2022Year ended December 31, 2021Operating cash flows from operating leases $ 8, 665 9,

255 For the year ended December 31, 2022, the Company added one new lease obligation related to the Company's new administrative office location in Iselin, New Jersey. The Company recorded a $ 16. 0 million right- of- use asset and lease liability for this lease obligation. Future minimum payments for operating leases with initial or remaining terms of one year or more as of December 31, 2022 were as follows (in thousands): Operating LeasesYears ended: 2022 $ 9, 379 20239, 347 20248, 812 20257, 620 20266, 757 Thereafter28, 950 Total future minimum lease payments70, 865 Amounts representing interest7, 494 Present value of net future minimum lease payments $ 63, 372 Item 9. Changes in and Disagreements With Accountants on Accounting and Financial Disclosure None. Item 9A. Controls and Procedures Evaluation of Disclosure Controls and Procedures Anthony J. Labozzetta, the Company's Principal Executive Officer, and Thomas M. Lyons, the Company's Principal Financial Officer, conducted an evaluation of the effectiveness of the Company's disclosure controls and procedures (as defined in Rule 13a- 15 (e) and 15d- 15 (e) under the Securities Exchange Act of 1934, as amended) as of December 31, 2022. Based upon their evaluation, they each found that the Company's disclosure controls and procedures were effective as of that date. Management's Report on Internal Control Over Financial Reporting The management of the Company is responsible for establishing and maintaining adequate internal control over financial reporting. The Company's internal control system is a process designed to provide reasonable assurance to the Company's management and board of directors regarding the preparation and fair presentation of published financial statements. The Company's internal control over financial reporting includes policies and procedures that pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect transactions and dispositions of assets; provide reasonable assurances that transactions are recorded as necessary to permit preparation of financial statements in accordance with U. S. generally accepted accounting principles, and that receipts and expenditures are being made only in accordance with authorizations of management and the directors of the Company; and provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Company's assets that could have a material effect on its financial statements. All internal control systems, no matter how well designed, have inherent limitations. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to financial statement preparation and presentation. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate. Management assessed the effectiveness of the Company's internal control over financial reporting as of December 31, 2022. In making this assessment, we used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission in Internal Control- Integrated Framework (2013). Based on the assessment management believes that, as of December 31, 2022, the Company's internal control over financial reporting is effective based on those criteria. The Company's independent registered public accounting firm that audited the consolidated financial statements has issued an audit report on the effectiveness of the Company's internal control over financial reporting as of December 31, 2022. This report appears on page 70 of this Annual Report on Form 10- K. Changes in Internal Control Over Financial Reporting During the last quarter of the year under report, there was no change in the Company's internal control over financial reporting that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting. Labozzetta, certify that: 1. I have reviewed this Annual Report

on Form 10- K of Provident Financial Services, Inc.; 2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report; 3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report; 4. The registrant's other certifying officers and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a- 15 (e) and 15d- 15 (e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a- 15 (f) and 15d- 15 (f)) for the registrant and have: a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared; b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles; c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and 5. The registrant's other certifying officers and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of registrant's board of directors (or persons performing the equivalent functions): a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting. / s / ANTHONY J. LABOZZETTADate: March 1, 2023Anthony J. Labozzetta President and Chief Executive Officer EXHIBIT 31. 2 I, Thomas M. Lyons, certify that: a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to affect the registrant's ability to record, process, summarize and report financial information; and / s / THOMAS M. LYONSDate: March 1, 2023Thomas M. Lyons Senior Executive Vice President and Chief Financial Officer Exhibit 32 Certification pursuant to 18 U. S. C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes- Oxley Act of 2002 Anthony J. Labozzetta, President and Chief Executive Officer and Thomas M. Lyons, Senior Executive Vice President and Chief Financial Officer of Provident Financial Services, Inc. (the "Company") each certify in his capacity as an officer of the Company that he has reviewed the Annual Report of the Company on Form 10- K for the fiscal ended December 31, 2022 and that to the best of his knowledge: 1. the report fully complies with the requirements of Sections 13 (a) of the Securities Exchange Act of 1934; and 2. the information contained in the report fairly presents, in all material respects, the financial condition and results of operations. The purpose of this statement is solely to comply with Title 18, Chapter 63, Section 1350 of the United States Code, as amended by Section 906 of the Sarbanes- Oxley Act of 2002. / s / ANTHONY J. Details Name: pfs_InterestExpenseBorrowedFunds Namespace Prefix: pfs_ Data Type: xbrli: monetaryItemType Balance Type: debit Period Type: durationX- DefinitionInterest income on federal funds sold. Federal funds sold represent the excess federal funds held by one commercial bank which it lends to another commercial bank, usually at an agreed- upon (federal funds) rate of interest. Such loans are made for legal reserve requirement purposes of the borrowing bank and generally are of short- duration (overnight). Also include interest income on other investments not otherwise specified in the taxonomy that will be realized in a short period of time, usually less than one year or the normal operating cycle, whichever is longer. Details Name: pfs_TransferFromLoansToForeclosedAssets Namespace Prefix: pfs_ Data Type: xbrli: monetaryItemType Balance Type: debit Period Type: durationX- DefinitionThe sum of the periodic adjustments of the differences between securities' face values and purchase prices that are charged against earnings. This is called accretion if the security was purchased at a discount and amortization if it was purchased at a premium. As a noncash item, this element is an adjustment to net income when calculating cash provided by or used in operations using the indirect method. (the " Company "), Provident Bank (the " Bank ") and their wholly owned subsidiaries. All intercompany balances and transactions have been eliminated in consolidation. Certain reclassifications have been made in the consolidated financial statements to conform with current year classifications. BusinessThe Company, through the Bank, provides a full range of banking services to individual and business customers through branch offices in New Jersey, Queens and Nassau Counties, New York and eastern Pennsylvania. The Bank is subject to competition from other financial institutions and to the regulations of certain federal and state agencies, and undergoes periodic examinations by those regulatory authorities. Basis of Financial Statement PresentationThe consolidated financial statements of the Company have been prepared in conformity with U. S. generally accepted accounting principles (" GAAP "). In preparing the consolidated financial statements, management is required to make estimates and assumptions about future events. These estimates and the underlying assumptions affect the reported amounts of assets and liabilities and disclosures about contingent assets and liabilities as of the dates of the consolidated statements of financial condition, and revenues and expenses for the periods then ended. Such estimates are used in connection with the determination of the allowance for credit losses, evaluation of goodwill for impairment, evaluation of the need for valuation allowances on deferred tax assets, and determination of liabilities related to retirement and other post- retirement benefits, among others. These estimates and assumptions are based on management' s best estimates and judgment. Management evaluates its estimates and assumptions on an ongoing basis using historical experience and other factors, including the currently forecasted economic environment, which management believes to be reasonable under the circumstances. Such estimates and assumptions are adjusted when facts and circumstances dictate. As future events and their effects cannot be determined with precision, actual results could differ significantly from these estimates. Changes in estimates will be reflected in the financial statements in future periods. Cash and Cash EquivalentsFor purposes of reporting cash flows, cash and cash equivalents include cash and due from banks, Federal funds sold and commercial paper with original maturity dates less than 90 days. SecuritiesSecurities include held to maturity debt securities and available for sale debt securities. The available for sale debt securities portfolio is carried at estimated fair value, with any unrealized gains or losses, net of taxes, reported as accumulated other comprehensive income or loss in Stockholders' Equity. Estimated fair values are provided by reputable and widely used pricing services who maintain pricing methodologies appropriate for varying security classes using valuation techniques that are in accordance with U. S. GAAP. Securities which the Company has the positive intent and ability to hold to maturity are classified as held to maturity debt securities and carried at amortized cost. On January 1, 2020, the Company adopted CECL which replaces the incurred loss methodology with an expected loss methodology. Management measures expected credit losses on held to maturity debt securities on a collective basis by security type. Management classifies the held to maturity debt securities portfolio into the following security types: • Agency obligations; • Mortgage- backed securities; • State and municipal obligations; and • Corporate obligations. All of the agency obligations held by the Company are issued by U. S. government entities and agencies. These securities are either explicitly or implicitly guaranteed by the U. S. government, are highly rated by major rating agencies and have a long history of no credit losses. The majority of the state and municipal, and corporate obligations carry no lower than A ratings from the rating agencies at December 31, 2022 and the Company had one security rated with a triple- B by Moody' s Investors Service. Premiums on securities are amortized into income using a method that approximates the interest method over the remaining period to the earliest call date or contractual maturity, adjusted for anticipated prepayments. Discounts on securities are accreted into income over the remaining period to the contractual maturity, adjusted for anticipated prepayments. Interest income is recognized on an accrual basis, while dividend income is recognized when earned. Realized gains and losses are recognized when securities are sold or called based on the specific identification method. Equity SecuritiesThe Company holds equity securities that are traded in active markets with readily determinable fair value using quoted market prices. Fair Value of Financial InstrumentsGAAP establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements). A financial instrument' s level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. Federal Home Loan Bank of New York StockThe Bank, as a member of the Federal Home Loan Bank of New York (" FHLBNY "), is required to hold shares of capital stock of the FHLBNY at cost based on a specified formula. The Bank carries this investment at cost, which approximates fair value. LoansLoans receivable are carried at unpaid principal balances plus unamortized premiums, purchase accounting mark- to- market adjustments, certain deferred direct loan origination costs and deferred loan origination fees and discounts, less the allowance for credit losses. The Bank defers loan origination fees and certain direct loan origination costs and accretes or amortizes such amounts as an adjustment to the yield over the contractual lives of the related loans using the interest method. Premiums and discounts on loans purchased are amortized or accreted as an adjustment of yield over the contractual lives of the related loans, adjusted for prepayments when applicable, using methodologies using the effective interest method. Loans are generally placed on non- accrual status when they are past due 90 days or more as to contractual obligations or when other circumstances indicate that collection is questionable. When a loan is placed on non- accrual status, any interest accrued but not received is reversed against interest income. Payments received on a non- accrual loan are either applied to the outstanding principal balance or recorded as interest income, depending on an assessment of the ability to collect the loan. A non- accrual loan is restored to accrual status when principal and interest payments become less than 90 days past due and its future collectability is reasonably assured. An impaired loan is defined as a loan for which it is probable, based on current information, that the Bank will not collect all amounts due under the contractual terms of the loan agreement. Impaired loans are individually assessed to determine that each loan' s carrying value is not in excess of the fair value of the related collateral or the present value of the expected future cash flows. Residential mortgage and consumer loans are deemed smaller balance homogeneous loans which are evaluated collectively for impairment and are therefore excluded from the population of impaired loans. Purchased credit deteriorated (" PCD ") loans are loans acquired that have experienced more than- insignificant deterioration in credit quality since origination. Allowance for Credit Losses on LoansOn January 1, 2020, the Company adopted ASU 2016- 13," Measurement of Credit Losses on Financial Instruments, " which replaced the incurred loss methodology with the current expected credit loss (" CECL ") methodology. The allowance for credit losses is a valuation account that reflects management' s evaluation of the current expected credit losses in the loan portfolio. The Company maintains the allowance for credit losses through provisions for credit losses that are charged to income. Charge- offs against the allowance for credit losses are taken on loans where management determines that the collection of loan principal and interest is unlikely. Recoveries made on loans that have been charged- off are credited to the allowance for credit losses. The calculation of the allowance for credit losses is a critical accounting policy of the Company. Management estimates the allowance balance using relevant available information, from internal and external sources, related to past events, current conditions, and a reasonable and supportable forecast. Historical credit loss experience for both the Company and peers provides the basis for the estimation of expected credit losses, where observed credit losses are converted to probability of default rate (" PDR ") curves through the use of segment- specific loss given default (" LGD ") risk factors that convert default rates to loss severity based on industry- level, observed relationships between the two variables for each segment, primarily due to the nature of the underlying collateral. These risk factors were assessed for reasonableness against the Company' s own loss experience and adjusted in certain cases when the relationship between the Company' s historical default and loss severity deviates from that of the wider industry. The historical PDR curves, together with corresponding economic conditions, establish a quantitative relationship between economic conditions and loan performance through an economic cycle. Using the historical relationship between economic conditions and loan performance, management' s expectation of future loan performance is incorporated using an externally developed economic forecast. This forecast is applied over a period that management has determined to be reasonable and supportable. Beyond the period over which management can develop or source a reasonable and supportable forecast, the model will revert to long- term average economic conditions using a straight- line, time- based methodology. The Company's current forecast period is six quarters, with a four quarter reversion period to historical average macroeconomic factors. The Company's economic forecast is approved by the Company's Asset- Liability Committee. The allowance for credit losses is measured on a collective (pool) basis, with both a quantitative and qualitative analysis that is applied on a quarterly basis, when similar risk characteristics exist. The respective quantitative allowance for each loan segment is measured using an econometric, discounted PDR / LGD modeling methodology in which distinct, segment- specific multi- variate regression models are applied to an external economic forecast. Under the discounted cash flows methodology, expected credit losses are estimated over the effective life of the loans by measuring the difference between the net present value of modeled cash flows and amortized cost basis. Contractual cash flows over the contractual life of the loans are the basis for modeled cash flows, adjusted for modeled defaults and expected prepayments and discounted at the loan- level effective interest rate. The contractual term excludes expected extensions, renewals and modifications unless either of the following applies at the reporting date: management has a reasonable expectation that a troubled debt restructuring (" TDR ") will be executed with an individual borrower; or when an extension or renewal option is included in the original contract and is not unconditionally cancellable by the Company. Management will assess the likelihood of an option being exercised by any given borrower and appropriately extend the maturity of the portfolio for modeling purposes. The Company considers qualitative adjustments to credit loss estimates for information not already captured in the quantitative component of the loss estimation process. Qualitative factors are based on portfolio concentration levels, model imprecision, changes in industry conditions, changes in the Company' s loan review process, changes in the Company' s loan policies and procedures, and economic forecast uncertainty. Portfolio segment is defined as the level at which an entity develops and documents a systematic methodology to determine its allowance for credit losses. Management developed segments for estimating loss based on type of borrower and collateral which is generally based upon federal call report segmentation. The segments have been established as needed to ensure loans of similar risk profiles are appropriately pooled. As of December 31, 2022, the portfolio and class segments for the Company' s loan portfolio were: • Mortgage Loans – Residential, Commercial Real Estate, Multi- Family and Construction • Commercial Loans – Commercial Owner Occupied and Commercial Non- Owner Occupied • Consumer Loans – First Lien Home Equity and Other ConsumerThe allowance for credit losses on loans individually evaluated are identified through the Company' s normal loan monitoring process. This process includes the review of delinquent and problem loans at the Company' s Delinquency, Credit, Credit Risk Management and Allowance Committees; or which may be identified through the Company' s loan review process. Generally, the Company only evaluates loans individually for specific reserves if the loan is non- accrual, non- homogeneous and the balance is at least $ 1. 0 million, or if the loan was modified as a TDR. For all classes of loans deemed collateral- dependent, the Company estimates expected credit losses based on the fair value of the collateral less any selling costs. If the loan is not collateral dependent, the allowance for credit losses related to individually assessed loans is based on discounted expected cash flows using the loan' s initial effective interest rate. A loan for which the terms have been modified resulting in a concession by the Company, and for which the borrower is experiencing financial difficulties is considered to be a TDR. The allowance for credit losses on a TDR is measured using the same method as all other impaired loans, except that the original interest rate is used to discount the expected cash flows, not the rate specified within the restructuring. For loans acquired that have experienced more- than- insignificant deterioration in credit quality since their origination are considered Purchased Credit Deteriorated (" PCD") loans. The Company evaluates acquired loans for deterioration in credit quality based on any of, but not limited to, the following: (1) non- accrual status; (2) troubled debt restructured designation; (3) risk ratings of special mention, substandard or doubtful; (4) watchlist credits; and (5) delinquency status, including loans that are current on acquisition date, but had been previously delinquent. At the acquisition date, an estimate of expected credit losses is made for groups of PCD loans with similar risk characteristics and individual PCD loans without similar risk characteristics. Subsequent to the acquisition date, the initial allowance for credit losses on PCD loans will increase or decrease based on future evaluations, with changes recognized in the provision for credit losses. Management believes the primary risks inherent in the portfolio are a general decline in the economy, a decline in real estate market values, rising unemployment or a protracted period of elevated unemployment, increasing vacancy rates in commercial investment properties and possible increases in interest rates in the absence of economic improvement. Any one or a combination of these events may adversely affect borrowers' ability to repay the loans, resulting in increased delinquencies, credit losses and higher levels of provisions. Management considers it important to maintain the ratio of the allowance for credit losses to total loans at an acceptable level given current and forecasted economic conditions, interest rates and the composition of the portfolio. Although management believes that the Company has established and maintained the allowance for credit losses at appropriate levels, additions may be necessary if future economic and other conditions differ substantially from the current operating environment and economic forecast. Management evaluates its estimates and assumptions on an ongoing basis giving consideration to forecasted economic factors, historical loss experience and other factors. Such estimates and assumptions are adjusted when facts and circumstances dictate. As future events and their effects cannot be determined with precision, actual results could differ significantly from these estimates. Changes in estimates resulting from continuing changes in the economic environment will be reflected in the financial statements in future periods. In addition, various

regulatory agencies periodically review the adequacy of the Company's allowance for credit losses as an integral part of their examination process. Such agencies may require the Company to recognize additions to the allowance or additional write- downs based on their judgments about information available to them at the time of their examination. Although management uses the best information available, the level of the allowance for credit losses remains an estimate that is subject to significant judgment and short- term change. The CECL approach to calculate the allowance for credit losses on loans is significantly influenced by the composition, characteristics and quality of the Company's loan portfolio, as well as the prevailing economic conditions and forecast utilized. Material changes to these and other relevant factors creates greater volatility to the allowance for credit losses, and therefore, greater volatility to the Company's reported earnings. Management considers different economic scenarios that may impact the allowance for credit losses on loans. Among other balance sheet and income statement changes, these scenarios could result in a significant increase to the allowance for credit losses on loans. These scenarios include both the quantitative and qualitative components of the model and demonstrate how sensitive the allowance can be to key assumptions underlying the overall calculation. To the extent actual losses are higher than management estimates, additional provision for credit losses on loans could be required and could adversely affect our earnings or financial position in future periods. See Note 7 to the Consolidated Financial Statements for more information on the allowance for credit losses on loans. Foreclosed AssetsAssets acquired through foreclosure or deed in lieu of foreclosure are carried at the lower of the outstanding loan balance at the time of foreclosure or fair value, less estimated costs to sell. Fair value is generally based on recent appraisals. When an asset is acquired, the excess of the loan balance over fair value, less estimated costs to sell, is charged to the allowance for credit losses. A reserve for foreclosed assets may be established to provide for possible write- downs and selling costs that occur subsequent to foreclosure. Foreclosed assets are carried net of the related reserve. Operating results from real estate owned, including rental income, operating expenses, and gains and losses realized from the sales of real estate owned, are recorded as incurred. Banking Premises and EquipmentLand is carried at cost. Banking premises, furniture, fixtures and equipment are carried at cost, less accumulated depreciation, computed using the straight- line method based on their estimated useful lives. Leasehold improvements, carried at cost, net of accumulated depreciation, are amortized over the terms of the leases or the estimated useful lives of the assets, whichever are shorter, using the straight- line method. Maintenance and repairs are charged to expense as incurred. Income TaxesThe Company uses the asset and liability method of accounting for income taxes. Under this method, deferred tax assets and liabilities are recognized for the estimated future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates in effect for the year in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in tax expense in the period that includes the enactment date. Deferred tax assets and liabilities are reported as a component of Other Assets on the Consolidated Statements of Financial Condition. The determination of whether deferred tax assets will be realizable is predicated on estimates of future taxable income. Such estimates are subject to management's judgment. A valuation reserve is established when management is unable to conclude that it is more likely than not that it will realize deferred tax assets based on the nature and timing of these items. The Company recognizes, when applicable, interest and penalties related to unrecognized tax benefits in the provision for income taxes. Trust AssetsTrust assets consisting of securities and other property (other than cash on deposit held by the Bank in fiduciary or agency capacities for customers of the Bank's wholly owned subsidiary, Beacon) are not included in the accompanying consolidated statements of financial condition because such properties are not assets of the Bank. Intangible AssetsIntangible assets of the Bank consist of goodwill, core deposit premiums, customer relationship premium and mortgage servicing rights. Goodwill represents the excess of the purchase price over the estimated fair value of identifiable net assets acquired through purchase acquisitions. In accordance with GAAP, goodwill with an indefinite useful life is not amortized, but is evaluated for impairment on an annual basis, or more frequently if events or changes in circumstances indicate potential impairment between annual measurement dates. As permitted by GAAP, the Company prepares a qualitative assessment in determining whether goodwill may be impaired. The factors considered in the assessment include macroeconomic conditions, industry and market conditions and overall financial performance of the Company, among others. The Company completed its annual qualitative assessment of goodwill as of July 1, 2022. Based upon its assessment of goodwill, the Company concluded that no further quantitative analysis was warranted. Core deposit premiums represent the intangible value of depositor relationships assumed in previous purchase acquisitions and are amortized on an accelerated basis over 8. 8 years, while the core deposit premium related to SB One is amortized over its estimated useful life of 10. 0 years. Customer relationship premiums represent the intangible value of customer relationships assumed in the purchase acquisitions of Beacon Trust Company (" Beacon"), The MDE Group, Inc. (" MDE"), Tirschwell & Loewy, Inc. (" T & L"), and SB One Bank and are amortized on an accelerated basis over 12. 0 years, 10. 4 years, 10. 0 years, and 13. 0 years, respectively. Mortgage servicing rights are recorded when purchased or when originated mortgage loans are sold, with servicing rights retained. Mortgage servicing rights are amortized on an accelerated method based upon the estimated lives of the related loans, adjusted for prepayments. Mortgage servicing rights are carried at the lower of amortized cost or fair value. Bank- owned Life InsuranceBank- owned life insurance is accounted for using the cash surrender value method and is recorded at its realizable value. Employee Benefit PlansThe Bank maintains a pension plan which covers full- time employees hired prior to April 1, 2003, the date on which the pension plan was frozen. The Bank's policy is to fund at least the minimum contribution required by the Employee Retirement Income Security Act of 1974. GAAP requires an employer to: (a) recognize in its statement of financial condition the over- funded or under- funded status of a defined benefit postretirement plan measured as the difference between the fair value of plan assets and the benefit obligation; (b) measure a plan's assets and its obligations that determine its funded status at the end of the employer's fiscal year (with limited exceptions); and (c) recognize as a component of other comprehensive income, net of tax, the actuarial gains and losses and the prior service costs and credits that arise during the period. The Bank has a 401 (k) plan covering substantially all employees of the Bank. The Bank may match a percentage of the first 6 % contributed by participants. The Bank's matching contribution, if any, is determined by the Board of Directors in its sole discretion. The Bank has an Employee Stock Ownership Plan (" ESOP "). The funds borrowed by the ESOP from the Company to purchase the Company's common stock are being repaid from the Bank's contributions and dividends paid on unallocated ESOP shares over a period of up to 30 years. The Company's common stock not allocated to participants is recorded as a reduction of stockholders' equity at cost. Compensation expense for the ESOP is based on the average price of the Company's stock during each quarter and the amount of shares allocated during the quarter. The Bank has an Equity Plan designed to provide competitive compensation for demonstrated performance and to align the interests of participants directly to increases in shareholder value. The Equity Plan provides for performance- vesting grants as well as time- vesting grants. Time- vesting stock awards, stock options and performance vesting stock awards that are based on a performance condition, such as return on average assets, are valued on the closing stock price on the date of grant. Performance- vesting stock awards and options that are based on a market condition, such as total shareholder return, would be valued using a generally accepted statistical technique to simulate future stock prices for Provident and the components of the peer group which Provident would be measured against. Expense related to time- vesting stock awards and stock options is based on the fair value of the common stock on the date of the grant and on the fair value of the stock options on the date of the grant, respectively, and is recognized ratably over the vesting period of the awards. Performance vesting stock awards and stock options are either dependent upon a market condition or a performance condition. A market condition performance metric is tied to a stock price, either on an absolute basis, or a relative basis against peers, while a performance- condition is based on internal operations, such as earnings per share. The expense related to a market condition performance- vesting stock award or stock option requires an initial Monte Carlo simulation to determine grant date fair value, which will be recognized as a compensation expense regardless of actual payout, assuming that the executive is still employed at the end of the requisite service period. If pre- vesting termination (forfeiture) occurs, then any expense recognized to date can be reversed. The grant date fair value is recognized ratably over the performance period. The expense related to a performance condition stock award or stock option is based on the fair value of the award on the date of grant, adjusted periodically based upon the number of awards or options expected to be earned, recognized over the performance period. In connection with the First Sentinel acquisition in July 2004, the Company assumed the First Savings Bank Directors' Deferred Fee Plan (the " DDFP "). The DDFP was frozen prior to the acquisition. The Company recorded a deferred compensation equity instrument and corresponding contra- equity account for the value of the shares held by the DDFP at the July 14, 2004 acquisition date. These accounts will be liquidated as shares are distributed from the DDFP in accordance with the plan document. At December 31, 2022, there were 104, 129 shares held by the DDFP. The Bank maintains a non- qualified plan that provides supplemental benefits to certain executives who are prevented from receiving the full benefits contemplated by the 401 (k) Plan's and the ESOP's benefit formulas under tax law limits for tax- qualified plans. Post- retirement Benefits Other Than PensionsThe Bank provides post- retirement health care and life insurance plans to certain of its employees. The life insurance coverage is noncontributory to the participant. Participants contribute to the cost of medical coverage based on the employee's length of service with the Bank. The costs of such benefits are accrued based on actuarial assumptions from the date of hire to the date the employee is fully eligible to receive the benefits. On December 31, 2002, the Bank eliminated postretirement healthcare benefits for employees with less than 10 years of service. GAAP requires an employer to: (a) recognize in its statement of financial condition the over- funded or under- funded status of a defined benefit post- retirement plan measured as the difference between the fair value of plan assets and the benefit obligation; (b) measure a plan's assets and its obligations that determine its funded status as of the end of the employer's fiscal year (with limited exceptions); and (c) recognize as a component of other comprehensive income, net of tax, the actuarial gains and losses and the prior service costs and credits that arise during the period. DerivativesThe Company records all derivatives on the statements of financial condition at fair value. The accounting for changes in the fair value of derivatives depends on the intended use of the derivative, whether the Company has elected to designate a derivative in a hedging relationship and apply hedge accounting and whether the hedging relationship has satisfied the criteria necessary to apply hedge accounting. The Company has interest rate derivatives resulting from a service provided to certain qualified borrowers in a loan related transaction which, therefore, are not used to manage interest rate risk in the Company's assets or liabilities. As such, all changes in fair value of the Company's derivatives are recognized directly in earnings. The Company also uses interest rate swaps as part of its interest rate risk management strategy. Interest rate swaps designated as cash flow hedges, and which satisfy hedge accounting requirements, involve the receipt of variable amounts from a counterparty in exchange for the Company making fixed- rate payments over the life of the agreements without the exchange of the underlying notional amount. These derivatives were used to hedge the variable cash outflows associated with FHLBNY borrowings and brokered demand deposits. The change in the fair value of these derivatives is recorded in accumulated other comprehensive income, and is subsequently reclassified into earnings in the period that the hedged forecasted transaction affects earnings. Comprehensive IncomeComprehensive income is divided into net income and other comprehensive income (loss). Other comprehensive income (loss) includes items previously recorded directly to equity, such as unrealized gains and losses on available for sale debt securities, unrealized gains and losses on derivatives that are designated as cash flow hedges and amortization related to post- retirement obligations. Comprehensive income is presented in a separate Consolidated Statement of Comprehensive Income. Segment ReportingThe Company's operations are solely in the financial services industry and include providing traditional banking and other financial services to its customers. The Company operates primarily in the geographical regions of northern and central New Jersey, Queens County, New York and eastern Pennsylvania. The Company has a single reporting segment for financial reporting purposes. Earnings Per ShareBasic earnings per share is computed by dividing income available to common stockholders by the weighted average number of shares outstanding for the period. Diluted earnings per share reflects the potential dilution that could occur if securities or other contracts to issue common stock (such as stock options) were exercised or resulted in the issuance of common stock. These potentially dilutive shares would then be included in the weighted average number of shares outstanding for the period using the treasury stock method. Shares issued and shares reacquired during the period are weighted for the portion of the period that they were outstanding. Impact of Recent Accounting PronouncementsAccounting Pronouncements Not Yet AdoptedIn March 2022, the Financial Accounting Standards Board (" FASB") issued Accounting Standards Update (" ASU") 2022- 02," Financial Instruments- Credit Losses (Topic 326): Troubled Debt Restructurings and Vintage Disclosures," which addresses areas identified by the FASB as part of its post- implementation review of the credit losses standard (ASU 2016- 13) that introduced the CECL model. The amendments eliminate the accounting guidance for troubled debt restructurings by creditors that have adopted the CECL model and enhance the disclosure requirements for loan refinancing and restructurings made with borrowers experiencing financial difficulty. In addition, the amendments require a public business entity to disclose current- period gross write- offs for financing receivables and net investment in leases by year of origination in the vintage disclosures. For entities that have adopted ASU 2016- 13, ASU 2022- 02 is effective for fiscal years beginning after December 15, 2022, including interim periods within those fiscal years. Early adoption is permitted if an entity has adopted ASU 2016- 13. This standard is not expected to have a material financial impact on the Company's consolidated financial statements, but is expected to have a meaningful impact on our required disclosures in the Notes to our Consolidated Financial Statements. In March 2022, the FASB issued Accounting Standards Update (ASU) 2022- 01, Derivatives and Hedging (Topic 815): Fair Value Hedging – Portfolio Layer Method. The purpose of this updated guidance is to further align risk management objectives with hedge accounting results on the application of the last- of- layer method, which was first introduced in ASU 2017- 12, Derivatives and Hedging (Topic 815): Targeted Improvements to Accounting for Hedging Activities. ASU 2022- 01 is effective for public business entities for fiscal years beginning after December 15, 2022, with early adoption in the interim period, permitted. The Company adopted this standard on January 1, 2023 on a prospective basis; with no impact to the consolidated financial statements. In March 2020, the FASB issued ASU 2020- 04," Reference Rate Reform (Topic 848)," which provides optional expedients and exceptions for applying GAAP to loan and lease agreements, derivative contracts, and other transactions affected by the anticipated transition away from LIBOR toward new interest rate benchmarks. For transactions that are modified because of reference rate reform and that meet certain scope guidance (i) modifications of loan agreements should be accounted for by prospectively adjusting the effective interest rate and the modification will be considered" minor" so that any existing unamortized origination fees / costs would carry forward and continue to be amortized and (ii) modifications of lease agreements should be accounted for as a continuation of the existing agreement with no reassessments of the lease classification and the discount rate or re- measurements of the lease payments that otherwise would be required for modifications not accounted for as separate contracts. ASU 2020- 04 also provides numerous optional expedients for derivative accounting. ASU 2020- 04 is effective March 12, 2020 through December 31, 2022. An entity may elect to apply ASU 2020- 04 for contract modifications as of January 1, 2020, or prospectively from a date within an interim period that includes or is subsequent to March 12, 2020, up to the date that the financial statements are available to be issued. Once elected for a Topic or an Industry Subtopic within the Codification, the amendments in this ASU must be applied prospectively for all eligible contract modifications for that Topic or Industry Subtopic. The Company anticipates this ASU will simplify any modifications we execute between the selected start date (yet to be determined) and December 31, 2022 that are directly related to LIBOR transition by allowing prospective recognition of the continuation of the contract, rather than the extinguishment of the old contract resulting in writing off unamortized fees / costs. In addition, in January 2021 the FASB issued ASU No. 2021- 01 " Reference Rate Reform — Scope, " which clarified the scope of ASC 848 relating to contract modifications. In the fourth quarter of 2019 the Company formed, a cross- functional team to develop transition plans for the LIBOR transition to address potential revisions to documentation, as well as customer management and communication, internal

training, financial, operational and risk management implications, and legal and contract management. The working group is comprised of individuals from various functional areas including lending, risk management, finance and credit, among others. In addition, the Company has engaged with its regulators and with industry working groups and trade associations to develop strategies for transitioning away from LIBOR. In 2023, we expect LIBOR to be phased out as an interest rate benchmark in pricing assets or liabilities. We are not entering into any new agreements that reference LIBOR. Additionally, the Company is in the process of amending existing asset and liability contracts that reference LIBOR to reference a new benchmark rate. The Company is currently in the process of transitioning from LIBOR and plans to move to the Secured Overnight Financing Rate (" SOFR") for most type of transactions. This standard is not expected to have a material impact on the Company' s consolidated financial statements. In addition, in December 2022 the FASB issued ASU 2022- 06, " Reference Rate Reform (Topic 848,)" which provides optional guidance to ease the potential burden in account for (or recognizing the effects of) reference rate reform on financial reporting. The objective of the guidance is to provide temporary relief during the transition period away from LIBOR toward new interest rate benchmarks. The amendments in ASU 2022- 06 defer the sunset date provision from December 31, 2022 to December 31, 2024. ASU 2022- 06 was effective immediately upon issuance and is not expected to have an impact on the Company' s financial statements or disclosures. X- ReferencesNo definition available. The Company sold 59. 6 million shares of common stock (par value $ 0. 01 per share) at $ 10. 00 per share. The Company received net proceeds in the amount of $ 567. 2 million. In connection with the Bank' s commitment to its community, the plan of conversion provided for the establishment of a charitable foundation. Provident donated $ 4. 8 million in cash and 1. 92 million of authorized but unissued shares of common stock to the foundation, which amounted to $ 24. 0 million in aggregate. The Company recognized an expense, net of income tax benefit, equal to the cash and fair value of the stock during 2003. Conversion costs were deferred and deducted from the proceeds of the shares sold in the offering. Upon completion of the plan of conversion, a " liquidation account " was established in an amount equal to the total equity of the Bank as of the latest practicable date prior to the conversion. The liquidation account was established to provide a limited priority claim to the assets of the Bank to " eligible account holders " and " supplemental eligible account holders " as defined in the Plan, who continue to maintain deposits in the Bank after the conversion. In the unlikely event of a complete liquidation of the Bank, and only in such event, each eligible account holder and supplemental eligible account holder would receive a liquidation distribution, prior to any payment to the holder of the Bank' s common stock. This distribution would be based upon each eligible account holder' s and supplemental eligible account holder' s proportionate share of the then total remaining qualifying deposits. At December 31, 2022, the liquidation account, which is an off- balance sheet memorandum account, amounted to $ 7. 7 million. X- ReferencesNo definition available. Merger AgreementOn September 26, 2022, the Company, NL 239 Corp., a direct, wholly owned subsidiary of the Company (" Merger Sub "), and Lakeland Bancorp, Inc. entered into an Agreement and Plan of Merger (as may be amended, modified or supplemented from time to time in accordance with its terms, the " merger agreement "), pursuant to which Provident and Lakeland have agreed to combine their respective businesses. Under the merger agreement, Merger Sub will merge with and into Lakeland, with Lakeland as the surviving entity (the " merger "), and as soon as reasonably practicable following the merger, Lakeland will merge with and into the Company, with the Company as the surviving entity (the " holdco merger "). At a date and time following the holdco merger as determined by the Company, Lakeland Bank, a New Jersey state- chartered commercial bank and a wholly owned subsidiary of Lakeland (" Lakeland Bank "), will merge with and into Provident Bank, a New Jersey state- chartered savings bank and a wholly owned subsidiary of the Company (" Provident Bank "), with Provident Bank as the surviving bank (the " bank merger " and, together with the merger and the holdco merger, the " mergers "). The Company as the surviving institution will have approximately $ 25 billion in total assets and $ 20 billion in total deposits with banking locations across northern and central New Jersey and in surrounding areas of New York and Pennsylvania. In the merger, Lakeland shareholders will receive 0. 8319 of a share of the Company' s common stock for each share of Lakeland common stock they own. Based on the closing price of the Company' s common stock on the New York Stock Exchange on September 26, 2022, the last trading day before the public announcement of the merger, the exchange ratio represented approximately $ 19. 27 in value for each share of Lakeland common stock, representing a merger consideration of approximately $ 1. 3 billion on an aggregate basis. The Company has received stockholder approval to proceed with the merger at a special meeting of stockholders held on February 1, 2023. Lakeland has received shareholder approval to proceed with the merger at a special meeting of shareholders held on February 1, 2023. The completion of the merger remains subject to receipt of the requisite bank regulatory approvals and other customary closing conditions. SB One Bancorp Acquisition On July 31, 2020, the Company completed its acquisition of SB One Bancorp (" SB One"), which added $ 2. 20 billion to total assets, $ 1. 77 billion to total loans, which included PCD loans totaling $ 294. 2 million, and $ 1. 76 billion to total deposits, and added 18 full- service banking offices in New Jersey and New York. As part of the acquisition, the addition of Provident Protection Plus, Inc., formerly SB One Insurance Agency, Inc., resulted in expansion of commercial and personal insurance products. Under the merger agreement, each share of SB One common stock was exchanged for 1. 357 shares of the Company' s common stock. The Company issued 12. 8 million shares of common stock from treasury stock, plus cash in lieu of fractional shares in the acquisition of SB One. The total consideration paid in the acquisition of SB One was $ 180. 8 million. In connection with the acquisition, SB One Bank, a wholly owned subsidiary of SB One, was merged with and into Provident Bank, a wholly owned subsidiary of the Company. The acquisition was accounted for under the acquisition method of accounting. Under this method of accounting, the respective assets acquired and liabilities assumed were recorded at their estimated fair value. The excess of consideration paid over the estimated fair value of the net assets acquired totaled $ 23. 9 million and was recorded as goodwill. X- ReferencesNo definition available. All of the agency obligations held by the Company are issued by U. S. government entities and agencies. These securities are either explicitly or implicitly guaranteed by the U. S. government, are highly rated by major rating agencies and have a long history of no credit losses. The majority of the state and municipal, and corporate obligations carry no lower than A ratings from the rating agencies at December 31, 2022 and the Company had one security rated with a triple- B by Moody' s Investors Service. The Company adopted CECL using the prospective transition approach for debt securities for which other- than- temporary impairment had been recognized prior to January 1, 2020. As a result, the amortized cost basis remains the same before and after the effective date of CECL. The following tables present the amortized cost, gross unrealized gains, gross unrealized losses and the estimated fair value for held to maturity debt securities at December 31, 2022 and 2021 (in thousands): 2022 Amortizedcost GrossunrealizedgainsGrossunrealizedlossesFairvalueAgency obligations $ 9, 997 — (1, 033) 8, 964 State and municipal obligations366, 164 268 (13, 015) 353, 417 Corporate obligations11, 789 1 (703) 11, 087 $ 387, 950 269 (14, 751) 373, 468 2021 Amortizedcost GrossunrealizedgainsGrossunrealizedlossesFairvalueAgency obligations $ 9, 996 — (175) 9, 821 Mortgage- backed securities21 — — 21 State and municipal obligations415, 724 14, 463 (635) 429, 552 Corporate obligations10, 448 19 (152) 10, 315 $ 436, 189 14, 482 (962) 449, 709 The amortized cost and fair value of held to maturity debt securities at December 31, 2022 by contractual maturity are shown below (in thousands). Expected maturities may differ from contractual maturities due to prepayment or early call privileges of the issuer. 2022 Amortizedcost FairvalueDue in one year or less $ 20, 280 20, 188 Due after one year through five years153, 915 151, 104 Due after five years through ten years173, 389 168, 040 Due after ten years40, 366 34, 136 $ 387, 950 373, 468 The allowance for credit losses on held to maturity debt securities at December 31, 2022 and 2021 were $ 27, 000 and $ 39, 000, respectively, and are excluded from amortized cost in the tables above. The Company generally purchases securities for long- term investment purposes, and differences between carrying and fair values may fluctuate during the investment period. Held to maturity debt securities having a carrying value of $ 340. 2 million and $ 414. 2 million at December 31, 2022 and 2021, respectively, were pledged to secure municipal deposits. During 2022, the Company recognized gains of $ 123, 000 and no losses related to calls on securities in the held to maturity debt securities portfolio, with total proceeds from the calls totaling $ 39. 2 million. There were no sales of securities from the held to maturity debt securities portfolio for the year ended December 31, 2022. For 2021, the Company recognized gains of $ 25, 000 and no losses related to calls on securities in the held to maturity debt securities portfolio, with total proceeds from the calls totaling $ 36. 0 million. There were no sales of securities from the held to maturity debt securities portfolio for the year ended December 31, 2021. For the 2020 period, the Company recognized gains of $ 81, 000 and no losses related to calls on certain securities in the held to maturity debt securities portfolio, with total proceeds from the calls totaling $ 49. 3 million. There were no sales of securities from the held to maturity debt securities portfolio for the year ended December 31, 2020. The number of securities in an unrealized loss position as of December 31, 2022 totaled 439, compared with 53 at December 31, 2021. The increase in the number of securities in an unrealized loss position at December 31, 2022 was due to higher current market interest rates compared to rates at December 31, 2021. Credit Quality Indicators. The following table provides the amortized cost of held to maturity debt securities by credit rating as of

The amortized cost and fair value of available for sale debt securities at December 31, 2022, by contractual maturity, are shown below (in thousands). Expected maturities may differ from contractual maturities due to prepayment or early call privileges of the issuer. 2022 AmortizedcostFairvalueDue in one year or less $ — — Due after one year through five years194, 949 176, 459 Due after five years through ten years125, 582 109, 597 Due after ten years63, 335 52, 732 $ 383, 866 338, 788 Investments which pay principal on a periodic basis totaling $ 1. 67 billion at amortized cost and fair value are excluded from the table above as their expected lives are likely to be shorter than the contractual maturity date due to principal prepayments. During 2022, proceeds from calls on securities in the available for sale debt securities portfolio totaled $ 5. 4 million, with gains of $ 58, 000 and no losses recognized. For 2021, proceeds from calls on securities in the available for sale debt securities portfolio totaled $ 9. 4 million, with gains of $ 230, 000 and no losses recognized. The number of securities in an unrealized loss position as of December 31, 2022 totaled 475, compared with 113 at December 31, 2021. The increase in the number of securities in an unrealized loss position at December 31, 2022 was due to higher current market interest rates compared to rates at December 31, 2021. All securities in an unrealized loss position were investment grade at December 31, 2022. X- DefinitionSecurities Available For Sale [Text Block] ReferencesNo definition available. Required reductions due to loan prepayments are charged against interest income. For the years ended December 31, 2022, 2021 and 2020, as a result of prepayments and normal amortization, interest income decreased $ 270, 000, $ 604, 000 and $ 1. 0 million, respectively. The following tables summarize the aging of loans receivable by portfolio segment and class of loans (in thousands): At December 31, 2022 30- 59 Days60- 89 DaysNon- accrual90 days or more past due and accruingTotal Past DueCurrentTotal LoansReceivableNon- accrual loans with no related allowanceMortgage loans: Residential $ 1, 411 1, 114 1, 928 — 4, 453 1, 173, 245 1, 177, 698 1, 928 Commercial2, 300 412 28, 212 — 30, 924 4, 285, 261 4, 316, 185 22, 961 Multi- family790 — 1, 565 — 2, 355 1, 511, 463 1, 513, 818 1, 565 Construction905 1, 097 1, 878 — 3, 880 711, 614 715, 494 1, 878 Total mortgage loans5, 406 2, 623 33, 583 — 41, 612 7, 681, 583 7, 723, 195 28, 332 Commercial loans964 1, 014 24, 188 — 26, 166 2, 207, 504 2, 233, 670 21, 156 Consumer loans885 147 738 — 1, 770 303, 010 304, 780 739 Total gross loans $ 7, 255 3, 784 58, 509 — 69, 548 10, 192, 097 10, 261, 645 50, 227 At December 31, 2021 30- 59 Days60- 89 DaysNon- accrual90 days or more past due and accruingTotal Past DueCurrentTotal LoansReceivableNon- accrual loans with no related allowanceMortgage loans: Residential $ 7, 229 1, 131 6, 072 — 14, 432 1, 188, 206 1, 202, 638 6, 072 Commercial720 2, 960 16, 887 — 21, 567 3, 805, 803 3, 827, 370 16, 887 Multi- family — — 439 — 439 1, 363, 958 1, 364, 397 439 Construction — 2, 365 — 2, 365 680, 801 683, 166 2, 365 Total mortgage loans7, 949 5, 091 25, 763 — 38, 803 7, 038, 768 7, 077, 571 25, 763 Commercial loans7, 229 1, 289 20, 582 — 29, 100 2, 159, 766 2, 188, 866 14, 453 Consumer loans649 228 1, 682 — 2, 559 324, 883 327, 442 1, 682 Total gross loans $ 15, 827 6, 608 48, 027 — 70, 462 9, 523, 417 9, 593, 879 41, 898 Included in loans receivable are loans for which the accrual of interest income has been discontinued due to deterioration in the financial condition of the borrowers. Generally, accrued interest is written off by reversing interest income during the quarter the loan is moved from an accrual to a non- accrual status. The principal amount of non- accrual loans was $ 58. 5 million and $ 48. 0 million at December 31, 2022 and 2021, respectively. There were no loans 90- days or greater past due and still accruing interest at December 31, 2022 and 2021. If the non- accrual loans had performed in accordance with their original terms, interest income would have increased by $ 1. 0 million, $ 1. 2 million and $ 3. 2 million, for the years ended December 31, 2022, 2021 and 2020, respectively. The amount of cash basis interest income that was recognized on impaired loans during the years ended December 31, 2022, 2021 and 2020 was $ 947, 000, $ 1. 1 million and $ 1. 9 million, respectively. The Company defines an impaired loan as a non- homogeneous loan greater than $ 1. 0 million, for which, based on current information, it is not expected to collect all amounts due under the contractual terms of the loan agreement. Impaired loans also include all loans modified as troubled debt restructurings (" TDRs"). An allowance for collateral- dependent impaired loans that have been modified in a TDR is measured based on the present value of expected future cash flows discounted at the loan' s effective interest rate, the loan' s observable market price, or the estimated fair value of the collateral, less any selling costs. The Company uses third- party appraisals to determine the fair value of the underlying collateral in its analysis of collateral- dependent loans. A third- party appraisal is generally ordered as soon as a loan is designated as a collateral- dependent loan and updated annually, or more frequently if required. A financial asset is considered collateral- dependent when the debtor is experiencing financial difficulty and repayment is expected to be provided substantially through the sale or operation of the collateral. For all classes of loans deemed collateral- dependent, the Company estimates expected credit losses based on the collateral' s fair value less any selling costs. A specific allocation of the allowance for credit losses is established for each collateral- dependent loan with a carrying balance greater than the collateral' s fair value, less estimated selling costs. In most cases, the Company records a partial charge- off to reduce the loan' s carrying value to the collateral' s fair value less estimated selling costs. At each fiscal quarter end, if a loan is designated as collateral- dependent and the third- party appraisal has not yet been received, an evaluation of all available collateral is made using the best information available at the time, including rent rolls, borrower financial statements and tax returns, prior appraisals, management' s knowledge of the market and collateral, and internally prepared collateral valuations based upon market assumptions regarding vacancy and capitalization rates, each as and where applicable. Once the appraisal is received and reviewed, the specific reserves are adjusted to reflect the appraised value and evaluated for charge offs. The Company believes there have been no significant time lapses resulting from this process. At December 31, 2022, there were 128 impaired loans totaling $ 68. 8 million, of which 118 loans totaling $ 26. 0 million were TDRs. Included in this total were 104 TDRs related to 101 borrowers totaling $ 19. 5 million that were performing in accordance with their restructured terms and which continued to accrue interest at December 31, 2022. At December 31, 2021, there were 155 impaired loans totaling $ 52. 3 million, of which 132 loans totaling $ 30. 6 million were TDRs. Included in this total were 115 TDRs related to 111 borrowers totaling $ 21. 9 million that were performing in accordance with their restructured terms and which continued to accrue interest at December 31, 2021. At December 31, 2022 and December 31, 2021, the Company had $ 24. 0 million and $ 18. 2 million of collateral- dependent impaired loans, respectively. The collateral- dependent impaired loans at December 31, 2022 consisted of $ 23. 2 million in commercial loans, $ 737, 000 in residential real estate loans and $ 57, 000 in consumer loans. The collateral for these impaired loans was primarily real estate. The activity in the allowance for credit losses for the years ended December 31, 2022, 2021 and 2020 is as follows (in thousands): Years Ended December 31, 202220212020Balance at beginning of period $ 80, 740 101, 466 55, 525 Provision charged to operations8, 400 (24, 300) 29, 712 Increase due to the initial adoption of CECL — — 7, 920 Initial allowance related to PCD loans — — 13, 586 Recoveries of loans previously charged off5, 431 9, 030 2, 636 Loans charged off (6, 548) (5, 456) (7, 913) Balance at end of period $ 88, 023 80, 740 101, 466 The activity in the allowance for credit losses by portfolio segment for the years ended December 31, 2022 and 2021 are as follows (in thousands): For the Year Ended December 31, 2022 MortgageloansCommercialloansConsumerloansTotalPortfolioSegmentsBalance at beginning of period $ 52, 104 26, 343 2, 293 80, 740 Provision charged to operations11, 087 (2, 489) (198) 8, 400 Recoveries of loans previously charged off585 4, 192 654 5, 431 Loans charged off (5, 558) (633) (357) (6, 548) Balance at end of period $ 58, 218 27, 413 2, 392 88, 023 For the Year Ended December 31, 2021 MortgageloansCommercialloansConsumerloansTotalPortfolioSegmentsBalance at beginning of period $ 68, 307 27, 084 6, 075 101, 466 Provision charged to operations (13, 720) (6, 313) (4267) (24, 300) Recoveries of loans previously charged off859 7, 169 1002 9, 030 Loans charged off (3, 342) (1, 597) (517) (5, 456) Balance at end of period $ 52, 104 26, 343 2, 293 80, 740 For the year ended December 31, 2022, the Company recorded an $ 8. 4 million provision for credit losses on loans, compared with a negative provision for credit losses of $ 24. 3 million for the year ended December 31, 2021. The increase in the year- over- year provision for credit losses was largely a function of the significant favorable impact of the post- pandemic recovery resulting in a large negative provision taken in the prior year and an increase in total loans outstanding. Loan modifications for borrowers experiencing financial difficulties that are considered TDRs primarily involve lowering the monthly payments on such loans through either a reduction in interest rate below a market rate, an extension of the term of the loan without a corresponding adjustment to the risk premium reflected in the interest rate, or a combination of these two methods. These modifications generally do not result in the forgiveness of principal or accrued interest. In addition, management attempts to obtain additional collateral or guarantor support when modifying such loans. If the borrower has demonstrated performance under the previous terms and our underwriting process shows the borrower has the capacity to continue to perform under the restructured terms, the loan will continue to accrue interest. Non- accruing restructured loans may be returned to accrual status when there has been a sustained period of repayment performance (generally six consecutive months of payments) and both principal and interest are deemed collectible. The following tables present the number of loans modified as TDRs during the years ended December 31, 2022 and 2021 and their balances immediately prior to the modification date and post- modification as of December 31, 2022 and 2021. Year Ended December 31, 2022Troubled Debt RestructuringsNumber ofLoansPre- ModificationOutstandingRecordedInvestmentPost- ModificationOutstandingRecordedInvestment ($ in thousands) Mortgage loans: Residential2 $ 265 198 Multi- Family1 1, 618 1, 566 Total mortgage loans3 1, 883 1, 764 Commercial loans1 209 143 Consumer loans1 108 85 Total restructured loans5 $ 2, 200 1, 992 Year Ended December 31, 2021Troubled Debt RestructuringsNumber ofLoansPre- ModificationOutstandingRecordedInvestmentPost- ModificationOutstandingRecordedInvestment ($ in thousands) Mortgage loans: Residential7 $ 1, 274 1, 142 Commercial3 3, 086 2, 902 Total mortgage loans10 4, 360 4, 044 Commercial loans4 2, 940 2, 287 Total restructured loans14 $ 7, 300 6, 331 All TDRs are impaired loans, which are individually evaluated for impairment, as previously discussed. During the years ended December 31, 2022 and 2021, there were $ 5. 5 million and $ 3. 8 million of charge- offs recorded on collateral dependent impaired loans, respectively. The TDRs presented in the preceding tables had a weighted average modified interest rate of approximately 4. 35 % and 4. 12 %, compared to a yield of 4. 29 % and 5. 74 % prior to modification for the years ended December 31, 2022 and 2021, respectively. There was one loan totaling $ 143, 000 which had a payment default (90 days or more past due) which was modified as a TDR within the 12 month periods ending December 31, 2022. There were no payment defaults for loans modified as a TDR within the 12 month periods ending December 31, 2021. For TDRs that subsequently default, the Company determines the amount of the allowance for the respective loans in accordance with the accounting policy for the allowance for credit losses on loans individually evaluated for impairment. As allowed by CECL, loans acquired by the Company that experience more- than- insignificant deterioration in credit quality after origination, are classified as Purchased Credit Deteriorated (" PCD") loans. At December 31, 2022, the balance of PCD loans totaled $ 193. 0 million with a related allowance for credit losses of $ 1. 7 million. The balance of PCD loans at December 31, 2021 was $ 246. 9 million with a related allowance of $ 2. 8 million. The following table presents loans individually evaluated for impairment by class and loan category (in thousands): At December 31, 2022At December 31, 2021 UnpaidPrincipalBalanceRecordedInvestmentRelatedAllowanceAverageRecordedInvestmentInterestIncomeRecognizedUnpaidPrincipalBalanceRecordedInvestmentRelatedAllowanceAverageRecordedInvestment with no related allowanceMortgage loans: Residential $ 11, 162 8, 756 — 9, 109 414 $ 12, 326 9, 814 — 9, 999 423 Commercial13, 619 11, 610 — 12, 481 13 15, 064 13, 685 — 15, 064 Multi- family1, 618 1, 566 — 1, 596 12 — — Construction1, 100 1, 100 — 1, 100 — 1, 656 1, 588 — 1, 643 30 Total27, 499 23, 032 — 24, 286 439 29, 292 26, 087 — 26, 706 516 Commercial loans20, 701 17, 029 — 19, 689 82 9, 845 7, 254 — 7, 714 33 Consumer loans1, 215 735 — 785 77 1, 389 853 — 1, 613 115 Total loans $ 49, 415 40, 796 — 44, 760 508 $ 40, 526 34, 194 — 36, 033 664 Loans with an allowance recordedMortgage loans: Residential $ 5, 969 5, 735 605 5, 824 228 $ 7, 994 7, 652 858 7, 742 278 Commercial22, 731 18, 182 583 24, 870 33 871 871 17 894 48 Multi- family — — — — — Construction — — — — — Total28, 700 23, 917 1, 188 30, 694 261 8, 865 8, 523 875 8, 636 326 Commercial loans4, 028 3, 756 1, 155 5, 225 75 9, 498 9, 166 3, 358 8, 304

At December 31, 2021, impaired loans consisted of 155 residential, commercial, commercial mortgage and consumer loans totaling $ 52. 3 million, of which 40 loans totaling $ 30. 3 million were included in non- accrual loans. Specific allocations of the allowance for credit losses attributable to impaired loans totaled $ 2. 4 million and $ 4. 3 million at December 31, 2022 and 2021, respectively. At December 31, 2022 and 2021, impaired loans for which there was no related allowance for credit losses totaled $ 40. 8 million and $ 34. 2 million, respectively. The average balances of impaired loans during the years ended December 31, 2022 and 2021 were $ 81. 0 million and $ 53. 4 million, respectively. In the normal course of conducting its business, the Bank extends credit to meet the financing needs of its customers through commitments. Commitments and contingent liabilities, such as commitments to extend credit (including loan commitments of $ 2. 06 billion and $ 2. 05 billion at December 31, 2022 and 2021, respectively, and undisbursed home equity and personal credit lines of $ 279. 2 million and $ 252. 4 million, at December 31, 2022 and 2021, respectively, are not reflected in the accompanying consolidated financial statements. These instruments involve elements of credit and interest rate risk in excess of the amount recognized in the consolidated financial statements. The Bank uses the same credit policies and collateral requirements in making commitments and conditional obligations as it does for on- balance sheet loans. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since the commitments may expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. The Bank evaluates each customer's creditworthiness on a case- by- case basis. The amount of collateral obtained, if deemed necessary by the Bank upon extension of credit, is based on management's credit evaluation of the borrower. The Bank grants residential real estate loans on single- and multi- family dwellings to borrowers primarily in New Jersey. Its borrowers' abilities to repay their obligations are dependent upon various factors, including the borrowers' income and net worth, cash flows generated by the underlying collateral, value of the underlying collateral, and priority of the Bank's lien on the property. Such factors are dependent upon various economic conditions and individual circumstances beyond the Bank's control; the Bank is therefore subject to risk of loss. The Bank believes that its lending policies and procedures adequately minimize the potential exposure to such risks and that adequate provisions for loan losses are provided for all known and inherent risks. Collateral and / or guarantees are required for virtually all loans. Management utilizes an internal nine- point risk rating system to summarize its loan portfolio into categories with similar risk characteristics. Loans deemed to be " acceptable quality " are rated 1 through 4, with a rating of 1 established for loans with minimal risk. Loans that are deemed to be of " questionable quality " are rated 5 (watch) or 6 (special mention). Loans with adverse classifications (substandard, doubtful or loss) are rated 7, 8 or 9, respectively. Commercial mortgage, commercial, multi- family and construction loans are rated individually, and each lending officer is responsible for risk rating loans in their portfolio. These risk ratings are then reviewed by the department manager and / or the Chief Lending Officer and by the Credit Department. The risk ratings are also reviewed periodically through loan review examinations which are currently performed by an independent third- party. Reports by the independent third- party are presented to the Audit Committee of the Board of Directors. In addition, the Company participated in the Paycheck Protection Program (" PPP ") through the United States Department of the Treasury and Small Business Administration (" SBA"). PPP loans are fully guaranteed by the SBA and may be eligible for forgiveness by the SBA to the extent that the proceeds are used to cover eligible payroll costs, interest costs, rent, and utility costs over a period of up to 24 weeks after the loan were made as long as certain conditions were met regarding employee retention and compensation levels. PPP loans deemed eligible for forgiveness by the SBA will be repaid by the SBA to the Company. Eligibility ended for this program on May 2021. PPP loans are included in the commercial loan portfolio. As of December 31, 2022, the Company secured 2, 067 PPP loans for its customers totaling $ 682. 0 million, which includes both the initial round and the second round of PPP. As of December 31, 2022, 2, 053 PPP loans totaling $ 679. 2 million were forgiven. The balance at December 31, 2022 for PPP loans was $ 2. 8 million. The following table summarizes the Company's gross loans held for investment by year of origination and internally assigned credit grades (in thousands): Gross Loans Held by Investment by Year of Originationat December 31, 20222022202120202019201820182018Prior to 2018Revolving LoansRevolving loans to term loansTotal LoansResidential (1) Special mention $ — — — 1, 114 — 1, 114 Substandard — — — 264 4, 417 — 4, 681 Doubtful — — — — — — — Loss — — — — — — — Gross Loans Held by Investment by Year of Originationat December 31, 20222022202120202019201820182018Prior to 2018Revolving LoansRevolving loans to term loansTotal LoansTotal criticized and classified — — — 264 5, 531 — 5, 795 Pass / Watch151, 077 212, 697 211, 445 95, 872 58, 226 442, 586 — 1, 171, 903 Total residential $ 151, 077 212, 697 211, 445 95, 872 58, 490 448, 117 — 1, 177, 698 Commercial MortgageSpecial mention $ — — 3, 071 26, 809 52, 509 14, 740 — 97, 129 Substandard — — — 18, 020 11, 774 434 — 30, 228 Doubtful — — — — — — — Loss — — — — — — — Total criticized and classified — — 3, 071 26, 809 70, 529 26, 514 434 — 127, 357 Pass / Watch951, 367 630, 584 567, 448 546, 474 218, 620 1, 164, 854 94, 716 14, 765 4, 188, 828 Total commercial mortgage $ 951, 367 630, 584 570, 519 573, 283 289, 149 1, 191, 368 95, 150 14, 765 4, 316, 185 Multi- familySpecial mention $ — — — — 9, 730 — 9, 730 Substandard — — — — 2, 356 — 2, 356 Doubtful — — — — — — — Loss — — — — — — — Total criticized and classified — — — — 12, 086 — 12, 086 Pass / Watch142, 550 150, 293 282, 228 234, 953 187, 499 502, 177 887 1, 145, 1, 501, 732 Total multi- family $ 142, 550 150, 293 282, 228 234, 953 187, 499 514, 263 887 1, 145, 1, 513, 818 ConstructionSpecial mention $ — — — — 19, 728 905 — 20, 633 Substandard — — — — 2, 197 777 — 2, 974 Doubtful — — — — — — — Loss — — — — — — — Total criticized and classified — — — — 2, 197 20, 505 905 — 23, 607 Pass / Watch168, 674 362, 542 103, 067 38, 639 16, 917 62 1, 986 691, 887 Total construction $ 168, 674 362, 542 103, 067 40, 836 37, 422 967 — 1, 986 715, 494 Total MortgageSpecial mention $ — — 3, 071 26, 809 72, 237 26, 489 — 128, 606 Substandard — — — 2, 197 19, 061 18, 547 434 — 40, 239 Doubtful — — — — — — — Loss — — — — — — — Total criticized and classified — — 3, 071 29, 006 91, 298 45, 036 434 — 168, 845 Pass / Watch1, 413, 668 1, 356, 116 1, 164, 188 915, 938 481, 262 2, 109, 679 95, 603 17, 896 7, 554, 350 Gross Loans Held by Investment by Year of Originationat December 31, 20222022202120202019201820182018Prior to 2018Revolving LoansRevolving loans to term loansTotal LoansTotal Mortgage $ 1, 413, 668 1, 356, 116 1, 167, 259 944, 944 572, 560 2, 154, 715 96, 037 17, 896 7, 723, 195 CommercialSpecial mention $ 75 1, 148 444 201 10, 156 4, 379 14, 530 140 31, 073 Substandard — 7, 605 10, 230 4, 391 3, 561 13, 734 7, 604 364 47, 489 Doubtful — — — — — — — Loss — — — — — — — Total criticized and classified75 8, 753 10, 674 4, 592 13, 717 18, 113 22, 134 504 78, 562 Pass / Watch377, 662 320, 334 162, 175 161, 150 87, 396 522, 798 492, 717 30, 876 2, 155, 108 Total commercial $ 377, 737 329, 087 172, 849 165, 742 101, 113 540, 911 514, 851 31, 380 2, 233, 670 Consumer (1) Special mention $ — — — — — 146 — 146 Substandard — 8 — 109 332 209 — 658 Doubtful — — — — — — — Loss — — — — — — — Total criticized and classified — 8 — 109 478 209 — 804 Pass / Watch30, 132 20, 671 2, 909 16, 682 18, 173 115, 777 13, 476 303, 976 Total consumer $ 30, 132 20, 671 2, 917 16, 682 16, 650 25, 688, 651 115, 986 13, 476 304, 780 Total LoansSpecial mention $ 75 1, 148 3, 515 27, 010 82, 393 31, 014 14, 530 140 159, 825 Substandard — 7, 605 10, 238 6, 588 22, 731 32, 613 8, 247 364 88, 386 Doubtful — — — — — — — Loss — — — — — — — Total criticized and classified75 8, 753 13, 753 33, 598 105, 124 63, 627 22, 777 504 248, 211 Pass / Watch1, 821, 462 1, 697, 121 1, 329, 272 1, 093, 770 584, 814 2, 720, 650 704, 097 62, 248 10, 013, 434 Total gross loans $ 1, 821, 537 1, 705, 874 1, 343, 025 1, 127, 368 689, 938 2, 784, 277 726, 874 62, 752 10, 261, 645 (1) For residential and consumer loans, the Company assigns internal credit grades based on the delinquency status of each loan. The pension plan was frozen on April 1, 2003. All participants in the pension plan are 100 % vested. The pension plan' s assets are invested in investment funds and group annuity contracts currently managed by the Principal Financial Group and Allmerica Financial. Based on the measurement date of December 31, 2022, no contributions will be made to the pension plan in 2023. In addition to pension benefits, certain health care and life insurance benefits are currently made available to certain of the Bank' s retired employees. The costs of such benefits are accrued based on actuarial assumptions from the date of hire to the date the employee is fully eligible to receive the benefits. Effective January 1, 2003, eligibility for retiree health care benefits was frozen as to new entrants and benefits were eliminated for employees with less than ten years of service as of December 31, 2002. Effective January 1, 2007, eligibility for retiree life insurance benefits was frozen as to new entrants and retiree life insurance benefits were eliminated for employees with less than ten years of service as of December 31, 2006. The following tables sets forth information regarding the pension plan and post- retirement healthcare and life insurance plans (in thousands): PensionPost- retirement 202220212020202220212020Change in benefit obligation: Benefit obligation at beginning of year $ 32, 517 35, 170 33, 058 16, 748 18, 805 23, 323 Service cost — — — 28 34 78 Interest cost855 790 1, 000 443 424 712 Actuarial (gain) loss (48) (294) 381 140 (412) (169) Benefits paid (1, 658) (1, 656) (1, 630) (933) (584) (627) Change in actuarial assumptions (7, 116) (1, 493) 2, 361 (4, 331) (1, 519) (4, 512) Benefit obligation at end of year $ 24, 550 32, 517 35, 170 12, 095 16, 748 18, 805 Change in plan assets: Fair value of plan assets at beginning of year $ 58, 451 54, 617 49, 932 — — — Actual (loss) return on plan assets (8, 863) 5, 490 6, 315 — — — Employer contributions — — — 933 584 627 Benefits paid (1, 658) (1, 656) (1, 630) (933) (584) (627) Fair value of plan assets at end of year47, 930 58, 451 54, 617 — — — Funded status at end of year $ 23, 380 25, 934 19, 447 (12, 095) (16, 748) (18, 805) For the years ended December 31, 2022 and 2021, the Company, in the measurement of its pension plan and post- retirement obligations updated its mortality assumptions to the PRI 2012 mortality table with the fully generational projection scale MP 2021 issued by The Society of Actuaries (" SOA") in October 2021. The prepaid pension benefits of $ 23. 4 million and the unfunded post- retirement healthcare and life insurance benefits of $ 12. 1 million at December 31, 2022 are included in other assets and other liabilities, respectively, in the Consolidated Statements of Financial Condition. The components of accumulated other comprehensive loss (income) related to the pension plan and other post- retirement benefits, on a pre- tax basis, at December 31, 2022 and 2021 are summarized in the following table (in thousands): PensionPost- retirement 202220212022 2021Unrecognized prior service cost $ — — — — Unrecognized net actuarial loss (income) 9, 658 4, 504 (11, 802) (8, 915) Total accumulated other comprehensive loss (income) $ 9, 658 4, 504 (11, 802) (8, 915) Net periodic (benefit) increase cost for the years ending December 31, 2022, 2021 and 2020, included the following components (in thousands): PensionPost- retirement 202220212020202220212020Service cost $ — — — 28 34 78 Interest cost855 790 1, 000 443 424 712 Return on plan assets (3, 456) (3, 227) (2, 949) — — — Amortization of: Net loss (gain) — 472 696 (1, 304) (1, 070) (248) Unrecognized prior service cost — — — — — — Net periodic (benefit) increase cost $ (2, 601) (1, 965) (1, 253) (833) (612) 542 The weighted average actuarial assumptions used in the plan determinations at December 31, 2022, 2021 and 2020 were as follows: PensionPost- retirement 202220212020202220212020Discount rate5. 10 % 2. 70 % 2. 30 % 5. 10 % 2. 70 % 2. 30 % Rate of compensation increase — — — Expected return on plan assets6. 00 6. 00 6. 00 — — — Medical and life insurance benefits cost rate of increase — — — 6. 00 6. 00 6. 00 The Company provides its actuary with certain rate assumptions used in measuring the benefit obligation. The most significant of these is the discount rate used to calculate the period- end present value of the benefit obligations, and the expense to be included in the following year' s financial statements. A lower discount rate will result in a higher benefit obligation and expense, while a higher discount rate will result in a lower benefit obligation and expense. The discount rate assumption was determined based on a cash flow- yield curve model specific to the Company' s pension and post- retirement plans. The Company compares this rate to certain market indices, such as long- term treasury bonds, or the Citigroup pension liability indices, for reasonableness. A discount rate of 5. 10 % was selected for the December 31, 2022 measurement date. Assumed health care cost trend rates have a significant effect on the amounts reported for health care plans. A 1 % change in the assumed health care cost trend rate would have had the following effects on post- retirement benefits at December 31, 2022 (in thousands): 1 % increase1 % decreaseEffect on total service cost and interest cost $ 70 (60) Effect on post- retirement benefits obligation $ 1, 300 (1, 100) Estimated future benefit payments, which reflect expected future service, as appropriate for the next five years, are as follows (in thousands): PensionPost- retirement2023 5 1, 776 733 20241, 787 755 20251, 788 795 20261, 785 795 20271, 788 814 The weighted- average asset allocation of pension plan assets at December 31, 2022 and 2021 were as follows: Asset Category20222021Domestic equities37 % 39 % Foreign equities11 % 11 % Fixed income50 % 48 % Real estate2 % 2 % Cash — % — % Total100 % 100 % The Company' s expected return on pension plan assets assumption is based on historical investment return experience and evaluation of input from the Plan' s Investment Consultant and its Benefits Committee which manages the pension plan' s assets. The expected return on pension plan assets is also impacted by the target allocation of assets, which is based on the Company' s goal of earning the highest rate of return while maintaining risk at acceptable levels. Management strives to have pension plan assets sufficiently diversified so that adverse or unexpected results from one security class will not have a significant detrimental impact on the entire portfolio. The target allocation of assets and acceptable ranges around the targets are as follows: Asset CategoryTargetAllowable RangeDomestic equities37 % 30- 41 % Foreign equities11 % 5- 13 % Fixed income50 % 40- 65 % Real estate2 % 0- 4 % Cash0 % 0 % Total100 % The Company anticipates that the long- term asset allocation on average will approximate the targeted allocation. Actual asset allocations are the result of investment decisions by a third- party investment manager. The following tables present the assets that are measured at fair value on a recurring basis by level within the U. S. GAAP fair value hierarchy as reported on the statements of net assets available for Plan benefits at December 31, 2022 and 2021, respectively. Financial assets and liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurement. Fair value measurements at December 31, 2022 (in thousands) Total (Level 1) (Level 2) (Level 3) Group annuity contracts $ 92 — 92 — Mutual funds: Fixed

For 2022, 2021 and 2020, the Bank matched 25 % of the first 6 % contributed by the participants. The contribution percentage is determined by the Board of Directors in its sole discretion. The Bank's aggregate contributions to the 401 (k) Plan for 2022, 2021 and 2020 were $ 1. 2 million, $ 1. 2 million and $ 1. 0 million, respectively. Supplemental Executive Retirement PlanThe Bank maintains a non- qualified supplemental retirement plan for certain senior officers of the Bank. This unfunded plan, which was frozen as of April 1, 2003 provides benefits in excess of the benefits permitted to be paid by the pension plan under provisions of the tax law. Amounts expensed under this supplemental retirement plan amounted to $ 73, 000, $ 74, 000 and $ 80, 000 for the years 2022, 2021 and 2020, respectively. At December 31, 2022 and 2021, $ 1. 7 million and $ 1. 8 million, respectively, were recorded in other liabilities on the Consolidated Statements of Financial Condition for this supplemental retirement plan. In connection with this supplemental retirement plan, an increase of $ 283, 000, an increase of $ 68, 000, and an increase of $ 89, 000, net of tax, were recorded in other comprehensive income (loss) for 2022, 2021 and 2020, respectively. Retirement Plan for the Board of Directors of Provident BankThe Bank maintains a Retirement Plan for the Board of Directors of the Bank, a non- qualified plan that provides cash payments for up to 10 years to eligible retired board members based on age and length of service requirements. The maximum payment under this plan to a board member, who terminates service on or after the age of 72 with at least ten years of service on the board, is forty quarterly payments of $ 1, 250. The Bank may suspend payments under this plan if it does not meet Federal Deposit Insurance Corporation or New Jersey Department of Banking and Insurance minimum capital requirements. The Bank may terminate this plan at any time although such termination may not reduce or eliminate any benefit previously accrued to a board member without his or her consent. The plan was amended in December 2005 to terminate benefits under this plan for any directors who had less than ten years of service on the board of directors of the Bank as of December 31, 2006. The plan further provides that, in the event of a change in control (as defined in the plan), the undistributed balance of a director's accrued benefit will be distributed to him or her within 60 days of the change in control. The Bank paid $ 5, 000, $ 6, 250, and $ 10, 000 to former board members under this plan for each of the years ended December 31, 2022, 2021 and 2020, respectively. At December 31, 2022 and 2021, $ 125, 000 and $ 123, 000, respectively, were recorded in other liabilities on the Consolidated Statements of Financial Condition for this retirement plan. Increases of $ 11, 000, $ 689 and $ 6, 334, net of tax, were recorded in other comprehensive income (loss) for 2022, 2021 and 2020, respectively, in connection with this plan. Employee Stock Ownership PlanThe ESOP is a tax- qualified plan designed to invest primarily in the Company's common stock that provides employees with the opportunity to receive a funded retirement benefit from the Bank, based primarily on the value of the Company's common stock. The ESOP purchased 4, 769, 464 shares of the Company's common stock at an average price of $ 17. 09 per share with the proceeds of a loan from the Company to the ESOP. The outstanding loan principal at December 31, 2022, was $ 13. 2 million. Shares of the Company's common stock pledged as collateral for the loan are released from the pledge for allocation to participants as loan payments are made. For the years ending December 31, 2022 and 2021, 299, 566 shares and 285, 107 shares from the ESOP were released, respectively. Unallocated ESOP shares held in suspense totaled 598, 507 at December 31, 2022, and had a fair value of $ 12. 8 million. ESOP compensation expense for the years ending December 31, 2022, 2021 and 2020 was $ 4. 1 million, $ 4. 3 million and $ 2. 4 million, respectively. Non- Qualified Supplemental Defined Contribution Plan (" the Supplemental Employee Stock Ownership Plan ") Effective January 1, 2004, the Bank established a deferred compensation plan for executive management and key employees of the Bank, known as Provident Bank Non- Qualified Supplemental Employee Stock Ownership Plan (the " Supplemental ESOP "). The Supplemental ESOP was amended and restated as the Non- Qualified Supplemental Defined Contribution Plan (the " Supplemental DC Plan "), effective January 1, 2010. The Supplemental DC Plan is a non- qualified plan that provides additional benefits to certain executives whose benefits under the 401 (k) Plan and ESOP are limited by tax law limitations applicable to tax- qualified plans. The Supplemental DC Plan requires a contribution by the Bank for each participant who also participates in the 401 (k) Plan and ESOP equal to the amount that would have been contributed under the terms of the 401 (k) Plan and ESOP but for the tax law limitations, less the amount actually contributed under the 401 (k) Plan and ESOP. The Supplemental DC Plan provides for a phantom stock allocation for qualified contributions that may not be accrued in the qualified ESOP and for matching contributions that may not be accrued in the qualified 401 (k) Plan due to tax law limitations. Under the Supplemental 401 (k) provision, the estimated expense for the years ending December 31, 2022, 2021 and 2020 was $ 312, 000, $ 25, 000 and $ 25, 000, respectively, and included the matching contributions plus interest credited at an annual rate equal to the ten- year bond- equivalent yield on U. S. Treasury securities. Under the Supplemental ESOP provision, the estimated expense for the years ending December 31, 2022, 2021 and 2020 was $ 144, 000, $ 180, 000 and $ 180, 000, respectively. The phantom equity is treated as equity awards (expensed at the time of allocation) and not liability awards which would require periodic adjustment to market, as participants do not have an option to take their distribution in cash. 2019 Long- Term Equity Incentive Plan Upon stockholders' approval of the 2019 Long- Term Equity Incentive Plan on April 25, 2019, shares available for stock awards and stock options under the Amended and Restated Long- Term Incentive Plan were reserved for issuance under the new 2019 Long- Term Equity Incentive Plan. No additional grants of stock awards and stock options will be made under the Amended and Restated Long- Term Incentive Plan. The new plan authorized the issuance of up to 1, 350, 000 shares of Company common stock to be issued as stock awards. At December 31, 2022, 1, 047, 756 shares remain available for grant under the plan. Shares previously awarded under prior equity incentive plans that are subsequently forfeited or expire may also be issued under this new plan. Stock AwardsAs a general rule, restricted stock grants are held in escrow for the benefit of the award recipient until vested. Awards outstanding generally vest in three annual installments, commencing one year from the date of the award. Additionally, certain awards are three- year performance- vesting awards, which may or may not vest depending upon the attainment of certain corporate financial targets. Expense attributable to stock awards amounted to $ 9. 4 million, $ 5. 5 million and $ 5. 4 million for the years ended December 31, 2022, 2021 and 2020, respectively. A summary status of the granted but unvested stock awards as of December 31, and changes during the year, is presented below: Restricted Stock Awards 202220212020Outstanding at beginning of year900, 483 785, 181 668, 826 Granted447, 526 500, 892 429, 122 Forfeited (105, 556) (144, 476) (59, 938) Vested (219, 323) (241, 114) (252, 829) Outstanding at the end of year1, 023, 130 900, 483 785, 181 As of December 31, 2022, unrecognized compensation cost relating to unvested restricted stock totaled $ 9. 1 million. This amount will be recognized over a remaining weighted average period of 1. 7 years. Stock OptionsEach stock option granted entitles the holder to purchase one share of the Company's common stock at an exercise price not less than the fair value of a share of the Company's common stock at the date of grant. Options generally vest over a five- year period from the date of grant and expire no later than 10 years following the grant date. Additionally, certain options are three- year performance- vesting options, which may or may not vest depending upon the attainment of certain corporate financial targets. A summary of the status of the granted but unexercised stock options as of December 31, 2022 2021 and 2020, and changes during the year is presented below: 202220212020 NumberofstockoptionsWeightedaverageexercisepriceNumberofstockoptionsWeightedaverageexercisepriceNumberofstockoptionsWeightedaverageexercisepriceOutstanding at beginning of year596, 453 $ 18. 73 596, 441 $ 17. 96 499, 201 $ 19. 32 Granted34, 353 23. 70 56, 605 20. 66 107, 240 20. 62 Exercised — — (86, 593) 14. 69 — — Forfeited — — — — (10, 000) 14. 68 Expired — — — — — — Outstanding at the end of year600, 806 $ 19. 01 566, 453 $ 18. 73 596, 441 $ 17. 96 The total fair value of options vesting during 2022, 2021 and 2020 was $ 195, 000, $ 190, 000 and $ 185, 000, respectively. Compensation expense of approximately $ 144, 000, $ 77, 000 and $ 11, 000 is projected for 2023, 2024 and 2025, respectively, on stock options outstanding at December 31, 2022. The following table summarizes information about stock options outstanding at December 31, 2022: Options OutstandingOptions ExercisableRange of exercise pricesNumberofoptionsoutstandingAverageremainingcontractuallifeWeightedaverageexercisepriceNumberofoptionsexercisableWeightedaverageexerciseprice $ 15. 23- 18. 70274, 942 1. 7 $ 17. 28 274, 942 $ 17. 28 $ 20. 62- 27. 25325, 864 6. 8 $ 23. 20 218, 023 $ 23. 99 The stock options outstanding and stock options exercisable at December 31, 2022 both had an aggregate intrinsic value of $ 1. 2 million. The expense related to stock options is based on the fair value of the options at the date of the grant and is recognized ratably over the vesting period of the options. Compensation expense related to the Company's stock option plan totaled $ 198, 000, $ 200, 000 and $ 190, 000 for 2022, 2021 and 2020, respectively. The estimated fair values were determined on the dates of grant using the Black- Scholes Option pricing model. The fair value of the Company' stock option awards are expensed on a straight- line basis over the vesting period of the stock option. The risk- free rate is based on the implied yield on a U. S. Treasury bond with a term approximating the expected term of the option. The expected volatility computation is based on historical volatility over a period approximating the expected term of the option. The dividend yield is based on the annual dividend payment per share, divided by the option date stock price. The expected option term is a function of the option life and the vesting period. The fair value of the option grants was estimated on the date of grant using the Black- Scholes option- pricing model with the following weighted average assumptions: For the year ended December 31, 202220212020Expected dividend yield4. 05 % 4. 45 % 4. 46 % Expected volatility36. 33 % 30. 75 % 20. 33 % Risk- free interest rate1. 74 % 0. 73 % 0. 75 % Expected option life8 years8 years8 yearsThe weighted average fair value of options granted during 2022, 2021 and 2020 was $ 5. 80, $ 3. 52 and $ 1. 83 per option, respectively. Additionally, the Company recorded a deferred tax expense (benefit) of ($ 517, 000), $ 1. 4 million and $ 1. 4 million in 2022, 2021 and 2020, respectively, related to the amortization of post- retirement benefit obligations, which is reported in accumulated other comprehensive income (loss), net of tax. A reconciliation between the amount of reported total income tax expense and the amount computed by multiplying the applicable statutory income tax rate is as follows (in thousands): Years ended December 31, 202220212020Tax expense at statutory rates $ 50, 422 47, 695 26, 786 Increase (decrease) in taxes resulting from: State tax, net of federal income tax benefit16, 791 15, 682 7, 400 Tax- exempt interest income (2, 590) (2, 690) (2, 609) Bank- owned life insurance (1, 257) (1, 665) (1, 363) Other, net1, 092 175 389 $ 64, 458 59, 197 30, 603 The net deferred tax asset is included in other assets in the Consolidated Statements of Financial Condition. The tax effects of temporary differences that give rise to significant portions of the deferred tax assets and deferred tax liabilities at December 31, 2022 and 2021 are as follows (in thousands): 20222021Deferred tax assets: Allowance for credit losses on loans $ 23, 794 21, 640 Allowance for credit loss on off- balance sheet (" OBS") credit exposure853 1, 763 Post- retirement benefit6, 458 6, 908 Deferred compensation569 743 Purchase accounting adjustments — 1, 145 Depreciation1, 412 425 SERP1, 130 1, 013 ESOP812 1, 145 Stock- based compensation5, 818 4, 753 Payroll Protection Program fees — 411 Non- accrual interest234 232 Federal Net Operating Loss (" NOL") 197 239 Unrealized losses on available for sale debt securities68, 324 501 Lease liability17, 126 13, 464 Other — 1, 196 Total gross deferred tax assets126, 727 55, 578 Deferred tax liabilities: Pension expense8, 928 8, 158 Contingent consideration162 56 Deferred loan costs8, 533 7, 104 Investment securities, principally due to accretion of discounts95 94 Purchase accounting adjustments363 — Intangibles1, 366 2, 121 Originated mortgage servicing rights169 184 Pension liability adjustments575 1, 036 Net unrealized gain on hedging activities7, 576 788 Lease right- of- use asset16, 370 13, 082 Other361 — Total gross deferred tax liabilities44, 498 32, 623 Net deferred tax asset $ 82, 229 22, 955 Retained earnings at December 31, 2022 includes approximately $ 51. 8 million for which no provision for income tax has been made. This amount represents an allocation of income to bad debt deductions for tax purposes only. Events that would result in taxation of these

reserves include the failure to qualify as a bank for tax purposes, distributions in complete or partial liquidation, stock redemptions and excess distributions to stockholders. At December 31, 2022, the Company had an unrecognized tax liability of $ 14. 0 million with respect to this reserve. As a result of the Beacon acquisition in 2011, the Company acquired federal net operating loss carryforwards. There are approximately $ 937, 000 of NOL carryforwards available to offset future taxable income as of December 31, 2022. If not utilized, these carryforwards will expire in 2031. The federal NOLs are subject to a combined annual Code Section 382 limitation in the amount of approximately $ 197, 000. Management has determined that it is more likely than not that it will realize the net deferred tax asset based upon the nature and timing of the items listed above. In order to fully realize the net deferred tax asset, the Company will need to generate future taxable income. Management has projected that the Company will generate sufficient taxable income to utilize the net deferred tax asset; however, there can be no assurance that such levels of taxable income will be generated. The Company' s policy is to report interest and penalties, if any, related to unrecognized tax benefits in income tax expense. The Company did not have any liabilities for uncertain tax positions at December 31, 2022 and 2021. The Company and its subsidiaries file a consolidated U. S. Federal income tax return. For tax periods prior to December 31, 2018, New Jersey tax law does not and has not allowed for a taxpayer to file a tax return on a combined or consolidated basis with another member of the affiliated group where there is common ownership. As a result of this enacted legislation that New Jersey effectuated on July 1, 2018, beginning in 2019, the Company and its subsidiaries is required to file a combined New Jersey state income tax return on apportioned and allocated income. Also, the Company and its subsidiaries file a combined New York State income tax return on apportioned and allocated income. The Company, through its bank subsidiary, files a Pennsylvania Mutual Thrift Institution Tax return. The Company' s Federal and Pennsylvania Mutual Thrift Institutions tax returns are open for examination from 2019. The Company' s 2017 and 2018 New York State returns are currently under audit and tax years after 2019 are still subject to examination for New York State. The Company' s 2015 through 2018 New Jersey State returns are currently under audit and tax years after 2019 are still subject to examination for New Jersey. X- ReferencesNo definition available. Details Name: us- gaap_CommitmentsAndContingenciesDisclosureAbstract Namespace Prefix: us- gaap_ Data Type: xbrli: stringItemType Balance Type: na Period Type: durationRegulatory Capital Requirements 12 Months Ended Dec. 31, 2022 Regulatory Assets and Liabilities Disclosure [Abstract] Regulatory Capital Requirements Regulatory Capital RequirementsFDIC regulations require banks to maintain minimum levels of regulatory capital. Under the regulations in effect at December 31, 2022, the Bank is required to maintain: (1) a Tier 1 capital to total assets leverage ratio of 4. 0 %; (2) a common equity Tier 1 capital to risk- based assets ratio of 4. 5 %; (3) a Tier 1 capital to risk- based assets ratio of 6. 0 %; and (4) a total capital to risk- based assets ratio of 8. 0 %. In addition to establishing the minimum regulatory capital requirements, the regulations limit capital distributions and certain discretionary bonus payments to management if the institution does not hold a " capital conservation buffer " consisting of 2. 5 % of common equity Tier 1 capital to risk- weighted asset above the amount necessary to meet its minimum risk- based capital requirements. Under its prompt corrective action regulations, the FDIC is required to take certain supervisory actions (and may take additional discretionary actions) with respect to an undercapitalized institution. Such actions could have a direct material effect on an institution' s financial statements. The regulations establish a framework for the classification of savings institutions into five categories: well capitalized, adequately capitalized, undercapitalized, significantly undercapitalized, and critically undercapitalized. Generally, an institution is considered well capitalized if it has: a leverage (Tier 1) capital ratio of at least 5. 00 %; a common equity Tier 1 risk- based capital ratio of 6. 50 %; a Tier 1 risk- based capital ratio of at least 8. 00 %; and a total risk- based capital ratio of at least 10. 00 %. In the first quarter of 2020, U. S. federal regulatory authorities issued an interim final rule providing banking institutions that adopt CECL during the 2020 calendar year with the option to delay for two years the estimated impact of CECL on regulatory capital, followed by a three- year transition period to phase out the aggregate amount of the capital benefit provided during the initial two- year delay (i. e., a five year transition in total). In connection with its adoption of CECL on January 1, 2020, the Company elected to utilize the five- year CECL transition. The foregoing capital ratios are based in part on specific quantitative measures of assets, liabilities and certain off- balance sheet items as calculated under regulatory accounting practices. Capital amounts and classifications are also subject to qualitative judgments by the FDIC about capital components, risk weightings and other factors. As of December 31, 2022 and 2021, the Bank exceeded all minimum capital adequacy requirements to which it is subject. Further, the most recent FDIC notification categorized the Bank as a well- capitalized institution under the prompt corrective action regulations. There have been no conditions or events since that notification that management believes have changed the Bank' s capital classification. The Company is regulated as a bank holding company, and as such, is subject to examination, regulation and periodic reporting under the Bank Holding Company Act, as administered by the Federal Reserve Board (" FRB "). The FRB has adopted capital adequacy guidelines for bank holding companies on a consolidated basis substantially similar to those of the FDIC for the Bank. As of December 31, 2022 and 2021, the Company was " well capitalized " under FRB guidelines. Regulations of the FRB provide that a bank holding company must serve as a source of strength to any of its subsidiary banks and must not conduct its activities in an unsafe or unsound manner. Under the prompt corrective action provisions discussed above, a bank holding company parent of an undercapitalized subsidiary bank would be directed to guarantee, within limitations, the capital restoration plan that is required of such an undercapitalized bank. If the undercapitalized bank fails to file an acceptable capital restoration plan or fails to implement an accepted plan, the FRB may prohibit the bank holding company parent of the undercapitalized bank from paying any dividend or making any other form of capital distribution without the prior approval of the FRB. The following table shows the Company' s actual capital amounts and ratios as of December 31, 2022 and 2021, compared to the FRB minimum capital adequacy requirements and the FRB requirements for classification as a well- capitalized institution (dollars in thousands). For purposes of estimating the allowance for credit losses for off- balance sheet credit exposures, the exposure at default includes an estimated drawdown of unused credit based on historical credit utilization factors and current loss factors, resulting in a proportionate amount of expected credit losses. For the years ended December 31, 2022, 2021 and 2020, the Company recorded a $ 3. 4 million negative provision, a $ 1. 5 million provision and a $ 1. 8 million provision for credit losses for off- balance sheet credit exposures, respectively. The allowance for credit losses for off- balance sheet credit exposures was $ 3. 2 million and $ 6. 5 million at December 31, 2022 and 2021, respectively, and included in other liabilities on the Consolidated Statements of Financial Condition. X- DefinitionThe entire disclosure for allowance for credit losses. Details Name: us- gaap_CreditLossAbstract Namespace Prefix: us- gaap_ Data Type: xbrli: stringItemType Balance Type: na Period Type: durationFair Value Measurements 12 Months Ended Dec. 31, 2022 Fair Value Disclosures [Abstract] Fair Value Measurements Fair Value MeasurementsThe Company utilizes fair value measurements to record fair value adjustments to certain assets and liabilities and to

determine fair value disclosures. The determination of fair values of financial instruments often requires the use of estimates. Where quoted market values in an active market are not readily available, the Company utilizes various valuation techniques to estimate fair value. Fair value is an estimate of the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. However, in many instances fair value estimates may not be substantiated by comparison to independent markets and may not be realized in an immediate sale of the financial instrument. GAAP establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of fair value hierarchy are as follows: Level 1: Unadjusted quoted market prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities; Level 2: Quoted prices in markets that are not active, or inputs that are observable either directly or indirectly, for substantially the full term of the asset or liability; and Level 3: Prices or valuation techniques that require inputs that are both significant to the fair value measurement and unobservable (i. e., supported by little or no market activity). A financial instrument's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. The valuation techniques are based upon the unpaid principal balance only, and exclude any accrued interest or dividends at the measurement date. Interest income and expense and dividend income are recorded within the consolidated statements of income depending on the nature of the instrument using the effective interest method based on acquired discount or premium. Assets Measured at Fair Value on a Recurring Basis The valuation techniques described below were used to measure fair value of financial instruments in the table below on a recurring basis as of December 31, 2022 and December 31, 2021. Available for Sale Debt Securities, at Fair Value For available for sale debt securities, fair value was estimated using a market approach. The majority of the Company's securities are fixed income instruments that are not quoted on an exchange, but are traded in active markets. Prices for these instruments are obtained through third- party data service providers or dealer market participants with whom the Company has historically transacted both purchases and sales of securities. Prices obtained from these sources include market quotations and matrix pricing. Matrix pricing, a Level 2 input, is a mathematical technique used principally to value certain securities to benchmark to comparable securities. The Company evaluates the quality of Level 2 matrix pricing through comparison to similar assets with greater liquidity and evaluation of projected cash flows. As management is responsible for the determination of fair value, it performs quarterly analyses on the prices received from the pricing service to determine whether the prices are reasonable estimates of fair value. Specifically, management compares the prices received from the pricing service to a secondary pricing source. Additionally, management compares changes in the reported market values and returns to relevant market indices to test the reasonableness of the reported prices. The Company's internal price verification procedures and review of fair value methodology documentation provided by independent pricing services has generally not resulted in an adjustment in the prices obtained from the pricing service. Equity Securities, at Fair Value The Company holds equity securities that are traded in active markets with readily determinable fair value using quoted market prices. Derivatives The Company records all derivatives on the statements of financial condition at fair value. The accounting for changes in the fair value of derivatives depends on the intended use of the derivative, whether the Company has elected to designate a derivative in a hedging relationship and apply hedge accounting and whether the hedging relationship has satisfied the criteria necessary to apply hedge accounting. The Company has interest rate derivatives resulting from a service provided to certain qualified borrowers in a loan related transaction which, therefore, are not used to manage interest rate risk in the Company's assets or liabilities. As such, all changes in fair value of the Company's derivatives are recognized directly in earnings. The Company also uses interest rate swaps as part of its interest rate risk management strategy. Interest rate swaps designated as cash flow hedges, and which satisfy hedge accounting requirements, involve the receipt of variable amounts from a counterparty in exchange for the Company making fixed- rate payments over the life of the agreements without the exchange of the underlying notional amount. These derivatives were used to hedge the variable cash outflows associated with FHLBNY borrowings and brokered demand deposits. The change in the fair value of these derivatives is recorded in accumulated other comprehensive income (loss), and is subsequently reclassified into earnings in the period that the forecasted transactions affect earnings. The fair value of the Company's derivatives is determined using discounted cash flow analysis using observable market- based inputs, which are considered Level 2 inputs. Assets Measured at Fair Value on a Non- Recurring Basis The valuation techniques described below were used to estimate fair value of financial instruments measured on a non- recurring basis as of December 31, 2022 and 2021. Collateral Dependent Impaired Loans For loans measured for impairment based on the fair value of the underlying collateral, fair value was estimated using a market approach. The Company measures the fair value of collateral underlying impaired loans primarily through obtaining independent appraisals that rely upon quoted market prices for similar assets in active markets. These appraisals include adjustments, on an individual case- by- case basis, to comparable assets based on the appraisers' market knowledge and experience, as well as adjustments for estimated costs to sell between 5 % and 10 %. Management classifies these loans as Level 3 within the fair value hierarchy. Foreclosed Assets Assets acquired through foreclosure or deed in lieu of foreclosure are carried at the lower of the outstanding loan balance at the time of foreclosure or fair value, less estimated selling costs, which range between 5 % and 10 %. Fair value is generally based on independent appraisals that rely upon quoted market prices for similar assets in active markets. These appraisals include adjustments, on an individual case basis, to comparable assets based on the appraisers' market knowledge and experience, and are classified as Level 3. When an asset is acquired, the excess of the loan balance over fair value less estimated selling costs is charged to the allowance for credit losses. A reserve for foreclosed assets may be established to provide for possible write- downs and selling costs that occur subsequent to foreclosure. Foreclosed assets are carried net of the related reserve. Operating results from real estate owned, including rental income, operating expenses, and gains and losses realized from the sales of real estate owned, are recorded as incurred. There were no changes to the valuation techniques for fair value measurements during the years ended December 31, 2022 and 2021. The following tables present the assets and liabilities reported on the consolidated statements of financial condition at their fair value as of December 31, 2022 and 2021, by level within the fair value hierarchy (in thousands).

Fair Value Measurements at Reporting Date Using: December 31, 2021 Quoted Prices in Active Markets for Identical Assets (Level 1) Significant Other Observable Inputs (Level 2) Significant Unobservable Inputs (Level 3) Measured on a recurring basis: Available for sale debt securities: U. S. Treasury obligations $ 196, 329 196, 329 — — Mortgage- backed securities 1, 708, 831 — 1, 708, 831 — Asset- backed securities 46, 797 — 46, 797 — State and municipal obligations 69, 707 — 69, 707 — Corporate obligations 36, 187 — 36, 187 — Total available for sale debt securities $ 2, 057, 851 196, 329 1, 861, 522 — Equity Securities 1, 325 1, 325 — — Derivative assets 65, 903 — 65, 903 — $ 2, 125, 079 197, 654 1, 927, 425 — Derivative liabilities $ 61, 412 — 61, 412 — Measured on a non- recurring basis: Loans measured for impairment based on the fair value of the underlying collateral $ 18, 237 — — 18, 237 Foreclosed assets 8, 731 — 8, 731 $ 26, 968 — — 26, 968

There were no transfers between Level 1, Level 2 and Level 3 during the years ended December 31, 2022 and 2021. Other Fair Value Disclosures The Company is required to disclose estimated fair value of financial instruments, both assets and liabilities on and off the balance sheet, for which it is practicable to estimate fair value. The following is a description of valuation methodologies used for those assets and liabilities. Cash and Cash Equivalents For cash and due from banks, federal funds sold and short- term investments, the carrying amount approximates fair value. Included in cash and cash equivalents at December 31, 2022 and December 31, 2021 was $ 70, 000 and $ 27. 3 million, respectively, representing cash collateral pledged to secure loan level swaps, risk participation agreements and reserves required by banking regulations. Held to Maturity Debt Securities, Net of Allowance for Credit Losses For held to maturity debt securities, fair value was estimated using a market approach. The majority of the Company's securities are fixed income instruments that are not quoted on an exchange, but are traded in active markets. Prices for these instruments are obtained through third party data service providers or dealer market participants with whom the Company has historically transacted both purchases and sales of securities. Prices obtained from these sources include market quotations and matrix pricing. Matrix pricing, a Level 2 input, is a mathematical technique used principally to value certain securities to benchmark to comparable securities. Management evaluates the quality of Level 2 matrix pricing through comparison to similar assets with greater liquidity and evaluation of projected cash flows. As management is responsible for the determination of fair value, it performs quarterly analyses on the prices received from the pricing service to determine whether the prices are reasonable estimates of fair value. Specifically, management compares the prices received from the pricing service to a secondary pricing source. Additionally, management compares changes in the reported market values and returns to relevant market indices to test the reasonableness of the reported prices. The Company's internal price verification procedures and review of fair value methodology documentation provided by independent pricing services has generally not resulted in adjustment in the prices obtained from the pricing service. The Company also holds debt instruments issued by the U. S. government and U. S. government agencies that are traded in active markets with readily accessible quoted market prices that are considered Level 1 within the fair value hierarchy. FHLBNY Stock The carrying value of FHLBNY stock is its cost. The fair value of FHLBNY stock is based on redemption at par value. The Company classifies the estimated fair value as Level 1 within the fair value hierarchy. Loans Fair values are estimated for portfolios of loans with similar financial characteristics. Loans are segregated by type such as commercial mortgage, residential mortgage, commercial, construction and consumer. Each loan category is further segmented into fixed and adjustable rate interest terms and into performing and non- performing categories. The fair value of performing loans was estimated using a combination of techniques, including a discounted cash flow model that utilizes a discount rate that reflects the Company's current pricing for loans with similar characteristics and remaining maturity, adjusted by an amount for estimated credit losses inherent in the portfolio at the balance sheet date (i. e. exit pricing). The rates take into account the expected yield curve, as well as an adjustment for prepayment risk, when applicable. The Company classifies the estimated fair value of its loan portfolio as Level 3. The fair value for significant non- performing loans was based on recent external appraisals of collateral securing such loans, adjusted for the timing of anticipated cash flows. The Company classifies the estimated fair value of its non- performing loan portfolio as Level 3. Deposits The fair value of deposits with no stated maturity, such as non- interest bearing demand deposits and savings deposits, was equal to the amount payable on demand and classified as Level 1. The estimated fair value of certificates of deposit was based on the discounted value of contractual cash flows. The discount rate was estimated using the Company's current rates offered for deposits with similar remaining maturities. The Company classifies the estimated fair value of its certificates of deposit portfolio as Level 2. Borrowed Funds The fair value of borrowed funds was estimated by discounting future cash flows using rates available for debt with similar terms and maturities and is classified by the Company as Level 2 within the fair value hierarchy. Commitments to Extend Credit and Letters of Credit The fair value of commitments to extend credit and letters of credit was estimated using the fees currently charged to enter into similar agreements, taking into account the remaining terms of the agreements and the present creditworthiness of the counterparties. For fixed rate loan commitments, fair value also considers the difference between current levels of interest rates and the committed rates. The Company classifies these commitments as Level 3 within the fair value hierarchy. Limitations Fair value estimates are made at a specific point in time, based on relevant market information and information about the financial instrument. These estimates do not reflect any premium or discount that could result from offering for sale at one time the Company's entire holdings of a particular financial instrument. Because no market exists for a significant portion of the Company's financial instruments, fair value estimates are based on judgments regarding future expected loss experience, current economic conditions, risk characteristics of various financial instruments, and other factors. These estimates are subjective in nature and involve uncertainties and matters of significant judgment and, therefore, cannot be determined with precision. Changes in assumptions could significantly affect the estimates. Fair value estimates are based on existing on- and off- balance sheet financial instruments without attempting to estimate the value of anticipated future business and the value of assets and liabilities that are not considered financial instruments. Significant assets and liabilities that are not considered financial assets or liabilities include goodwill and other intangibles, deferred tax assets and premises and equipment. In addition, the tax ramifications related to the realization of the unrealized gains and losses can have a significant effect on fair value estimates and have not been considered in the estimates. The following tables present the Company's financial instruments at their carrying and fair values as of December 31, 2022 and December 31, 2021. Fair values are presented by level within the fair value hierarchy.

Details Name: us- gaap_EquityAbstract Namespace Prefix: us- gaap_ Data Type: xbrli: stringItemType Balance Type: na Period Type: durationDerivative and Hedging Activities 12 Months Ended Dec. 31, 2022 Derivative Instruments and Hedging Activities Disclosure [Abstract] Derivative and Hedging Activities Derivative and Hedging Activities The Company is exposed to certain risks arising from both its business operations and economic conditions. The Company principally manages its exposures to a wide variety of business and operational risks through the management of its core business activities. The Company manages economic risks, including interest rate, liquidity, and credit risk, primarily by managing the amount, sources, and duration of its assets and liabilities. Non- designated Hedges. Derivatives not designated in qualifying hedging relationships are not speculative and result from a service the Company provides to certain qualified commercial borrowers in loan related transactions which, therefore, are not used to manage interest rate risk in the Company' s assets or liabilities. The Company may execute interest rate swaps with qualified commercial banking customers to facilitate their respective risk management strategies. Those interest rate swaps are simultaneously hedged by offsetting interest rate swaps that the Company executes with a third party, such that the Company minimizes its net risk exposure resulting from such transactions. The interest rate swap agreement which the Company executes with the commercial borrower is collateralized by the borrower' s commercial real estate financed by the Company. As the Company has not elected to apply hedge accounting and these interest rate swaps do not meet the hedge accounting requirements, changes in the fair value of both the customer swaps and the offsetting swaps are recognized directly in earnings. At December 31, 2022 and 2021, the Company had 162 and 166 interest rate swaps with an aggregate notional amount of $ 2. 40 billion and $ 2. 38 billion, respectively. The Company periodically enters into risk participation agreements (" RPAs"), with the Company functioning as either the lead institution, or as a participant when another company is the lead institution on a commercial loan. These RPAs are entered into to manage the credit exposure on interest rate contracts associated with these loan participation agreements. Under the RPAs, the Company will either receive or make a payment in the event the borrower defaults on the related interest rate contract. The Company has minimum collateral posting thresholds with certain of its risk participation counterparties, and has posted collateral of $ 70, 000 against the potential risk of default by the borrower under these agreements. At December 31, 2022 and 2021, the Company had 14 and 13 credit derivatives, respectively, with aggregate notional amounts of $ 157. 9 million and $ 144. 8 million, respectively, from participations in interest rate swaps as part of these loan participation arrangements. At December 31, 2022, the asset and liability positions of these fair value credit derivatives totaled $ 26, 000 and $ 12, 000, respectively, compared to $ 109, 000 and $ 46, 000, respectively, at December 31, 2021. Cash Flow Hedges of Interest Rate Risk. The Company' s objective in using interest rate derivatives is to add stability to interest expense and to manage its exposure to interest rate movements. To accomplish this objective, the Company primarily uses interest rate swaps as part of its interest rate risk management strategy. Interest rate swaps designated as cash flow hedges involve the receipt of variable payment amounts from a counterparty in exchange for the Company making fixed- rate payments over the life of the agreements without exchange of the underlying notional amount. Changes in the fair value of derivatives designated and that qualify as cash flow hedges of interest rate risk are recorded in accumulated other comprehensive income and are subsequently reclassified into earnings in the period that the hedged forecasted transaction affects earnings. During the years ended December 31, 2022, 2021 and 2020, such derivatives were used to hedge the variable cash outflows associated with FHLBNY borrowings and brokered demand deposits. Amounts reported in accumulated other comprehensive income related to derivatives will be reclassified to interest expense as interest payments are made on the Company' s borrowings or demand deposits. During the next twelve months, the Company estimates that $ 15. 6 million will be reclassified as a reduction to interest expense. As of December 31, 2022, the Company had 11 outstanding interest rate derivatives with an aggregate notional amount of $ 460. 0 million that was designated as a cash flow hedge of interest rate risk. Assets and liabilities relating to certain financial instruments, including derivatives, may be eligible for offset in the Consolidated Statements of Financial Condition and / or subject to enforceable master netting arrangements or similar agreements. The Company does not offset asset and liabilities under such arrangements in the Consolidated Statements of Financial Condition. The tables below present a gross presentation, the effects of offsetting, and a net

presentation of the Company's financial instruments that are eligible for offset in the Consolidated Statements of Condition at December 31, 2022 and December 31, 2021 (in thousands). The guidance in ASU 2014- 09, Revenue from Contracts with Customers (Topic 606) does not apply to revenue associated with financial instruments, including interest income on loans and investments, which comprise the majority of the Company's revenue. For the years ended December 31, 2022, 2021 and 2020 the out- of- scope revenue related to financial instruments were 84 %, 82 % and 83 % of the Company's total revenue, respectively. Revenue- generating activities that are within the scope of Topic 606, are components of non- interest income. These revenue streams can generally be classified into wealth management revenue, insurance agency income and banking service charges and other fees. The following table presents non- interest income, segregated by revenue streams in- scope and out- of- scope of Topic 606, for the years ended December 31, 2022, 2021 and 2020: Three months ended December 31, (in- thousands) 2022202120202Non- interest incomeIn- scope of Topic 606: Wealth management fees $ 27, 870 $ 30, 756 25, 733 Insurance agency income11, 440 10, 216 3, Banking service charges and other fees: Service charges on deposit accounts12, 553 10, 921 10, 312 Debit card and ATM fees3, 124 5, 665 5, 974 Total banking service charges and other fees15, 677 16, 586 16, 286 Total in- scope non- interest income54, 987 57, 558 45, 532 Total out- of- scope non- interest income32, 802 29, 251 26, 899 Total non- interest income $ 87, 789 $ 86, 809 72, 431 Wealth management fee income represents fees earned from customers as consideration for asset management, investment advisory and trust services. The Company's performance obligation is generally satisfied monthly and the resulting fees are recognized monthly. The fee is generally based upon the average market value of the assets under management (" AUM") for the month and the applicable fee rate. The monthly accrual of wealth management fees is recorded in other assets on the Company's Consolidated Statements of Financial Condition. Fees are received from the customer on a monthly basis. The Company does not earn performance- based incentives. To a certain extent, optional services such as tax return preparation and estate settlement are also available to existing customers. The Company's performance obligation for these transaction- based services are generally satisfied, and related revenue recognized, at either a point in time when the service is completed, or in the case of estate settlement, over a relatively short period of time, as each service component is completed. Insurance agency income, consisting of commissions and fees, is generally recognized as of the effective date of the insurance policy. Commission revenues related to installment billings are recognized on the invoice date. Subsequent commission adjustments are recognized upon the receipt of notification from insurance companies concerning matters necessitating such adjustments. Profit- sharing contingent commissions are recognized when determinable, which is generally when such commissions are received from insurance companies, or when the Company receives formal notification of the amount of such payments. Service charges on deposit accounts include overdraft service fees, account analysis fees and other deposit related fees. These fees are generally transaction- based, or time- based services. The Company's performance obligation for these services are generally satisfied, and revenue recognized, at the time the transaction is completed, or the service rendered. Fees for these services are generally received from the customer either at the time of transaction, or monthly. Debit card and ATM fees are generally transaction- based. Debit card revenue is primarily comprised of interchange fees earned when a customer's Company card is processed through a card payment network. ATM fees are largely generated when a Company cardholder uses a non- Company ATM, or a non- Company cardholder uses a Company ATM. The Company's performance obligation for these services is satisfied when the service is rendered. Payment is generally received at time of transaction or monthly. Out- of- scope non- interest income primarily consists of Bank- owned life insurance and net fees on loan level interest rate swaps, along with gains and losses on the sale of loans and foreclosed real estate, loan prepayment fees and loan servicing fees. None of these revenue streams are subject to the requirements of Topic 606. X- ReferencesNo definition available. Details Name: us- gaap_RevenueFromContractWithCustomerAbstract Namespace Prefix: us- gaap_ Data Type: xbrli: stringItemType Balance Type: na Period Type: durationX- DefinitionThe entire disclosure of revenue from contract with customer to transfer good or service and to transfer nonfinancial asset. (the " Company "), Provident Bank (the " Bank ") and their wholly owned subsidiaries. All intercompany balances and transactions have been eliminated in consolidation. Certain reclassifications have been made in the consolidated financial statements to conform with current year classifications. Business BusinessThe Company, through the Bank, provides a full range of banking services to individual and business customers through branch offices in New Jersey, Queens and Nassau Counties, New York and eastern Pennsylvania. The Bank is subject to competition from other financial institutions and to the regulations of certain federal and state agencies, and undergoes periodic examinations by those regulatory authorities. Basis of Financial Statement Presentation Basis of Financial Statement PresentationThe consolidated financial statements of the Company have been prepared in conformity with U. S. generally accepted accounting principles (" GAAP "). In preparing the consolidated financial statements, management is required to make estimates and assumptions about future events. These estimates and the underlying assumptions affect the reported amounts of assets and liabilities and disclosures about contingent assets and liabilities as of the dates of the consolidated statements of financial condition, and revenues and expenses for the periods then ended. Such estimates are used in connection with the determination of the allowance for credit losses, evaluation of goodwill for impairment, evaluation of the need for valuation allowances on deferred tax assets, and determination of liabilities related to retirement and other post- retirement benefits, among others. These estimates and assumptions are based on management's best estimates and judgment. Management evaluates its estimates and assumptions on an ongoing basis using historical experience and other factors, including the currently forecasted economic environment, which management believes to be reasonable under the circumstances. Such estimates and assumptions are adjusted when facts and circumstances dictate. As future events and their effects cannot be determined with precision, actual results could differ significantly from these estimates. Changes in estimates will be reflected in the financial statements in future periods. Cash and Cash Equivalents Cash and Cash EquivalentsFor purposes of reporting cash flows, cash and cash equivalents include cash and due from banks, Federal funds sold and commercial paper with original maturity dates less than 90 days. Securities SecuritiesSecurities include held to maturity debt securities and available for sale debt securities. The available for sale debt securities portfolio is carried at estimated fair value, with any unrealized gains or losses, net of taxes, reported as accumulated other comprehensive income or loss in Stockholders' Equity. Estimated fair values are provided by reputable and widely used pricing services who maintain pricing methodologies appropriate for varying security classes using valuation techniques that are in accordance with U. S. GAAP. Securities which the Company has the positive intent and ability to hold to maturity are classified as held to maturity debt securities and carried at amortized cost. On January 1, 2020, the Company adopted CECL which replaces the incurred loss methodology with an expected credit loss methodology. Management measures expected credit losses on held to maturity debt securities on a collective basis by security type. Management classifies the held to maturity debt securities portfolio into the following security types: • Agency obligations; • Mortgage- backed securities; • State and municipal obligations; and • Corporate obligations. All of the agency obligations held by the Company are issued by U. S. government entities and agencies. These securities are either explicitly or implicitly guaranteed by the U. S. government, are highly rated by major rating agencies and have a long history of no credit losses. The majority of the state and municipal, and corporate obligations carry no lower than A ratings from the rating agencies at December 31, 2022 and the Company had one security rated with a triple- B by Moody's Investors Service. Premiums on securities are amortized into income using a method that approximates the interest method over the remaining period to the earliest call date or contractual maturity, adjusted for anticipated prepayments. Discounts on securities are accreted into income over the remaining period to the contractual maturity, adjusted for anticipated prepayments. Interest income is recognized on an accrual basis, while dividend income is recognized when earned. Realized gains and losses are recognized when securities are sold or called based on the specific identification method. Equity SecuritiesThe Company holds equity securities that are traded in active markets with readily determinable fair value using quoted market prices. Fair Value of Financial Instruments Fair Value of Financial InstrumentsGAAP establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements). A financial instrument's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. Federal Home Loan Bank of New York Stock Federal Home Loan Bank of New York StockThe Bank, as a member of the Federal Home Loan Bank of New York (" FHLBNY "), is required to hold shares of capital stock of the FHLBNY at cost based on a specified formula. The Bank carries this investment at cost, which approximates fair value. Loans LoansLoans receivable are carried at unpaid principal balances plus unamortized premiums, purchase accounting mark- to- market adjustments, certain deferred direct loan origination costs and deferred loan origination fees and discounts, less the allowance for credit losses. The Bank defers loan origination fees and certain direct loan origination costs and accretes or amortizes such amounts as an adjustment to the yield over the contractual lives of the related loans using the interest method. Premiums and discounts on loans purchased are amortized or accreted as an adjustment of yield over the contractual lives of the related loans, adjusted for prepayments when applicable, using methodologies using the effective interest method. Loans are generally placed on non- accrual status when they are past due 90 days or more as to contractual obligations or when other circumstances indicate that collection is questionable. When a loan is placed on non- accrual status, any interest accrued but not received is reversed against interest income. Payments received on a non- accrual loan are either applied to the outstanding principal balance or recorded as interest income, depending on an assessment of the ability to collect the loan. A non- accrual loan is restored to accrual status when principal and interest payments become less than 90 days past due and its future collectability is reasonably assured. An impaired loan is defined as a loan for which it is probable, based on current information, that the Bank will not collect all amounts due under the contractual terms of the loan agreement. Impaired loans are individually assessed to determine that each loan's carrying value is not in excess of the fair value of the related collateral or the present value of the expected future cash flows. Residential mortgage and consumer loans are deemed smaller balance homogeneous loans which are evaluated collectively for impairment and are therefore excluded from the population of impaired loans. Purchased credit deteriorated (" PCD ") loans are loans acquired that have experienced more- than- insignificant deterioration in credit quality since origination. Allowance for Loan Losses Allowance for Credit Losses on LoansOn January 1, 2020, the Company adopted ASU 2016- 13," Measurement of Credit Losses on Financial Instruments, " which replaced the incurred loss methodology with the current expected credit loss (" CECL ") methodology. The allowance for credit losses is a valuation account that reflects management's evaluation of the current expected credit losses in the loan portfolio. The Company maintains the allowance for credit losses through provisions for credit losses that are charged to income. Charge- offs against the allowance for credit losses are taken on loans where management determines that the collection of loan principal and interest is unlikely. Recoveries made on loans that have been charged- off are credited to the allowance for credit losses. The calculation of the allowance for credit losses is a critical accounting policy of the Company. Management estimates the allowance balance using relevant available information, from internal and external sources, related to past events, current conditions, and a reasonable and supportable forecast. Historical credit loss experience for both the Company and peers provides the basis for the estimation of expected credit losses, where observed credit losses are converted to probability of default rate (" PDR ") curves through the use of segment- specific loss given default (" LGD ") risk factors that convert default rates to loss severity based on industry- level, observed relationships between the two variables for each segment, primarily due to the nature of the underlying collateral. These risk factors were assessed for reasonableness against the Company's own loss experience and adjusted in certain cases when the relationship between the Company's historical default and loss severity deviates from that of the wider industry. The historical PDR curves, together with corresponding economic conditions, establish a quantitative relationship between economic conditions and loan performance through an economic cycle. Using the historical relationship between economic conditions and loan performance, management's expectation of future loan performance is incorporated using an externally developed economic forecast. This forecast is applied over a period that management has determined to be reasonable and supportable. Beyond the period over which management can develop or source a reasonable and supportable forecast, the model will revert to long- term average economic conditions using a straight- line, time- based methodology. The Company's current forecast period is six quarters, with a four quarter reversion period to historical average macroeconomic factors. The Company's economic forecast is approved by the Company's Asset- Liability Committee. The allowance for credit losses is measured on a collective (pool) basis, with both a quantitative and qualitative analysis that is applied on a quarterly basis, when similar risk characteristics exist. The respective quantitative allowance for each loan segment is measured using an econometric, discounted PDR / LGD modeling methodology in which distinct, segment- specific multi- variate regression models are applied to an external economic forecast. Under the discounted cash flows methodology, expected credit losses are estimated over the effective life of the loans by measuring the difference between the net present value of modeled cash flows and amortized cost basis. Contractual cash flows over the contractual life of the loans are the basis for modeled cash flows, adjusted for modeled defaults and expected prepayments and discounted at the loan- level effective interest rate. The contractual term excludes expected extensions, renewals and modifications unless either of the following applies at the reporting date: management has a reasonable expectation that a troubled debt restructuring (" TDR ") will be executed with an individual borrower; or when an extension or renewal option is included in the original contract and is not unconditionally cancellable by the Company. Management will assess the likelihood of an option being exercised by any given borrower and appropriately extend the maturity of the portfolio for modeling purposes. The Company considers qualitative adjustments to credit loss estimates for information not already captured in the quantitative component of the loss estimation process. Qualitative factors are based on portfolio concentration levels, model imprecision, changes in industry conditions, changes in the Company's loan review process, changes in the Company's loan policies and procedures, and economic forecast uncertainty. Portfolio segment is defined as the level at which an entity develops and documents a systematic methodology to determine its allowance for credit losses. Management developed segments for estimating loss based on type of borrower and collateral which is generally based upon federal call report segmentation. The segments have been combined or sub- segmented as needed to ensure loans of similar risk profiles are appropriately pooled. As of December 31, 2022, the portfolio and class segments for the Company's loan portfolio were: • Mortgage Loans – Residential, Commercial Real Estate, Multi- Family and Construction • Commercial Loans – Commercial Owner Occupied and Commercial Non- Owner Occupied • Consumer Loans – First Lien Home Equity and Other ConsumerThe allowance for credit losses on loans individually evaluated are identified through the Company's normal loan monitoring process. This process includes the review of delinquent and problem loans at the Company's Delinquency, Credit, Credit Risk Management and Allowance Committees; or which may be identified through the Company's loan review process. Generally, the Company only evaluates loans individually for specific reserves if the loan is non- accrual, non- homogeneous and the balance is at least $ 1. 0 million, or if the loan was modified as a TDR. For all classes of loans deemed collateral- dependent, the Company estimates expected credit losses based on the fair value of the collateral less any selling costs. If the loan is not collateral dependent, the allowance for credit losses related to individually assessed loans is based on discounted expected cash flows using the loan's initial effective interest rate. A loan for which the terms have been modified resulting in a concession by the Company, and for which the borrower is experiencing financial difficulties is considered to be a TDR. The allowance for credit losses on a TDR is measured using the same method as all other impaired loans, except that the original interest rate is used to discount the expected cash flows, not the rate specified within the restructuring. For loans acquired that have experienced more- than- insignificant deterioration in credit quality since their origination are considered Purchased Credit Deteriorated (" PCD") loans. The Company evaluates acquired loans for deterioration in credit quality based on any of, but not limited to, the following: (1) non- accrual status; (2) troubled debt restructured designation; (3) risk ratings of special mention, substandard or doubtful; (4) watchlist credits; and (5) delinquency status, including loans that are current on acquisition date, but had been previously delinquent. At the acquisition date, an estimate of expected credit losses is made for groups of PCD loans with similar risk characteristics and individual PCD loans without similar risk characteristics. Subsequent to the acquisition date, the initial allowance for credit losses on PCD loans will increase or decrease based on future evaluations, with changes recognized in the provision for credit losses. Management believes the primary risks inherent in the portfolio are a general decline in the economy, a decline in real estate market values, rising unemployment or a protracted period of elevated unemployment, increasing vacancy rates in commercial investment properties and possible increases in interest rates in the absence of economic improvement. Any one or a combination of these events may adversely affect borrowers' ability to repay the loans, resulting in increased delinquencies, credit losses and higher levels of provisions. Management considers it important to maintain the ratio of the allowance for credit losses to total loans at an acceptable level given current and forecasted economic conditions, interest rates and the composition of the portfolio. Although management believes that the Company has established and maintained the allowance for credit losses at appropriate levels, additions may be necessary if future economic and other conditions differ substantially from the current operating environment and economic forecast. Management evaluates its estimates and assumptions on an ongoing basis giving consideration to forecasted economic factors, historical loss experience and other factors. Such estimates and assumptions are adjusted when facts and circumstances dictate. As future events and their effects cannot be determined with precision, actual results could differ significantly from these estimates. Changes in estimates resulting from continuing changes in the economic environment will be reflected in the financial statements in future periods. In addition, various regulatory agencies periodically review the adequacy of the Company's allowance for credit losses as an integral part of their examination process. Such agencies may require the Company to recognize additions to the allowance or additional write- downs based on their judgments about information available to them at the time of their examination. Although management uses the best information available, the level of the allowance for credit losses remains an estimate that is subject to significant judgment and short- term change. The CECL approach to calculate the allowance for credit losses on loans is significantly influenced by the composition, characteristics and quality of the Company's loan portfolio, as well as the prevailing economic conditions and forecast utilized. Material changes to these and other relevant factors creates greater volatility to the allowance for credit losses, and therefore, greater volatility to the Company's reported earnings. Management considers different economic scenarios that may impact the allowance for credit losses on loans. Among other balance sheet and income statement changes, these scenarios could result in a significant increase to the allowance for credit losses on loans. These scenarios include both the quantitative and qualitative components of the model and demonstrate how sensitive the allowance can be to key assumptions underlying the overall calculation. To the extent actual losses are higher than management estimates, additional provision for credit losses on loans could be required and could adversely affect our earnings or financial position in future periods. See

Note 7 to the Consolidated Financial Statements for more information on the allowance for credit losses on loans. Foreclosed Assets Foreclosed AssetsAssets acquired through foreclosure or deed in lieu of foreclosure are carried at the lower of the outstanding loan balance at the time of foreclosure or fair value, less estimated costs to sell. Fair value is generally based on recent appraisals. When an asset is acquired, the excess of the loan balance over fair value, less estimated costs to sell, is charged to the allowance for credit losses. A reserve for foreclosed assets may be established to provide for possible write- downs and selling costs that occur subsequent to foreclosure. Foreclosed assets are carried net of the related reserve. Operating results from real estate owned, including rental income, operating expenses, and gains and losses realized from the sales of real estate owned, are recorded as incurred. Banking Premises and Equipment Banking Premises and EquipmentLand is carried at cost. Banking premises, furniture, fixtures and equipment are carried at cost, less accumulated depreciation, computed using the straight- line method based on their estimated useful lives. Leasehold improvements, carried at cost, net of accumulated depreciation, are amortized over the terms of the leases or the estimated useful lives of the assets, whichever are shorter, using the straight- line method. Maintenance and repairs are charged to expense as incurred. Income Taxes Income TaxesThe Company uses the asset and liability method of accounting for income taxes. Under this method, deferred tax assets and liabilities are recognized for the estimated future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates in effect for the year in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in tax expense in the period that includes the enactment date. Deferred tax assets and liabilities are reported as a component of Other Assets on the Consolidated Statements of Financial Condition. The determination of whether deferred tax assets will be realizable is predicated on estimates of future taxable income. Such estimates are subject to management' s judgment. A valuation reserve is established when management is unable to conclude that it is more likely than not that it will realize deferred tax assets based on the nature and timing of these items. The Company recognizes, when applicable, interest and penalties related to unrecognized tax benefits in the provision for income taxes. Trust Assets Trust AssetsTrust assets consisting of securities and other property (other than cash on deposit held by the Bank in fiduciary or agency capacities for customers of the Bank' s wholly owned subsidiary, Beacon) are not included in the accompanying consolidated statements of financial condition because such properties are not assets of the Bank. Intangible Assets Intangible AssetsIntangible assets of the Bank consist of goodwill, core deposit premiums, customer relationship premium and mortgage servicing rights. Goodwill represents the excess of the purchase price over the estimated fair value of identifiable net assets acquired through purchase acquisitions. In accordance with GAAP, goodwill with an indefinite useful life is not amortized, but is evaluated for impairment on an annual basis, or more frequently if events or changes in circumstances indicate potential impairment between annual measurement dates. As permitted by GAAP, the Company prepares a qualitative assessment in determining whether goodwill may be impaired. The factors considered in the assessment include macroeconomic conditions, industry and market conditions and overall financial performance of the Company, among others. The Company completed its annual qualitative assessment of goodwill as of July 1, 2022. Based upon its assessment of goodwill, the Company concluded that no further quantitative analysis was warranted. Core deposit premiums represent the intangible value of depositor relationships assumed in previous purchase acquisitions and are amortized on an accelerated basis over 8. 8 years, while the core deposit premium related to SB One is amortized over its estimated useful life of 10. 0 years. Customer relationship premiums represent the intangible value of customer relationships assumed in the purchase acquisitions of Beacon Trust Company (" Beacon"), The MDE Group, Inc. (" MDE"), Tirschwell & Loewy, Inc. (" T & L"), and SB One Bank and are amortized on an accelerated basis over 12. 0 years, 10. 4 years, 10. 0 years, and 13. 0 years, respectively. Mortgage servicing rights are recorded when purchased or when originated mortgage loans are sold, with servicing rights retained. Mortgage servicing rights are amortized on an accelerated method based upon the estimated lives of the related loans, adjusted for prepayments. Mortgage servicing rights are carried at the lower of amortized cost or fair value. Bank- owned Life Insurance Bank- owned Life InsuranceBank- owned life insurance is accounted for using the cash surrender value method and is recorded at its realizable value. Employee Benefit Plans Employee Benefit PlansThe Bank maintains a pension plan which covers full- time employees hired prior to April 1, 2003, the date on which the pension plan was frozen. The Bank' s policy is to fund at least the minimum contribution required by the Employee Retirement Income Security Act of 1974. GAAP requires an employer to: (a) recognize in its statement of financial condition the over- funded or under- funded status of a defined benefit postretirement plan measured as the difference between the fair value of plan assets and the benefit obligation; (b) measure a plan' s assets and its obligations that determine its funded status at the end of the employer' s fiscal year (with limited exceptions); and (c) recognize as a component of other comprehensive income, net of tax, the actuarial gains and losses and the prior service costs and credits that arise during the period. The Bank has a 401 (k) plan covering substantially all employees of the Bank. The Bank may match a percentage of the first 6 % contributed by participants. The Bank' s matching contribution, if any, is determined by the Board of Directors in its sole discretion. The Bank has an Employee Stock Ownership Plan (" ESOP "). The funds borrowed by the ESOP from the Company to purchase the Company' s common stock are being repaid from the Bank' s contributions and dividends paid on unallocated ESOP shares over a period of up to 30 years. The Company' s common stock not allocated to participants is recorded as a reduction of stockholders' equity at cost. Compensation expense for the ESOP is based on the average price of the Company' s stock during each quarter and the amount of shares allocated during the quarter. The Bank has an Equity Plan designed to provide competitive compensation for demonstrated performance and to align the interests of participants directly to increases in shareholder value. The Equity Plan provides for performance- vesting grants as well as time- vesting grants. Time- vesting stock awards, stock options and performance vesting stock awards that are based on a performance condition, such as return on average assets, are valued on the closing stock price on the date of grant. Performance- vesting stock awards and options that are based on a market condition, such as total shareholder return, would be valued using a generally accepted statistical technique to simulate future stock prices for Provident and the components of the peer group which Provident would be measured against. Expense related to time- vesting stock awards and stock options is based on the fair value of the common stock on the date of the grant and on the fair value of the stock options on the date of the grant, respectively, and is recognized ratably over the vesting period of the awards. Performance vesting stock awards and stock options are either dependent upon a market condition or a performance condition. A market condition performance metric is tied to a stock price, either on an absolute basis, or a relative basis against peers, while a performance- condition is based on internal operations, such as earnings per share. The expense related to a market condition performance- vesting stock award or stock option requires an initial Monte Carlo simulation to determine grant date fair value, which will be recognized as a compensation expense regardless of actual payout, assuming that the executive is still employed at the end of the requisite service period. If pre- vesting termination (forfeiture) occurs, then any expense recognized to date can be reversed. The grant date fair value is recognized ratably over the performance period. The expense related to a performance condition stock award or stock option is based on the fair value of the award on the date of grant, adjusted periodically based upon the number of awards or options expected to be earned, recognized over the performance period. In connection with the First Sentinel acquisition in July 2004, the Company assumed the First Savings Bank Directors' Deferred Fee Plan (the " DDFP "). The DDFP was frozen prior to the acquisition. The Company recorded a deferred compensation equity instrument and corresponding contra- equity account for the value of the shares held by the DDFP at the July 14, 2004 acquisition date. These accounts will be liquidated as shares are distributed from the DDFP in accordance with the plan document. At December 31, 2022, there were 104, 129 shares held by the DDFP. The Bank maintains a non- qualified plan that provides supplemental benefits to certain executives who are prevented from receiving the full benefits contemplated by the 401 (k) Plan' s and the ESOP' s benefit formulas under tax law limits for tax- qualified plans. Post- retirement Benefits Other Than Pensions Post- retirement Benefits Other Than PensionsThe Bank provides post- retirement health care and life insurance plans to certain of its employees. The life insurance coverage is noncontributory to the participant. Participants contribute to the cost of medical coverage based on the employee' s length of service with the Bank. The costs of such benefits are accrued based on actuarial assumptions from the date of hire to the date the employee is fully eligible to receive the benefits. On December 31, 2002, the Bank eliminated postretirement healthcare benefits for employees with less than 10 years of service. GAAP requires an employer to: (a) recognize in its statement of financial condition the over- funded or under- funded status of a defined benefit post- retirement plan measured as the difference between the fair value of plan assets and the benefit obligation; (b) measure a plan' s assets and its obligations that determine its funded status as of the end of the employer' s fiscal year (with limited exceptions); and (c) recognize as a component of other comprehensive income, net of tax, the actuarial gains and losses and the prior service costs and credits that arise during the period. Derivatives DerivativesThe Company records all derivatives on the statements of financial condition at fair value. The accounting for changes in the fair value of derivatives depends on the intended use of the derivative, whether the Company has elected to designate a derivative in a hedging relationship and apply hedge accounting and whether the hedging relationship has satisfied the criteria necessary to apply hedge accounting. The Company has interest rate derivatives resulting from a service provided to certain qualified borrowers in a loan related transaction which, therefore, are not used to manage interest rate risk in the Company' s assets or liabilities. As such, all changes in fair value of these derivatives are recognized directly in earnings. The Company also uses interest rate swaps as part of its interest rate risk management strategy. Interest rate swaps designated as cash flow hedges, and which satisfy hedge accounting requirements, involve the receipt of variable amounts from a counterparty in exchange for the Company making fixed- rate payments over the life of the agreements without the exchange of the underlying notional amount. These derivatives were used to hedge the variable cash outflows associated with FHLBNY borrowings and brokered demand deposits. The change in the fair value of these derivatives is recorded in accumulated other comprehensive income, and is subsequently reclassified into earnings in the period that the hedged forecasted transaction affects earnings. Comprehensive Income Comprehensive IncomeComprehensive income is divided into net income and other comprehensive income (loss). Other comprehensive income (loss) includes items previously recorded directly to equity, such as unrealized gains and losses on available for sale debt securities, unrealized gains and losses on derivatives that are designated as cash flow hedges and amortization related to post- retirement obligations. Comprehensive income is presented in a separate Consolidated Statement of Comprehensive Income. Segment Reporting Segment ReportingThe Company' s operations are solely in the financial services industry and include providing traditional banking and other financial services to its customers. The Company operates primarily in the geographical regions of northern and central New Jersey, Queens County, New York and eastern Pennsylvania. The Company has a single reporting segment for financial reporting purposes. Earnings Per Share Earnings Per ShareBasic earnings per share is computed by dividing income available to common stockholders by the weighted average number of shares outstanding for the period. Diluted earnings per share reflects the potential dilution that could occur if securities or other contracts to issue common stock (such as stock options) were exercised or resulted in the issuance of common stock. These potentially dilutive shares would then be included in the weighted average number of shares outstanding for the period using the treasury stock method. Shares issued and shares reacquired during the period are weighted for the portion of the period that they were outstanding. Impact of Recent Accounting Pronouncements Impact of Recent Accounting PronouncementsAccounting Pronouncements Not Yet AdoptedIn March 2022, the Financial Accounting Standards Board (" FASB") issued Accounting Standards Update (" ASU") 2022- 02," Financial Instruments- Credit Losses (Topic 326): Troubled Debt Restructurings and Vintage Disclosures," which addresses areas identified by the FASB as part of its post- implementation review of the credit losses standard (ASU 2016- 13) that introduced the CECL model. The amendments eliminate the accounting guidance for troubled debt restructurings by creditors that have adopted the CECL model and enhance the disclosure requirements for loan refinancing and restructurings made with borrowers experiencing financial difficulty. In addition, the amendments require a public business entity to disclose current- period gross write- offs for financing receivables and net investment in leases by year of origination in the vintage disclosures. For entities that have adopted ASU 2016- 13, ASU 2022- 02 is effective for fiscal years beginning after December 15, 2022, including interim periods within those fiscal years. Early adoption is permitted if an entity has adopted ASU 2016- 13. This standard is not expected to have a material financial impact on the Company' s consolidated financial statements, but is expected to have a meaningful impact on our required disclosures in the Notes to our Consolidated Financial Statements. In March 2022, the FASB issued Accounting Standards Update (ASU) 2022- 01, Derivatives and Hedging (Topic 815): Fair Value Hedging – Portfolio Layer Method. The purpose of this updated guidance is to further align risk management objectives with hedge accounting results on the application of the last- of- layer method, which was first introduced in ASU 2017- 12, Derivatives and Hedging (Topic 815): Targeted Improvements to Accounting for Hedging Activities. ASU 2022- 01 is effective for public business entities for fiscal years beginning after December 15, 2022, with early adoption in the interim period, permitted. The Company adopted this standard on January 1, 2023 on a prospective basis; with no impact to the consolidated financial statements. In March 2020, the FASB issued ASU 2020- 04," Reference Rate Reform (Topic 848)," which provides optional expedients and exceptions for applying GAAP to loan and lease agreements, derivative contracts, and other transactions affected by the anticipated transition away from LIBOR toward new interest rate benchmarks. For transactions that are modified because of reference rate reform and that meet certain scope guidance (i) modifications of loan agreements should be accounted for by prospectively adjusting the effective interest rate and the modification will be considered" minor" so that any existing unamortized origination fees / costs would carry forward and continue to be amortized and (ii) modifications of lease agreements should be accounted for as a continuation of the existing agreement with no reassessments of the lease classification and the discount rate or re- measurements of lease payments that otherwise would be required for modifications not accounted for as separate contracts. ASU 2020- 04 also provides numerous optional expedients for derivative accounting. ASU 2020- 04 is effective March 12, 2020 through December 31, 2022. An entity may elect to apply ASU 2020- 04 for contract modifications as of January 1, 2020, or prospectively from a date within an interim period that includes or is subsequent to March 12, 2020, up to the date that the financial statements are available to be issued. Once elected for a Topic or an Industry Subtopic within the Codification, the amendments in this ASU must be applied prospectively for all eligible contract modifications for that Topic or Industry Subtopic. The Company anticipates this ASU will simplify any modifications we execute between the selected start date (yet to be determined) and December 31, 2022 that are directly related to LIBOR transition by allowing prospective recognition of the continuation of the contract, rather than the extinguishment of the old contract resulting in writing off unamortized fees / costs. In addition, in January 2021 the FASB issued ASU No. 2021- 01 " Reference Rate Reform — Scope, " which clarified the scope of ASC 848 relating to contract modifications. In the fourth quarter of 2019 the Company formed, a cross- functional team to develop transition plans for the LIBOR transition to address potential revisions to documentation, as well as customer management and communication, internal training, financial, operational and risk management implications, and legal and contract management. The working group is comprised of individuals from various functional areas including lending, risk management, finance and credit, among others. In addition, the Company has engaged with its regulators and with industry working groups and trade associations to develop strategies for transitioning away from LIBOR. In 2023, we expect LIBOR to be phased out as an interest rate benchmark in pricing assets or liabilities. We are not entering into any new agreements that reference LIBOR. Additionally, the Company is in the process of amending existing asset and liability contracts that reference LIBOR to reference a new benchmark rate. The Company is currently in the process of transitioning from LIBOR and plans to move to the Secured Overnight Financing Rate (" SOFR") for most type of transactions. This standard is not expected to have a material impact on the Company' s consolidated financial statements. In addition, in December 2022 the FASB issued ASU 2022- 06, " Reference Rate Reform (Topic 848,)" which provides optional guidance to ease the potential burden in account for (or recognizing the effects of) reference rate reform on financial

reporting. The objective of the guidance is to provide temporary relief during the transition period away from LIBOR toward new interest rate benchmarks. The amendments in ASU 2022- 06 defer the sunset date provision from December 31, 2022 to December 31, 2024. ASU 2022- 06 was effective immediately upon issuance and is not expected to have an impact on the Company' s financial statements or disclosures. ReferencesReference 1: http://fasb. org/us- gaap/role/ref/legacyRef- Publisher FASB- Name Accounting Standards Codification- Topic 505- SubTopic 10- Section 50- Details Name: us- gaap_SaleOfStockPricePerShare Namespace Prefix: us- gaap_ Data Type: dtr- types: perShareItemType Balance Type: na Period Type: instantX- DefinitionThe aggregate liquidation preference (or restrictions) of stock classified as temporary equity that has a preference in involuntary liquidation considerably in excess of the par or stated value of the shares. The liquidation preference is the difference between the preference in liquidation and the par or stated values of the share. Temporary equity is a security with redemption features that are outside the control of the issuer, is not classified as an asset or liability in conformity with GAAP, and is not mandatorily redeemable. Includes any type of security that is redeemable at a fixed or determinable price or on a fixed or determinable date or dates, is redeemable at the option of the

holder, or has conditions for redemption which are not solely within the control of the issuer. If convertible, the issuer does not control the actions or events necessary to issue the maximum number of shares that could be required to be delivered under the conversion option if the holder exercises the option to convert the stock to another class of equity. If the security is a warrant or a rights issue, the warrant or rights issue is considered to be temporary equity if the issuer cannot demonstrate that it would be able to deliver upon the exercise of the option by the holder in all cases. Includes stock with put option held by ESOP and stock redeemable by holder only in the event of a change in control of the issuer. ReferencesNo definition available. Volatility also may be defined as a probability- weighted measure of the dispersion of returns about the mean. The volatility of a share price is the standard deviation of the continuously compounded rates of return on the share over a specified period. That is the same as the standard deviation of the differences in the natural logarithms of the stock prices plus dividends, if any, over the period.
